Montreal.

Scrap metals are again reported quiet this week. Dealers have been expecting an improvement in recent weeks. but to date the market on both buying and selling is dull. Enquiries are being made and it is hoped that these will bring better business in the very near future Present quotations are:

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red Brass	0 11
Light brass	4 50
Scrap zinc	0 05
Lead, heavy	4 00
Lead, tea	2 50
Light copper	9 00
Heavy copper	11 50
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	9 00
Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00
No. 1 machinery cast, per gr. ton	$25 00 $28 00

Corrugated Sheets Unchanged

Montreal.

Sales on corrugated sheets are said to be seasonably small, with prices remaining unchanged from the beginning of the year. Stocks are in good shape, awaiting the spring demand. Quotations are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Sap Buckets Moving

Montreal.

Sap buckets are now being forwarded to the dealers, the season being very near at hand. Buckets of imperial measure are being made up by some manufacturers this season, and sales of these are said to be good. Following are the prices on both imperial measure and the older numbered sizes:

Sap Buckets.—No. 8, $21.88; No. 9, $24.50; No. 12, $26.25; No. 16, $31.50 per hundred; 1 gal., $21.88; 1½ gal., $26.25; 2 gal., $31.50 uer hundred.

Spouts.—Perfection. $25 a thousand; Eureka, $16.50; Sterling, $38; Square syrup cans, 1 gal., Imperial, $26 per hundred.

Metal Lath Prices Hold

Montreal.

There has been no change in the prices of metal lath, with very little business offering. Building activities control this product to a great extent, therefore sales might be expected small, however bookings have not been placed in comparison with other years. Present prices are as follows:

Metal Lath (painted)—26 gauge, 42c; 24 gauge, 48c; 23 gauge, 57c sq. yd.

Galvanized—11c per sq. yd. extra, Discount, 10%.

Zinc Sheets Slightly Lower

Montreal.

In lead products this week, zinc sheets have been marked slightly lower and are now quoted at 14 cents a pound. Other lines remain unchanged, with a fair business reported. Present prices are as follows:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net list
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 35
Zinc, sheets, casks	0 14
Do., broken lots	0 15½

Sheets at Reduced Prices

Montreal.

Black sheets and both American and English standard galvanized sheets are shown at reduced prices. These declines, however, are made from stocks on hand, as import prices have not lowered recently. Stocks in the hands of importers and jobbers are still quite heavy, the seasonable demand being very light. Black sheets are from $1.25 to $1.55 lower in price, American galvanized one cent, and English standard ½ cent per pound lower. Quotations at present are:

PLATES—	
10 gauge	6 25
12 gauge	6 30

24 gauge	11 15	10 35
22 gauge	10 80	9 90
18 and 20 gauge	10 10	9 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Wrought Iron Pipe Unchanged

Montreal.

Sales of wrought iron pipe continue fair and of a sorting nature. Stocks are very good and prices remain unchanged, list No. 48 being still in use. Prices will be found on current market pages.

No Change in Fittings

Montreal.

Pipe fittings show no change from previous quotations, with stocks of the different smaller fittings in better shape than they have been for some time past. Following are the quotations:

Bushings, cast	20%
Do., malleable	20%
Flanges	20%
Plugs	17½%
Flange Unions	7½%
Malleable Unions	32½%
Nipples, blk. or galv., up to 4 in.	50%

Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

Bar Iron and Steel Dull

Montreal.

Few sales are being made on bar iron and steel at present, and stocks are not heavy in the jobbers' warehouses. A better movement is expected soon, however, as the season advances. Prices remain at recent declines and are as follows:

Common bar iron, 100 lbs.	4 20
Refined iron	5 80
Iron finished machinery steel	4 25
Mild steel	4 20
Band steel	4 20
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 20
Tire steel	4 40
Toe calk steel	5 20
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steed in scroll bdles. 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Ingot Metals Still Dull

Montreal.

Ingot metals are slightly easier this week, with no improvement to report. While the price changes are not great, conditions are said to be very dull, and the improvement on metals is still to be looked for.

TIN.—This metal has fluctuated in the last few days, being up one day and down the next, with very little ultimate change in price. Production is being curtailed, owing to present values, but

with the consumption very light, this has shown no immediate effect on the market. Local price 38½ cents.

COPPER.—Copper is a little easier in New York and producers are inclined to shade prices. The export trade is fairly good, but local demand is very quiet. Electro 19 cents, casting 18½ cents.

SPELTER.—A weaker market is reported in the United States, having touched the new low point of $4.90. This means absolute loss in producing at this price, and the United States Government may have to impose a duty on this metal. The European market remains fairly steady, and foreign spelter is offered at reasonably low prices. Local price is 8 cents.

LEAD.—Lead is reported the weakest metal on the list this week, having touched the new low level of £19 in London and $4.15 in East St. Louis. It is quite probable that even lower prices will be reached. It is quoted easier at 6¾ cents locally.

ANTIMONY.—No change is noted in antimony, it remaining very quiet. Local price is unchanged at 8 cents.

ALUMINUM. — Aluminum is still quiet, with price unchanged at 34½ cents.

Toronto Markets

TORONTO, Feb. 24.—The chief features of the price changes this week are the new discounts on bolts of various styles, and the reductions on wire and the new list of wire "extras." Among the lines showing declines are leather goods, harness and harness parts, half soles and heels. Lubricating oils of various grades are reduced in price, and cup and axle grease are lower. The declines in bolts include practically every kind of bolt, such as carriage, machine, sleigh shoe, plow, elevator, plows, shaft, tire, stove and sink bolts, as well as coach screws. Blank and tapped nuts, both square and hexagon, are also lower. The bright wire base has been reduced and other reductions include oiled and annealed wire and stove pipe wire. New gauge extras on wire are issued, and also new extras for tinning, coppering and wrapping. A new extra for galvanizing nails shows a considerable reduction. Some declines are made on rules, measuring tapes and other carpenters' tools.

Staple lines such as nails, wrought pipe and fittings, sheets and plates, and bar iron and steel are held practically unchanged, and sales are in most cases light. Business continues to improve, but very slowly, but wholesalers and manufacturers are very optimistic and are expecting an increased demand for spring and summer requirements shortly.

Roofings Seasonably Quiet

Toronto.

Roofing and building papers have been seasonably quiet, but an improvement is expected in a short while, and with the resumption of building operations this spring it is felt that there will be a good demand again for these products. Prices generally are holding at the changes noted at the end of the year. The following are recent quotations: Imperial gray sheathing, $5.75 per hundredweight; Imperial white sheathing, $7.75 per hundredweight; Amazon roofing, special extra heavy, 80 pounds to the roll, $4.75 per square; Everlastic multi-shingles (4 in 1), $6.50 per square.

Rope Prices Are Held

Toronto.

There has been no change in rope prices since the decline of two weeks since, and a slow but gradual improvement in sales is reported. It is believed that the next month will show a difference, as many retail buyers, not only in this product, but in other lines as well, are waiting until the beginning of the season before placing their order. Present quotations on rope will be found on current market pages. The new prices for binder twine have not been issued yet.

Nails Show No Change

Toronto.

Nails are holding at the recent change, and wholesalers' quotations on wire nails are $5.10, base. For cut nails the base price is $6.20 per keg. Present sales continue light, but with a tendency towards improvement and wholesalers' stocks are adequate.

5 P.C. Reduction on Harness

Toronto.

A further reduction of 5 per cent. is reported on harness and harness parts, and present prices are 15 per cent. below those prevailing last summer. Business has been quiet in this line, but shows signs of improving, and it is expected that a better demand will be shown as spring approaches.

Some Lufkin Rules Lower

Toronto.

A new list on Lufkin rules shows a reduction of about 15 per cent. on the spring joint zig-zag rule.

Measuring Tapes Reduced

Toronto.

A slight reduction has been made on some of the Lufkin make of measuring tapes, and the No. 603, 50 feet, metallic, is now quoted at $3.38 net; No. 604, 66 feet, at $3.92, and the No. 403, linen, 50 feet, at $2.57.

Leather Soles Are Lower

Toronto.

An average reduction of about 10 per cent. has been made in the price of leather tap soles and heels. The last reduction was late last year. Present quotations on some of these lines are the following:

TAP SOLES—Men's No. 6, $7.45; No. 7, $6.75; No. 8, $6.10; No. 9½, $6.95; No. 10, $6.20; No. 11, $4.95; No. 121, $3.65; No. 122, $3.45; No. 123, $3.35.

Men's Slip—No. 125, $2.20; No. 126, $2.05; No. 127, $1.90; No. 128, $1.75.

Men's Taps, B, No. 12, $4.35; No. 13, $3.85; BB, No. 14, $2.85; No. 15, $2.25.

Boy's Taps—No. 30½, $2.85; No. 31½, $2.60; No. 31¾, $2.45.

Women's Taps—No. 35, $4.15; No. 36, $3.80; No. 37, $3.50; No. 37¼, $3.25.

Misses' and Youths'—No. 41, $3.35; No. 42, $3; No. 43, $2.75; No. 43½, $1.65.

Tire Bolts 50 P.C. Off

Toronto.

Tire bolts are now quoted at 50 per cent. off list, in place of 40 per cent. This is an approximate decline of 16 per cent.

Stove Bolts 12 P.C. Lower

Toronto.

Stove bolts have been reduced in price and the new discount is 62½ per cent. off list.

Stove Pipe Wire Down

Toronto.

A slight reduction has been made in the price of stove pipe wire, and it is approximately 5 per cent. lower. No. 18 is now quoted at $9.50 and No. 10 at $10.

Nail Galvanizing Prices Down

Toronto.

The extras for galvanizing nails have been changed, and new prices constitute a reduction of approximately 25 per cent. Under 1 inch the price is now $3.50, and over 1 inch $3 per 100 pounds.

Reductions on Bolts

Toronto.

New discounts are quoted on bolt lists, including carriage, machine, sleigh, shoe and other miscellaneous bolts. Prices are now lower by from 10 to 15 per cent. This is the second reduction within a short period. Following are the new discounts:

Carriage Bolts, $1.00 list, ⅜ in dia. and smaller, 6 in. and shorter	25%
Do., longer lengths	10%
Do., 7-16 in. and larger	15%
Machine Bolts, ⅜ in. dia. and smaller, 4 in. and shorter	40%
Do., ⅜ in. dia. and smaller, longer lengths	15%
Do., 7-16 in. dia. and larger	20%
Sleigh Shoe Bolts, all sizes	10%
Square Head Blank Bolts	20%
Bolt Ends	20%
Plow Bolts, 1, 2, 3, heads	25%
Do., others	net extra 20%
Elevator Bolts, large head	10%
Do., corrugated heads	40%

Fancy Head Bolts	10%
Shaft Bolts ($3 list)	10%
Step Bolts, large head ($3 list)	10%
Whiffletree Bolts	10%
Tire Bolts	50%
Sink Bolts	60%
Stove Bolts	62½%

Coach Screws Down 20 P.C.

Toronto.

A reduction of nearly 20 per cent. has been made in coach or lag screw prices. The new discount is 35 per cent. off list instead of 20 per cent.

Tapped and Blank Nuts Down

Toronto.

Square and hexagon tapped and blank nuts have been reduced in price. The new quotations are given below. The previous additions to list were $2, $2.50, $2.25, $2.75 respectifully.

NUTS, 2 in. and smaller—	
Square—Blank, add to list	$1 25
do., Tapped, add to list	1 75
Hexagon—Blank, add to list	1 75
do., Tapped, add to list	2 25

Bright Wire Base Down

Toronto.

The base price of bright and annealed wire has been reduced and is now $5 per 100 pounds. Annealed now takes the same base, and the extra on oiled and annealed is 15 cents per hundredweight.

New Wire Base Extras

Toronto.

Effective February 21 a new list of wire gauge extras is issued. This is virtually a return to the old gauge extras and is as follows:

Wire Gauge Extras—No. 0-9, Base; No. 10, 6c; No. 11, 12c; No. 12, 20c; No. 13, 30c; No. 14, 40c; No. 15, 55c; No. 16, 70c.

Other Wire Extras

Toronto.

The other extras for soft drawn bright, coppering, tinning and wrapping and burlapping are as follows:

Soft Drawn Bright—No. 0-9 gauge, per 100 lbs., 25c extra; 10-13 gauge, 50c extra; 14-16 gauge, 70c extra.

Coppering and Liquor Finish—14 gauge and heavier, $1; 15-16 gauge, $1.50.

Tinned Wire—12 gauge and heavier, $2; 13-15 gauge, $2.50; 16 gauge, $3.

Wrapping Tinned and Coppered—Papering, per cwt., 25c; Burlapping, 25c; Papering and Burlapping 50c.

Bale Ties Are Lower

Toronto.

Reductions have been made in bale tie prices, and effective February 21 the following quotations are in operation:

Bale Ties, Single loop—12 gauge, $5.90; 13 ga., $6.10; 13½ ga., $6.15; 14 ga., $6.30; 15 ga., $6.55; 16 ga., $6.90.

Cut Hay Wire.—9 gauge, $5.60; 10 ga., $5.70; 11 ga., $5.80; 12 ga., $5.90; 13 ga., $6.10; 13½ ga., $6.15; 14 ga., $6.30; 15 ga., $6.55; 16 ga., $6.90.

Fine Wire Reduced

Toronto.

A reduction of $2 per 100 pounds was made February 21 on all fine wire.

Barbed Wire Prices

Toronto.

The following are the present quotations on barbed wire, galvanized plain twist wire, galvanized coil spring wire and plain galvanized wire. Quotations on these lines at the present time are variable on account of the fluctuations of the market and are subject to change without notice.

Barbed Wire, 80 rod reels—2 x 5, $4.15; 4 x 6, $4.40; 4 x 4, $4.80.

Galvanized plain twist, $6.

Plain Galvanized Wire—Gauges 3-9, $5.90; 10 ga., $5.95; 11 ga., $6; 12 ga., $6.15; 13 ga., $6.25; 14 ga., $6.35; 15 ga., $6.95; 16 ga., $7.10.

Galvanized Coil Spring—No. 9 ga., $5.05; 12 ga., $5.20.

Lubricating Oils Reduced

Toronto.

Reductions have been made in some lubricating oils. The list price of machine oil, regular grades, has been reduced from 56.10 cents to 52.60. Imperial gas engine oil from 62.60 to 59.10 cents. Paraffine oil has been reduced from 39.60 cents to 31.10 list. The discount on above is 15 per cent.

Cup and Axle Greases Drop

Toronto.

A decline of approximately one-half cent per pound has been made in cup grease and axle grease prices. The new list prices are not yet available.

Woodenware Firm

Toronto.

Woodenware prices continue firm and show no changes. Some buyers look for reductions along these lines on account of reported declines in lumber prices, but it is stated that it would probably be some time before manufacturers' and wholesalers' stocks felt the effect of any declines in the raw material. The fact, too, that some manufacturers are guaranteeing their customers against declines until July 1 next should be an incentive it is thought for buyers to place orders for their requirements.

Wares Quiet and Unchanged

Toronto.

Ware shipments are reported to be steady at the present time, but not heavy. It is thought that few retailers are heavily stocked in these goods, and there is a tendency at this period of the year to reduce stocks. Prices are holding unchanged, and the only alterations in ware quotations lately have been the recent declines in copper goods, but manufacturers state that ware prices, when they went up, did not increase in proportion to the advance in sheet and plate prices. In tinware a good movement of sap pails and supplies is reported at the present time. Galvanized ware is selling fairly well and aluminum wares are reported to be in steady demand.

Eavestrough Dull : No Changes

Toronto.

Business in conductor pipe, eavestrough and elbows continues light. This is usually a quiet period of the year, and the present time is no exception. Stocks are reported to be in good shape and prices are unchanged at the declines made at the beginning of the year.

Compression Work Holding

Toronto.

The demand for valves, bibbs and other compression work is showing little change. Prices are holding at recent declines, and no further revisions appear probable at present. Following are quotations on these goods:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Do., Fuller	30%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	10%
J.M.T. C.	20%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Lead Products Steadier

Toronto.

Lead products and solder are unchanged at the declines noted last week. The demand is reported lighter, but is fair for the quiet season. Stocks are larger than they have been for some time. The outside primary markets in pig lead continue to show a downward tendency and the production, in spite of curtailment, is reported to be gaining on consumption. Following are prevailing quotations:

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09¾
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 26
Do., commercial, lb.	0 24
Do., guaranteed, lb.	0 28
Do., wiping, lb.	0 22¼
Zinc sheets, per lb.	0 16

Corrugated Sheets Unchanged

Toronto.

Corrugated sheets are holding unchanged at the prices made early in the new year. Business is lighter even than is usual at this period of the year in this line. Stocks are ample for normal requirements, it is stated. Following are present quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00
Less 7½%.	

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Gas and Coal Oil Hold

Toronto.

Gasoline and coal oil are holding at the reduced prices quoted last week, and no further change has been made. Motor grade gasoline is quoted at 38 cents per gallon, net, and coal oil quotations are 27 cents for Royalite and 30 cents for Palacite. There is a good demand for the season.

Iron and Steel Quiet

Toronto.

The situation of the past few weeks continues to hold unchanged in bar iron and steel, and sales are small. Buying appears to be restricted to actual needs, it is stated, but the opening up of the spring activity will, it is believed, cause a good demand, especially as purchasing has been deferred. Prices show no quotable change and are the following:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 25
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter	5 25
Common bar iron, ¼ in. and heavier	4 75
Angle base	4 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 25
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop Steel	6 00

No Change in Fittings

Toronto.

Prices on cast and malleable fittings are maintained without change, and sales are reported to be moderately fair. Following are the quotations:

Cast iron fittings	10%
Plugs	20%
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 26	0 36
Class C.	0 17	0 26

Wrought Pipe Holding

Toronto.

No changes have been made in wrought pipe prices. Stocks are said to be in better shape than they have been for a long while. For the season of the year a fair demand is reported. Quotations are shown on the current market pages.

Sheets and Plates Steady

Toronto.

The situation in sheets and plates is stated to be very little changed from last week in local markets. Business continues light with a very slight increase over previous weeks. The disposition on the part of buyers to purchase for actual requirements only has not changed, and there is little buying ahead. Prices here are nominally unchanged. Reports from the Pittsburgh district indicate that certain of the independent mills are canvassing the trade with reduced prices on sheets and plates, but buying is said to be insufficient to support the market or encourage further cutting. Local quotations are the following:

PLATES

10 gauge	6 20	....
12 gauge	6 25	....
14 gauge	6 30	....
16 gauge	6 40	....

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 50	10 50
U. S 28	9 10	10 20
U. S. 26	8 80	9 95
22 and 24	8 65	9 70
18 and 20	8 50	9 55
16	8 35	9 40
12 and 14	8 30	9 35

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Scrap Metals Unchanged

Toronto.

The scrap metal market is still dull. Cast iron scrap has been in better demand than steel scrap. There has been practically no change in prices and red and yellow metals have had a slight demand. Business is very light in rubber scrap. The following are nominal prices for large quantities:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	19 00 20 00
Yellow brass	6 00 7 00
Red Brass	10 00
No. 1 machinery cast	24 00 25 00

Overseas lumbermen's rubber boots	1 50 2 00

Ingots Practically Unchanged

Toronto.

There has been little change in the local ingot market and the limit of dullness has been reached in metals, it is stated. Lead is easier and is shown at a decline in local markets, but other metals are practically unchanged.

TIN.—This metal is unchanged here, though higher in primary markets. On London markets there is also an uptrend, but it is scarcely expected to continue. Sales are still light and prices are still 43 cents on local markets.

COPPER.—Dull and unchanged is the report on this, and outside markets are very depressed. Local quotations remain unchanged at 19 cents for casting copper.

LEAD.—The market in lead continues to decline and prices are reduced again. Reductions during the week on United States markets amounted to $5 a ton. English markets have been steadier. Quotations here are 50 cents lower at $6.50.

SPELTER.—Business has been dull in this metal and prices are unchanged at $7.

ANTIMONY.—No changes are noted in antimony and prices are held at 8 to 9 cents.

ALUMINUM.—This market has been listless and shows no change in quotations. Outside markets are reported dull and neglected. Prices here are 35 to 37 cents.

London Markets

LONDON, Feb. 24.—The principal price changes this week are on bolts of various descriptions and on wire. Lower prices are quoted on these goods. White lead in oil and putty have been reduced. Other lines affected are leather soles and heels, soldering coppers, and turpentine, which are all reduced in price.

Business here continues to improve and orders this past week have been more numerous and larger. Collections are seasonably good.

Turpentine Drops 5 Cents

London, Ont.

Turpentine is quoted at a reduction of 5 cents per gallon on last week's price, and new quotations are the following:

	Imp. Gal.
1 barrel lots	1 10
2 to 4 barrel	1 09
5 gal.	1 25

Linseed Oil Unchanged

London, Ont.

No change is made this week in linseed oil prices, and present sales are a little improved. Following are quotations here:

	Raw	Boiled
1 to 2 barrels, gal.	1 00	1 03
3 to 5 bbls., gal.	0 99	1 02
6 to 9 bbls., gal.	0 97	1 00

Less bbls. add 15c gal.

Nail Prices Hold

London, Ont.

Nail prices are holding unchanged at the recent declines and wire nail base is $5.10. The cut nail base is $6.40 per keg.

O and A Wire Lower

London, Ont.

Oiled and annealed wire has been reduced in price, and the new quotations are: No. 11, $5.27; No. 12, $5.35 per 100 pounds.

Bolt Prices Reduced

London, Ont.

Prices of carriage and machine bolts, together with other miscellaneous bolts and coach or lag screws have been reduced in price and the new discounts show declines of from 10 to about 15 per cent. The following are the new quotations on these goods:

Carriage Bolts ($1.00 list), ⅜ in. dia. and smaller, 6 in. and shorter	25%
Do., ⅜ in. dia and smaller, long lengths	10%
Do., 7-16 in. dia. and larger	15%
Machine Bolts, ⅜ in. dia. and smaller, 4 in. and shorter	40%
Do., ⅜ in. and smaller, longer lengths	15%
Do., 7-16 in. dia. and larger	20%
Sleigh Shoe Bolts, all sizes	10%
Coach and Lag Screws	35%
Square Head Blank Bolts	20%
Bolt Ends	20%
Plow Bolts Nos. 1, 2, 3	25%
Do., all other Nos. (list, plus 20%)	25%
Elevator Bolts, large flat head	10%
Do., corrugated head	40%
Fancy Head Bolts	10%
Step and Shaft Bolts ($3 list)	10%
Whiffletree Bolts	10%
Stove Bolts	62½%

Blank and Tapped Nuts Down

London, Ont.

Square and hexagon nuts, both tapped and blank, have been revised and are lower. Following are the revised quotations:

Nuts, Square Blank, add to list $1 25

Do., Tapped, add to list	1 75
Nuts, Hexagon, Blank, add to list	1 75
Do., Tapped, add to list	2 25

Mail Boxes Lower

London, Ont.

The standard makes of mail boxes have been revised, and new prices are a little lower. The standard black enamel are quoted at $11.50 per dozen; antique copper finish at $15, and the dull brass at $15.

Soldering Coppers Reduced

London, Ont.

Prices have been reduced on soldering coppers, and new quotations are from 8 to 10 per cent. lower. The following are the new net prices:

3lb., to pair and heavier, 48c lb.; 2½ lb. to pair, 49c; 2 lb. to pair, 50c; 1½ lb. to pair, 52c; 1 lb. to pair, 58c; ¾ lb. to pair, 61c; ½ lb. to pair, 77c.

Stanley Braces: New Prices

London, Ont.

Following the revisions announced recently on Stanley Rule and Level goods the following are the new net prices on this make of bit brace. These prices are slightly lower than the old quotations:

Bit Braces—No. 966 x 10 in., $1.05 each; No. 946 x 10 in., $1.90; No. 975 x 10 in., $1.85; No. 945 x 10 in., $2.95; No. 923 x 6 in., $4.35; 8 in., $4.35; 10 in., $4.45; 12 in., $4.60; No. 921 x 10 in., $4.85; 12 in., $5; No. 915 x 10 in., $3.50; 12 in., $3.55; No. 919 x 10 in., $5.95; 12 in., $6.15.

Planes and Levels Revised

London, Ont.

The following are the new net prices on Stanley planes and levels and most are slightly reduced.

Planes—No. 3, $4.20 each; 4 in., $4.60; 5 in., $5.25; No. 6, $6.75; No. 7, $7.75; No. 8, $9.20; No. 9½, $2.40; No. 9¾, $2.80; No. 15, $2.65; No. 16, $2.80; No. 17, $3.25; No. 18, $3.05; No. 19, $3.20; No. 26, $3.50; No. 27½, $4; No. 28, $4.40; No. 35, $3.95; No. 36, $4.45; No. 101, 45c; No. 102, 87c; No. 103, $1.22; No. 110, $1.22; No. 120, $1.70; No. 130, $1.80; No. 220, $1.80.

Levels—No. 00, $13.80 doz.; No. 0, $15.35; No. 2, $22; No. 3, $26.95; No. 4, $21; No. 5, $35.40; No. 10, $30; No. 30, $40.75; No. 35, $35.40.

Rules and Screwdrivers Down

London, Ont.

The rules and screwdrivers made by the Stanley Rule & Level Co. are also showing a slight reduction, and new net prices are as follows:

Rules—No. 51, $4 doz.; No. 61, $3.25; No. 62, $9.60; No. 66½, $7.20; No. 66¾, $18.15; No. 68, $2.70; No. 70, $4.75; No. 84, $7.55; No. 04, $7.55; No. 06, $11.30; No. 204, $10.55; No. 206, $14.05.

Screwdrivers—No. 20 x 3 in., $3.70 doz.; 4 in., $4.45; 5 in., $5.20; 6 in., $6.30; 8 in., $7.75; 10 in., $9.70.

No. 45 x 4½ in., $4.05 doz.; 5½ in., $4.75; No. 6½ in., $5.70.

No. 55 x 3 in., $3.70 doz.; 4 in., $4.45; 5 in., $5.20; 6 in., $6.30.

No. 70 x 3 in., $2.95 doz.; 4 in., $4.20; 5 in., $3.60; 6 in., $3.90; 8 in., $5.10; 10 in., $6.15.

No. 80 x 3 in., $2.30 doz.; 4 in., $2.70; 5 in., $2.80; 6 in., $3.05; 8 in., $4.20; 10 in., $5.05.

Try Square and Vises Revised

London, Ont.

With other lines the try squares and vises and mallets of the Stanley make are revised. The following are the new net prices:

Try Squares.—No. 20 x 4½ in., $5.40 doz.; 6 in., $7.20; 7½ in., $7.85; 8 in., $8.10; 9 in., $10.05; 10 in., $10.90; 12 in., $13.40.

Vises—No. 742, $1.90 each; No. 743, $2.25; No. 744, $2.70; No. 745, $3.15; No. 746, $4.90; No. 761, $1.95; No. 762, $2.30; No. 763, $2.75.

Carpenter Mallets—No. 4, $4.05 doz.; No. 6, $16.30; No. 10, $13.35; No. 11, $15.40; No. 12, $19.60; No. 13, $23.75.

Prepared Paints Down

London, Ont.

Prepared paints have been reduced and are now selling at lower prices. First grade white paint is now 60 cents per gallon less. Colors and outside porch paints are 70 cents lower, and inside floor paint 25 cents lower.

Leather Soles 10 P.C. Down

London, Ont.

A reduction of about 10 per cent. has been made on prices of leather soles and heels, and the new prices on some of the better sellers are as follows:

Leather Soles—No. 37½, ladies, $2.05 doz.; No. 31½, boys' $2.60; No. 123, men's, $3.35; No. 122, men's, $3.45; No. 121, men's, $3.65; No. 122 x size 11, $4.14.

Leather Heels—No. 80, ladies, $1.10 doz.; No. 81, ladies', $1; No. 51, men's, $1.30; No. 52, men's, $1.15.

No Change in Glass

London, Ont.

Window glass shows no change this week, and the quotations for single and double diamond remain 60 per cent. off list. The cut lights are quoted at 60 per cent. off cut light list.

White Lead Reduced

London, Ont.

Prices are reduced $2 on white lead in oil, and the following are new quotations:

	Tons	Less tons Per 100 lbs.
Pure	14 95	15 30
Elephant	15 45	15 80

Putty Prices

London, Ont.

Pure linseed oil putty has been reduced $2 per hundredweight, and standard putty $1.

PUTTY—	
Standard, 100-lb. drums	7 05
Do., 25-lb. drums	7 30
Pure, 100-lb. drums	8 55
Do., 25-lb. drums	8 80

Rope Sales Are Light

London, Ont.

Sales are continuing light on rope and prices show no further change. The quotations are as under:

Pure Manila, per lb., 24½c base; Beaver Manila, 20c; New Zealand Hemp, 20c; Sisal, 18c.

Winnipeg Markets

WINNIPEG, Feb. 24.—The features of the week have been the reductions made in the prices of cotton rope and cordage, barbed wire, lead pipe, beaver board and paint. Heinisch shears have dropped in price. Stillson pattern and Trimo wrenches are lower, and other lines showing lower quotations are harness rings, neck-yokes, whiffletrees, doubletrees, cast iron fittings, and grease cups and oil cups.

Bar iron and steel, black and galvanized sheets, wrought iron pipe, and malleable fittings are holding unchanged.

Business here is gradually improving with a fair volume of sorting up orders coming in.

Wrenches Reduced in Price

Winnipeg.

The prices have been reduced on Stillson pattern and Trimo pipe wrenches and the following are the latest quotations: Stillson pattern, 40 per cent. off list; Trimo pattern, 30 per cent. off list.

Sash Cord Again Reduced

Winnipeg.

The price has been reduced again this week on sash and awning cord and the prices now in effect are as follows:

Sash Cord—In hanks, No. 6, 62c per lb.; No. 7, 61c; No. 8, 60c; No. 9, 60c. In coils, Nos. 8, 10 and 12, 60c per lb.

Awning Cord—White, No. 4, $4.28 per doz. hanks; No. 5, $16.20 per doz. hanks. Drab, No. 4, $4.95 per doz. hanks; No. 5, $19.35.

Barbed Wire Down Again

Winnipeg.

The prices for barb wire have been reduced again and are as follows:

Lyman—Winnipeg, $5.65; Fort William, $5.15.
Glidden—Winnipeg, $5.45; Fort Williams, $5.00.
Baker—Winnipeg, $5.35; Fort William, $4.90.

Harness Rings Are Lower

Winnipeg.

The price has been lowered on harness rings, and the following are the prices quoted this week:

Japanned—½ in., $1.05 gross; ⅝ in., $1.05; ¾ in., $1.15; ⅞ in., $1.35; 1 in., $1.70; 1¼ in., $2.40; 1½ in., $3.40; 1¾ in., $3.60; 2 in., $4.

Tinned—½ in., $1.20 gross; ⅝ in., $1.20; ¾ in., $1.40; 1 in., $2.05; 1¼ in., $2.75; 1½ in., $4.20; 1¾, $4.75; 2 in., $5.60.

Tarred Felt Is Lower

Winnipeg.

The price has been lowered on tarred felt and it is now selling at $6.30 per 100 lbs.

Beaver Board Reduced $2.

Winnipeg.

The price of beaver board has been reduced $2 per 1,000 feet and it is now selling at $51.50 per 1,000 ft.

Cotton Rope Declines Again

Winnipeg.

Another decline in cotton rope has been recorded this week and 3-16 in. is now selling at 55 cents per lb. and ¼ in. and upwards 54 cents per lb.

Cotton Clothes Lines Reduced

Winnipeg.

The price is lower this week on cotton clothes lines and the reduction is due to declines in the raw cotton market. 48 ft. lines are selling at $3.07 per dozen, and 60 ft. at $3.84.

Heinisch Shears Reduced

Winnipeg.

Lower prices are recorded this week on different lines of shears. Some of the prices are given below:

Heinisch Shears, japanned—6 in., $14.40 doz.; 6½ in., $15.30; 7 in., $16.20; 7½ in., $17.10; 8 in., $18; 8½ in., $18.90; 9 in., $22.50; 10 in., $27.75.

Nickel Plated—6 in., $16.80; 6½ in., $18.15; 7 in., $19.35; 7½ in., $20.25; 8 in., $21.30; 8½ in., $22.50; 9 in., $26.70; 10 in., $33.

Bent Trimmers, japanned—8 in., $18.90; 9 in., $25.20; 10 in., $30.30.

Nickel Plated—8 in., $22.50; 9 in., $30; 10 in., $36.30.

Barbers' Shears, japanned—8 in., $18.30; 8½ in., $18.90.
Nickel Plated—8 in., $21.30; 8½ in., $22.50.

Lead Pipe Again Reduced

Winnipeg.

The price has been reduced again on lead and lead waste pipe and lead pipe is now selling at $12.06 per 100 lbs. Lead waste pipe is quoted at $12.96 per 100 lbs.

Cast Pipe Fittings Lower

Winnipeg.

The prices have been lowered a trifle on cast iron fittings and the following prices are now in effect:

Elbows, Tees, Crosses, Return Bends, Caps and Lock Nuts—Net list.
Reducers—10% off list.
Bushings—15% off list.
Plugs—15% off list.
Flanged Unions, Standard—Net list.
Do., Dart—10% adv.
Cast Iron Drainage Fittings—25% off.

Linseed Oil; No Change

Winnipeg.

The price of linseed oil remains the same this week and raw is still priced at $1.25 per gal. and boiled $1.28.

Turpentine Price Holds

Winnipeg.

The price of turpentine did not change this week and the price of $1.65 per gal. quoted last week still remains the same.

Pittsburgh Markets

PITTSBURGH, Feb. 24.—It appears to be fairly well established that the price cutting on the part of the independent mills has brought them very little additional business, and on the other hand the volume of new business given the Steel Corporation has diminished considerably and is attributed to the price cutting. On standard steel pipe and on tin plate there has been little or no shading, but bars, shapes, plates and sheets are being quoted by independents at lower prices. A new low price of $25 valley has developed on basic pig iron, and is stated to be below actual cost based on recent records.

PITTSBURGH, Feb. 24.—Enough time has now elapsed since the Midvale Steel & Ordnance Company began quoting prices below the Industrial Board and Steel Corporation schedule to make some appraisal of the situation. This is that Midvale and a few other independent steel producers are actively soliciting business at reductions of a few dollars a ton on most of the leading products, that practically all the other independents are willing to sell at reduced prices, provided the orders offered are large enough to make this worth while, and that the United States Steel Corporation is standing rigidly by the prices it has maintained since the Industrial Board adjustment of March 21, 1919.

As to the volume of business booked at the reduced prices, that is very small. It seems clear that practically no business was produced by the price cutting, the orders placed being chiefly or wholly orders that would have been placed in any event, orders that could not be held back because the need was pressing. As to the Steel Corporation, prior to the break it was booking rather a fair volume of new business, considering the general dullness. In both December and January the bookings were not far below 50 per cent. of capacity. The volume of new business given the Steel Corporation has now diminished very considerably. A more important effect upon the Steel Corporation is a large decrease in the volume of specifications on old contracts being filed. This is, of course, perfectly natural. Many customers of the corporation were taking shipments on their old contracts at a greater rate than was requisite to take care of current consumption, so that stocks were piling up, and when it was made clear that the contract prices could be shaded the customers naturally curtailed their specifications.

Extent of Cuts

The extent of the price cutting may be shown approximately by setting down the lowest prices done or quoted thus far by any independent, together with the Industrial Board prices to which the Steel Corporation strictly adheres, and which some of the independents are nominally quoting, until they are offered orders sufficiently attractive to justify cutting: Bars, 2 to 2.35 cents; shapes, 2.20 to 2.45 cents; plates, 2.25 to 2.65 cents; hoops, 2.85 to 3.05 cents; blue annealed sheets, 3.20 to 3.55 cents; black sheets, 4.15 to 4.35 cents; galvanized sheets, 5.35 to 5.70 cents; plain wire, 3 to 3.25 cents; wire nails, $3.10 to $3.25.

In standard steel pipe there is little if any shading, the standard price being a basing discount of 57½ per cent., but there are various price irregularities in specialties in tubular goods. In tin plate it seems clear that there is absolutely no shading by any mills on orders for actual production from the standard price of $7 per base box, 100-pound, but for quite a while past there have been offerings at second hand from stocks at deep cuts. At first these were chiefly by New York export houses, who had bought tin plate for export and did not complete the transaction, but lately there have been offerings by some domestic consumers.

Attitude of Independents

It being quite clear that the volume of steel business secured by the price cutting has not justified the making of these reductions, for with the high costs ruling, partly due to the reckless manner in which independents operated when they were securing very high prices, and partly due to the light operation at present, there was not much room for cutting, the question arises, why did the independents start to cut prices? There are only two possible answers, that the independents made a mistake and that they did not make a mistake. They might have made a mistake by thinking that a reasonable amount of business could be gathered up by cutting prices, sufficient to give something like a fair operation and thus justify selling at close prices, or even at an apparent loss, by comparison with previous costs, because by economizing during the operation they could pare their costs. Such a result has not come. The amount of business secured is plainly not worth while.

If the independents did not make a mistake, then they expected what has occurred. What has occurred is that they secured very little business, and that the business of the United States Steel Corporation is greatly reduced. The corporation operated at about 92 per cent. in November and December and at an average of about 90 per cent. in January. Its operations were certain to taper off, but probably at no great rate. Now, however, the corporation's operations were at only about 80 per cent. last week and they are at less than that this week, with a prospect that in a very few weeks they will be quite low, under 50 per cent. and perhaps down to 30 or 40 per cent. The corporation's new business and specifications against old contracts have both fallen off, and a good many customers are probably instructing it to delay shipment on some of the material already specified.

This decline in Steel Corporation business is attributable in large part to the price cutting. There may be an advantage in that to the independents, on the theory that whatever steel the corporation makes is irretrievably lost to the independents, whereas by mixing things up the independents may secure a sort of redistribution. This is not theory, but the actual statement, made privately, of some of the independents.

Then there is the matter of wages. The independents have been wanting to reduce wages, and some of them did as long ago as last December, while others have only lately reduced, the Youngstown mills making reductions of about 20 per cent. last week, while the Steel Corporation has not reduced wages. The independents feel that if the corporation has to cut prices it will also reduce wages. Some of the independents did not take kindly to all the wage advances the corporation made during the war, and there was some feeling on the subject in the latter part of 1919, when the independents were disposed to advance

Getting the Ear of the Paint Prospect

An Unquestionable Argument for Use of Paint and Varnish— How One Merchant Greatly Increased Paint Sales by Getting the Arguments Home to His Prospects

IT IS not too early now to begin to put into effect some of the ideas for developing spring painting business which hardware merchants have had in mind during the winter months. While the application of some of these ideas has no doubt helped to keep the cash register ringing in the paint department during the cold weather, these ideas will bring even bigger results during the spring season. Though the educational work which the trade has been doing of recent years to bring customers to a realization that paint and varnish can be used to advantage twelve months in the year has brought certain results, yet many property owners still have the idea that spring is the logical time to paint.

Remember Shortage of Painters Last Spring

In dealing with these latter customers this year one important point to keep in mind is the experience of last spring. It will be remembered that at that time painters were so loaded up with work that much painting which was to have been done in the early spring dragged along until well on toward fall. This is one of the arguments for a twelvemonth sale of paint and varnish, but as long as the condition remains it can be used as the basis of an argument why customers should buy their paint early so as to be in position to get their painting done before the painters get loaded up. This will help to get paint buying started even earlier in the spring than usual.

Visit Customers at Home

One of the most important things to do after the paint department has been stocked up with a well-assorted group of paints, varnishes and specialties, and due attention has been given to the location of the department, generous use of literature, color cards, etc., and arrangements made for regular window displays, is to plan visits to the homes of your customers, particularly if the store is located in rural districts. The importance of getting in close contact with the customers and pointing out the actual need for paint, cannot be over-estimated.

A Salesman Demonstrates This Point

At the recent convention of the Ontario Retail Hardware Association in Hamilton one paint manufacturer told how a salesman for his company had suggested this plan to one of his clients who was not selling as much paint as he should judging by the district in which his store was located. The dealer scoffed at the idea, whereupon the salesman took it upon himself to personally visit a number of the dealer's customers and some who were not regular customers. The result was that the salesman sold more paint within a few days than the dealer ordinarily sold all season. The salesman found that those on whom he worked appreciated the interest taken in the protection of their property. He made use of a few statistics as to the wastage through deterioration each year where surfaces are unduly exposed to climatic conditions. He pointed out places on the properties in question where such deterioration was in progress, and then figured out the approximate cost per year of a coat of paint regularly applied.

Let Clerks Look After the Store

It is a good policy to have the paint department in the store as appealing as possible and to have window displays, store displays and other sales helps arranged to bring maximum returns, but the store proprietor should not spend his own time with such details when his clerks can do this work, and he can spend his time to better advantage getting in closer touch with his customers as to their paint requirements. If the dealer stays in his store waiting for his displays and advertising to do all the work he may find that his opposition has gone out and secured the business ahead of him. A more competitive basis is being established in business to-day. This holds good in respect to retail trade just as much as to any other branch, and it behooves the merchant to make the most of his selling ability to-day if he is to carry on successful competition.

Saving Surfaces

The underlying idea of the "Save the Surface and You Save All" campaign can be well applied by the merchant in his selling efforts, as illustrated by John Irwin, of McArthur Irwin, Ltd., Montreal, who spoke on the work of the campaign at the convention of Ontario retail hardware merchants in Hamilton; when a person sits on a chair they do not sit on the wood, they sit on a thin film of paint or varnish. When a person stands on the floor the same holds true. The thin film of paint or varnish is the only protection which the wood or other material is afforded. To allow the basic material to be exposed to wear, is to allow undue deterioration to set in, and rapid loss of value to take place. Another coat of paint or varnish inexpensively applied will save the surface and protect the basic material, thus preserving its original structure.

Use Customers' Property as Subject of Discussion

This illustration has been proved to be very effective in demonstrating the true function of paint and varnish, which function, unfortunately, is much misunderstood by the majority of paint users and prospective users. The main thing is to get out and put these arguments directly before the prospects. A certain number of them will come to the store and you may have an opportunity of talking with a few of them, but in the rush of the store business the customer's attention is not as keen as when he is at home, and an exposed part of his own property is the subject under discussion.

This Merchant Arranges Demonstrations

There are various modifications of this plan, but the main thing is to get the arguments before those who should be using paint. One merchant follows the plan of arranging demonstrations, in company with the representative of the firm whose line of paint he handles. Much advertising was done in advance, and

Jap-a-lac for Marred Furniture

"Save the surface and you save all" Paint & Varnish

For covering up discolorations that years of hard usage have wrought, for brightening dull, bleached-out surfaces, Jap-a-lac is unsurpassed. It's just the thing the housewife wants for spreading newness over old pieces of furniture.

And no one knows the quality of Jap-a-lac better than the housewife. Its fame has spread to every corner of the Dominion until now Jap-a-lac has become a household word in thousands of homes. That's why Jap-a-lac proves so profitable for the dealer. It finds ready acceptance wherever it is offered for sale.

But you can expect Jap-a-lac results only when you sell genuine Glidden Jap-a-lac. Like many another good product, Jap-a-lac is freely imitated and, as might be expected, these imitations are far inferior to the original. Write today for the Jap-a-lac dealer proposition.

White Lead in Oil Reduced Again

New Lower Prices Also Quoted on Pure and Standard Putty

WHITE lead in oil has been reduced this week $2.00 per 100 lbs. Pure linseed oil putty is also reduced $2.00 per cwt., and standard putty $1.00 per cwt. There have been three reductions in white lead prices in the last three months. For the greater part of last year the Montreal price in ton lots stood at $20.00 per cwt. At the end of November, 1920, the price was reduced $2.25 per cwt. The next change occurred the second week in January, when the price came down again and was reduced $1.25 per 100 lbs., and on February 23 this last decline brings the price to $14.50 per cwt. The new quotation is approximately 27½ per cent. below last season's price.

In the primary markets pig lead continues weak, and spot lead is quoted at a reduction of 40 per cent. from the average price of 1920, or 50 per cent. from the high level price of that year. On London markets the declines amount to 45 and 60 per cent. It is stated, however, that present pig lead prices are lower than the cost of production and large producers are curtailing output, and several of the larger mines are not operating.

The present decline in putty is a reduction of about 20 per cent. in pure linseed oil putty and 13 per cent. on standard putty in 25-lb. irons. This also brings the differential between pure and standard putty back to where it used to be. The last change in putty prices was at the end of November last, when prices on both pure and standard were reduced 50 cents per cwt. It is noted that while linseed oil is down considerably from last year's high prices there has not been much change in whiting and prices on this commodity continue firm.

Per Capita Consumption of Paint is Low

2.20 Per Year is Per Capita Consumption of Paint in Canada, Whereas $6 Per Capita is Spent on Tobacco—Instructive Meeting of Paint Club in Winnipeg

WINNIPEG.—An interesting gathering of paint men was recently held in Winnipeg under the auspices of the Winnipeg Paint Club and those paint and varnish salesmen who were in the city for the bonspiel were invited to hear the addresses of T. J. Moneypenny, Imperial Varnish & Color Co., and F. J. Penberthy, Lowe Bros., Toronto, and others, chiefly in the interests of the "Save the Surface and You Save All" campaign. The meetings were presided over by C. H. S. Bamford, sales manager J. H. Ashdown Hardware Co., who is a member of the Winnipeg Paint Club.

Per Capita Consumption

In the course of his address Mr. Moneypenny made the point that the consumption of paint was only $2.20 per capita in Canada. He compared this with the per capita consumption of tobacco, which is $6. He emphasized the fact that paint was now being sold more as a preservative than as a decorative feature and urged that full advantage be taken of Arbor Day and other special occasions to encourage cleaning-up campaigns in all communities.

F. J. Penberthy gave an illustrated lecture on "Paint and how to use it." Slides were shown of the Dutch process of making white lead and others showed the various effects of paint on wood and steel. The various causes of trouble experienced in painting were also shown, among which the most emphasized was that of bad mixing.

In the course of his lecture, Mr. Penberthy urged the salesmen to get acquainted with the various causes of trouble and when complaints were made to them about the paint, investigate the complaint themselves, and he thought that in the majority of cases they would find that it was due to bad mixing.

William Brockie, president of the Alberta Paint Club; J. B. Cleveland, representative of Benjamin Moore Co., Saskatoon, Sask., and J. H. Hartford, of the British American Paint Co. of Regina, were also present.

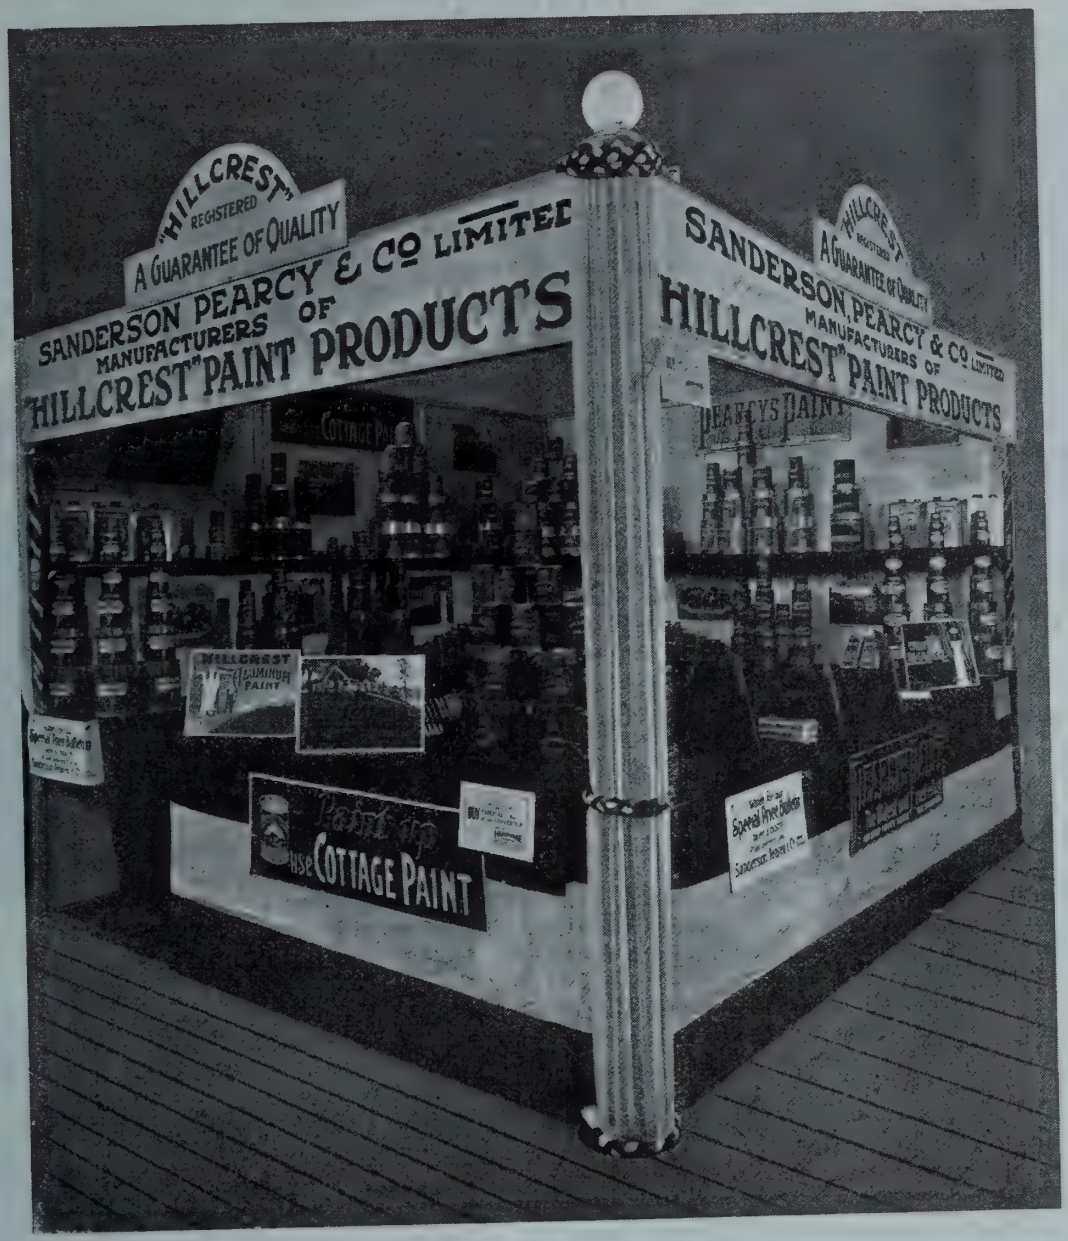
Oppose Half Holiday

Considerable opposition was expressed before the charter and amendments committee of the city council of Edmonton, Alta., to the proposal that the stores of Edmonton close on either Wednesday or Saturday afternoons. A prolonged discussion took place on the question, both merchants and clerks entering heatedly into the debate. It was agreed that a committee of retail merchants and one of retail clerks should get together and try to reach some agreement about the closing hours of stores, and the fixing of a half holiday, if that was desirable.

W. H. Gerke Reorganizes Sargent Co.

W. H. Gerke, whose resignation as general manager of the Martin-Senour Company was recently reported in Hardwar and Metal, heads a reorganization of the Sargent Paint Company of Indianapolis. Application has been made for an increase in the capital stock from $75,000 to $200,000, and the new company will operate under the name of the Sargent-Gerke Company.

At a recent meeting of the stockholders the following officers were elected: W. H. Gerke, president; John N. Carey, vice-president (president Stewart-Carey Glass Co.); H. G. Sargent, secretary (formerly secretary Sargent Paint Co.).



W. H. GERKE

whose resignation from the position of general manager of the Martin-Senour Co. in Canada and the U.S. was recently announced in Hardware and Metal, and who has reorganized the Sargent Paint Co., of Indianapolis, in future to be known as the Sargent-Gerke Co.

The organization is further strengthened by the addition of F. B. Keuthan as sales manager, formerly sales manager with the Martin-Senour Co., and F. S. Bautlich, Harold F. Fannon and Norman T. Jeffrey, also formerly with the Martin-Senour Company, and stockholders in the new company. The Sargent Paint Company, of which Mr. Carey was president, has operated in that field for over twenty years.

Mr. Gerke was for fifteen years general manager of the Martin-Senour Company in both the United States and Canada.

No one has been named as successor to W. H. Gerke, who recently resigned as general manager of the Martin-Senour Co., Chicago. The duties which Mr. Gerke performed will be taken over by V. Martin.

Hillcrest Products at the Hardware Convention

At Booth No. 19 at the Ontario Retail Hardware Association Convention, at Hamilton, last week, a gratifying interest was shown in the Hillcrest Products.

It was a pleasure to show Hillcrest Products there, because we take a very real pride in them. Every product bearing the mark, "Hillcrest," is the very best that can possibly be produced. We were not only proud to exhibit these splendid Paint Products, but we are proud to be known as the manufacturers of them.

These are the reasons that every "Hillcrest" salesman feels "sold" on the goods and regards them with confidence. Give the Hillcrest salesman a welcome when he calls and let him explain the advantage to you in handling "Hillcrest" Paint Products.

A Definite Argument for More Painting

Increasing Efficiency Along Many Lines in the Household Suggested by Western Hardware Merchant as Argument for Increased Use of Paint and Varnish

THERE is a great deal of foundation to the argument advanced by the Perry Hardware Company, Estevan, Sask., to the effect that as housekeeping is each day becoming more efficient housewives will be in a more receptive mood to consider the advantages from the standpoints of appearance and utility of the greater use of paints, varnishes and other specialties in the household.

Women Influencing Much Business

It was remarked at the recent convention of the Ontario Retail Hardware Association in Hamilton, Ont., that women were becoming a greater factor in influencing sales of hardware than ever before. It was stated by the sales manager of a large U.S. firm having extensive dealings with the hardware trade in Canada and the U.S. that women influence 80 per cent. of retail purchases. This being the case it is time for the merchant who has been catering to the other 20 per cent. of trade to adjust his methods in order to get the most out of his business.

Women Susceptible to Arguments for Economy

It has generally been found that women are more susceptible to arguments for economy, such as the use of paint and varnish for preservative purposes, than are men. They can certainly be appealed to from the standpoint of added beauty from the use of such lines, so that taken as a whole the appeal in advertising and displays can continue to be based on these points, provision being made for some messages to be addressed particularly to the women who may influence some of the expected business.

The ad by Perry Hardware Co. continued by announcing that beautiful homes are made from the inside out and not from the outside in and that it is only by the application of an occasional coat of varnish that a woman can hope to prolong the usefulness and beauty of the floors and woodwork of her home.

In the development of the coming Spring paint business the appeal to women should not be lost sight of for they as a class are quick to realize the appreciation of value which comes to the property which reflects good care, both outside and in. Such an announcement as that shown herewith by the Perry Hardware Co. might be addressed to the women of the community at frequent periods.

The Perry Hardware Co's

BULLETIN

Each day sees housekeeping placed more firmly on a business basis, which is another way of saying the business of housekeeping is gradually becoming more efficiently handled. Within the past few years housewives have begun to realize the possibilities in a can of Varnish. Only by applying an occasional coat of Varnish can a woman hope to prolong the usefulness and beauty of her floors and wood-work, **"Beautiful homes are made from the inside out and not from the outside in. The outside of the house is the casket, the jewel is inside."** The outside must be finished when the weather permits but the inside can be finished NOW or whenever you can find or get a painter.

The policy of this store is to supply you with Satisfactory goods at a Satisfactory price—When we say satisfactory goods we mean goods made to give service. When there is an argument between quality and price quality always wins for us. When by paying five per cent. more we can secure twenty or even ten per cent. more for you, we never hesitate about paying the extra five. **Our customers are our friends, and it would not be friendly to sell you a scamped article in the name of a bargain when we could sell you real satisfaction at a small difference.**

The Perry Hardware Co.

The Oldest and Biggest Hardware in Southern Sask.

Estevan, Sask.

GETTING THE EAR OF THE PAINT PROSPECT

Continued from page 56

any customers who, on being personally approached at their homes, brought up certain arguments in regard to quality or other points, were particularly invited to the demonstration. Tests were then made of various paints and varnishes, these clearly demonstrating the value of the high-grade product. Many large jobs were sold as a result of this plan, and the futility of many of the arguments raised against painting and against the use of the high-grade paints as compared with cheaper varieties, was clearly shown. This merchant as a result of these campaigns, has greatly increased the consumption of paint in his district, and he commends th eplan or any other similar plan which aims to bring the true arguments for painting and varnishing before prospects, for the consideration of the trade.

A new foundry is being erected at a cost of $75,000 on Broad St., Ottawa, by the Beach Foundry Company.

A $60,000 factory is being erected by the Decalcomania Co. of Canada, Ltd., 364 Richmond St., Toronto.

H. C. Crow, sales manager, the Canada Metal Company, Limited, Toronto, is making a business trip to the coast. He will be away about a month and will spend some time at the Winnipeg and Vancouver plants.

Getting Canadian Plate. — What is stated to be the first shipment of steel plates of appreciable width from the Maritime Provinces to the Toronto district has arrived in Toronto. The shipment consisted of three carloads of steel plates, eighty-five inches wide, manufactured by the Dominion Iron & Steel Corporation, of Sydney, Nova Scotia, and transhipped via the Canadian National Railways to the Toronto Iron Works. Hitherto local firms have been obliged to order steel plates of this size from the big mills in the United States, and the fact that Nova Scotia has attained such magnitude as a steel producer is regarded as encouraging by the Canadian trade.

Soligum

WOOD PRESERVATIVE & STAIN

Made by
Major & Co., Ld.
Hull, England

Supplied in Wood Preservative Grade and also in Colors for Shingles and outside work—in 1 gal., 5 gals., or Barrels.

Retails from $1.20 to $2.00.

Weekly Paint Markets

Montreal

MONTREAL, February 24.—Featuring the paint market this week are the reductions on white lead in oil and putty. White lead in oil is reduced $2.00 per 100 pounds, standard putty $1.00, and pure linseed oil putty $2.00 per 100 lbs.

Glass is reported very unsettled, no improvement being shown in the last few weeks. Present prices are 50 per cent. off Montreal glass list.

Turpentine is again easier, being now well down to the dollar figure. Linseed oil and shellac show no change in prices. Business is slowly improving in paint and allied products as the season advances.

White Lead $2.00 Lower

Montreal.

A reduction of $2.00 per 100 lbs. has been made in white lead in oil, new quotations now being $14.00 in 5 ton lots, $14.50 in one ton lots, and $14.85 in less quantities. Relative to recent reductions in paint, these new prices are now set for the spring deliveries, and it is hoped they will have a stimulating effect on sales for spring requirements.

Lower Prices on Putty

Montreal.

New lower prices are now in effect on both standard and pure linseed oil putty. Standard shows a decline of $1.00, and pure linseed oil putty $2.00 per 100 lbs. This makes the differential between standard and pure only $1.50, formerly it was $2.50 for 100 lbs.

Standard Putty—	5 ton	1 ton	Less ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Bulk drums or tins, loose 12½ lbs.	6 50	6 75	7 10
3 and 5 lb. tins	8 60	8 85	9 20
1 and 2 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Unsettled Condition on Glass

Montreal.

Window glass might be reported as taking a turn for the worse rather than showing any improvement over the previous few weeks. Price cutting is still in evidence, confined, however to present stocks. Prices and discounts have been withdrawn from the Belgian market, and a stiffening is shown from that source. Whether present prices will continue to be quoted is doubtful, and the withdrawal of prices from the large Belgian field may have its own significance. The Montreal glass list is now quoted with 50 per cent. off, and is shown on current paint market pages.

Mixed Paints at Recent Decline

Montreal.

With the lowering of prices on ready mixed paints, quoted in our last issue, it is now a question whether sales will show any improvement through these new prices being given. Difference of opinion are given on this, some manufacturers claiming it will have no stimulating effect whatever, while others believe that dealers were holding off until some definite decision was reached as to prices for spring deliveries and dealers will now place their orders for their full season's requirements. That buying has been curtailed is manifest, whether from heavy stocks in the hands of dealers, or reluctance on the part of the same merchants to buy, fearing lower prices. With the latter cause thought to be the most direct, dealers may now place their orders with the assurance of firm prices during this spring's paint season, and an early improvement in paint sales may now be expected as the season is becoming nearer.

Turpentine Easier

Montreal.

Turpentine is again quoted at lower figures this week, new quotations bringing it down well on to the dollar mark. The Southern market with its lower prices continues to have an unsettling effect locally. With these prices now prevailing, it is not thought that much lower figures will be reached when compared with pre-war levels. Much depends, however, on the Savannah situation, as prices now quoted show a heavy loss to importers with a stock on hand, and the local dealers will undoubtedly take advantage of any stiffening from outside sources. Present prices are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 05
2 to 4 barrel lots	1 02
Broken lots	1 06

No Change in Shellac

Montreal.

Shellac prices have settled down to a more or less firm basis during the last week or two, although different dealers still have varying prices to give. However the price cutting that prevailed a few weeks ago seems no longer in evidence and present prices are as follows:

Orange shellac, in barrels, $4.50; in one gal. jugs, $4.75; white, in barrels, or 5 gal. jugs, $5; in one gal. jugs, $5.25.

Linseed Oil Prices Hold

Montreal.

No change has been made in the prices of linseed oil this week. The flax market has been much firmer the last week or ten days than in the weeks previous. As in the case of turpentine, linseed oil is now at the dollar mark and lower prices, to any extent, are not looked for at the present. Later on, with the outside seed markets to be taken into consideration, it is hard to determine just what the trend of the market will be. Prices for this week are:

1 to 2 barrels	0 99	1 01½
5 to 10 barrels	0 92	0 94½

Toronto

TORONTO, Feb. 24.—Manufacturers state that it is too early yet to judge what effect the change in prices has had on paint orders. In some cases buyers are reported to have placed their orders for spring requirements, and in many cases shipment has been made, but there is still a considerable number of dealers who state that they are waiting until the demand opens up.

Some important price changes are made in other products. White lead in oil and putty are both reduced again. Some lower quotations are announced on shellacs. Window glass is unsettled and reports are current of lower quotations than the recognized ones. Linseed oil remains unchanged, but shows a stiffer tendency. Turpentine is slightly reduced again, and the market is easier.

Paint Sales Little Changed

Toronto.

Prepared paint sales are being made at the reduced prices reported last week. It is too early yet to be able to state whether the reductions have increased sales to any extent. While orders continue to increase in number, sales generally are smaller than usual, but many buyers during the past two years or so are stated to have placed larger orders on account of the shortages in so many lines.

White Lead Down $2.00

Toronto.

White lead in oil has been reduced $2.00 per cwt. from 23rd of February. This is a reduction of 11 per cent. on Toronto prices in ton lots. Previous declines since last summer have been $1.25

Here's Unusual Profit in a Usual Line

RAM-CO

"The Magic Touch"

Straw Hat Renovator

That RAM-CO is a Ramsay product is sufficient a warrant as to RAM-CO'S quality.

Thoroughly tested, positively proven superior to any product of a like nature, it is now available to the trade.

The highest notch of serviceability has been reached in RAM-CO. Its easy and permanent coloring has satisfied and pleased its host of users. Its economy and range of operation has made it an everyday necessity in the home. Its low cost, together with its gratifying results, has made it the chosen article wherever it has been displayed.

A live and blanketing advertising campaign commencing in the early spring will cause a greater demand for the preparation of Milady's Easter millinery.

A sample, together with particulars, or the personal visit of a salesman awaits but your request.

It's the right time now!

and $2.25 per cwt., making present prices about 27 per cent. below those in force for the greater part of last season. The new quotations in ton lots are $14.95 per 100 lbs. and $15.30 for less than ton lots.

Putty is Reduced

Toronto.

A reduction has been made this week in the price of putty, and standard putty is reduced $1.00 per cwt., and pure linseed oil putty $2.00 per cwt. It is thought that these declines will stimulate sales in this product as retailers have hitherto been reluctant to place orders for more than their immediate requirements. Following are the new quotations:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

Shellacs Further Reduced

Toronto.

Some further declines are noted in shellac quotations, and barrel quotations are $4.50 for orange and $5 for white. In one-gallon jugs the quotations are $5.25 and $5.75.

Glass Demand Light

Toronto.

There is little change in the window glass situation, and trading continues lighter than is usual at this season. Sixty per cent. and 60 and 10 per cent. for quantities are the general quotations, and the old list is used by most wholesalers, although as stated in last week's issue one or two firms are using a net list. Reports were current that Belgian glass manufacturers had decided to reduce their output, but no confirmation of the reports have been received. The effect would undoubtedly stiffen prices, especially in conjunction with an improvement in exchange. It is pointed out that one cent advance on the Belgian exchange means an increase of from 50 cents to $1.50 on a case of glass. American window glass prices have remained firm and unchanged and except in the coast cities and nearby territory where competition from foreign makers is felt there has been no change in their prices, although it is stated that only about one-fifth of the United States window glass factories are operating at the present time.

Linseed Oil Unchanged

Toronto.

There is no change this week in linseed oil prices, although a slightly firmer tone is reported by the crushers. Flax seed is regarded as low in price at the present compared with other grain. A slight improvement is reported in demand. Following are the quotations on oil:

	Raw.	Boiled.
1 to 2 barrels gal.	1 00	1 03
3 to 5 barrels, gal.	0 99	1 02
6 to 9 barrels, gal.	0 97	1 00

Less quantities add 15 cents per gallon.

Turpentine Down 5 Cents

Toronto.

Another small reduction has been made this week in turpentine prices. Southern markets are reported easier, but prices there are regarded as below the cost of production, and wholesalers believe an upward trend will take place before very long. The exchange rate has affected the turpentine markets during the past year or two, and with the Canadian dollar only accepted at 85 cents a considerable difference is shown between United States and Canadian quotations on this product. Following are the present quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 05
2 to 4 barrel lots	1 02
5 gal. lots	1 20

PITTSBURGH MARKETS

Continued from page 55

prices. The attitude of the Steel Corporation at that time seems to have been "If you advance prices you will have to advance wages—why not advance wages first?" What occurred, however, was that the independents advanced prices and then the corporation advanced wages without advancing prices, the independents then having to advance wages also.

As the market is extremely quiet as to actual developments, the tactical position and aspirations of the producers seem to be the important feature, as giving a line on what may be expected in the future.

Pig Iron

The first sales of basic pig iron of any consequence this year have just occurred, developing a new low price, $25, valley, or a sharp decline, as on January 1 the market declined from $33 to $30 by furnaces voluntarily quoting the lower price. There was no record of any sales of consequence until the $25 sales just made, which included at least one lot of 1,000 tons. Bessemer is now priced at $27, valley, with reports that a few carloads have been sold at this figure. Foundry remains quotable at $28, valley, with an occasional carload going. On any sizable lot these prices would probably be shaded. The prices are below actual cost, based on recent records, but costs will have to come down. The question just now seems to be whether pig iron prices are going to dictate coke and ore prices, or coke and ore prices are going to dictate pig iron prices, as of course furnaces would not sell at a loss for any length of time.

Important Points in Income Tax Law

THE following enumeration of points to be remembered in connection with the amended Income Tax Law in Canada will help merchants to a proper understanding of their responsibility. At the present time when there re so many complications in various forms of taxation it is advisable to have the main points condensed and available for reference, as has been done by the Royal Trust Company, who enumerate the points as follows:—

Tax payable along with return, April 30—at least a fourth. Better pay half, to allow margin for errors, which are heavily penalized.

Form for return must be asked for, not waited for.

Companies and Employers' lists and Fiduciaries' Returns to be in by March 31.

Deferred Instalments due June 30, Aug. 31, Oct. 31.

Tax reckoned on income of calendar year, Jan. 1 to Dec. 31; or on a Company's year ended during that calendar year.

Confiscation of all unreported income, if understatement exceeds 20 per cent.; or half, if from 10 to 20 per cent.

Tax increased 25 per cent. if return is late.

Six months in jail and $10,000 fine for false statement.

Normal Tax, 4 per cent. on net taxable income up to $6,000, and 8 per cent. beyond that.

Exempt from Normal Tax only:—
- $2,000 if married or with dependents, of certain categories;
- $1,000 if unmarried, no dependents; $200 each for children under 18.

Surtax on incomes beyond $5,000—rising from 1 per cent. on first $1,000 to 65 per cent. on all beyond a million.

Five per cent. of both taxes added if taxable income is $5,000 or more.

Exempt from both Normal and Surtax—
- War Disability Pensions;
- Tax-free Bond Interest;
- Gifts and Bequests;
- Life Insurance Proceeds;
- Certain incidental gains from turnover of capital assets outside the Taxpayer's regular business.

Expenditure to be deducted when calucating Taxable Income—
- General Business Expenses;
- Interest on Business Borrowing;
- Taxes, Insurance, Repairs, Depreciation, Mortgage Interest—own residence excepted;
- Payments for own Superannuation;
- Carrying Charges on Securities, not exceeding income therefrom.

Deductions from Tax—
- Income Tax paid to United Kingdom or other British Dominion, or to Foreign Countries if they reciprocate;
- Certain payments under Business Profits War Tax Act and Special War Revenue Act.

Partners pay—not Partnerships.

Companies pay Normal Tax, not Surtax.

Executors, Guardians and Trustees pay for Beneficiaries unable to manage their own affairs.

Accrued and Undivided Profits are Taxable.

Married Women with Separate Incomes make Separate Returns.

Farmers make Returns on Special Form.

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

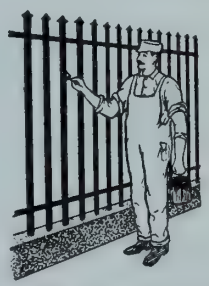
Plastic Elastigum Patching Cement

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

THE man who buys Barrett Products usually buys them through a dealer. The dealer carries them because he knows who makes them and what they *are*. He knows, also, that The Barrett Company's reputation throughout the Dominion is *his* reputation in his locality, and that it increases his sales, his profits, and his name for quality and fair prices.

Consumers are likely to judge you, Mr. Dealer, by the products you handle. Barrett Products on your counter will tell them that you are the man they want to do business with.

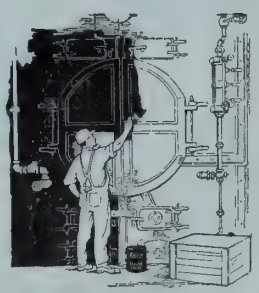
Farm impliments don't wear out—they rust out. Everjet prevents rust.



Everjet Elastic Carbon Paint

A black carbon paint for industrial purposes. No other paint on the Canadian market has ever enjoyed the same popularity and filled so many demands in the industrial world as Everjet, which was put on the market by our chemists less than ten years ago.

We manufacture no product which we can more thoroughly recommend. For use on all kinds of metal and wood, particularly on materials subject to severe conditions; for use on boilers, smokestacks, machinery, piping; in fact, metal work of all kinds. It is also used extensively for painting metal roofs. It successfully resists the corrosive action of acids, alkalies, fumes and vapors, and will wear stubbornly under the most adverse conditions.



It is being used extensively by big manufacturing concerns, railroads, etc., all over Canada, and has been endorsed by some of the most eminent engineers.

Put up in: 1-Gallon Cans, Lithographed (cases of one doz.), 5 Gallon Cans, ½-Barrels (about 20 gallons), Barrels (about 40 gallons).

Everjet Paint adds years to the life of outdoor metal work.

Everlastic Liquid Roofing Cement

FOR resurfacing old and worn-out "rubber" and prepared roofings, here's a winner!

Comes ready for use, is easy to apply and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.

Everlastic Liquid Roofing Cement is in a class by itself among roof repair materials.

Every Gardener is a Prospect

for this Cultivator. Amateur or professional, he will want the—

Ulrich Cultivator

for it will help him do his work quicker, better and easier. It can be adjusted for general cultivation, hilling, furrowing and covering and, with shield, for small plant cultivating.

It will stand up under hard use, for the blades are of spring steel; shanks of ⅜-inch spring steel; the ferrule of malleable iron and is bolted to handle; handle is of best grade ash 1¼ x 52 inches.

You'll have no come-back when you sell this tool.

Better send for full data at once.

Burlaps—

No. V of a Series

Send Us Your Orders Early

THE dealer who intelligently anticipates his customers' requirements is going to reap big benefits as soon as the season opens.

It always pays to talk to your customers about your own business—get them interested in prospects for 1921 — speak about building — tell them, for instance, that one of the most important items of interior furnishing is BURLAP.

Have a good display in your window and in your store; show them how decorative it is and explain the sanitary, germ-killing properties of this wonderful wall covering.

There is a big demand coming—it has started already—get your share of the profits.

Send your orders in early.

Who Will Get the 1921 Business?

Where Do Canadian Hardware Buyers Look for Information?

They look in the "Buyers' Guide and Directory Number" that has been published annually for the past 33 years.

The 1921 issue will be in the hands of the trade on March 19.

This "Buying and Directory Number" goes by paid invitation to every wholesale hardware firm, over 90% of the retail hardware firms, and nine hundred hardware sections of department or general stores.

The "Spring Buying and Directory Number" for 1921 will reach the trade at a time when many large orders are about to be placed.

Stocks are light and spring orders have been delayed. Hardware buyers are exercising greater care in their buying this year. The 33rd annual "Spring Buying and Directory Number" of Hardware and Metal will be on the job when Canadian hardware merchants are placing many of the biggest orders for 1921.

The influence of forceful representation in the "Buying and Directory Number" of Hardware and Metal will have a direct bearing on the purchases of the hardware trade during the next six months.

Wholesalers and retailers alike have written us voluntarily, telling of the great and lasting value of our annual "Buying and Directory" numbers, which have been a feature for 33 years. We will gladly send you copies of letters received from these important buyers.

Hardware buyers in Canada hang up their copy of the Annual Spring Buying and Directory Number close beside their desk for ready reference. A cord is inserted in the upper left-hand corner for this purpose. This idea was adopted at the request of hardware buyers.

Date of issue, March 19.

TINKER TOM'S TALKS.

No. 300

IMPORT SHIPMENTS GALVANIZED SHEETS

Now comes the time when the air will be full of the advantages of buying cheap import sheets.

Do you know of anyone who imported Galvanized Sheets in the latter half of 1920 who made money out of it? If they all lost money in 1920 on such business, how on earth can anyone expect to do better in such times as are ahead of us?

The safe way is to use our big stock of Premier Galvanized Sheets as you need them. The price is right—and think of the service.

TINKER TOM.

HOBBS Manufacturing Company, Limited

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Perfect in Service

The fact that there are over 25,000 satisfied users of this range is a good indication to hardware merchants of its selling qualities. It is quick and easy to sell and satisfies customers.

"Perfect" Double High Oven
Over 20,000 Satisfied Users

Perfect in Sales

The fact that there are over 25,000 satisfied customers using these ranges means that there are 25,000 people boosting it and sending their friends to merchants with "Enterprise."

Enterprise

Ranges, Stoves and Heaters

A Range that has been built with the needs of the consumer in view is sure to meet with the approval of the stove-buying public. Enterprise "Perfect" has over 20,000 satisfied owners; this is powerful testimony that the Enterprise "Perfect" has the approval of consumers—approval that brings sales for the dealer. In service the "Perfect" is fully established with the housewife as a labor and time-saving friend of some considerable efficiency. Its special features make it easy and profitable selling for the hardware dealer. For a range that is perfect in sales as it is perfect in service, stock and push the popular Enterprise "Perfect."

The Ashdown organization is behind every customer. We offer only lines in which we have the utmost confidence. Every facility of the Ashdown organization goes into the task of selecting for our customers those lines which are established sellers, carry good profits and satisfy customers for the retail merchant.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Product-
Publicity-
Prestige-

FROST FENCE dealers have not only the advantage of a superior product in making sales, but they have also an up-to-date, enterprising manufacturing organization at their back.

Are you reaping the full benefit from the Frost Fence "name" and Frost Fence advertising? Are you prepared to supply the demand created by this prestige of name and publicity?

Carry a stock of *Frost Fence*. Your customers know its superior qualities. They have read of its strong points and are ready to be convinced and to buy when you show the product. Increase your "satisfied" customer business by handling this sturdy, neat and truly economical fence.

Every owner is a *Frost Fence* Booster

Frost Steel & Wire Co., Limited

INTERNATIONAL
Dayton Hardware Scales

Range of prices: 4c to 60c per lb. Total Adder Cylinder to 90 lbs.

METAL STOP ON THE TARE BEAM

The tare beam is so constructed that by sliding the poise to a "set pin" it will offset the weight of scoop or wire rack, thus bring the scale again to normal.

Full Agate Bearings throughout.

Automatic Pendulum: Gravity, with Reflector.

Standard Finish: Turquoise Blue Gold Finish Extra.

100 lbs. capacity
10 lbs. on chart
10 lbs. on Tare Beam and 80 lbs. in weights.

Counting Scoop quickly attached in place of weights when desired. It is a marvel of speed and accuracy in store service and stock-taking.

Wire rack for use in weighing wire coils, rope, rubber hose, etc., may be placed on platform instead of scoop when desired.

FROM "TIP TO TIP" IT'S BUILT TO GIVE SERVICE AND SPEED

It does at any time all that any other scale will do. It does so much more that it is rated by merchants who use it as the most serviceable piece of equipment ever introduced into the hardware trade. Consider just ONE of the EXTRA Services it performs: The automatic counting of nails, bolts and other small articles—and you will understand why satisfied users all over Canada regard it as equal to one or two extra clerks at stocktaking time.

$2,500 IN CASH PRIZES—ARE YOU ENTERED YET IN THE GREAT DAYTON SCALES WORD CONTEST?

Here is your problem: How many words can you make up from the letters which make up the words D-A-Y-T-O-N S-C-A-L-E-S? Come in and win. The contest is open to merchants and their clerks all over Canada and Newfoundland, who use scales. It costs you nothing to enter. Replies must be in before March 15, 1921. If you have not yet received circular with rules and entry blanks, write to-day to our Contest Department.

'RICE LEWIS' NEWS

—time "Henry" was being spring cleaned!

SHALER Roadlighters
"SILLS RITE-LITE" LENS

We sell JOHNSON'S and NORWESCO. Auto Products

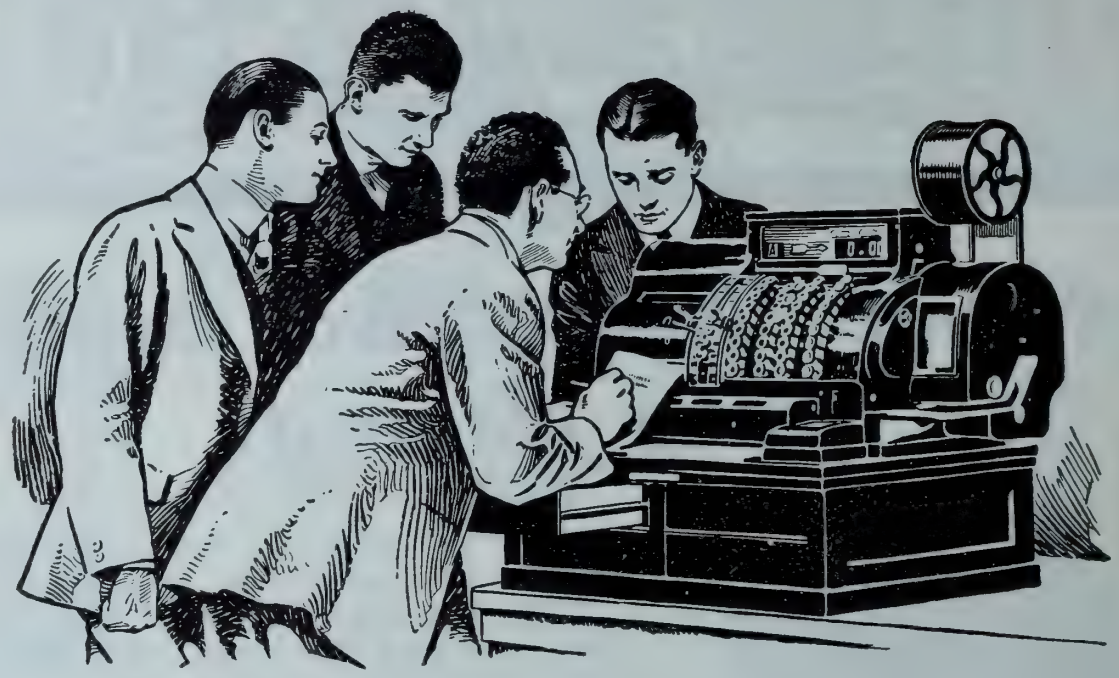
THIS has not been a very hard winter on cars from the weather standpoint, but on the other hand there have been a great many cars used this winter which ordinarily would have been jacked up and put out of commission. These cars have had several months of good hard wear and will now need overhauling before the spring season opens.

Now is the time to draw the motorists' attention to your auto "spring cleaning" lines such as Auto Enamels, Polishes, Lubricators, etc.

We carry a stock of Johnson's Auto Products including:

Johnson's Black-Lac, Auto-Lak, Top Dressing, Prepared Wax, Cleaner, Radiator Cement, Carbon Remover, Stop Squeak Oil, Hastee Patch.

Also Norwesco Products, O-Cedar Polish, Liquid Veneer.



Order your stock of

"Shaler Road Lighters" and Sills' "Rite-Lite" Lens, and be ready for spring trade.

Ask the "Rice Lewis" man, or write direct.

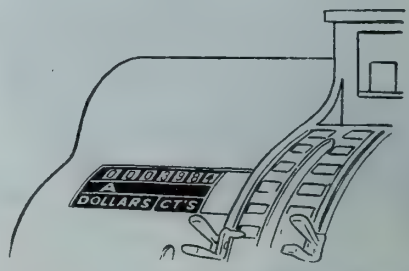
The record of each clerk

An up-to-date National Cash Register shows you exactly what each one of your clerks does every day. Adding counters on the register tell:

① How many customers each clerk waited on.



② The total amount of each clerk's sales.

These daily records show you which clerks are most industrious, which clerks sell the most goods, which clerks are most accurate.

They enable you to fix wages on actual selling ability.

They give you the figures needed for a bonus or profit-sharing system.

These clerks' records, together with the many other printed and added records made by an up-to-date National Cash Register, enable you to control your business.

This adding counter, at the left side of the register, shows that Clerk A took in $39.84 during the day. Similar counters show what the other clerks took in.

These adding counters, at the front of the register just above the cash drawers, show how many customers each clerk waited on, and the total number of customers.

We make cash registers for every line of business

Hatch
Garage Door Outfits

Exceptionally easy to apply and have full directions packed with each set. Slamming or sagging of the doors is impossible; nor can snow and ice interfere with their working easily and reliably.

The Hatch Garage Door Outfit is rich in selling points and easily closes the sales. Its performance is so reliable and satisfactory to the user that sales of Hatch Garage Door Outfits lead to more future sales and permanent business.

The Hardware Dealer in Garage Hardware has a splendid outlook for the future, as the use of motor cars continues to increase.

Canada Steel Goods Co., Limited
Hamilton, Canada

The Set Includes

- 3 Special Swivel Door Rollers.
- 22 Feet of Track.
- 3 Pairs Special Garage Door Hinges.
- 3 Stay Rollers (floor guides).
- 2 Extra heavy Garage Door Handles.
- 1 Safety Hasp (for fastening doors outside).
- 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles — two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

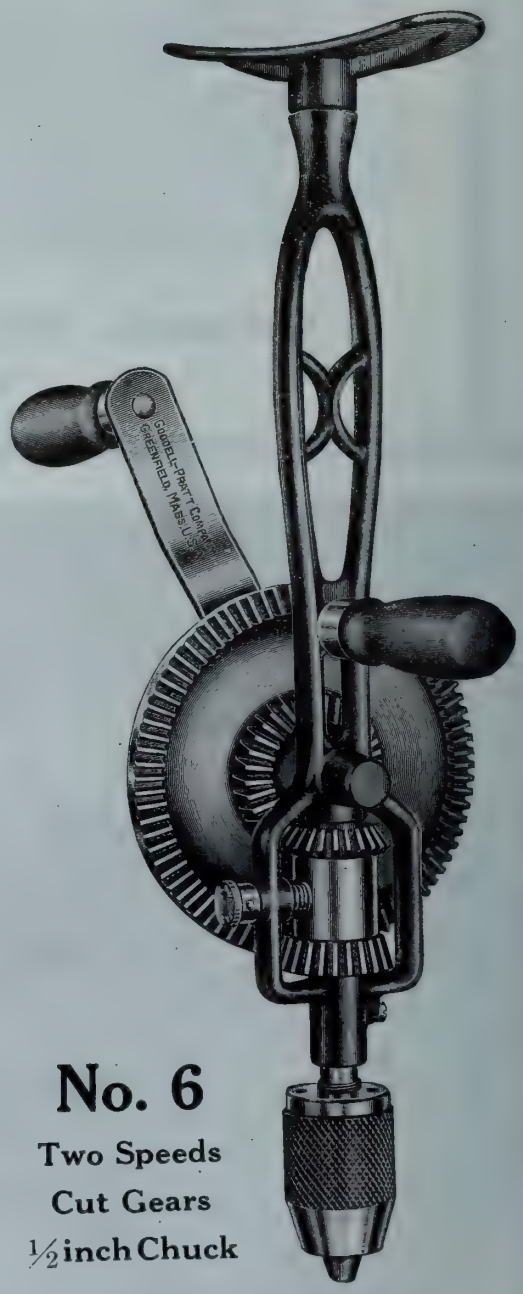
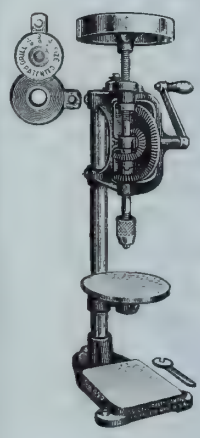
GOODELL-PRATT
1500 GOOD TOOLS



28 BREAST DRILLS

Far-sighted merchants can see the advantages to be obtained from concentrating on one **complete** line of Breast Drills.

The good variety of Goodell-Pratt Breast Drills enables the merchant to meet the demands of his trade for any particular type of drill and at the same time reduces the selling cost, consequently his profits increase.



Goodell-Pratt Breast Drills

are modern in design, strongly constructed, efficient in operation, have the quality the user demands, and will yield the profits the dealer expects —the logical result of the right goods, rightly sold.

Made the Hit of the O.R.H.A. Convention

No. 1918 Hangers with 1918 Round Track

No. 1918 Hangers are packed one-half dozen pairs in wooden case. No. 1918 Track is supplied in 3-foot lengths only. It is packed in 48 and 60-foot crates. A complete catalogue will show you many other good sellers in the S. & B. line.

1918 is the only self-cleaning track on the market. It will not hold dust or water. As shown in the sectional view, the carriage is protected from weather —from snow and ice, and accumulations that might interfere with smooth-running of the hanger in its track.

No. 1917 Hangers with 1918 Round Track

No. 1917 Round Trolley Hangers are made of best grade steel; wheels made of deep drawing steel, fitted with steel roller bearings, malleable loops and steel hasp. Packed one pair in carton, with two end stops and bolts, also instructions how to apply. Half, or one dozen, to case. Weight, per dozen pairs, 80 lbs.

These efficient, smooth-running hangers, and the round track, were the hit of the Ontario Retail Hardware Association Convention at Hamilton, Ontario, February 14 to 18 inclusive. Many visitors saw them and ordered them. We recommend them confidently, for satisfaction, to hardware dealers and consumers throughout the Dominion of Canada.

"Seafoam" Electric Washer

The WHIRLPOOL

Water Power Washer is a new "DOWSWELL" product designed to meet the demand for a Water Power Machine with a perforated rubbing board. Many people prefer this principle of washing so we offer the WHIRLPOOL after successful experimenting to produce the very best washer of this type. The WHIRLPOOL is up to the Dowswell standard.

The motor used is similar to our IDEAL, which insures strength, speed and endurance. It is the simplest and surest Water Motor made, and will operate on low or high pressure. There are no intricate or delicate parts to easily get out of order. All parts are standardized and interchangeable.

The tub is made of best quality cypress, heavily hooped and attractively finished. All metal parts which come into contact with water are heavily zinc coated.

The WHIRLPOOL is a quality product through and through, and we stand behind it to the limit.

Butterfield Tools

What About the Plants Near You?

There are plants near every hardware store tool department that send hundreds of miles away for tools, and order from catalogues because they don't know that the nearby hardware store has them. Is this happening to you?

Display your Butterfield tools. A post-card to the purchasing agent of plants near you should secure this business. Make it known that you have them. You can easily make the sale then on Butterfield's forty years of good tools.

The Long Life Line

THIS is the line of downright merit—the line that has built for itself a great reputation all over Canada, largely on the strength of its usefulness to Canadian women in their homes.

Women prefer Pearl Ware because they have found it a line long in life. Dealers in slack times have found Pearl Ware a real Life Line. It has pulled many a dealer safely over the "rough spots."

It is a sure-selling line. Stock up now and you will have to restock soon again. Its reputation sells it, and its solid value keeps it sold.

But of principal interest to you as a dealer is the fact it can be sold at a price that will bring you a ***good*** profit. And because it is such a steady-selling line it means ***steady*** profit.

Pearl Ware is the complete enameled ware line. There are well over three hundred articles to the line—everything any customer of yours could ever ask for—from tea cups to roasters, from wash boards and stock pots to pie plates or ladles. It is the complete line. Nothing bigger. Nothing better.

Quick Turnovers

Just as important to you as the profit there is in selling Pearl Ware is the importance of steady and quick turnover. Pearl Ware sells quickly and steadily. It means quick turnovers wherever stocked. Send us an order and see for yourself.

Get Closer to that Customer —The Farm Repair Shop

THE farmer of today is appreciating more and more the necessity for good tools on the farm. He must be able to make emergency repairs to farm implements *on the spot*. Minutes are precious at harvest time—in winter when the windmill goes wrong, etc. A trip to town may spoil a crop, or freeze a water system. He must own his own repair tools.

Every farmer is a real prospect for GTD Threading Repair Sets and Pipe Tools. You can sell him :

No. 311 *Little Giant* Screw Plate, threading bolts, nuts, rods, etc., from ¼" to ¾" diameter, USS Threads and corresponding sizes with SAE threads for automobile and tractor repairs.

No. 261A—a set of *Little Giant* Pipe Stocks and Dies, threading pipe from ¼" to 1" diameter.

GTD Pipe Wrenches, Cutters and Vises.

A set of GTD Hexagon Rethreading Dies for rethreading crossed and rusted threads (not for cutting new threads.)

These GTD Tools are essential on any farm. Why not pitch in and get your share of this business? We are ready and eager to cooperate.

Our suggestion: Send us the names of the live farmers in your vicinity, and we will gladly help you to sell them GTD tools. It will cost you nothing—and may open the door to some important new business for you.

Story for Week Dated March 5, 1921 **Hull in 1851** **Being No. 47 in the Series**

From The Tree To The Trade Includes E. B. Eddy Wooden-Ware

AMONGST the many marvels of wood-pulp papers, and indurated ware, and match manufacture at the Eddy plant the fact that the E. B. Eddy Company also manufacture a large amount of plain wooden articles is apt to be overlooked.

It ought never to be forgotten, however, that the late E. B. Eddy was a famous manufacturer of wooden stave pails, and tubs, and buckets in the early days of the plant at Hull. No more wooden stave pails and tubs are manufactured there now, for the far more lasting and attractive indurated ware has completely superseded them. But there are still the wooden framings for the many lines of Eddy Company Wash-boards to manufacture, and the wooden cases for shipping certain Eddy lines are also made at the Hull Factory.

In the manufacture of the wash-boards employment is found for an army of clever fingered boys who prove themselves exceedingly handy with hammer and saw. The wood does not require much sawing it is true, for it arrives at the assembling rooms in lengths for the particular jobs in hand.

But the boys grow adept at fitting the pieces of wash-board framing into place, and nailing them securely. Only the best, clear, and well seasoned wood is used for the wash-boards. As a result they are strong and lasting, not likely to warp or twist, and capable of withstanding the strain of many a hard Monday's wash, and helping materially the while. Most famous of all the Eddy Company wash-boards is the "Twin Beaver" with its indurated ware friction surfaces which do the work so perfectly, and last so long.

The Eveready Line with the Ever-steady turnover

Like automatic vending

EVEREADY Flashlights and Batteries sell with the certainty and regularity of merchandise in a slot-machine.

Successful Eveready dealers have a yearly turnover of not less than 4 on cases and 8 on batteries.

The time of your salespeople is saved, because the buying public knows that the name "Eveready" on a flashlight or battery is the guarantee of quality. All you need do is display merchandise bearing this nationally known trade-mark.

Experience has shown us what the fastest-selling numbers of the line are, and we have dropped all others. You can't go wrong with an Eveready assortment. Ask one of the jobbers in your territory to show you the line. If you don't know who the nearest Eveready jobber is, we'll tell you. Do that now—it means money to you.

STRENGTH TEST

"Wellworth" aluminum cooking utensils are either stamped in huge presses or cast in our own foundry. They are not spun, because spinning leaves thin spots, which weaken the walls of the article. The demonstration shown in the illustration of five men weighing 746 pounds standing on a "Wellworth" aluminum tea kettle is an eloquent and final demonstration of the quality that is built through and through our utensils. It would be much cheaper for us to spin all our ware, but this would not be consistent with our policy of supplying only goods that will give satisfaction.

Look for the Wellworth trademark to make sure you are getting strong, 99% pure aluminum.

ATKINS
STERLING QUALITY SAWS

REASONS WHY YOU SHOULD SELL ATKINS STERLING QUALITY SAWS

Sterling Quality Steel is our exclusive formula, and the best saw steel made

Atkins Hand Saws are ground the two-way taper, that is, the cutting edge is the same thickness while the back tapers evenly from the handle to the point and from back to the cutting edge. See illustration.

Segment Grinding

Atkins Cross-Cut Saws are Segment Ground. This gives our saws clearance with very little set. The illustrations show the difference between Atkins process of SEGMENT GRINDING and the imitation.

The Imitation

Atkins Sterling Quality Steel receives our special process of Gas Tempering, which makes it tough and stiff, without being brittle. This is the reason why Atkins Saws will hold an edge longer.

Sell Atkins Saws and you will learn the meaning of "The Finest on Earth."

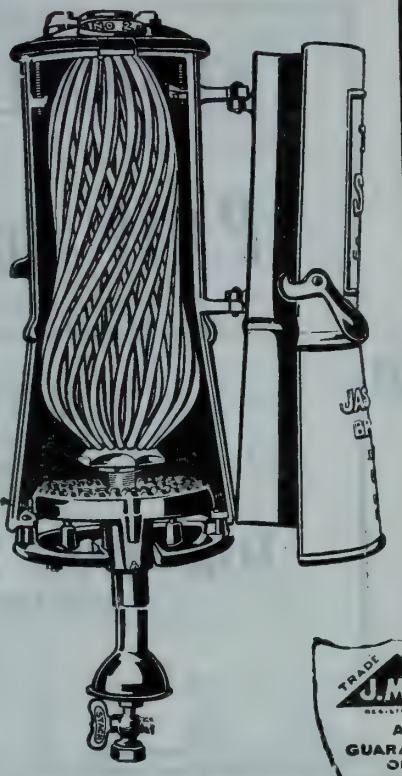
TRADE MARK J.M.T. A GUARANTEE OF QUALITY

True Economy



Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take note of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with smaller consumption of gas—that's true economy.

BALE TIES

NAILS WIRE

Laidlaw

Time-Tested Efficiency

Laidlaw Bale-Ties are made from Bessemer Steel. Our Ties have been thoroughly tested in general use throughout the Dominion and most of the foreign countries of the world. Practical use has convinced buyers of Laidlaw efficiency. This has made Laidlaw Bale-Ties the

Dominion and World-Wide Choice

Strong, reliable and of practical design, Laidlaw Bale-Ties make good and prevent broken bales and consequent commercial loss. Laidlaw Bale-Ties are made in "Single-Loop" and "Cross-Head" styles of fastening.

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

"Crisp Comments at the Convention"

"Let us throw the hooks into our jobs instead of into each other."

B. J. McCormick, general sales manager Canada Foundries & Forgings, at Ontario Retail Hardware Convention.

"By watching his trade paper the retailer will be able to buy and sell more intelligently."

Ed. Wanless, retiring president Ontario Retail Hardware Association.

"This is a time when the machinery of business needs to hit on all four."

C. A. Smith, Frost Steel & Wire Co.

"Business men should not wait to see what the other fellow is going to do. They should be up and doing—stand ready to give your business stimulation, a little hand cranking so to speak, when the self-starter refuses to work."

Nelson Mills, of Mills Hardware Co., newly elected president Ontario Retail Hardware Association.

"The hardware trade has not suffered nearly as much in depreciation and volume as many other lines of business, and we can look forward after the first quarter of the year to a normal state of affairs again."

Col. Robert Starke, of Starke-Seybold Co., president Canadian Wholesale Hardware Association.

"The supply of goods will be better this spring. The retail hardware merchant to-day can save a lot of money by mixing shopping with his buying."

George May, of May Brothers Hardware, vice-president Ontario Retail Hardware Association.

"Speaking personally, we have never stopped buying goods. We have deliberately set ourselves within the last few months to see that our stock is complete in all its branches. Don't forget that Canada is to-day in the premier position of the countries of the world."

S. H. Alexander, Wood, Alexander & James, wholesale hardware.

"We are ninety days nearer good times than we were three months ago."

Robert Hobson, president Steel Company of Canada, Ltd.

"I cannot do better than refer you to the article on page 58, February 12 issue of Hardware and Metal, outlining the views of Mr. Bamford, sales manager of J. H. Ashdown Hardware Co., in order to express my views on the situation."

James Hardy, secretary Canadian Wholesale Hardware Association.

The consensus of opinion at the 16th Annual Convention Ontario Retail Hardware Association held at Hamilton, Ont., Feb. 14-17, and fully reported in Feb. 19 issue HARDWARE AND METAL, was that good business will be experienced within the next 60 days. It will not be easy business. Every manufacturer and wholesaler will have to work for his business in 1921. Truly, 1921 will reward fighters.

Necessity will force a large volume of buying during March and April, but who will get this business? The retail *hardware merchant is going to mix shopping with his buying this year.* The retail hardware merchant is taking his time with his spring and summer buying. He is looking around; he is looking up all sources of supply for information and prices. The changed conditions in the hardware trade make it absolutely certain that the hardware man's Annual Spring Buying Directory this year will be consulted more carefully and more frequently than in any previous year. The Canadian hardware trade is more responsive to advertising to-day than it has ever been in the past. The firms represented in the 33rd Annual Spring Buying Directory of HARDWARE AND METAL will get the best results they have ever had from representation in the Annual Buyers' Guide. Used by every wholesaler, over 90% of the retailers and also by 900 hardware sections of department or general stores. No free distribution. Subscribers pay in advance, because this Annual Buyers' Directory is a vital part of the buyer's equipment, and is used for many months as a guide and reference number. We send out a total distribution of 4,560 copies. Two pages, $120; full page, $65; half page, $36; quarter page, $21; eighth page, $12. *"1921 business requires solicitation."* This is your opportunity to solicit the business of practically the entire hardware trade of Canada at a cost of less than 1½c per hardware firm, for full page (7¼" x 10") message. Forms now closing. Last form closes March 12. *Don't forget that 1921 business requires solicitation,* and act *NOW!*

Possibly you have experienced the vexations caused by a constantly sagging clothes line and rusty, shrieking pulleys, which become obstructed either by knots or snow or ice.

Your customers will appreciate an effort on your part to relieve them of such troubles and incidentally it will be financially profitable for you.

AERO Clothes Line Pulleys manufactured of waterproofed hardwood are 6 inches diameter, with deep V-shaped groove, giving perfect friction to varying diameters of line, are self-lubricating, rustless, knot-passing and will run noiselessly under all weather conditions, and are guaranteed for ten years, if oiled annually.

The **Aero** method of installation as per above cut is a departure from common practice, but a glance at it will convince you of its practicability in securing a taut clothes line at all times without splicing the line itself. If desired, the line and pulleys may be taken in after use.

The Aero Line Support prevents sagging in the center when carrying heavy loads.

Your jobber probably has these in stock. If not, communicate with us direct or with our Western Agents—H. L. Perry Co., Ltd., Winnipeg, Man.

"Retailers Have Suffered Sufficiently"

This Was The Opinion of a Recent Convention of Merchants in Toronto Who Disagreed With Policy of Remarking Prices on Replacement Value Basis—Obvious Duty of Hardwaremen is to Pass on Price Advantage to the Consumer, Say Leading Hardware Merchants

WHILE there has been little evident disagreement on the part of hardware merchants, with the policy of re-marking prices on the basis of replacement values rather than maintaining prices on the basis of cost where declines have occurred, there are no doubt many cases where this policy is not being followed. Information given elsewhere in this issue shows that after a comprehensive survey of conditions in all the provinces of Canada, the consensus of opinion of bank managers is that price-reductions are not being made as far as warranted by conditions. This is a highly important matter to the hardware trade of Canada at the present time, and the policy of re-marking prices on the basis of replacement values is being followed by many of the leading hardware merchants, but there are a certain number who disagree with this policy, some even suggesting that prices be upheld for thirty days after a decline. Concerted action was taken against this policy of passing on any price advantage to the consumer by a recent gathering of merchants in Toronto who took the stand that the retail trade has suffered sufficiently. A number of prominent hardware merchants interviewed on the subject have expressed to Hardware and Metal some interesting views as follows:—

Only One Answer

"In my humble opinion the question of what should be done at the present time in regard to hardware prices admits of but one answer, and that is to keep pace with the falling markets by adopting the lower prices just as quickly as they appear," said Thos. A. Jones, Vice-president Cowan Hardware Co., London, Ont., in discussing the matter.

"Let us look at the situation frankly and treat it in exactly the same manner as we did when the shoe was on the other foot and prices were rising far more rapidly than they are now on the down grade.

"If there were any merchants who did not follow the rising market that was their own option entirely (personally, I know of none) but they will have no option in falling in line with the new prices because if they have any opposition at all they will be forced to get in line or go out of business. What is required to-day is the creation of confidence in the buying public and the quicker this is accomplished the sooner things will adjust themselves and trade get back to normal.

"The buying public bought like fools when prices soared because money came easy to them, and just as readily was it spent. What was more common than for a customer to say, 'Why, that's twice what I paid last time, but I suppose everything has gone up; here's your money?' Then what more natural, now that the wheels of commerce are slowing down, than for the customer to look around before buying and to spend his or her lessened income to the best advantage, and the merchant who is not up to date in his prices will be the one to suffer.

"I have no hesitation in saying that practically as much money can be made this year and next if the dealer will devote careful attention to buying, watch his expenses, increase his store service and efficiency (and this can be done with no extra expense but with a little more hard labor of the brain) and advertise judiciously—above all, advertise, because the advertisements are being read to-day as they never were before.

"Personally, I have no fears for 1921, with its lower prices, because it will put us all on our mettle, and anyone with red blood in his veins certainly enjoys a good hard struggle for business, especially if his competitors are anything like the good fellows in the hardware game in London."

Duty of Hardwaremen is Obvious

Similar views are expressed by a Western hardware merchant. C. C. Falconer, Winnipeg, says: "To us the duty of every reputable hardware dealer is so obvious that either argument or discussion displays evidence of weakness. The article in Hardware and Metal of January 28th relating the experience of a merchant who failed to recognize his proper duty to his customer was in itself the real answer to this question.

"We heartily agree with W. A. Walker, who, in the same article says, 'The customers' confidence is required.' We think the customers' confidence is not only required but is absolutely necessary, not only at this time, but at all times, and the firm which betrays that confidence is not only unworthy but is at the same time committing business suicide.

"Most decidedly we say give your customers the immediate benefit of a new lower price as you receive it without regard to what your stock may be at that time, and by doing so retain confidence, encourage buying and a quicker return to normal business."

Duty of the Newspapers

"It is our policy to at once re-mark goods on which there has been a decline," said A. H. Stelck, Sutherland-Stelck Hardware Co., Dauphin, Man., to Hardware and Metal. "This is in our opinion the only fair method under the present circumstances and will do much to bring back confidence in the retailers. The talk that retailers are holding up prices is, in our opinion, unjustified, and is not according to the facts. Hundreds of retailers have sold and are selling certain lines of goods that cannot be replaced at the price.

"The buying public must realize that prices have become stabilized before business will resume its normal course. Meanwhile, if the daily press would engender a little optimism it would justify its existence at the present time."

Policy of a Maritime Merchant

J. S. Neill, of James S. Neill & Sons, Limited, Fredericton, N.B., states to Hardware and Metal that the policy of re-marking goods just as soon as the price is changed has been followed by that firm. "This, we think, is the only fair way," says Mr. Neill, "as when prices were on the upward move we did the same thing and took our profits on what goods we had on hand. We are, therefore, willing to sacrifice an equal amount, but are endeavoring to keep our buying and our stock down to the lowest point, and are simply buying from hand to mouth. This, we think, is the only sane policy to adopt, and if every hardware merchant in Canada would adopt it they would find that they would retain the confidence of the public far better than if they are trying to keep the price up."

George F. May, of May Brothers, West Toronto, is also basing selling price on the market price prevailing, regardless of cost paid or the amount of stock on hand.

Oppose Amendment re Marking Silverware

Proposed Amendment to Gold and Silver Marking Act Now Before Senate Would Compel Manufacturer to Stamp Each Article With Proportion of Gold or Silver and Fineness of Metal

As we go to press Hardware and Metal is advised that at a representative meeting of manufacturers of silverware held in Toronto late this week, a resolution was passed disapproving of the proposed amendment to the Gold and Silver Marking Act as outlined in this article. Manufacturers from both Toronto and Hamilton were in attendance at the meeting and the resolution was forwarded in the name of the Toronto manufacturers who are members of the Canadian Manufacturers Association. There are a limited number of silverware manufacturers outside of Toronto and Hamilton but these have supported the action taken and have wired or written their disapproval of the proposed amendment.

A PROPOSED amendment to the Gold and Silver Marking Act will, if adopted, be a stringent regulation upon the manufacturers of such lines, in as much as they will be compelled, in most cases, to stamp upon each article of silver or gold, as outlined herein, the fineness of the metal in the article and the proportion of metal in each. The section of the Act to which this amendment applies reads as follows:

Section 10. This section applies only to plated articles wholly or partly composed of the materials known to the trade as "rolled gold plate," "gold filled," "gold electro-plate," "rolled silver plate," "silver filled," "silver electro-plate" or of such materials of like nature as are defined and designated by regulations made by the Governor-in-Council.

2. There shall not be applied to any such article any mark other than a mark authorized by this section.

3. If any such articles has applied to it any mark it must have applied to it a trade mark registered in accordance with the Trade Mark and Design Act.

4. In addition to such trade mark there may be applied all or any of the following marks:

(a) A mark indicating truly and correctly, in accordance with the provisions of subsection 1 of this section, the designation, as known to the trade or as established by regulation aforesaid, of the material;

(b) Numerals intended to identify the article or pattern and not calculated to mislead or deceive;

(c) The name or initials of a dealer;

(Amendment). (d) A mark indicating truly and correctly the fineness of the gold and silver in the article and the proportion of each to the gross weight, at the time the article is sold or delivered by the maker.

5. The Governor-in-Council may make such regulations as he deems necessary or expedient for defining the plated articles to which this section shall apply and for designating materials of which such plated articles are composed.

Not Aimed at Silverware Manufacturers

It will be noted that the amendment applied to "rolled gold plate," "gold-filled," "gold electro-plate," "rolled silver plate," "silver-filled," "silver electro-plate." Discussing this matter with the head of a firm manufacturing such lines it was stated to Hardware and Metal that it was unlikely that the regulation was being aimed at the manufacturers of ordinary silverware, but rather at some makers of gold rings and such articles, who have been guilty of mismarking such articles.

It was pointed out by this official that practically all the lines handled in the usual silverware trade of the hardware store were electro-plated and therefore would come under the new regulation. Showing how this regulation would be a hardship on the manufacturer, it was stated that only the better grade articles were now weighed after being immersed in the silver bath. The cheaper lines are left in the bath for the usual length of time necessary to take the required coating of silver, but they are not finally weighed. The enforcement of the Act would make necessary the weighing and stamping on each article of the proportion of gold or silver to the gross weight and the fineness of the metal.

A meeting of interested manufacturers is being held in Toronto this week to discuss the matter.

W. Ryan, Dominion inspector of this department, stated to Hardware and Metal that the matter would be thoroughly discussed and it was probable that when the amendment was finally adopted it would be much different from that now outlined.

"Dick" Terrill Says Cut Out Squandermania

Industry is looking to the retailer, said J. R. Terrill, of Caverhill, Learmont & Co., Montreal, to Hardware and Metal. A buying movement by the public is desirable in order to return to prosperity. "Confidence" should be our motto. The purchasing value of our dollar is advancing every day, which will mean a decided improvement in building trades within the next few months, but let there be be no more "squandermania." A dollar saved in the expenditure of a Government department is of more value to the country than ten dollars extracted from industry by taxation. It is more of the simple, straight life we need, that and honest work will do more for Canada than all the politicians.

Bathroom Fixtures Have the Best Display Space

Pays to Keep This Line Out Where People See It Says Purdom Hardware Co., London, Ont.—Appeal to Both City and Farm Trade—Fixture Cabinet Shows Stock to Good Advantage—Some Customers Make a Collection of Certain Styles of Fixtures—Make Prices Plain.

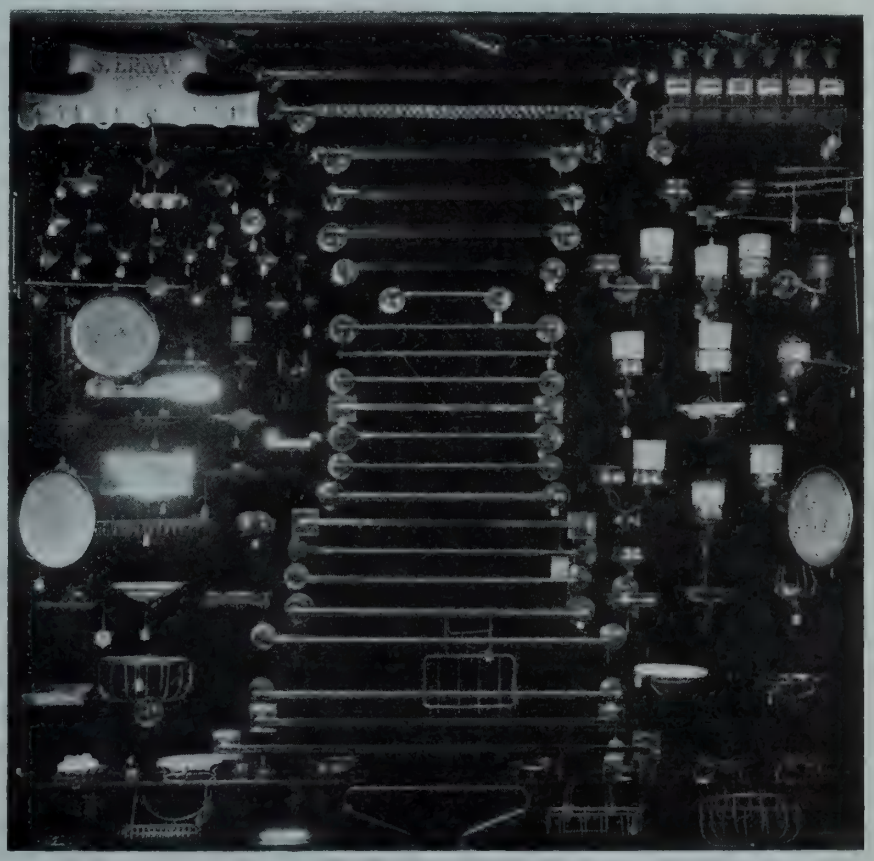
BATHROOM fixtures have won for themselves a premier place in the display space of the Purdom Hardware Company, at London, Ont. In a big special wall stand right up at the very front of the store as one enters they make a showing that is not only striking but very attractive. This is especially so at night, when the lights in the display case are turned on and the fixtures shine forth in all their glory of white enamel and nickel plate. Many a sale can be traced directly to this attractive wall cabinet.

"We do not give bathroom fixtures the very best place in our store without a reason," said T. H. Purdom, Jr., to Hardware and Metal. "We have found that it pays and pays well to keep this line out where people can see it the very first thing when they are coming in and the last thing when they are leaving. Our display is aimed to attract attention and draw business, and it has been doing both in a way that has been most satisfactory. We aim especially to get the eye of home makers, and we find that both men and women find much of real interest in the display."

A General Appeal

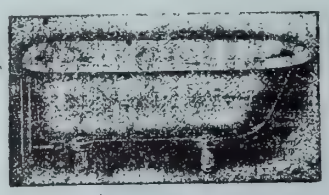
Mr. Purdom says he finds that the display carries a general appeal to both country and city people, in fact, to everyone who has a home. Farmers are liberal buyers of bathroom fixtures, and in the city where thousands of dollars worth of new residences are constantly being erected there is an all year round demand for goods of this kind.

"We find," said Mr. Purdom, "that all classes of people are interested. There is, for instance, the man who is building a new house. He comes down with his wife to see about various things required for the new home and the very first thing that happens when they get inside the store is that they stop to look at the bathroom fixtures. This is a good thing in itself, especially if the clerks happen to be busy for a few minutes, as often happens. The man and his wife have found something of real interest to them, and something that will help make their new home better and give a lifetime of service. Very often we find people talking over bathroom fixtures when we get to them. Had it not been for the display case they might have forgotten all about them and it is pretty safe to say that they would not have had the same interest in them. Very often we find that the man and woman have 'sold' themselves on the line without the clerk having had to say a word.



"There is another point also. We make a special feature of carrying a quality stock. It is obvious to prospective buyers at a glance that the lines on display are of unquestionable quality. Right at the start then they are unconsciously impressed with our store, our stock and the service they may expect. This may seem a small thing but it is really big when results are considered."

Valuable to the Store



From no other standpoint than merely display Mr. Purdom considers his fixture cabinet a valuable asset to the store.

"People," he said, "like to see something when they go into a store. I am not boasting at all when I say that our display of bathroom fixtures looks well. We take pains to see that it does. The fixture was selected and placed with a particular object in view and it is accomplishing that purpose. We see to it that the enamel is kept spotless and the nickel shining. People appreciate this and it is certainly a factor in increasing sales."

Mr. Purdom says that selecting a stock of bathroom fixtures is an important matter. He has found that it does not pay to carry "cheap" goods. People, he says, are ready and willing to pay fair prices for fixtures that are worth while. They are not buying bathroom fixtures every day, and when they buy they want something that is going

This wall panel showing a wide range of bathroom fixtures is kept right at the front door of the Purdom Hardware Company store, London, Ont. The fixtures are kept well polished and whether in the day or under artificial light they present a striking appearance. The display is such as will appeal to both city and country customers. It has been found that this display is a popular centre of interest to customers looking around the store prior to purchasing.

THE MODERN BATH TUB

Our Plumbing Department is Equipped in every respect to install any kind of Plumbing in old or new buildings either in Country or Town.

Your residence fitted with modern Plumbing Fixtures add real value to the building and assists the housewife more than any one can imagine who has not previously experienced the convenience it offers.

IF YOU ARE BUILDING A NEW RESIDENCE and feel that you cannot afford the complete equipment we advise having the enclosed pipe work done at least, your job can then be finished at any time with less expense and no ripping of your floors.

We will gladly go into the matter with you at any time and furnish an estimate without charge or obligation.

THE PERRY HARDWARE CO.

The "Oldest" and "Biggest" Hardware in Southern Sask.

Bathroom Fixtures

Most people are renovating the home at this season of the year, and likely the Bathroom requires New Fixtures.

The "Snow-white Porcelain Outfits"

are the very latest productions, being enamelled on cast iron; are strong, sanitary and sensible; will stand the wear and tear of years. Very easily kept clean, and will add brightness to the Bathroom.

Towel Bars in Enamelled and Glass 18" 21" and 24" long

Soap Dishes, Toilet Paper Racks,

Robe Hooks,

Tumbler and Tooth Brush Holders, both Single and Combination, Etc.

We also display a full line of the same articles in Nickel-Plated on Brass, to suit those who wish to match existing Fixtures.

Special Line in Plate Glass Shelves

5" x 18", complete with Pair of Nickel-Plated Brackets . . . $1.50 each
5" x 24", complete with Pair of Nickel-Plated Brackets . . . 1.75 each

Everything in Hardware

Rice Lewis & Son, Limited
VICTORIA STREET

Established 1847 Phone Main 4040

Some samples of bathroom fixture advertising are shown herewith. The ad by Perry Hardware Co., Estevan, Sask., is soliciting installation work for the plumbing department, pointing out that modern plumbing fixtures add value to the building. The ad by Rice Lewis & Son, Ltd., on plumbing fixtures points out that many people are renovating their homes at this time of year and are good prospects for such fixtures. Illustrations are used and prices quoted.

to be in keeping with their home and that will give service and keep on looking attractive.

Making a Collection

"One thing we often find," said Mr. Purdom, "is that people, especially those who are in comparatively moderate circumstances, make what might be called a collection, that is they buy one fixture at a time. Quite a few women do this. Very often it will take them five or six years to get all the pieces they want, but we find that they always come back to us for what they want. Many people who are remodelling old houses and putting in a bathroom, buy a piece at a time, especially farmers."

Towel rods, soap dishes, glasses and nickel plated hooks are all large sellers Mr. Purdom says, and there is a good demand for mirrors.

In addition to the splendid store display, window displays are frequently arranged and the firm does not neglect to link up its store and window displays invariably shown, and in all advertisements the prices of the articles featured are given in large type.

They Want to Know

"Price is the first thing the buyer wants to know," said Mr. Purdom. "and we want them to know. There is no possibility of mistaking our prices. We make them very prominent and we find it pays to do so.

Mr. Purdom says that women are particularly interested in bathroom fixtures. Every woman, he says, whether she lives in the country or in the city, wants to have a nice bathroom, and takes special pride in the fixtures in it. There is a big market for this line and for the hardware merchant he says it offers excellent possibilities and profits.

Mass Production By English Manufacturers

Sheffield Cutlery Makers Open for Business at Fixed Prices and Guaranteeing Prompt Delivery—Prices Falling Considerably But Unlikely That Pre-War Cutlery Prices Will Return

FREDERIC SARA, manufacturers' agent, Calgary, Alta., has returned from a four months' business trip to England, where he spent considerable time with the leading cutlery and steel manufacturers. Discussing the situation in England with Hardware and Metal, Mr. Sara stated that the leading cutlery and steel manufacturers are going in for mass production and are installing machines to do away with much of the hand labor. Sheffield makers of cutlery are now said to be open to take all orders that come and they are also ready to take orders at fixed prices and guarantee prompt delivery. Prices, according to Mr. Sara, have been falling to a considerable extent during the past four or five months, although he is of the opinion that we will never again see pre-war prices on English cutlery.

During the past few months workmen were said to be showing a much better spirit and are now more ready to negotiate with employers and arrive at an amicable arrangement regarding wages.

Mr. Sara has taken on a number of new agencies.

While on his trip abroad he visited Belfast and Lisburn and saw many signs of the destruction caused by the riots in Ireland where conditions are very unsettled at the present time.

For the March Advertising

The first issue of Hardware and Metal each month will carry suggestions for the local advertising of retail hardware merchants for that month. Illustrations and descriptive matter will show how other merchants are developing seasonable trade. These will deal only with those lines which are particularly seasonable and will supplement the advertising suggestions shown from time to time elsewhere in the respective issues.

PREPARATIONS for early spring business are now being made and plans should be prepared for the covering of all seasonable lines well in advance. The suggestions illustrated herewith contain a number of hints of value in preparing copy for the March advertising. On the left is shown an ad. devoted to carpenters' tools. Much building is anticipated in many sections of the country and after several years of quiet business in builders' tools and hardware, the merchant should not overlook the possibilities which a resumption of building will bring in these lines. A number of tools are dealt with in this ad, illustrated, briefly described and price marked. It is by **Stanley Mills & Co., Hamilton, Ont.**

WHEEL GOODS

With the snow fast disappearing and streets and sidewalks becoming bare, sleighs are being put away and the wheel goods are being brought out. This ad by **Ingram & Davey, Ltd., St. Thomas, Ont.**, features a number of lines of wheel goods for the children, including velocipedes, baby carriages, waggons, bicycles, automobiles, hand cars, etc., etc. A number of other facilities for the amusement of the children are also shown, these including baby swings, walkers, lawn swings, roller skates, wheelbarrows, etc. Such lines will shortly be coming into use for the spring and summer months and an early start on the advertising showing the new lines being offered will do much to start this business rolling.

SPRING CLEANING

With the early approach of mild weather, the housewife's mind turns to spring housecleaning, and she should not be allowed to overlook the many facilities for lightening the labor in this work, which are to be found in the hardware store. The ad by **Northern Hardware Co., Edmonton, Alta.,** deals with wall coatings, polishes, door mats, brooms, wash boilers, kalsomine brushes, washing machines, etc. It also deals with step ladders, gardening tools, carving sets, electric lamps, etc. Each line is illustrated and described. It presents a group of articles all of which should have a strong appeal for the housewife about this time of year.

WALLPAPER

Making the point that it will soon be time to think of freshening up the rooms with a new coat of wallpaper or kalsomine, an ad by **Ross Hardware Co., Druid, Sask.**, reminds customers that the store has a good stock of wallpaper on hand for spring requirements, in many attractive patterns, with border and ceiling. "Kalsomine is easy to apply and is very sanitary. It may be had in any shade desired. Ask for color card which shows you how to decorate the interior of your home at very little expense."

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, MARCH 5, 1921

IT IS difficult to believe that there is much wrong with the business fabric of a country whose total bank deposits in 1920 amounted to $1,978,763,102, being an increase of $100,000,000 over the total for the previous year. Savings also increased more rapidly than current loans in that period so that there is plenty of evidence of sure and healthy growth in Canada's resources. More work and constructive thought is all that is required.

* * *

RUMORS regarding probable tariff legislation to be announced in the forthcoming Budget of the Federal Government have it that Canadian import duties on plates will be increased from the present rate of $3 to $7 per ton. Requests for prompt delivery of outstanding orders of U. S. plate by Canadian firms is said to be based to some extent on the rumored action outlined. It will be several weeks yet however before the Federal Government gets down to a discussion of the Budget and no doubt there will be many such reports in circulation before it is finally announced.

* * *

PRICE cutting on iron and steel seems to be a popular diversion these days in the hope of increasing the volume of business. The latest to take such action are the pig iron producers of the Cleveland district of Yorkshire. A cut in prices of all Cleveland pig iron, amounting to 45 shillings a ton is said to have been made in an effort to revive the industry from its present state of stagnation. It will be interesting to note if this action brings any better results than were experienced recently by the independent mills in the U. S.

* * *

THE composite market average is a quick way to get an idea of prices. This represents the average of fourteen iron and steel products. Over a period of seven years they stand: To-day, $47.10; February 16, 1921, $48.36; January, 1921, $51.73; November, 1920, $63.75; February, 1920, $65.63; February, 1914, $23.52. If you want to know at once how things stand as compared to a year ago, there it is $47.10 as against $65.63, or a drop of $18.53.

* * *

PRICE tendencies were down this week in several steel markets. The law of supply and demand is at work and greater than that is the desire of a good many steel merchants to clear out their stock. There was more steel held in the country than was generally believed. In a rising market such as prevailed for about a year and a half, terminating six months ago, it is easy to sell, and about nine out of every ten buyers do things they wouldn't do in normal times. The liquidation of high-cost stocks is very advisable, even if accomplished at a loss.

Offensive Weapons Legislation

A THOROUGH study of the new regulations respecting the sale and ownership of firearms and other weapons should be made by every hardware merchant as a number of technical points are involved on which the customer will want information. The regulations are set forth concisely in this issue.

Among the important points it will be noted that for knives, metal knuckles, skull crackers and such weapons a permit is required only when these are carried upon the person and not when they are left in the home or other premises outlined. On the other hand, all firearms require a permit no matter where they are kept, with the one exception of shotguns now owned by British subjects. Penalties are provided for those who fail to secure permits, for those who give or lend such articles to others not possessing a permit, those who fail to keep a detailed record of a sale, those who neglect to send a copy of such record by registered mail to the issuer of the permit and those issuing permits who fail to keep a copy of permits issued for checking purposes.

It should also be noted that permits are not good beyond the jurisdiction of the official issuing, nor in any case after a period of a year from date of issue. Manufacturers and wholesalers, along with military forces, peace officers and immigration officers are exempt from the regulations. A number of rulings secured by Hardware and Metal on technical points raised by some in the trade are also outlined in the article in this issue.

As Others See Us

CANADA has 800,000 homes wired for electric power and we stand second among the nations of the world in respect to available energy through the medium of water power. What more potent argument need there be for the future development of electrical trade in this country? In addition, Canada's unique banking arrangement, consisting of eighteen chartered banks and 4,000 branches, provides a better basis for procuring loans on which to further business enterprise than prevails in many other countries. A U. S. manufacturer who recently visited Canada made the statement that the variation in interest rates on such loans was only about 1-2 per cent in Canada compared to a variation of 2 to 3 per cent. in the U. S. This is regarded as an important factor in favor of the Canadian retail merchant. This official also spoke of Canada's splendid railway system which makes possible the rapid development of rural districts and which is a direct aid in developing the country commercially. Canada's importance from an agricultural standpoint was emphasized by the statement that our agricultural products are now worth two billions of dollars annually. Canada's splendid spirit of achievement and its modest efficiency in handling even the biggest of problems were referred to as important elements in guiding the future of this country.

This comment coming from a manufacturer of the U. S. who has been investigating conditions in Canada reminds us of the poet who longed that we might have the gift of being able to see ourselves as others see us. If such a gift could be invoked it would doubtless show many of us that there is little or no reason for entertaining fear as to the commercial future of this country. Merchants should endeavor to get this point of view because it will help that spirit of confidence which will speed a return to normal trading conditions.

New Regulations re Purchase and Ownership of Firearms

Many important points concerning the procedure and liability of dealers and purchasers of firearms and other weapons are dealt with herein. This is a Federal enactment and applies to all parts of Canada.

(Clip out this page and keep it for reference)

THOSE NEEDING PERMITS

Permits on form 76 must be held by:

(1) Those who have upon their person elsewhere than in their dwelling house, shop, warehouse, counting house or premises or are carrying concealed a sheath knife, bowie knife, dagger, stiletto, metal knuckles, skull cracker, or other offensive weapon that may be concealed upon the person.

(2) Those who have in their possession any cannon, machine gun, rifle, gun, revolver, pistol, bomb or other firearm or any air gun or any device or contrivance for muffling or stopping the sound of the report of any firearm, without having a permit therefor, which permit may be issued in the same manner, by the same persons and as near as may be in the same form as in the case of other permits referred to in this section; provided that no British subject shall be required to obtain a permit with respect to any shotgun now owned by him.

* * *

LIABILITY

The following persons are guilty of an offence and liable on summary conviction to a penalty not exceeding $100 and costs or imprisonment for three months, or to both fine and costs and imprisonment.

(1) Those who have not secured permits as outlined above.

Giving or Lending

(2) Those who sell or without lawful excuse give or lend any such offensive weapon, firearm, air gun, device or contrivance to anyone not holding a permit.

Dealers' Record

(3) Those who in case of a sale neglect to keep a record of such sale, the date thereof, name of purchaser, such sufficient description of the weapon, firearm, air gun, device or contrivance sold as may be necessary to identify it, the date and place of issue of the permit and the name and office of the issuer of the permit.

Duplicate of Record to Issuer of Permit

(4) Those who in case of sale neglect to send a duplicate of such record by registered mail to the person who issued such permit or neglects to endorse upon such permit the date and place of sale, the said description of the weapon, firearm, air gun, device or contrivance and the name of the vendor.

Neglect to Keep Duplicate of Permit

(5) Those who being authorized to issue a permit issue them without keeping a duplicate thereof as a record, or having issued a permit fails to keep any record received by him of sales of weapons, firearms, air guns, devices or contrivances to the holder thereof.

Aliens

(6) Those who being aliens have in their possession any weapon, air gun, device or contrivance aforesaid without having a permit therefor, which permit may be issued in same manner, by the same person and as near as may be in the same form as in the case of other permits referred to in this section.

(7) Those who issue a permit without lawful authority.

* * *

SECURING PERMITS

Permits may be secured from the officials named, on personal application or application by letter, such letter stating the type, calibre or other description of the weapon to be purchased.

Charges for Permits

A fee of $1 is being charged by some officials for the issuance of a permit, though no charge is being made in other cases. This is left to the jurisdiction of the official issuing permit. No fee is prescribed in the Act.

THOSE AUTHORIZED TO ISSUE PERMITS

Upon sufficient cause being shown, any officer of the Royal Canadian Mounted Police or commissioner of Dominion police or superintendent of provincial police or stipendiary or district magistrate or police magistrate or acting police magistrate or sheriff or chief constable of any city, incorporated town or district, municipality, or any person authorized under the law of any province to issue licenses or permits to carry firearms, may grant any applicant therefor, as to whose discretion and good character he is satisfied, a permit in Form 76, for such period not exceeding twelve months as he deems fit, but such permit shall not be good or have any force or effect beyond the limits within which the person granting the same has jurisdiction or has power to exercise and perform the duties of his office.

* * *

EXEMPTIONS FROM THE REGULATIONS

Manufacturers and Wholesalers Exempt

Nothing in this section shall apply to the having upon his person or the carrying by any member of His Majesty's Naval, Military or Militia Forces, or by any peace officer or immigration officer of any weapons, devices or contrivances which he is by law permitted or authorized so to have or carry, or to any bonafide sale made by any manufacturer of or person trading wholesale in such weapons, devices or contrivances to any person bonafide dealing in such articles and having an established and fixed place of business.

* * *

POLICE AUTHORITY TO SEARCH

Every peace officer may search any person whom he has reason to believe and does believe has upon his person any weapon, firearm, air gun, device or contrivance contrary to the provisions of this section, and may seize any weapon, firearm, air gun, device or contrivance illegally in the possession of any person without a permit. Any such weapon, firearm, air gun, device or contrivance had or carried in violation of this section shall be forfeited to the Crown to be disposed of as the Attorney-General of the province in which such forfeiture takes place may direct.

* * *

SELLING FIREARMS TO MINORS

Every one is guilty of an offence and liable on summary conviction to a penalty not exceeding fifty dollars who sells any firearms or gives or sells any pistol or air gun, or any ammunition therefor, to a minor under the age of sixteen years unless he establishes to the satisfaction of the justice before whom he is charged that he used reasonable diligence in endeavoring to ascertain the age of the minor before making such sale or gift and that he had good reason to believe that such minor was not under the age of sixteen years.

* * *

RULINGS ON TECHNICAL POINTS

1—Permits required for war trophies if coming under the headings outlined.

2—Defective weapons require a permit.

3—Hand grenades are classed as bombs and require a permit.

4—Rifle and bayonet attached—No reference is made in the Act to bayonets.

5—Ownership before coming into effect of the Act in October last does not exempt a person from obligation of getting a permit unless in the case of shotguns owned by British subjects.

6—Permits not restricted to British subjects, but aliens will have difficulty getting them.

7—Weapons not allowed in lumber camps, as this would be breach of fish and game laws.

News of Western Canada

Doings of Winnipeg Paint Club

Rapid Growth in Nine Years—Suggest Means Of Putting on Paint-Up Campaigns

REPRESENTATIVES of sixteen manufacturing and jobbing paint and varnish houses have formed what is known as "The Winnipeg Paint Club." The officers originally selected were Edward Barry, president; William Osborne, vice-president; E. L. Sauder, secretary-treasurer.

Since the first meeting nine years ago, the Winnipeg Paint Club has steadily grown in size and today the association has thirty members representing twenty-four wholesale paint and varnish houses. The officers for 1921 elected at the recent annual meeting are as follows: A. J. Webb, president; J. Leonard Paul, vice-president; Ira T. Peacock, secretary-treasurer.

The objects of the Winnipeg Paint Club are to further the use of paint and varnish and to promote harmony and good-will amongst the paint manufacturer, jobbers, wholesaler and dealer.

Early in 1920, the Winnipeg Paint Club was seized with the importance of the work done by the "Save the Surface" association and it was decided to link up with this association in order that the people in the prairie provinces would have the idea brought home to them more forcibly.

Relief for Unemployed Painters

The Winnipeg Paint Club has just completed an advertising campaign in Winnipeg to relieve unemployed painters and the Master Painters of Winnipeg were unanimous in saying that the campaign had done them a great deal of good as hundreds of local house owners were now having interior work done who formerly waited until May or June. Furthermore, better work can be done by the master painters where decorating is spread more or less evenly over the entire season.

In the forthcoming Home Building Exhibition, the Winnipeg Paint Club have rented a booth and it will be clearly demonstrated by samples of painted and unpainted wood and other material, that painting is not only a beautifier but a real necessity.

About the middle of May, in each year, the Winnipeg Paint Club brings home to the people of the West the lesson of "Paint up—clean up and keep it up" by poster display and newspaper advertising. Every dealer who handles paint and varnish, wall paper, glass, garden tools, flower seeds, etc., should interest himself in seeing that a "Paint up and Clean up" campaign is put on in his own locality. The Winnipeg Paint Club, through its secretary, Ira T. Peacock, P.O. Box 2882, Winnipeg, will be pleased to suggest to any dealer interested the best means of putting on a campaign of this nature.

Addresses before a recent meeting of the club will be found in the Paint Section of this issue.

Says Outlook in West is Good

Montreal.—E. J. Johonnot, director of sales, Dominion Cartridge Co., Ltd., Montreal, has returned from a business trip through the Western provinces. Mr. Johonnot states the outlook for the coming year is very bright, improving very much in the last month or so, and people generally are very optimistic. The hardware trade shows good prospects, more so among the jobbers. Retailers have experienced some difficulty in their collections, farmers perhaps not receiving as much for their crops this year as other seasons. However, the money is in the West and benefit will be derived from it.

A. E. Dykes, manager of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, has taken a trip south for his health, and is expected to be away for three or four weeks.

* * *

William Barker, of the A. S. Smith Hardware Co., Moosomin, Sask., was a visitor to Winnipeg.

* * *

Frank Bridge, hardware merchant of Carman, Man., was in Winnipeg on business.

* * *

Winnipeg.—D. B. Jones, president and manager of the Moose Mountain Lumber and Hardware Company, is dead, after a brief illness, from pneumonia.

* * *

Regina.—Suspicions of foul play in connection with the sudden death of Thomas A. Fraser, hardware merchant of Outlook, who was found dead at his home, have resulted in sending the stomach of deceased to Dr. Charlton, provincial bacteriologist, for analysis.

* * *

Kamsack, Sask.—A. D. McArthur, who has recently severed his connection with Bay's Hardware, has gone to Winnipeg, where he has accepted a position with the Canada Motor Co. Mr. McArthur went to Kamsack in March, 1914, to manage the hardware business of the late J. G. Hallson, and subsequently took over the management of the same business when Mr. Bay bought it.

Gaily decorated with flags and bunting, the Board of Trade building at Winnipeg presented a gala appearance for the initial holding of the Western Canada Automotive Equipment Show. Equipment to the value of $185,000 is said to be on view in this picture. Many hardware merchants were in attendance and the exhibitors were highly pleased with the advantages secured from participation in the show. Some useful ideas for displaying small accessories can be taken from these exhibits.

Boosting Automobile Accessory Business

Ten Thousand People Daily Visit Initial Holding of Western Canada Automotive Equipment Show in Winnipeg—$185,000 Worth of Equipment on Exhibition—Hardware Merchants From Winnipeg and District in Attendance

WINNIPEG,—Much success attended the initial holding of the Western Canada Automotive Equipment Show, as recently concluded in this city, and it was the opinion of retail hardware merchants and others handling automobile accessories that much educational work of value was achieved by the show. Expressions of opinion from several foremost United States manufacturers of accessories who visited the show were that from an artistic standpoint, booth construction and displaying of small lines, nothing equaling the exhibition had been seen.

The show opened every morning at 10 a.m., remaining open until 10 p.m., and lasted for a week. During that time large crowds of people and many retailers from the city and surrounding district visited the exhibits and took great interest in examining the latest equipment. Wood-Vallance, Ltd., wholesale hardware firm, had a very attractive booth, with a visible gasoline pump installed. The operation of this pump created much interest to both dealer and consumer. There were seventy-two exhibitors. A splendid orchestra, playing from 2 to 5 in the afternoon and from 8 to 10 in the evenings, helped the social spirit of the occasion.

Wholesale Hardware Firms Take Space

Each of the Winnipeg wholesale hardware firms had space at the show, and in most cases the traveling staffs were kept in Winnipeg for the occasion to deal with visiting merchants.

Manufacturers and jobbers of automotive equipment from all parts of Canada and the United States were represented in exhibits of all the standard lines of equipment. The total value of the exhibits was estimated at over $185,000. Oils and greases of all varieties, spark plugs, shock absorbers, batteries, tires, chains, radiators and many other accessories were to be seen, all arranged in pleasing manner. The hall itself was well decorated with flags and bunting, and each individual booth was given special attention.

Large Attendance

More than ten thousand persons visited the show on the opening day and similar attendance was on hand each day throughout the show. Bonspiel visitors from the surrounding district were prominent among those in attendance. Exhibitors all reported good results in the way of establishing connections with present customers and making new connections. Sales were quite numerous. The exhibition was officially opened by the Lieutenant-Governor, Sir James A. M. Aikins, who declared that he had not thought it possible that such a show could ever be put on.

Plans for a show on an even larger scale are already being planned for next year.

Exhibitors included the following: The Manley Manufacturing Co., A. H. Fraser & Co., Russell R. Sutherland, Motor Products Ltd., S. C. Johnson & Son, Ltd., Richardson-Green Ltd., Canadian Fairbanks-Morse Co., Ltd., Mutual Oils Consolidated Ltd. of Canada, Acme Magneto and Electrical Co., Ltd., Canadian Oil Companies Ltd., Jos. St. Mars, Oak Tire and Rubber Co., Ltd., Prescott W. Robinson Sales Co., Ltd., S. F. Bowser & Co., Ltd., British American Oil Co., Ltd.. Northern Electric Co., Ltd., Tuthill Spring Co., Imperial Oil Limited,

Port Stanley, Ont. — R. H. Miller, hardware, has been succeeded by J. H. Burke.

* * *

Alexandria, Ont.—Courville & Chenier, hardware, have dissolved partnership. A. Chenier continues.

Obituary

Toronto.—John Keys of Keys & Co., hardware, is dead.

* * *

Toronto. — Edward Lawrence, hardware merchant, is dead.

Personal

Montreal.—G. L. Cohoon, Canadian representative, Thos. Ellin Co., Ltd., Sheffield, England, is leaving this week, via St. Johns on a trip to the Old Country to visit his principals.

* * *

Montreal.—W. L. Helliwell, manager, Gurney-Massey Co., Ltd., left this week on a business trip through the Maritime Provinces. Mr. Helliwell will be away from his Montreal office about ten days.

* * *

Montreal.—Visitors calling on the Montreal wholesale hardware firms this week are: C. J. White, of Samuel Winslow Skate Mfg. Co., Worcester, Mass.; W. Waghorn, Nicholson File Co.; F. B. Pierson, Otto Bernz Co., Newark, N.J.; R. H. Skillman, Minnesota Mining & Mfg. Co.

Passing of Adam Stewart

Woodstock, Ont.—Adam A. Stewart, one of Woodstock's most prominent citizens, is dead, following a brief illness from pneumonia. Mr. Stewart was seventy-two years of age. He was born in Hamilton, a son of the late James Stewart, the founder of the Stewart Stove Manufacturing Company, which moved here from Hamilton twenty-eight years ago. Mr. Stewart himself came here in 1892. At that time he was secretary of the company, and later in 1900 he was made president of the company, which position he held until 1907, when he retired on account of ill-health. Prior to coming here Mr. Stewart was secretary to Sir John Kennedy, formerly chief engineer of the Great Western Railroad. He was also actively identified with the Stove Founders' Association, of which he was at one time president.

Eastern Manager Morrow Screw & Nut Co.

Montreal.—The John Morrow Screw & Nut Co. have opened their own warehouse and office in Montreal at 489 St. Paul Street West. F. J. McCarty, A.S.M.E., appointed in charge of the Montreal office, has come up through the mechanical end of the business. Mr. McCarty graduated from the Springfield Technical School in 1904 and then went into practical work in the tool room of the National Needle Co., Springfield.

F. J. McCARTY

Appointed Eastern representative and manager of the Montreal office of the John Morrow Screw & Nut Company, Ingersoll, Ont.

He was subsequently in the experimental and automatic department of the Singer Mfg. Co. Later he was promoted to the designing of new tools and machinery. Then with the Standard Oil Co. as chief draftsman and designer. Mr. McCarty's first acquaintance with Canada was on the sales force of the Standard Oil Co. In 1910 he joined the Tait-Jones Co., Pittsburg, but still worked the Canadian field. In 1915 he went with the Rudel-Belnap firm at Montreal, specializing on machinery, special equipment and drills, and he is now eastern representative of the John Morrow Co.

Montreal Hardware Merchants Elect Officers

Montreal.—The election of officers for the coming year will take place at the next meeting of the Montreal Retail Hardware Dealers' Association, which will be held on Wednesday evening, March 9th.

WESTERN ONTARIO NEWS

Charles E. Boyd, who has been in the hardware business at Simcoe, Ont., for twenty-three years, has disposed of his premises to W. H. Davison, of Clinton, Ontario.

* * *

Frank Perkins, former advertising manager of the Orton Motor Car Co., Petrolea, has joined the sales staff of the Imperial Oil Co. and is now located in Toronto.

* * *

At the organization of the Amherstburg Baseball Club on Monday, Roy Taylor was elected president and G. H. Jones, secretary and business manager.

* * *

H. L. Martinson, hardware merchant at Cottam, Ont., has been selected as one of the arbitrators on a board appointed to make a decision in an important claim for damages at Essex, Ont.

* * *

George and Harold Tompkins, of the Willard Hardware, at Chatham, have purchased the tinsmithing and stove and furnace repair business of Ray Ellis, at Wallaceburg, and are moving there this week.

* * *

R. J. Muldrew was a recent visitor with relatives at Seaforth and has returned to Brockville.

* * *

Leslie Smith, hardware merchant, at Hagersville, Ont., has returned after spending several days in Hamilton on business.

* * *

The Gove Motor Car Co. of Tilbury, Ont., is preparing plans for a new $50,000 plant to be erected this spring.

Changes on Staff of Perfection Stove Co.

M. J. O'Neil, Toronto, who formerly represented the Detroit Vapor Red Star Oil Stove in Canada, is now representative in Toronto for the Perfection Stove Company, Sarnia, Ont. E. L. MacFarland, who was in Toronto during December, January and February, has been promoted to the position of assistant district manager in charge of the Western district, with headquarters at Winnipeg.

Hamilton Stove & Heater Co. Appoints General Sales Manager

Hamilton,—The Hamilton Stove and Heater Co. has recently reorganized its sales department and F. C. Moore, who has been connected with the company for a number of years, has received the appointment of general sales manager, with headquarters in Hamilton. Mr. Moore has had extensive dealings with the hardware trade throughout the country. His early life was spent in Western Ontario. He commenced in the hardware business and served his apprenticeship fifteen years ago with

F. C. MOORE

for the past two years Western manager for Hamilton Stove and Heater Co., who has been appointed general sales manager of the Company, with head office in Hamilton, Ont.

Westman Bros., at Chatham, which is now conducted under the name of Willard Bros. Mr. Moore specialized from the beginning in the stove and furnace end of the business, and acquired a vast knowledge of these lines. Subsequently he heard the call of the West and eleven years ago journeyed to Winnipeg and joined the sales force of the stove department of the Winnipeg Street Railway. He later joined the staff of the Hamilton Stove and Heater Co., whom he represented on the road for eight years, and for the past two years has been located at Winnipeg in the capacity of western manager.

Move to Larger Premises

Montreal.—The Renaud Motor Supply Co., requiring larger premises and desiring to be in a more central location, have moved from their former address, 326 St. Catherine St. E., and are now occupying a four story building at 225 Craig St. West.

Manufacturers Pay Visit to Chatham

Chatham.—A delegation of the Canadian Manufacturers Association visited this city this week. A luncheon was tendered the visitors at the Chamber of Commerce, after which a tour of the city was made. At the luncheon addresses were given by J. R. Shaw, Woodstock, second vice-president C.M.A.; J. F. MacKay, Ingersoll File Co., Ingersoll; T. F. Monypenny, Imperial Varnish and Color Co., Toronto; H. Macdonald, legal secretary of the C.M.A.; Mayor F. H. Brisco; G. W. Wands, president of the Chatham Chamber of Commerce; Ald. W. M. Gray, gentral manager Gray Dort Motors; J. B. Kennedy; N. H. Stevens, president Canada Flour Mills, and F. Biette, first vice-president Chamber of Commerce.

Successful Dollar Day in Paris

The merchants of Paris, Ont., have put on a number of most successful "Dollar Day" sales but that held the end of last week was by far the most extensive and ambitious effort they have yet made. As in former years it was well advertised; a whole page in the Brantford daily was taken in addition to the space in the home paper. This was made possible by the close co-operation of the merchants and the results more than justified the outlay. The whole countryside was in Paris to take advantage of the sale and the turnover was said to be the largest of any single day's business in the history of the town. The merchants backed their advertising by splendid store and window displays, and free use was made of special green pennants. Among the hardware men taking part in the big sale were D. Sinclair and H. W. Wilson.

To Investigate European Markets

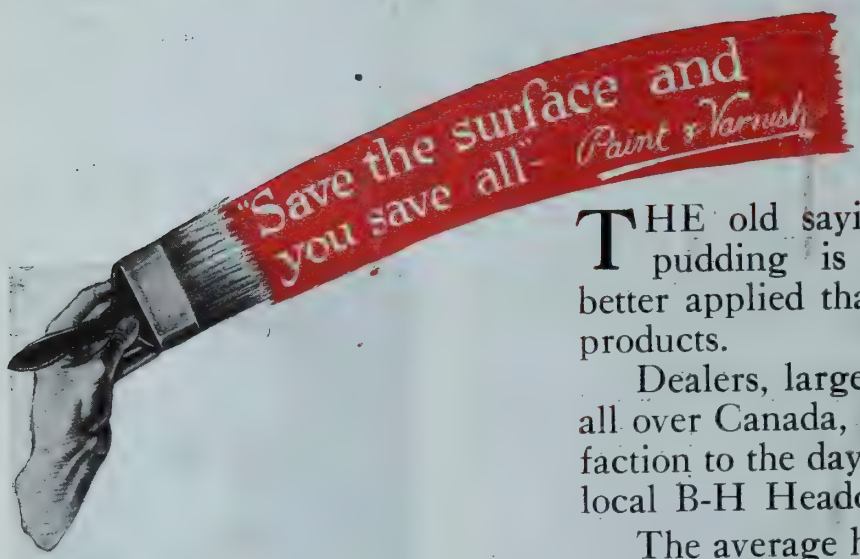
Montreal.—Hugh Kearns, managing director B. & S. H. Thompson Co., Ltd., sailed on March 3rd for Germany and other European points. The above firm, previous to the war, imported from the German market steel, metal sheets, heavy chemicals, etc., but through public sentiment this has ceased in later years. However, German materials are now on the market again, through the channels of other markets, and a thorough investigation will be made by Mr. Kearns while he is in Europe. He expects to be away from his Montreal office about two months.

Death of C. E. Duncan

Sault Ste. Marie, Ont.—C. E. Duncan, general superintendent of the Algoma Steel Corporation, died here following an operation for appendicitis. He had been ill only a few days. Mr. Duncan was forty-eight years of age and was born in Chattanooga, Tenn. He learned the steel business in the Homestead works of the Carnegie Steel Corporation, where he mastered every branch of the trade.

St. John Hardware Clerks Help to Bring About Daylight Saving

St. John, N.B.—What really amounted to a contest between the St. John Hardware Clerks' Association and the Trades and Labor Council over the question of daylight saving was recently staged here and won by the hardware clerks. The result is that daylight saving will be effective here on May 21. Owing to opposit on the City Council decided that the only settlement of the question would be by a plebiscite. The majority of the citizens did not seem to care which



GEORGE CAVERHILL

head of the wholesale hardware firm of Caverhill, Learmont & Co., Montreal, who has been elected a director of the Bell Telephone Company of Canada. Mr. Caverhill was one of the group of Dominion Steel directors who left the board at the last annual meeting when the new interests elected their own slate.

way the issue went, so the clerks got busy with committees to secure every vote in favor of the issue. A campaign fund was raised with liberal donations from hardware and other merchants and the entire city was circularized. Marked ballots were printed for the voters and arrangements were made that all clerks who were returned soldiers be given a vote. On the day of voting a central information bureau was opened by the clerks and automobiles to help bring out the voters. A representative of the clerks was stationed at every booth. The issue carried by a vote of 2 to 1 in spite of the fact that labor had largely advertised the statement that over 85 per cent. of the citizens were opposed to the new time. Much co-operation with the clerks was extended by the local press. Efforts have been made by the Trades and Labor Council to secure the affiliation of the clerks' association, but the latter have decided to stand alone.

B-H Quality—the best

THE old saying that "the proof of the pudding is in the eating" was never better applied than to the quality of B-H products.

Dealers, large and small, old and young, all over Canada, have looked back with satisfaction to the day that first saw their store the local B-H Headquarters.

The average hardware man handles many lines yielding a varying scale of profits—but those who are best fitted to judge, admit that the B-H Agency Proposition is the best thing that ever came to town.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of March 9th, 1901:

* * *

"Gurney Foundry Co., Ltd., will again act this summer as agents for 'Quick Meal' wickless oil and gasoline stoves manufactured by The Ringen Stove Co., St. Louis."

* * *

"R. E. Bingham, of Stayner, was in Toronto this week. Mr. Bingham was head of the firm of Bingham & Co., who recently sold out to J. E. Doner. Since then Mr. Doner has amalgamated with T. W. Gibson."

* * *

"The Arcade File Works, Anderson, Indiana, have been sold to the Nicholson File Works, Providence, R.I."

* * *

"H. G. McNaughton, Guelph, formerly representative of the Doherty Mfg. Co., Sarnia, Ont., is again on the road in the capacity of representative of Gurney Foundry Co., travelling in Western Ontario, the territory recently covered by W. H. Smith.

* * *

"The Ingersoll Metallic Mfg. Co., Ingersoll, Ont., have been incorporated with $20,000 capital stock."

* * *

"R. Chestnut & Sons, Fredericton, N.B., have adopted the co-operative principle. Each man employed at the factory will be given his weekly wages as in the past, the proprietors will take a stated percentage as interest on capital invested. At the end of the year whatever profits remain will be divided among proprietors and workmen."

* * *

"Lewis Bros. & Co., Montreal, have just issued Catalog and Price List No. 27 for 1901."

* * *

"In forming a Retail Hardware and Paint Dealers' Association, the Montreal hardware merchants have wrought much good to themselves."

* * *

"The Carnegie - Morgan combination, whose ambitious undertaking and enormous capitalization are causing those interested in the iron and steel industry of two hemispheres to look on with astonishment have filed a certificate of incorporation in Trenton, N.J. The name of the combination is The United States Steel Corporation and its capital stock is $1,110,000,000, a sum that transcends all other incorporated companies in existence."

Meeting of London Hardware Merchants

New Price List For All Members—President T. Jones and Secretary T. H. Purdom Re-elected—The Business Outlook

LONDON, Ont.—One of the busiest, and at the same time, most interesting and profitable evenings the members of the London Retail Hardware Association have spent in a long time followed the closing up of local hardware stores on Tuesday at six o'clock. Every member "made tracks" for a local cafe. The annual banquet this year was purely and simply a get-together informal affair and it had all the advantages that gatherings of this kind have. As soon as luncheon was over the hardware men got busy and conducted a complete revision of prices. As a result every member of the association will have a new list that will provide a working basis by which quotations are stabilized.

It was the unanimous opinion that meetings similar to that held on Tuesday should be held oftener, and it was decided to get together and talk over business and other matters on the first Monday evening of every month.

Plans for Outing

The question of the annual outing of the Hardware Association at Port Stanley was talked over and every effort will be made to make this year's picnic bigger and better than ever.

Last but not least on the list of the evening's business came the matter of electing officers for the year. Thomas Jones, of the Cowan Hardware, and Thomas H. Purdom, of the Purdom Hardware, who have been president and secretary for some years, thought that it was time they had a rest. The members, however, thought otherwise. It was pointed out by any number of hardware merchants, and pointed out forcibly and emphatically, that President Jones and Secretary Purdom had done excellent work. The splendid success of the association and of the picnics was due, it was stated, in no small measure to their efforts. President Jones and Secretary Purdom are again the active directing forces in the association, and they were assured of the heartiest co-operation of every hardware man.

A noticeable feature of the discussion during the evening was the splendid spirit of optimism shown regarding the outlook for business. The members stated that in spite of a most unusual season, that has prevented the sale of merchandise usually in demand during the cold weather, they had found trade excellent. They had no complaints to make, they said, and were looking forward to a nice volume of business throughout the year. The membership of the association now includes, in addition to the hardware merchants of the city of London, several in nearby towns. These merchants co-operate in every way with the city merchants and the arrangement is working out most satisfactorily.

English Canada Plate Coming Forward

Manufacturers in Wales Have Made Offer to Canadian Importers. Scant Appearance of These Sheets Since 1914

RETAIL hardware dealers generally, especially those operating a tinshop, will be interested in the announcement that Canada plate from England and Wales is again available, and will be on the market for this season's requirements.

Accompanying this announcement it is also stated that the present price is reasonable and much below present quotations. This reasonable quotation, however, is confined to the half bright at present, the polished plate still remaining at a high figure. This might be expected, but the active season is not yet close at hand and there is plenty of time for an improvement in the better grade.

There has been little sign of the overseas sheets since the first year of the war, when importation ceased; stocks at that time were reasonably heavy in the hands of importers and jobbers, but these stocks were soon depleted and in the fall of 1915 other sources of supply had to be looked to. Dealers were asking in vain for English sheets, only to be informed that they were not to be had. The United States manufacturers then became the exporters to the Canadian market, and were able to meet the demand fairly well until a year ago, when the shortage became very evident, dealers being unable to locate sheets at any price.

Buyers are not placing their orders for imports as yet, but rather are investigating the situation from the different fields and when the time comes to place their orders it is felt that the market will then probably show an improvement in prices. That stocks will be found light is manifest, and it is thought by some that considerable business will be done again in the English market on Canada plate.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

SOME important price changes have been made this week on hardware lines, and the outstanding features are new lower prices on steel pipe and reductions on clothes wringers and washing machines.

Wood screws, both steel and brass, are also reduced in price. Other declines are made in prices of files and rasps, some lines of builders' hardware, including plated lock sets and butt hinges, floor and spring hinges, knife handled wrenches, shears and snips, and wrought iron washers. Prices of pipe fittings have been further revised and show some lower prices. Lead traps and bends are quoted at a lower level. The lighter gauges of corrugated sheets are reduced in price, and lower quotations are made on English standard galvanized sheets. Boiler tube prices are slightly lower and some small declines are made on bar iron and steel. Turpentine and linseed oil are being quoted at a little lower level, although the primary markets on these products are a trifle firmer. Ingot metals remain dull and further recessions are made in prices, lead having declined on all markets. In the primary iron and steel markets there is no increase of activity reported and further price cutting is reported on the part of the independent steel mills in the United States. The lower quotations are largely on black and galvanized sheets, less on plates and shapes and bars, and little or none on steel pipe and tin plate. Wholesalers report a slight increase in business and a little more activity in spring and summer lines although orders are smaller in size than usual at this season.

Montreal Markets

MONTREAL, March 3.—Lower levels are again reached on many important lines, in the hardware trade this week. The feature change might be stated as being on washing machines and wringers. These are now quoted at 25 per cent. off list. On smaller shelf goods, wrought iron washers are again reduced; a decline of 10 per cent. on the different grades of Nicholson files is also noted. Wood screws now have new discounts from list prices and are lowered from 2 to 4 per cent. Plated lock sets, hinges, etc., are now about 10 per cent. lower than former prices. Coe's wrenches, Wiss snips and shears also show a decline. On heavier goods, boiler tubes are from 5 to 10 per cent. lower, and both English and American galvanized sheets are 50 cents per 100 pounds down on all gauges. Other lines such as lead products, bar iron and steel, corrugated sheets, rope, coal oil, gasoline, and the different wares are unchanged in prices. Business shows a decided improvement this week over the previous quiet weeks.

Wrought Washers 45% Off

Montreal.

Wrought iron washers are again reduced in price this week, and are now quoted at 45 per cent. off list. Only last week these were shown at a reduction.

Some Files Reduced

Montreal.

A reduction of 10 per cent. is made on Globe, Great Western, American, Kearney & Foot and Arcade files and rasps. At time of going to press the new discounts were not available, but reductions as stated above are noted.

Sink Bolts Now 62½ Off

Montreal.

A reduction has been made on sink bolts, and they are now quoted at 62½ per cent. off list prices.

Washing Machines Lower

Montreal.

A new discount is now quoted on washing machines of different styles and makes, and are now quoted at 25 per cent. off list instead of 20 per cent. as formerly. List prices on the different lines will be found on current market pages.

Wringers Also Show Decline

Montreal.

Wringers of the different makes are now quoted at 25 per cent. off list, former quotations being 20 per cent. off list prices. Lists are shown on current market pages.

Reduction in Wood Screws

Montreal.

New lower discounts are given on wood screws, affecting bright, brass and bronze. Brass and bronze screws show a bigger reduction than bright, by about 2 per cent. Flat head bright are now 72½ per cent. off list, formerly being 70 per cent. off. Following are present quotations on all lines:

Wood Screws, F.H., bright	72½%
Do., R.H., bright	70%
Do., O.H., bright	70%
Do., F.H., brass	60%
Do., R.H., brass	57½%
Do., O.H., brass	57½%
Do., F.H., bronze	55%
Do., R.H., bronze	52½%
Do., O.H., bronze	52½%

Decline in Builders' Hardware

Montreal.

A 10 per cent. reduction is made on different lines of steel goods in builders' hardware, including plated lock sets, etc. Brass and bronze sets are reduced approximately 5 per cent.

Floor and Spring Hinges Down

Montreal.

Along with other lines of plated hardware, floor and spring hinges are now 10 per cent. lower than former quotations.

Coe's Wrenches at List Prices

Montreal.

Coe's knife handled wrenches are now priced at list prices, former quotations being list plus 10 per cent.

Snips and Shears Down

Montreal.

Snips and shears of genuine Wiss make are reduced this week, showing a decline of about 12½ per cent.

Compression Goods Unchanged

Montreal.

There have been no price changes made on the different lines of compression goods. Sales are better, however, than

during the past quiet weeks, and some lines are moving quite freely. Quotations are as follows:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Basin cocks, Fuller, No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, standard	34%
Roundway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Radiator valves, standard	23%
Do., removable disc	38%
Globe, angle and check valves, standard	5%
Gate or straightway	Net
Jenkins globe	10%
Jenkins gate valves	10/7%

A Reduction in Boiler Tubes

Montreal.

A reduction has been made on the different sizes of boiler tubes, ranging from 5 per cent. to 10 per cent., some sizes showing a greater decline than others. Business is reported a little brisker this week, the demand increasing very satisfactorily for this season of the year. Following are present quotations:

BOILER TUBES —	Seamless	Lapweld
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	27 00
2 inch	29 25	25 50
2¼ inch	33 00	28 50
2½ inch	44 75	31 50
3 inch	49 25	40 00
3½ inch	63 50	43 50
4 inch	85 00	55 50

Lead Products Hold

Montreal.

Prices on all lines of lead products remain unchanged, with present quotations below. The demand continues light on these goods, but a slight improvement over former weeks.

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net list
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 35
Zinc, sheets, casks	0 14
Do., broken lots	0 15½

Decline in Galvanized Sheets

Montreal.

Galvanized sheets of both English and American standard are reduced 50 cents per 100 pounds. As stated in Hardware and Metal recently, prices on sheets were controlled by stocks in the hands of importers and jobbers to a great extent. However, lower quotations are now given abroad on English sheets. Stocks are still quite adequate to meet early spring business, and with new stocks coming in slightly lower prices than those now quoted may be given. Following are the present quotations:

PLATES—	
10 gauge	6 25
12 gauge	6 30
14 gauge	6 45
16 gauge	6 55
BLACK SHEETS—	
10 gauge	6 50
12 gauge	6 55
14 gauge	6 60
16 gauge	6 80
18-20 gauge	7 95
22-24 gauge	8 00
26 gauge	8 10
28 gauge	8 20
Sheets 36 in. wide, 10c per 100 lbs. extra.	

GALVANZED SHEETS—

U.S. Standard—	
10¾ gauge	10 25
28 gauge	9 75
26 gauge	9 50
22 to 24 gauge	9 35
20 gauge	9 15
18 gauge	9 15
16 gauge	9 00
14 gauge	9 00
12 gauge	9 00

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	11 50	10 50
26 gauge	11 25	10 25
24 gauge	10 65	9 85
22 gauge	10 30	9 40
18 and 20 gauge	9 60	9 25

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Waste Materials Quiet

Montreal.

The scrap metal market is still dull, with no price changes to report. One dealer stated that the market was a little easier, but with business quiet, as it is at present, no lower prices would be given. In the near future, when increased activity is shown, lower prices will undoubtedly be quoted on some lines. Present prices are as follows:

DEALER'S BUYING PRICES.	
Automobile tires	0 75
Yellow brass	0 07
Red Brass	0 11
Light brass	4 50
Scrap zinc	0 05
Lead, heavy	4 00
Lead, tea	2 50
Light copper	9 00
Heavy copper	11 50
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	9 00
Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00
No. 1 machinery cast, per gr. ton	**$25 00 $28 00**

Iron and Steel Unchanged

Montreal.

Business in bar iron and steel is of a small sorting order, with small sales being made on the different lines. This trade, however, has kept up fairly well during the quiet months, and stocks today are in fairly good shape. Prices have not changed for this week and following are present quotations:

Common bar iron, 100 lbs.	4 20
Refined iron	5 80
Iron finished machinery steel	4 25
Mild steel	4 20
Band steel	4 20
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 20
Tire steel	4 40
Toe calk steel	5 20
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.
Band steed in scroll bdles, 50c per 100 lbs. extra.
Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Corrugated Sheets Quiet

Montreal.

No change has been made in the prices of corrugated sheets, and business remains very quiet. Any improvement in these lines is not looked for now until the weather permits outside building, as apparently dealers and agents will not stock any quantities and will order supplies only as the demand requires. Following are the present prices, which are unchanged from the first of the year:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.
Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Rope Prices Hold

Montreal.

There has been no change in rope prices since the last decline of three weeks ago. Business is said to be still quiet, but shows some improvement over the first two months of the year. During March a greater activity is expected, as dealers will be placing their orders for spring requirements. Prices are quoted on current market pages.

Oil and Gasoline Unchanged

Montreal.

Coal oil is now selling at 28 and 30 cents, gasoline at 39 cents for motor grade, and 44 cents for the higher grade. These prices are the reduction prices of February 15.

Sap Buckets Brisk

Montreal.

Sap buckets and spouts are selling well at present, with stocks in good shape to meet the demands. An even greater activity is expected as soon as the first run is reported, as it is felt that dealers are holding off to a certain extent until the last moment for supplies. Prices are unchanged and are as follows:

Sap Buckets.—No. 8, $21.88; No. 9, $24.50; No. 12, $26.25; No. 16, $31.50 per hundred; 1 gal., $21.88; 1½ gal., $26.25; 2 gal., $31.50 uer hundred.

Spouts.—Perfection. $25 a thousand; Eureka, $16.50; Sterling, $38; Square syrup cans, 1 gal., Imperial, $26 per hundred.

Wares Selling Fairly Well

Montreal.

A fairly steady business is being done in wares. Aluminum ware is experiencing a good steady demand, sales having kept up fairly well during the quiet winter months. Tin and granite ware are holding their own for this season of the year, deliveries of a sorting order being shipped. Sap pails and cans being active in the tin lines.

No Change in Nails

Montreal.

Wire nails are still quoted at $5.20 base, although lower prices are given by some jobbers for large quantities such as the spring orders from dealers. Cut nails are unchanged, quoted at $5.75 base. There has been a better movement during the last week on nails. This is expected to continue as the season opens.

Steel Pipe Lowered

Montreal.

A new price list, No. 49, has been issued with lower prices for steel pipe. The declines average about 4 per cent.

(See current market pages for new list.)

Pipe Fittings Unchanged

Montreal.

No change has been made in the price of fittings, quotations remaining at decline of a few weeks ago. Stocks are in good shape with the exception of smaller

sizes on some lines. This is, however, only temporary, and generally stocks are ample to meet the activity of the coming spring business. Quotations are as follows:

Bushings, cast	20%
Do., malleable	20%
Flanges	20%
Plugs	17½%
Flange Unions	7½%
Malleable Unions	32½%
Nipples, blk. or galv., up to 4 in.	50%
Do., 4½ in. or larger	40%
Do., running thread, 4 in. and under	30%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

Ingots Slightly Easier

Montreal.

Ingot metals are again easier this week, with slightly lower prices quoted on practically all metals. The opinion is expressed, however, that the bottom has been reached and a firmer tendency is expected in the near future.

TIN.—Fluctuations continue on tin, showing very little change in price. Production is still curtailed owing to present values, but this has shown no immediate effect on the market. Local price slightly easier at 38 cents.

COPPER.—Copper is easier in New York, elsewhere it is very dull and unchanged. Present quotations are 18¾ cents for electro and 18¼ cents for castings.

SPELTER. — This metal continues weak in United States, and present prices are much below productive costs. The market in Europe continues fairly steady. Local price is slightly easier at 7¾ cents.

LEAD.—Lead is again the weakest metal on the list this week, having now touched the low level of £17 in London and $3.90 in East St. Louis. Local price easier at 6½ cents.

ANTIMONY.—There is no change in antimony, it remaining dull and unchanged at 8 cents.

ALUMINUM.—Aluminum is in a listless condition, with prices unchanged at 34½ cents.

Toronto Markets

TORONTO, March 3.—Of the price changes this week probably the chief feature is the new list on steel pipe, which shows a decline of about 4 per cent. on steel pipe. This is the first change in this product for over seven months. Other important price changes are reductions in bright and brass wood screws, pipe fittings and wrought iron washers. Washing machines and clothes wringers have been reduced about 6 per cent. Slight reductions have been made in bar iron and steel prices, and the lighter gauges of corrugated sheets are reduced $1 per cwt. Lead traps and bends have been reduced again about 10 per cent. Quotations on black and galvanized sheets are holding unchanged. The waste metal market continues quiet and shows little change in prices. Ingot metals are still very dull and further declines are made in tin and lead prices. Not much change is shown in business conditions. Wholesalers report a slight improvement all the time but it is almost imperceptible. Booked orders for spring and summer goods are beginning to be shipped out.

Wood Screws are Reduced

Toronto.

Wood screws are subject to new discounts. On flat head, bright, the discount has been changed from 70 per cent. to 72 1-2 per cent. Flat head brass screws from 55 per cent. off list to 60 per cent. The new discounts for flat, oval and round head bright and brass are as follows. The previous change was in June 3rd, 1920, when prices were advanced.

WOOD SCREWS—

Flat Head Bright, off list	72½%
Oval head, bright	70%
Round head, bright	70%
Flat head, brass	60%
Oval head, brass	57½%
Round head, brass	55%
Oval head, bronze	52½%
Round head, bronze	52½%

"Gas" and Oil Steady

Toronto.

No further changes have been made in gasoline or coal oil prices, and quotations remain at 38 cents per gallon net for motor grade gasoline, and 27 to 30, according to grade for coal oil. The demand continues good.

Washing Machines are Lower

Toronto.

A reduction of approximately 6 per cent. has been made in the price of hand and power washing machines. The new discount is 25 per cent. off list instead of 20 per cent.

Wrought Washers 40 P.C. Off

Toronto.

Wrought washers have been reduced in price. The new discount is 40 per cent. off list in place of 30 per cent. The usual extras remain for special size packages and boxing.

Wringers Now 25 Per Cent. Off

Toronto.

Clothes wringers have been reduced in price. The decline amounts to about 6 per cent. as the new discount is 25 per cent. off list.

Barbed Wire Prices—A Correction

Toronto.

The prices of barbed wire published in Hardware and Metal last week were given in error, as quotations at present are on "application." It is stated that prices may be set at an early date, but on account of the fluctuations of the wire rod market in the United States prices on wire and especially barbed wire are variable at present, and liable to sudden change.

NEW LOWER PRICE LIST

Toronto.

New prices are being issued on steel pipe. The new quotations amount to a decline of about 4 per cent. Until the present pipe prices have been unchanged for over seven months, and during the greater part of 1920 wrought pipe was scarce and deliveries hard to obtain. During the shortage stocks became depleted, and it is only recently that wholesalers and retailers have been able to accumulate supplies again. Stocks are reported in better shape now. There has been very little price cutting on wrought pipe on outside markets, and the independent mills in the United States, while cutting prices on many steel products have made little or no concessions below the Industrial Board schedule on pipe. Below are the new prices:

Price List No. 49. March 1st, 1921

Standard Buttweld Pipe.

Per 100 feet.

	Steel		Gen. Wrot. Iron	
	Blk.	Galv.	Blk.	Galv.

10 in.	3 40	4 22	4 39	5 21

Valves and Bibbs Held

Toronto.

Last week's quotations are held unchanged on valves and bibbs and other compression work, and sales are still light. In the primary markets the demand for brass and copper is not increasing as rapidly as anticipated, considering the reductions that have been made and the present low price of the metals. The present price of copper on U.S. markets is on a level with the average price of 1911. Quotations here on compression goods are as follows:

Compression work, standard	40%
Fuller work, standard	30%

Bath cocks, compression	30%
Do., Fuller	30%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	10%
J.M.T. C.	15%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Nails are Unchanged

Toronto.

Nails are holding unchanged. Along with other commodities, nails are not moving as quickly as is usual at the beginning of the season. The present price on wire nails is approximately 20 per cent. below that of last fall and whether further reductions may be expected is uncertain. Declines on wire nails and on wire products are reported from Pittsburgh district. Quotations here are $5.10 per keg base for wire nails and $6.20 for cut.

Screen Door Prices

Toronto.

Orders for screen doors have been very satisfactory and in a few cases shipments are beginning to be made. Prices are higher than last season and the following are the quotations for Kasement screen doors complete with hardware fittings, ready to hang:

KASEMENT SCREEN DOORS—Complete with fittings—

2 ft. 6 in. x 6 ft. 6 in., per doz.	$45 00
2 ft. 8 in. x 6 ft. 8 in., per doz.	45 60
2 ft. 10 in. x 6 ft. 10 in., per doz.	46 20
3 ft. x 7 ft., per doz.	46 80

Screen Wire Cloth Prices

Toronto.

Screen wire cloth is beginning to move now and $3.50 per 100 square feet is quoted this season for the painted wire cloth. Galvanoid screen wire cloth which is varnished after being coated with zinc is quoted at $6 per 100 square feet.

Bar Iron Slightly Lower

Toronto.

Not much improvement in demand is reported in the iron and steel market, and sales are still of the sorting up variety as a rule. Quotations are a little easier and the base price has been reduced 25 cents per cwt., making it $4.50 instead of $4.75. U. S. market reports indicate little activity with many furnaces out and new orders light. Following are the present quotations here:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 00
Common bar steel, ¼ in. and heavier	4 50
Common bar iron, 3-16 in. dia. and lighter	5 00
Common bar iron, ¼ in. and heavier	4 50
Angle base	4 50
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 00
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop Steel	6 00

Rope and Cordage Improve

Toronto.

A little better showing is reported in the cordage trade, and spring business is making a belated improvement. Prices are holding at recent declines and are the following:

ROPE—	
Pure Manila, basis	$0 24½
Beaver Manila, basis	0 20
New Zealand Hemp, basis	0 20
Sisal, basis	0 18

Above quotations are basis prices, ¾ in., and larger diameter. The following advances over base are made for small sizes: ⅝ in, ½c; 9-16 in., ½c; 7-16 in., inclusive, 1c; ⅜ in., 1½c; ¼ in., and 5-16 in., 2c; 3-16 in., 2½c.

Single lath yarn, basis	0 18
Double lath yarn, basis	0 18½

Further Revisions on Fittings

Toronto.

Further changes have been made this week on pipe fittings. The new prices are all in the nature of a reduction. Cast iron fittings are about 5 per cent. cheaper and are now quoted at 15 per cent. off list. Cast iron plugs are now 25 per cent. off list; solid plugs 10 per cent., and countersunk plugs net list. Other changes are on wrought nipples, on which the new discount is 40 per cent. for close and short and 50 per cent. for long, and on malleable fittings. Class B and C goods are one cent per pound less. The demand for these goods is variable at present, but is lighter than usual. Following are the new quotations:

Cast iron fittings	15%
Plugs, cast iron	25%
Do., solid	10%
Do., countersunk	net
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., long, ⅛ in. to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B	0 25	0 35
Class C	0 16	0 25

Light Corrugated Sheets Decline

Toronto.

An approximate reduction of 10 per cent. has been made in 26 and 28 gauge corrugated sheets, which are quoted at $10.25 and $9.50 per cwt., respectively, less 7½ per cent. The other gauges remain unchanged. Business is reported light on these goods at present and stocks are plentiful. Following are the present quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00
Less 7½%.	

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Corn Brooms Steady

Toronto.

Prices have been steady on corn brooms, and little change is expected before June in prices. There has been a quantity of second quality broom corn on the market which has been made up and has sold for about $5 per dozen, but quotations on 5 string first quality corn run from $9 to $11 per dozen. Labor costs and lumber are remaining high, it is stated.

Traps and Bends Reduced

Toronto.

New prices are quoted this week on lead traps and bends, making a reduction of 10 per cent. on previous quotations. These are now quoted at 10 per cent. off list. Lead pipe and waste remain unchanged, and no further alterations have been made in solder prices. Lead on primary markets continues to decline in price, and both on U.S. and on English markets further recessions have been made in prices. Quotations on London markets are now on a level with the average price of 1911. Should these low level prices be maintained, a downward tendency appears probable on lead products. Following are quotations on lead and zinc products.

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09¾
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 26
Do., commercial, lb.	0 24
Do., guaranteed, lb.	0 28
Do., wiping, lb.	0 22¼
Zinc sheets, per lb.	0 16

Little Change in Sheets

Toronto.

There is little change shown here in black or galvanized sheets, and business is still inactive. Buyers appear to be holding off as much as possible and ordering for actual needs only. Prices are nominally unchanged. Reports from the Youngstown district in the States indicate that several of the mills there which have been closed down have accumulated sufficient orders to enable them to resume operations, but it is stated that independent sheet mills as a whole are not operating over 20 per cent. of capacity. The U. S. sheet market is very unsettled and prices quoted vary from $5 to $8 a ton. Concessions have been made by independent mills on blue annealed, black and galvanized sheets, but it is believed that both labor, freight rates and raw materials will have to be reduced before the Steel Corporation will consider any readjustments in their prices. The following are prevailing quotations here:

PLATES

10 gauge	6 20	
12 gauge	6 25	
14 gauge	6 30	
16 gauge	6 40	

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 40	10 30
U. S. 28	9 00	10 00
U. S. 26	8 70	9 75
22 and 24	8 55	9 50
18 and 20	8 40	9 35
16	8 25	9 20
12 and 14	8 20	9 15

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Scrap Metals Little Changed

Toronto.

The waste material market shows little change. The consuming demand is slow and holders are not pressing sales. Prices are mostly unchanged and are the following. It is pointed out that these prices are nominal and are for fairly large quantities.

WASTE MATERIAL

No. 2 busheling	....	$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass	....	10 00
No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	2 50
Overseas lumbermen's rubber boots	1 50	2 00

Ingots Dull—Lead Declines

Toronto.

The ingot metal market continues very dull and there are some lower levels reported. Lead is very weak and shows declines on outside primary markets, while copper though practically unchanged is in poor demand.

TIN.—This metal continues to fluctuate but prices remain about the same levels as a week ago on London markets. A little firmer tone is reported from U.S. markets. Quotations here are down 3 cents since the last report and price is 40 cents per pound.

LEAD.—Further reductions are reported from U. S. and English markets on lead, and sales were made under the $4 mark on Chicago markets. Locally prices have declined another 50 cents and quotations are now $6.

COPPER.—A continued weakness is felt in copper, and there is reported to be little demand either for the raw metal or the manufactured product. On U.S. markets there is a better export business, but the domestic trade is smaller. Prices are easier but owing to the absence of business prices are nominal. Quotations are holding here at 19 cents for casting copper.

SPELTER.—This market is irregular and in spite of the fact that it was believed that prices had reached bottom there have been further declines. Prices here remain at $7.

ANTIMONY.—Quiet and dull without change in price is the report on antimony and quotations are 8 to 9 cents.

ALUMINUM.—No feature of any importance is reported on this metal. Business is dull and prices remain at 35 to 37 cents.

London Markets

LONDON, March 3.—The principal price changes here this week are on washing machines, clothes wringers, and coaster wagons. Wrought iron washers, tie out chains, and turpentine have also been reduced in price.

Business continues to show a steady improvement. Many retail merchants are holding sales of winter lines, and between these and the preparations for spring trade are being kept busy.

Turpentine Declines Five Cents

London, Ont.

Another decline of 5 cents per gallon has taken place this week in the price of turpentine and following are the new quotations:

TURPENTINE—1 bbl. lots, $1.05 Imp. gal; 2 to 4 bbl. lots, $1.04; 5 gal. lots, $1.20.

Linseed Oil is Unchanged

London, Ont.

Linseed oil prices are unchanged this week and quotations are as under:

	Raw	Boiled
1 to 2 bbls., per gal.	$1 00	$1 03
3 to 5 bbls., per gal.	0 99	1 02
6 to 9 bbls., per gal.	0 97	1 00

Less bbls. add 15 cents gal.

Quotations on Putty

London, Ont.

Putty is selling at the lower quotations made last week. Sales are seasonably light now on this product. The following are the new quotations:

Standard 100 lb. drums, $7.05 per gal.; 25 lb. drums, $7.80.

Pure, 100 lb. drums, $8.55 per gal; 25 lb. drums, $8.80.

White Lead Selling Prices

London, Ont.

The reductions made last week on white lead prices are holding. There is very little change in the demand and sales show a slow improvement. The following are present quotations:

	Tons.	Less tons.
PURE, per 100 lbs.	$14,95	$15,30
ELEPHANT	15.35	15.80

Washing Machines Reduced

London, Ont.

A reduction of about 6 per cent. has been made in the price of washing machines, which are now quoted at 25 per cent. off list in place of 20 per cent.

Wringers Now 25 P.C. Off

London, Ont.

A new lower price has been made on clothes wringers, which are now quoted at 25 per cent. off list prices. The previous discount was 15 per cent. off.

Wrought Washers 40 P.C. Off

London, Ont.

Wrought washers are reduced in price. The new discount is 40 per cent. off list, which is about a 14 per cent. decline. The usual extras are charged for special packages and small quantities.

Auto Coaster Wagons Lower

London, Ont.

A reduction of about 10 per cent. has been made in the price of auto coaster wagons and the new discount for these is 35 and 10 per cent. off list. Following are the list and net prices for some of the sizes:

	List prices.	Figured net at 35/10 off.
No. 00, doz.	$ 75 00	$43 88 doz.
No. 01, doz.	116 00	67 86 doz.
No. 1, doz.	133 00	77 80 doz.
No. 2, doz.	145 00	84 83 doz.
No. 3, doz.	160 00	93 60 doz.
No. 4, doz.	182 00	106 47 doz.

Insect Destroyer; Spring Prices

London, Ont.

Dr. William's fly and insect destroyer is quoted at the following prices for spring:

1 gal. cans, $13 doz., net cash; ½ gal cans, $9 doz., net cash; ¼ gal. cans, $6.50 doz., net cash.

Tire Bolts 50 P.C. Off

London, Ont.

A new lower price has been made for tire bolts, which are now quoted at 50 per cent. off list. The previous discount was 40 per cent.

Tie Out Chains Reduced

London, Ont.

A reduction has been made in the price of tie out chains. They are now quoted at 33 1-3 per cent. off list. This is a decline of approximately 15 per cent.

Nail Sales Still Light

London, Ont.

Sales on wire nails continue light and show little change. Prices are holding and are $5.10 per keg, base, for wire, and $6.40 for cut nails.

Rope Shows No Change

London, Ont.

No change has been made in the price of rope and sales are slightly improved. Following are the present quotations:

Pure Manila, 24½c base; Beaver Manila, 20c; New Zealand Hemp, 20c; Sisal, 18c.

Poultry Netting Moving

London, Ont.

Spring shipments of poultry netting are beginning to move out now. The Canadian make is quoted at 10 per cent. above list for 1-inch and 2-inch mesh.

Screen Wire $3.50 Square

London, Ont.

Screen wire cloth, of which shipments are beginning to go forward to the retailer, is quoted at $3.50 per 100 square feet for the black painted grade.

Spades & Harvest Tools Move

London, Ont.

The quotations for the spring orders on spades and shovels are 35 per cent. off list. Harvest and garden tools are quoted at list less 50 and 10 per cent. Orders that have been booked for these are now going forward.

Lawn Mower Quotations

London, Ont.

The spring shipments of lawn mowers are now starting to move out. The quotations on Taylor-Forbes make are the following: Woodyatt and Star, 10 per

cent. off list. Daisy and Empress, 15 per cent. off list.

Alabastine Selling Well

London, Ont.

Alabastine is selling well at the present time and is quoted at 16 cents per pound, less 40 per cent.

Screen Door Hinge Prices

London, Ont.

Prices on spring hinges for screen doors are the following: No. 20 and No. 200, per gross pairs, $28.80. In smaller lots the price is $2.50 per dozen pairs. Booked orders are now moving out.

Horse Clippers Selling

London, Ont.

There is a very fair demand for horse clippers at the present time, and the Stewart No. 1 is quoted at $14, less 25 per cent. The Newmarket clipper is selling at $3.50 net.

Winnipeg Markets

WINNIPEG, March 3.—There are few price changes to record this week, and most of the alterations are to a lower level. Among the lines reduced are annealed wire, bright market wire, pig and bar lead, soldering coppers and several lines of mechanics' tools. Prices on iron and steel have remained steady for some time, but it is believed that a downward trend is possible shortly. Black and galvanized sheets are unchanged. A slight advance has been made in the price of steel butts, and tee and strap hinges, light, heavy and corrugated. Business here is showing a slow improvement, and prospects look brighter for the coming spring.

Linseed Oil Unchanged

Winnipeg.

Linseed oil is still quoted at $1.25 per gallon for raw and $1.28 per gallon for boiled.

No Change in Turpentine

Winnipeg.

The price remains the same this week on turpentine and it is quoted at $1.65 per gallon in barrel lots and 10 cents per gallon extra for small lots. Containers, 25 cents per gallon extra.

Soldering Coppers Reduced

Winnipeg.

Prices have again been reduced on soldering coppers and are as follows:

1 lb., 60c per lb, 1½ lb., 55c; 2 lb., 54c; 2½ lb., 53c; 3 lb. and over, 52c.

Reduction in Lead Products

Winnipeg.

Reductions have been made this week on pig lead, bar lead and block lead. Solder changed last week and is still quoted at the same prices. Following are the prices quoted:

Pig Lead, 8c per lb.; Bar Lead, 8¼c, lb.; Block Lead, 8¼c lb.
Solder—Tinkers, 45c lb.; wire, 45c lb.
Half and Half—Case lots, 31c lb.; less, 32c lb.

Rubber Belting Again Reduced

Winnipeg.

The prices for rubber belting have again been lowered and 6 inches and under is now quoted at 54 per cent. off list and over 6 inches at 47 per cent. off list.

Lower Wire Prices

Winnipeg.

The price has been reduced on the annealed, bright market and coppered spring wire and under are given the new quotations:

Annealed—0 to 9, $6.75; 10, $6.81; 11, $6.87; 12, $6.95; 13, $7.05; 14, $7.15; 15, $7.30; 16, $7.45.
Bright Market—0 to 9, $7.00; 10, $7.06; 11, $7.12; 12, $7.20; 13, $7.30; 14, $7.40; 15, $7.55; 16, $7.70.
Coppered Spring—8 and 9, $10.70; 10, $10.76; 11, $10.82; 12, $10.90; 13, $11; 14, $11.10.

Hinges Slightly Advanced

Winnipeg.

The prices have been revised again on tee and strap hinges and are slightly higher. The following quotations are now in effect:

Light Tee in Bulk—3 in., $1.15 per doz. pairs; 4 $1.30; 5, $1.50; 6, $1.75; 8, $2.10; 10, $2.75.
Heavy Tee—4, $2; 5, $2.40; 6, $2.75; 8, 3.15; 10, $5.40; 12, $8.80; 14, $9.20.
Corrugated Tee—4, $2.15; 5, $3; 6, $3.50; 8, $5.90; 10, $8.85.
Light Strap in Bulk—3, $1.15; 4, $1.40.
Heavy Strap—4, $2.25; 5, $2.80; 6, $3; 8, $4.05; 10, $6.90; 12, $8.40; 14, $9.90.
Corrugated Strap—4, $1.80; 5, $2.35; 6, $3.20; 8, $4.90; 10, $7.50; 12, $11.30.

Butt Quotations Revised

Winnipeg.

Prices on steel butts have been revised this week and show some small increases. Following are the new quotations:

No. 800—1 in., 39c per doz. pairs; 1¼, 46c; 1½, 60c; 1¾, 78c; 2, 84c; 2¼, 98c; 2½, $1; 3, $1.34; 3½, $1.87; 4, $2.66.
No. 833—1 in., 36c per doz. pairs; 1¼, 42c; 1½, 53c; 1¾, 67c; 2, 76c; 2¼, 88c; 2½, 93c; 3, $1.20.
No. 840, 98c; 2½, $1.29; 3, $1.57.
No. 804—2 x 2, $1.15; 2½ x 2½, $1.35; 3 x 3, $1.89; 3½ x 3, $2.50; 3½ x 3½, $2.77; 4 x 4, $3.38; 4½ x 4½, $4.39; 5 x 5, $5.67.

Saunder Pipe Cutters Reduced

Winnipeg.

The price has been reduced on Saunders' pipe cutters and they are now selling for 20 per cent. off the list.

Pittsburgh Markets

PITTSBURGH, March 3.—No more interest has been shown this past week in the finished steel market, and buyers remain apathetic. Declines on the various products have been small, but it is stated that price changes seem immaterial at present as there is no market in the sense of there being no activity. The price cutting by the independents, while it may not have brought them much additional business, has apparently curtailed shipments by the Steel Corporation and the operations of the latter have fallen from 75 to 65 per cent. of capacity in the last week. The independent mills are not believed to be running at more than an average capacity of 20 to 25 per cent. Bars and plates are quotable at a further decline, but the largest cuts have been made in sheet prices. Steel pipe and tin plate have been little affected and remain practically at Industrial Board prices. Pig iron prices have been further shaded $1 a ton to $27 a ton valley, and foundry coke is quoted from $5.50 to $6.50 per net ton.

PITTSBURG, March 3.—The finished steel market continues stagnant. There is scarcely any inquiry and thus the mills cannot get much business and do not even have much opportunity to endeavor to get business by making further price cuts. The position of most independent mills is that they would gladly quote lower prices than have yet been named if thereby they could secure reasonable sized orders and by the term they do not mean really large orders, but rather orders for say 1,000 tons at a time in the heavy rolled products and even less in the lighter materials, like sheets.

Declines in prices in the week have been small. Plates, which were quotable a week ago at about 2.25c as minimum, against the Industrial Board and Steel Corporation price of 2.65c, have been quoted at 2.10c, and the producing interest which quotes this price will not say how small a tonnage need be offered to induce it to quote it, while intimating that on a really large inquiry a still lower figure would be named. Shapes are quotable at 2.25c, the same as a week ago, the old price having been 2.45c, but the lack of a lower price on shapes seems to be due simply to there having been no inquiry to bring out a lower quotation. Bars were quotable a week ago at 2.00c, the old figure having been 2.35c, and may still be quoted generally at 2.00c, though it is known that in some special cases 1.95c and even 1.90c has been quoted, while in some quarters it is believed 1.85c could be done if there were the right sort of inquiry.

In sheets there are definitely lower prices. Blue annealed sheets are still quotable at 3.20c against the Industrial

Farmers Tire of Being Retailers

The Farmers' Co-operative Movement in Certain States is Reviewed—Farmers Seem To Be Realizing That They Are Beyond Their Depth, So Far As Conducting Retail Stores Is Concerned

From Printers' Ink

MANUFACTURERS who have been watching with some little apprehension the growth of the co-operative buying idea among farmers have asked Printers' Ink how the movement is being affected by present business conditions.

A survey of the situation in Iowa, Nebraska and Kansas, where the agitation has been the strongest, reveals two interesting conditions of a contradictory nature.

The farmers seem to be realizing that they are beyond their depth, so far as conducting retail stores is concerned.

On the other hand, the sentiment is growing in favor of buying binder twine, harvester machinery, coal and similar commodities in carload lots.

The latter proposition is really one that the leading promoters of co-operative buying have urged from the beginning. It is the thing that Printers' Ink mentioned a few months ago as being of real concern to the manufacturer. The manufacturer has to look out for it now more than ever.

Sentiment Changes

The retail store—the selling of dry goods, groceries and general merchandise—was hooked onto, or rather wished onto, co-operative buying without general consent.

For years farmers have held the bag for about every kind of co-operative store deal you ever heard of. All sorts of schemes have been cooked up for the purpose of doing away with the independent retailer. During the recent reign of sky-high prices, these stores got to be more in favor than they probably ever will be again. But now that readjustment is in progress the sentiment seems to be going the other way—showing that Mr. Farmer is a hard-headed individual after all, who is not going to buy goods from anybody very long from a standpoint of sentiment.

In Iowa, nine retail stores are owned and operated by the State Farmers' Union. Now comes the announcement that the Farmers' Union Exchange, which is the wholesale house supplying the nine retail stores, is in the hands of a receiver. The effect on the co-operative store proposition in Iowa remains to be seen.

In Kansas and Nebraska the retail stores are owned by the local unions and buy their goods wherever they like. Life is not at all pleasant for these stores right now. At this writing one big store of the kind in central Kansas is being closed out because its stockholders, all farmers, were "dissatisfied with the way things were going."

The officers of the Nebraska Farmers' Union are taking the situation in hand and are definitely discouraging the formation of co-operative retail stores.

Quantity Buying

In the matter of buying certain things in carload lots, however, and distributing them according to the method already described in Printers' Ink, the favorable sentiment gets stronger all the time. This has the backing of State Boards of Agriculture and is even supported by the United States Department of Agriculture.

It must be remembered in this connection that the farmer gets what he wants, no matter what the politics of the "in" administration may be. The farmer wants co-operative buying. And it must be admitted that he is going about it in a businesslike manner. Anyway, with the State and Federal Government back of him, he is a force that cannot be ridiculed away or argued out of existence.

Obviously the thing for the manufacturer to do in States where the co-operative buying idea is strong is to redouble his efforts for the upbuilding of the retail store. After all, here is the real weakness of almost any buying scheme. When it comes to distributing the goods to the consumer the retail store is the only real satisfactory way.

Build Up the Retailer

There is no use for the manufacturers to try to solve this problem through governmental agencies. The farmers are in the saddle there. Doubtless manufacturers would scorn to use such tactics in any event. But they can devote more attention to building up the retailer.

The experience that has been worked out in the case of retail mail-order ought to be enough encouragement. Ten years ago retailers were badly scared and all sorts of ridiculous ideas were proposed to help them defeat retail mail-order. Among other things, a move was started to have Congress impose a prohibitive tax on the catalogue houses. But certain manufacturers and jobbers who succeeded in keeping their feet on the ground realized that the way to curb mail-order was to have strong retail stores. This policy was put into effect. Retail dealers were shown how they could compete with the catalogue houses. To-day mail-order is great and strong but it no longer is regarded as a menace to the retail store.

Where there are aggressive, capable retailers willing to put up a real fight for business the farmer is not going to be influenced so much by any talk about the fancy advantages of going in with his neighbors and buying things in carload lots. The retail store is or can be a stronger force than the agricultural departments and other agencies backing the co-operative plan.

PITTSBURGH MARKETS

Continued from page 56

Board price of 3.55c, but the 3.20c is practically nominal, awaiting inquiry, and the heavy gauges can be bought at much less, as they could be bought at a plate mill price, say at 2.10c plus an extra for their being under ¼-inch thick. Black sheets can easily be done at 4.10c, against 4.15c quoted a week ago, and an Industrial Board price of 4.35c, while it is believed 4.00c could be done and perhaps shaded a trifle on a really good order. Galvanized sheets have been quoted even in small lots at 5.25c against 5.35c a week ago and an Industrial Board price of 5.70c.

Standard steel pipe seems still to present a firm front, so far as the mills are concerned, but it is reported that some jobbers, particularly in the East, are offering to sell at mill prices. Tin plate likewise has not been shaded. These two are the only lines that remain at Industrial Board prices.

The Steel Corporation has made no reductions, but adheres rigidly to the Industrial Board prices, just as it did all through the period when the independents were readily securing much higher prices.

Buyers Apathetic

The record of prices and price declines, however, is of little significance and of no particular interest. As to market conditions it does not matter what prices chance to be quotable, as there is no market in the sense of there being activity. It would make very little difference in the year's earnings of producers or consumers whether the material now being sold were at $10 a ton higher or $10 a ton lower than the prices that are just now quotable as the market.

Buyers are taking no interest in prices. There is nothing like a deadlock. Buy-

Paint Doubles the Value of Property

Second Hand Automobiles Increase in Value From One to Three Hundred Dollars if Attractively Painted—Dealers Should Keep Their Stores Well Painted—Suggest Canvass of Local District

AT the invitation of the Winnipeg Paint Club, T. F. Monypenny, of the Imperial Varnish and Color Co., Ltd., of Toronto, and F. J. Penberthy, of Lowe Bros. Co., Ltd., Toronto, addressed the salesmen of the various paint houses in Winnipeg. The convention was held in the Board of Trade auditorium and about 200 executives and salesmen were present.

The convention chose for its chairman C. H. S. Bamford, salesmanager of the J. H. Ashdown Hardware Co. The meeting was called to order at 2.30 p.m. and Mr. Bamford introduced the speaker of the afternoon session, Mr. Monypenny. The topic on which Mr. Monypenny spoke was the "Save the Surface and you save all" idea and how to interest the dealers in linking up with the campaign.

Mr. Monypenny started the subject by stating that the "Save the Surface" campaign originated about two years ago and the idea back of the propaganda was to further the use of paint and varnish and to show the consumer that paint and varnish was a necessity as well as a beautifier. To prove this he went on to say that a house or barn properly painted would, if sold, bring almost twice the value of unpainted buildings. Second-hand automobiles invariably brought from one to three hundred dollars more if attractively painted and varnished.

Paint the Stores

It was pointed out by the speaker that many dealers would sell more paint and varnish if their own premises were kept in the "pink of condition." One of the salesmen present corroborated this statement by saying that a certain merchant on his territory sold very little paint. This salesman was successful in getting the merchant to paint up his own store and fence. The farmers in the district were immediately struck with the idea of painting up and within three weeks the merchant had disposed of more paint than he had during the previous year. In other words, it pays to practise what you preach.

During the year 1919 the people of Canada per capita paid only $2.20 for paint and varnish and over $6 for tobacco. Before the "Save the Surface" campaign was introduced, the people of Canada per capita paid only $1.13 for paint and varnish. This was thought to show that much good is being done by the "Save the Surface" campaign.

Every merchant who sells paint and varnish may secure full particulars as to how to link up with the "Save the Surface" idea, by writing to the "Save the Surface" Headquarters, 509 Royal Trust Chambers, 107 St. James St., Montreal, Que. Dealers will be supplied with advertising, electros, window banners, moving picture slides, etc., absolutely free of charge but only on the promise that the material furnished will be used.

Canvass the District

It was suggested to the salesmen present by Mr. Monypenny that dealers be instructed to make a canvass of their towns and district, taking the size and description of all buildings, machinery, etc., requiring paint and varnish. A letter could then be written by the merchant to the owners of this unprotected property, giving an approximate idea of the paint and varnish required, with prices and color cards.

Following the excellent address given by Mr. Monypenny, a general discussion was entered into. H. H. Eager, of the Sherwin-Williams Co., told of an amusing incident to show how the "Save the Surface" idea was taking hold. A dealer two years ago called on a Swedish-American to sell him some paint for his farm buildings that were badly deteriorating for want of protection. Ole refused to buy, but last year changed his mind and approached the same dealer. The merchant was interested in finding out what made the farmer change his mind, and to his query Ole replied, "I ban got to do it. Now you save the surface or it go to hell."

Illustrated Lecture

At 8 p.m. Mr. Penberthy spoke on "Paint—its uses and abuses." The lecture was illustrated with over one hundred lantern slides showing amongst other things the system of producing and manufacturing linseed oil, china wood oil, shellac and kowri gum and white lead. Reproductions clearly showed that a paint made from lead and zinc lasted much longer than a straight lead and oil mixture. Slides showed that white lead under a powerful miscroscope was made up of coarse atoms and zinc of fine atoms and when combined a perfect film was formed, absolutely impervious to snow, rain, wind or sun.

In the making of paint and varnish, the manufacturer leaves nothing to chance. All ingredients entering into ready mixed paints are thoroughly tested before using, by experienced chemists. Before the paint is ready for placing in containers, samples are drawn from the various tanks and tried out for color, covering capacity, etc. Then boards are painted, numbered and dated and placed on the "roof gardens" and are subjected to all kinds of weather in order that the manufacturer can ascertain in what manner his finished product will stand up. The modern methods of today make failure almost an impossibility.

Another interesting slide was thrown on the screen to show the importance of a consumer properly mixing paint. A screw driver or small stick used for mixing only cuts the paint. What should be used for mixing is a flat board about half an inch thick and at least 1½ inches wide. The paint can should be cut right around the edge in order that plenty of space is available for proper mixing.

Mr. Penberthy concluded his interesting address by again asking the salesmen to get the merchants all over the prairie provinces to link up with the "Save the Surface" idea.

Paint Prospects in The West

W. S. Fallis, vice-president and managing director of Sherwin-Williams Co., Ltd., who just recently returned from a business trip to Winnipeg, sums up in a brief way conditions as he found them, in the following statement to Hardware and Metal:

"The West has experienced a period of depression; however, this has been lifted, evidenced by reports I have had from the large jobbing houses in Winnipeg, particularly in our own lines. While the volume of business has been less than last year, it was running uniform throughout the entire West; that is, all parts were turning in orders of a good sorting nature.

"We have every confidence in the future, as already a greater number of orders have been received up until the end of February, and the recent reduction in the price of paint will act as a stimulus to that particular trade. The Western factories of our allied companies have been running to full capacity in preparation of stock that we have every confidence will be early moved in the months of spring.

"The West is always buoyant of hope, and this year is no exception."

Correction re W. H. Gerke

The underlines of a cut of W. H. Gerke appearing in February 26 issue of Hardware and Metal incorrectly mentioned that Mr. Gerke had resigned from the position of general manager of the Martin-Senour Company in Canada and the United States. Mr. Gerke has not been connected with the Canadian end of the company's business for some years and resigned as general manager of the company in the United States.

GLIDDEN

Paint That Repeats

It's often easy to make first sales.

But first sales are not the most profitable sales. You find your greatest profits in repeat sales—the business that comes to you without effort—the result of good goods that have given satisfaction.

It is just this kind of profitable repeat business that Glidden reputation brings. While it is selling painting materials for you it is selling other products. Glidden reputation will be a real asset for your business.

If you were in business for a month or two any kind of paint might do. But you're in business to stay. So are we. Let's get together and get a firm hold on the paint business in your territory.

Write for prices and plans to-day. Now is the time to prepare for the spring rush.

The Brush Department

Best Grade Bristle Brushes Remain High

Production of Long Stiff Bristles Decreasing—Producing Countries in Chaotic State

IT has often been said that a salesman cannot be really effective unless he has a thorough knowledge of the goods he is selling. The truth of this assertion will not be denied by anyone. It has therefore been suggested by some that a more extensive knowledge on the part of the average merchant in regard to the various qualities and construction of brushes would do much to increase their sales. Great progress has been made in recent years in the manufacture of brushes, particularly paint brushes, as will be outlined in this talk on the subject by Robert Brown in "Stephens' Paint News":

The principal raw material used is the bristle of the wild boar, generally regarded as the original of our domestic swine — in size equal to the largest of the domestic kind, but stronger in body and a most dangerous adversary when at bay. It is of a grayish black color, with short woolly hair thickly interspersed wi h coarse stiff bristles taking the form of a mane along the spine, and from this mane we get our best bristles, though other parts of the body furnish us good but shorter bristles.

This species of boar inhabits the deepest recesses of the forests and marshy lands of Russia and Central Asia, roaming in large herds, but they are not all of value for their bristles. A certain race is fattened in a special way, the animals are fed on the refuse of tallow factories at certain seasons, and reach prime condition after a few months' feeding. When fattened, and their bristles are in fine color, they are herded into pens, crowded together so thickly they can scarcely stand, irritated and goaded by the herdsmen until they are swollen with rage, kicking, struggling, scrambling together, and protesting vigorously, they are seized one by one by trained men and their bristles plucked out by the roots. The perspiration into which the animals are thrown by their exertions causes their bristles to yield easily. Once their bristles are removed the animals are immediately released and return to the woods.

A semi-tamed variety of hog provides another source of supply. At certain seasons these hogs shed some of their bristles, which are gathered by the peasants and taken to market, but these bristles are slightly inferior to the above mentioned. These types are rapidly getting scarcer and are in danger of becoming almost extinct.

Breeding on a large scale has now been resorted to, and while an excellent bristle is produced, the production of long stiff bristles is constantly decreasing to the point of actual scarcity, and the demand for them is ever increasing.

Chinese Bristles

The smooth, glossy bristle, generally named "Chinese Bristle," is not drawn entirely from the Orient as their name would imply, but a large proportion comes from other countries in Asia and Europe.

The Indian boar produces a very valuable bristle used principally in the manufacture of short stiff brushes such as cloth brushes, etc., and also when mixed with other bristles.

So-called "French Bristles" are principally from Russian stock—cleaned and bleached by a special process—giving them a splendid whiteness and softness, yet preserving their elasticity and firmness.

From this class of bristle are made the fine pencils of the artists, fresco brushes, angular liners, lily oval varnish brushes, etc.

American packing houses also supply a quantity of the poorer grades of bristle used. Though some very good bristles are produced from this source, the bristles of the domestic hog are unsuited for best quality paint brushes, being as a rule too short and wanting in elasticity. High breeding, while giving us splendid hams and bacons, certainly deteriorates the bristles.

Bristles go through an extensive and thorough cleansing process, and are then sorted into colors, black, gray, yellow, white and "lilies."

They vary in length and are separated by the workman passing them through a special comb to bring the thick or root ends together, then holding a quantity in his hands with roots down and knocking them smartly on his bench until all the roots are even. He then applies them to a gauge to ascertain the lengths of those that project, and seizing them between his finger and thumb, draws them out of the bundle and places them with those of corresponding dimensions.

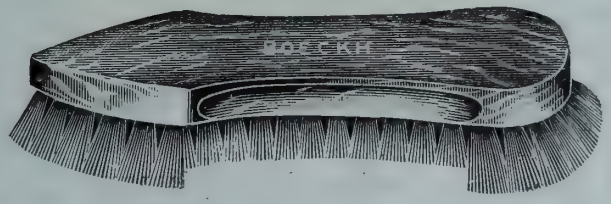
Sorting

They are sorted according to thickness by a process called "dragging," which consists of passing the bristles through special combs — which retain those that are too stout to go through the teeth. By repeating with finer combs, the bristles can be assorted to any number of sizes required.

Bristles are bleached for whiteness by sulphur and other chemical agents. They have a natural bend which requires great skill and delicate touch on the part of the workman to manipulate so that they will incline towards the centre of the brush, which when dipped will have a perfectly pointed working edge.

The workman having weighed and arranged his bristles, they are now imbedded in a plastic rubber head hardened by vulcanizing, and being bound on to the handles by strong bands or ferrules, securely riveted and clinched on the completion of this process, we have a combination which enables us to guarantee a brush that will not shed its bristles.

Horse hair and a great variety of fibres are used in the manufacture of brushes, but though of value in the manufacture of certain kinds of brushes, they really only serve as an adulterant when used in paint brushes.



Bristles have no satisfactory substitute, and it is always true economy for practical painters to insist on the best obtainable.

The chief bristle producing countries of the world being still in a state of chaos is one reason only for the high cost of best grade bristle brushes, for even should these countries return to normal conditions the continual increase in values will not stop—diminished production of best-quality long stiff bristles and the steadily growing demand being the chief reasons for increased costs.

The Monarch Industries, Ltd., Beamsville, Ont., has been incorporated with capital stock of $300,000, to manufacture registers, carburetors, motors, etc.

New Company.—The Canadian Toledo Scales Co., Ltd., has been incorporated with head office at Windsor and capital stock of $350,000 to carry on the business heretofore carried on in Canada by the Toledo Scale Co. of Toledo, Ohio, and to carry on the business of mechanical engineers and dealers in and manufacturers and operators of plants, engines and other machinery, including scales and weighing and testing machines of all kinds.

BOECKH TRADE MARK EST^BD 1856 TORONTO

BOECKH'S Superior Brushes

Displays of these many kinds of reliable brushes assure sales

DISPLAY them. When Boeckh's Brushes are well displayed they are far more than "half sold."

If you haven't already received one of the handsome, attention-drawing Boeckh Display Cards as shown on Page 63, Hardware and Metal for Jan. 8, 1921, we still have a few available and will gladly supply you free. This is a handsome card 21 in. x 28 in., in five colors, suitable for either hanger or easel use. In making up Boeckh displays with this striking card, see that you represent as many lines as possible of Boeckh's paint, varnish, kalsomine, miscellaneous painters' brushes, household brushes, etc.

Every Brush Guaranteed.

The Boeckh Company, Ltd.

Toronto, Canada

Established 1856

Absolutely Free!

A handsome and expensive display card in five colors —very striking.

Improved Inquiry For Turpentine

Chaotic Feeling in Market Has Been Overdone —Stocks Held by Dealers and Consumers are Light—Rosin and Turpentine Below Pre-War Prices

TURPENTINE holds firm at 50. cents, with the offerings taken, and some improvement reported in inquiry and sales to consumers, says Naval Stores Review, Savannah, Ga. True, they are not buying largely, but the signs of needs on the part of consuming industries are plain enough to read. As business settles slowly to a safe, sane and stable basis the pressure of demand on the market will come more into evidence. While there have been reports of some "distress," turpentine having been forced to sale below 50 cents, it is noticeable that the small lots that come in a regular way upon the market from day to day are taken up, leaving seemingly some further gaps to be filled in on the succeeding day.

While it is an anxious period through which the industry is passing, and the need of retrenchment in the cost of production and the curtailment of output need no stressing, there is somewhat of a sentiment that the chaotic feeling has been overdone, that the spirit of depression should give way more to a determination to withstand further efforts to depress values, and that no real reason exists why prices should be permitted to show further demoralization. In turpentine, at least, there seems a basis for the hope that the downward trend has been somewhat checked and that the market can be held firm around 50 cents without in the slightest lessening the demand, which is solely based on nearby needs and not on requirements of any distant date. Neither dealers nor consumers hold any material stocks of turpentine and that is one element of strength for the future.

Rosin

While reports do not indicate that there is any material improvement in the demand for rosins from consumers it is noticeable, from current but not officially confirmed reports, that dealers are laying in stocks. Factors are said to feel that rosins, in common with turpentine, have gone too low, that the present values, which are actually below the average price of rosins for the five years preceding the war, represent a financial loss to producers that cannot indefinitely continue. Rosins and turpentine are probably the only commodities that have fallen below the average pre-war quotations. The domestic and foreign demand shows little animation as yet, but as prices of rosins have been more than readjusted to the world-wide shrinkage in general values it is felt that further declines are in no wise justified.

PITTSBURGH MARKETS

Continued from page 57

ers are not waiting for lower prices, nor have they any particular prices in mind, at which they would be disposed to buy.

The really interesting feature of the situation is the relation between the Steel Corporation and the independents, which was referred to at some length in last letter. The independents evidently wanted to force the Steel Corporation to reduce wages, but the corporation refuses to take action. The independents did not, presumably, wish to force the corporation to reduce its prices, though obviously the corporation must eventually do so. Apparently they did wish to curtail the flow of steel from the Steel Corporation to its customers, as the existence of this steel, much of it going into stocks, would tend to detract from the quantity the independents would be able to sell later.

Last Friday a circumstantial report emanated from Youngstown to the effect that the Steel Corporation was to have a meeting that day and the next of the sales managers of the subsidiary companies, to consider making price reductions. The newspaper reports quoted officials of the Steel Corporation in Youngstown without giving names, also a prominent independent steel official, name also not mentioned, all commenting on this meeting, yet there was no meeting. The sales managers who would constitute the meeting were to be found at their desks in Pittsburg both days. The presumption is the report was conceived by independent steel men rather than by newspaper men. From various circumstances it is plain that the steel industry is not entering an era of good feeling between the various producers.

Operations

The Steel Corporation could not logically reduce its prices when it still had a high operating rate, based on old orders, but the cutting by independents has caused many customers of the corporation to instruct that shipments be curtailed or discontinued, and the corporation operations are decreasing rapidly. They were about 75 per cent. of capacity week before last, against about 92 per cent. in the first fortnight of the year, and last week they probably did not average over 65 per cent. This week will naturally show a still lower rate, and so on. The decline paves the way for the corporation to reduce its prices, and, of course, the corporation will reduce wages when it reduces prices or soon afterwards.

Practically everywhere it is admitted that the independents are operating at under 25 per cent., and one observer with good facilities for ascertaining the facts estimates that the rate is under 20 per cent. In other words, the independents are not running as well as when they started to cut prices, although they might be no better off if they had not cut prices. The one noteworthy result of the price cutting is the great decrease in the Steel Corporation's operations.

Foundry pig iron has quietly slid off a dollar a ton, $27, valley, being now the accepted market price, Bessemer remaining at $27 and basic at $25. These prices are more or less nominal, and certainly they are not supported by any buying to speak of. The prices are much below the cost of production, based on the cost of the large quantities of ore the furnaces have, purchased at last season's prices, and recent prices for coke. It appears now that the pig iron price will make the ore and coke prices, rather than the other way, and of course furnaces have to absorb the loss on the ore already bought. There is no interest in coke as to actual purchases, and little interest as to the future, the point about coke being that eventually the Steel Corporation will no doubt reduce wages all around, including wages in the Connellsville region, and then the other operators in the region can reduce also. When the new wage scale is in force it will be possible to figure how cheaply coke can be sold. The market is nominal just now, with spot furnace at $4.50 and contracts at $5.00. Some operators ask more, of course, but even those with the lowest prices do not effect sales. Spot foundry coke is quotable at $5.50 to $6.50, depending on brand, all prices being per net ton, f.o.b. Connellsville ovens.

"MISTER CHANCE"

Toronto.—Francis W. Chance, who represents a cutlery and sporting goods house of Montreal, was a guest at the Walker House. He has numerous friends in Toronto. Hence it was that a much-buttoned boy paraded the dining room at the lunch hour shouting urgently:

"Mister Chance! Mister Chance!"

And the innocent little bride from Hamilton at the sheltered corner table looked with adoring eyes at her hubby opposite and whispered confidentially:

"Poor thing. I'm sorry for her."

Millers Lock Co. Catalog

A description of a catalogue in the February 26 issue of Hardware and Metal said to have been issued by Millers Falls Co., Philadelphia, was incorrect. The catalog was issued by the Miller Lock Co., of Philadelphia.

MOORE'S LINE

Moore's Wagon and Implement Paint and Automobile finish are, as the rest of the Moore Line, high quality paints with a service of efficiency that delights and satisfies customers. They are made of selected materials by skilled artisans, and give the last word in paint service.

Here They Are!

Here are two fast sellers for your spring stocks. You'll need them both, the Automobile Finish when your customers touch up the car for spring, and the Wagon and Implement Paint for teamsters, cartage men, farmers, and numerous other wagon users. These lines, backed with the Moore guarantee, assure the dealer many new customers, and repeat orders from the old ones. Send your order in to-day.

Weekly Paint Markets

Montreal

MONTREAL, March 3.—There is a marked improvement noted this week in the sales of ready mixed paints and their allied products. Spring painting time gradually nearing, seems to be the chief reason of this increased activity, while the opinion is expressed that the recent decline in prices is another factor.

White lead in oil and putty are reported with seasonably light sales, and are quoted at reductions of last week. Turpentine is reduced 5 cents a gallon, with the Southern markets still anything but promising. Linseed oil also has lower prices, having now reached 95 cents in one barrel lots. Shellac registers no change in prices, but the market continues unsteady. Window glass also is very unsettled, and an increase in demand is thought to be the only remedy on this product.

Turpentine 5 Cents Lower

Montreal.

Turpentine shows a reduction of five cents a gallon, and is now quoted at the dollar figure in one barrel lots. The Southern markets are still said to be easier, but present prices are below productive costs, and the demand in the United States will have to increase before an upward trend takes place. It is the opinion of local importers and jobbers that as soon as the spring demand becomes heavier, prices will advance accordingly. Following are the present quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 00
2 to 4 barrel lots	0 97
Broken lots	1 05

Linseed Oil Again Easier

Montreal.

Linseed oil is again reduced 5 cents a gallon, and is now quoted at 95 cents for raw, and 97½ cents for boiled in one and two barrel lots. Business at these prices is not being sought, and paint manufacturers would rather use present stocks in the making of their products than sell at these low figures. The flax seed market is again easier, a change from last week when it was reported a little firmer.

1 to 2 barrels	0 95	0 97½
5 to 10 barrels	0 90	0 92½

White Lead at Decline

Montreal.

White lead in oil is now selling at the decline quoted in last week's issue of Hardware and Metal. With prices apparently set for this spring's business, manufacturers are now looking forward to increased sales. The new prices are as follows: $14 in five ton lots, $14.50 in one ton lots, and $14.85 in less quantities.

Putty Sales Light

Montreal.

Putty sales are still light, but this is expected for a few weeks yet. Not until March is well advanced will an increased volume of business be looked for. The new lower prices, reductions being quoted last week, are now ruling and are as follows:

Standard Putty—	5 ton	1 ton	Less ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs: advance over above prices.

No Change in Shellac

Montreal.

There is no change in shellac, and prices remain the same as last week, although some dealers are a little higher and some a little lower than prices given below. Business is still quiet, but somewhat improved from previous quiet weeks. Following are the quotations:

Orange shellac, in barrels, $4.50; in one gal. jugs, $5; white, in barrels, or 5 gal. jugs, $5; in one gal. jugs, $5.50.

Window Glass Unchanged

Montreal.

There is no change in the window glass situation from the last week, with trading continuing very light. The Belgian market is being watched with great interest, and the withdrawal of prices from that source will undoubtedly have its stiffening results on the market here. Local prices are unchanged, and 50 per cent. off Montreal list is still quoted, although lower prices are given by some jobbers in large quantities. One dealer probably has the right solution of the present unsettled condition when he stated that until the consumption increases not much improvement may be looked for.

Paint Sales Steadily Improving

Montreal.

A gradual improvement has been reported on sales of ready mixed paints and their allied products during the past few weeks, but this week paint manufacturers state a marked improvement is shown. Whether the recent reduction has had a stimulating effect or whether the season of the year now advancing nearer painting time is accountable for this increased activity has caused differences of opinion to be expressed among the paint producers. This season promises as well as other years in the paint industry, and the lack of volume of orders during the past winter months has undoubtedly been due to retailers not placing their orders, but allowing their stocks to run low and still take care of their paint trade. With stocks in this low condition throughout the different provinces, trading above the average might be looked for as soon as the weather permits the consumption of paint.

Toronto

TORONTO, March 3.—The paint trade has settled down to the new prices on prepared paints and white lead, and general opinion is that the declines have not stimulated business greatly. While there is an increase in the volume of business from week to week, paint sales at the present time should be larger than they are, and reductions in prices have the effect of a falling market and buyers are apt to hold off in the hopes of further declines.

Ready mixed paints, white lead in oil and putty are holding at recent changes. Varnish prices are holding unchanged and shellacs are steadier. The linseed oil market appears a trifle firmer and prices are maintained. In turpentine there has been a strengthening of prices in Southern markets, but there has been no change made here. Window glass is still an uncertain quantity, but reports from the Belgian markets look as if a firmer tone is at hand.

Paints and Varnishes

Toronto.

Prices on prepared paints are unchanged at recent declines, and varnish quotations show no changes. A gradual increase in the number and volume of orders is reported. Many buyers are stated to have held off placing orders for spring requirements, and when the season opens up there is likely to be a sudden demand upon manufacturers' stocks, it is believed.

White Lead Sales Moderate

Toronto.

Sales of white lead in oil are only moderate and many dealers are purchasing for immediate requirements only. The present prices of white lead in oil constitute a reduction of nearly 30 per cent. from the prices ruling last summer and fall. Whether the bottom has now been reached is uncertain, but pig lead prices

Vitralite
The Long-Life Enamel.

Tommy and Betsy are in Your Town

You know this always interesting couple — originated by Pratt & Lambert and made familiar to the whole country by national advertising. But do you realize that they really live in your own community? — that every household where their message is read, becomes a Tommy and Betsy household so far as the purchase of Vitralite Tints is concerned?

And the number of these families in your town would surprise you. Step into any better-class home and you will find at least *one* of these magazines: Atlantic Monthly, Century, Country Life in America, Harper's, House Beautiful, Review of Reviews, Scribner's or World's Work. Tommy and Betsy are in them all — creating better-class trade for you in a season when better-class business is particularly welcome.

The introductory proposition on Vitralite Tints is worth knowing about. Tell us to send the details.

PRATT & LAMBERT VARNISH PRODUCTS

If interested tear out this page and place with letters to be answered.

both in English and United States markets continue to show declines and the level reached on English markets is equal to the average of 1911. The following are white lead quotations: Ton lots, $14.95 per 100 lbs.; less than tons, $15.30 per cwt.

Putty at Recent Declines

Toronto.

The prices on putty are as the changes noted last week. The demand is reported to be light at present on this commodity. Quotations are as follows:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

Shellacs are Steadier

Toronto.

No further changes are reported in shellac prices, and quotations made last week still hold. Present quotations show a considerable reduction from last season's prices. Orange shellac is quoted from $4.50 to $5.25 per gallon, and white from $5.00 to $5.75.

Linseed Market Firmer

Toronto.

There is a firmer tone reported in the oil market. Prices are down 5 cents from last week, and while the crushers do not expect to see lower prices at present and the price may possibly not advance there is an opinion that a favorable price has been reached, and this past week has seen more enquiries and more interest taken. Following are the present quotations:

	Raw.	Boiled.
1 to 2 bbls, per gal.	0 95	0 98
3 to 5 bbls, per gal.	0 94	0 97
6 to 9 bbls, per gal.	0 92	0 95

Less barrels add 15 cts. gal.

Southern Turpentine Market Stronger

Toronto.

Turpentine prices are 10 cents lower than the quotations given last week, but reports from Savannah and other Southern markets indicate a stronger tone down there and producer's prices have been advanced this week. The future trend is usually uncertain, but it is noted that there is often an increase in the price of turpentine at this time of the year until the new crop comes in. The present quotations are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	0 95
2 to 4 barrel lots	0 92
5 gal. lots	1 10

Glass Tone Little Firmer

Toronto.

Little new information is available on the glass situation. There are indications of a stiffening of the Belgian market, and it is reported that the Belgian manufacturers have decided to curtail production in order to stabilize the market. Although business continues lighter than is usual at this season there has been a little improvement, it is stated. Quotations while nominally unchanged, are varying from 60 per cent. to 60 and 10 per cent., and reports of offers below these figures are current. Some independent lists are being quoted on window glass at the present time.

GERMAN GOODS ARE FINDING THEIR WAY TO CANADIAN MARKET

The menace to Canadian industry from Germany appears to be not only real, but immediate, according to the Canadian Reconstruction Association, and while Germany is making a moan about her ruined industries, she is at the same time trying by every means in her power to regain the position in the world's trade she occupied before she plunged the world into war. The United States Department of Commerce has reports from Argentina showing how the Teuton is underselling American firms, a concrete instance being in the respective quotations for 10,000 car wheels. In Mexico, German manufacturers are offering hardware at 25 per cent. lower than U.S. firms. The low exchange situation, to some extent, explains the matter, but high exchange countries like Canada and the United States are menaced by countries whose currency is greatly depreciated in international trade.

Perfect Industrial Machine

In a recent statement, a British government official said that "Germany is still a perfect industrial machine, running at low speed, it is true, but undamaged as yet in its vital parts, and would respond readily to any stimulus. The Guaranty Trust Company, of New York, which has just issued an analysis of "German plans to extend foreign trade," written by the assistant manager of its international trade department, quotes this statement:

"German exports for the first five months of 1920 were valued at 23,688,000 marks as compared with 10,057,000 marks for the entire year of 1919. For the eleven months ending November, 1920, the United States imported from Germany imports valued at $84,000,000, as compared with $10,608,141 for the entire year of 1919."

German imports into Canada for the eight months period ended November 30, 1920, were valued at $725,322, as compared with a value of $11,862 for the corresponding period of 1919.

CALLS IT BUSINESS IMMORALITY

By CHARLES PIEZ, President Link-Belt Co., Chicago

ONE of the discouraging, if not alarming, symptons attending the present business depression is the attitude of the merchants, dealers and jobbers on the subject of cancelling orders. While a sudden and severe reduction in demand may warrant a distributor in holding up or cancelling an order, there is absolutely no justification for the position taken by many distributors that they can cancel or reduce orders without incurring any obligation.

If manufacturers are going to permit distributors to escape responsibility for losses involved in cancellations, then they will encourage overpurchases in the future, with the loss and derangement to business which such overpurchases and consequent cancellations involve.

It is only when a merchant, dealer or jobber realizes the responsibility he is under when he places an order, that he will investigate conditions before he buys, and base his order on an intelligent estimate of the demand.

The widespread feeling that orders can be cancelled with impunity must be cured by a more vigorous and definite insistence on accountability for losses involved; for it is essential to the continued soundness of our business structure that this piece of business immorality be permanently stamped out.

Dougall

"Save the surface and you save all" *Paint & Varnish*

The Varnish That Lasts Longest

A varnish that is absolutely impervious to boiling water. Ammonia-proof, Soap-proof, and Steam-proof. A varnish that can be washed with hot water and soap without the least injury to its original lustre.

Where the wear is hardest and where ordinary varnish will crack and peel, Univernish will give lasting satisfaction. It is the Varnish for universal use and is equally reliable on indoor or outdoor surfaces.

It will pay you to keep Univernish in stock. Your customers know it and our window trims and display cards will remind them of the fact that you sell "the one best varnish for anything that needs varnishing."

May we send you prices and particulars of our dealer proposition?

SHEET LEAD

ANY WEIGHT. EIGHT FEET WIDE. ANY LENGTH.

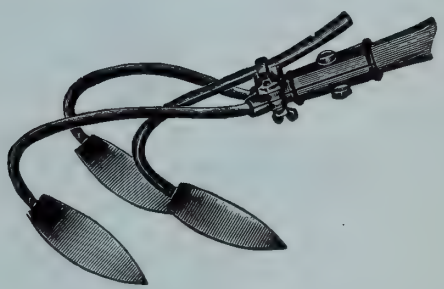
THE CANADA METAL CO., LIMITED, TORONTO

CARTER'S

Stock It For Your Painter Customers—

CARTER'S GENUINE DRY RED LEAD

A high grade Red Lead that is always pure and uniform. When mixed with pure linseed oil it furnishes an easy spreading and economical surface protection for iron work, metal work, steam pipes, etc.



The same standard of goodness is characteristic of the other Carter products—Carter's Genuine Dry White Lead, Genuine Orange Lead and Litharge.

Keep a supply of all four on hand. You'll find them worth while.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Every Gardener is a Prospect

for this Cultivator. Amateur or professional, he will want the—

Ulrich Cultivator

for it will help him do his work quicker, better and easier. It can be adjusted for general cultivation, hilling, furrowing and covering and, with shield, for small plant cultivating. It will stand up under hard use, for the blades are of spring steel; shanks of ⅜-inch spring steel; the ferrule is of malleable iron and is bolted to handle; handle is of best grade ash 1¼ x 52 inches.

You'll have no come-back when you sell this tool.

Better send for full data at once.

TRADE
ELASTICA
MARK.

At The Hardware Convention

Visitors to the recent Hardware Convention at Hamilton will recognize the above picture of the Elastica Paint and Varnish booth.

We are glad to have had this opportunity of meeting so many of our friends in the Canadian hardware trade, and are confident that the advantages of the complete Elastica Paint and Varnish line as demonstrated in this exhibit will appeal to many who are not already connected with us.

Complete information re the exclusive Elastica Agency will be mailed on request.

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Plastic Elastigum Patching Cement

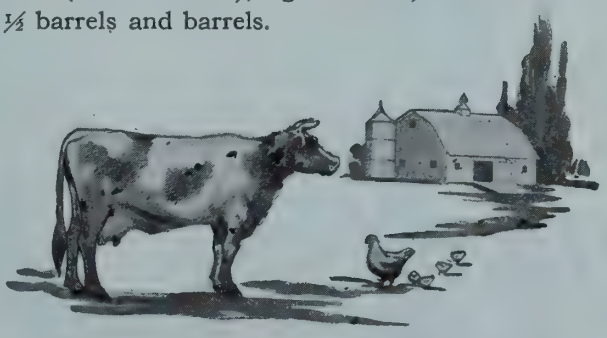
ONE of the most popular of the Barrett Products is Creonoid (Fly Oil) Lice Destroyer and Cow Spray. Farmers throughout the entire Dominion use vast quantities of this product during the fly season. Our plans include an intensive advertising campaign directed to the farmers during the time when the fly pest is prevalent. Be ready to cash in on this demand which will be created for you.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

"I SAVE from $30 to $50 per month by the use of Creonoid," writes a farmer. "By its use night and morning, my cows have practically 24 hours of peace and comfort . . . I have used Creonoid for more than a year in my dairy, and I find it so superior to all other 'fly dope' that there is no comparison."

That is but one instance among thousands, where Creonoid has increased the milk yield. Experts say that cows give 25% more milk, when freed from the fly nuisance.

Creonoid is a very inexpensive and wonderfully effective fly-spray for horses and all live stock.



It is easy to apply. After its use cows will stand still at milking time, and should show an increase in weight and milk yield.

Creonoid will pay for itself many times over through increased farm profits.

Creonoid means more milk per cow, more eggs per hen, more pounds per hog.

Creonoid comes all ready for use. It requires no mixing or thinning.

It is put up in exceptionally attractive lithographed cans in the following sizes: 1-gallcn cans (12 to the case), 5-gallon cans, ½ barrels and barrels.

TINKER TOM'S TALKS.

No. 301

A Tip to Tinsmiths

In our daily production of Premier Galvanized Steel Sheets we set aside a ton or more of

Galvanized Sheet Seconds

These are whole sheets, with slight surface defects, spots on one side, or corner turned down—and for many uses are practically as good as Primes.

They are used largely for valleys, flashing, hot air pipes, small manufactured articles of all kinds.

Order a couple of bundles with your next lot of Premier. The reduced cost is a considerable saving.

Every jobber sells our Made-in-Canada Sheets.

TINKER TOM.

DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

HOBBS Manufacturing Company, Limited

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by" of their need for Wa-Ko-Ver Stain. This sales-maker will handsomely reward a little sales-effort on your part.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Harvey Boltless Auto Springs

Display Rack

Made of selected hardwood. Well made and serviceable. Finished in natural wood 30 in. high. Will hold 12 springs. With this rack to display and a stock of replacements at hand, you will find it easy to sell the Harvey Springs. This "Silent Salesman" means money to you.

Model AA

Our Guarantee

We guarantee every Harvey Auto Spring against breakage or sagging for one year. Defective springs returned to us, transportation prepaid, will be replaced without charge.

Write to-day for prices and full particulars. We are close-at-hand to give the Western dealer the utmost in service.

Fig. 1

Regular centre hole, punched cold, the usual way. Note invisible fractures in structure of steel, as shown by magnifying glass.

A Fast Selling Line

The Harvey guaranteed "Boltless" Auto Springs are unsurpassed. Made by the Patented Harvey Process. Built on a better principle that gives added strength and makes the Harvey a superior spring. For wearing and lasting qualities no other can equal them. Your automotive accessories customers will be delighted with these reliable and durable Harvey Boltless Auto Springs. Remember, they are fully guaranteed.

Fig. 2

The Harvey head is forged hot. No metal is removed. The fibre of the steel remains unbroken. It has the advantages that make the general superiority of the product, collectively.

Opening the Strap

O-Rib-O Adjustable Taper Stove Pipe

This handy patent permits adjustment to fit any stove collar with a smoke-tight joint. No large assortment of taper pipes is necessary, which allows the merchant to economize storage space. It is a quick seller, built for service.

O-Rib-O Manufacturing Co.
Winnipeg, Manitoba

For Solidifying Sales and Preventing Lost Accounts

For solidifying sales, and preventing lost accounts by keeping the trade "lined up," a weekly message to the whole Canadian hardware trade through Hardware & Metal will prove productive and profitable.

In design and construction it is the best torch of this type on the market to-day.

Detroit Torch
Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on botton of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

100 Per Cent. Canadian

For a profitable and salable file, Hart Mower Files stand supreme. They are made in Canada, from selected materials, by skilled Canadian mechanics, for the Canadian trade. Hart Mower Files, the result of 34 years' experience in the manufacture of abrasives, are the farmers' friend, and that he appreciates the service-giving qualities of these files is proven by the continual harvest of sales experience by hardware dealers everywhere. Stock and sell Hart Mower Files for satisfied customers and repeat sales. Write to-day for interesting catalogues and literature of this line, and remember—they are 100% Canadian.

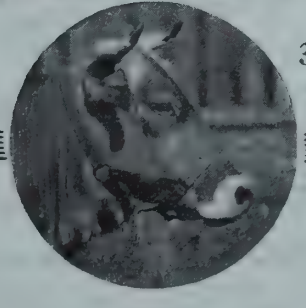
Sell All the Horse and Cow Owners

STEWART No. 1 Clipping Machines

Horses should be clipped to protect them from colds, heaves, pneumonia, and other horse ailments. A clipped horse dries quicker, rests better, and does more work.

Cows are clipped by progressive farmers and dairymen to ensure clean, higher-grade milk; it pays them. Moreover, the cows, and fine stock generally, are improved in appearance and value and made comfortable.

The Stewart No. 1 Ball Bearing Clipping Machine is the most perfect clipping machine ever made at any price. It has made good through years of satisfactory service.



Gears cut from solid metal and enclosed in dust-proof metal box. All wearing parts of hardened steel. Compact—can be set up or taken down quickly. Light—weighs only 30 lbs.

Guaranteed to please or price paid will be immediately refunded.

Get in touch quickly with your jobbers so that you can display the machines and get even the earliest business.

NORCROSS
GARDEN CULTIVATORS

are growing in demand every day. Over a Million are now in use. Sell one to a customer and you get his next door neighbor. Every Farmer and Gardener is a prospect. The Norcross comes in (3) sizes, 5-Prong, 3-Prong and Midget, suited to both men and women. A Norcross bears a Distinctiveness of Quality—Class and Finish that quickly appeals to buyers. Well made—Durable—Handsome in appearance, they sell readily at a good profit and you can confidently recommend them. Ask your jobber for Noreross Goods.

Dealers Should Get Out and Listen

If dealers would get out where they could hear men talk freely about tires, they would get some valuable pointers.

READ THIS LETTER

Dear Bert:-

Since talking with you in January, I have often thought how some of you hardware dealers would wake up if you could hear motorists talking among themselves. Motorists pay hard-earned dollars for their tires and don't do any boosting without good reason. Last summer, I heard so much boosting of "Gutta Percha" Tires and so many wild tales of mileage that I thought there was an Ananias contest on; but they were in dead earnest. Ed. Canby, you know him, persuaded me to buy a "Gutta Percha" Tire. That was six months ago, and it looks good for six months more. I have four "Gutta Perchas" now and they wear like they were eternal. Being a salesman on commission, I have to buy my own tires and the price comes out of my bread and butter. I watch my mileage like a hawk and I am not deceiving myself, or you either, when I say "they beat 'em all." It's a wise dealer who stocks "Gutta Percha" Tires because they are the winners on the road and that means they are sellers in the store. A friend of mine got 12,000 miles out of his, and a truck I know of went over 30,000 miles each on two rear tires. It's only fair to boost a good article; everybody's doing it.

BOB.

Mr. Dealer:—This User-Boosting is going to do a lot of good for some dealer in your territory. Why not you?

Rod Repairing

TRADE-MARK
Sign of Quality

TRADE-MARK
Sign of Quality

Dealers in Fishing Tackle will make friends of their customers by reminding them of the coming trout season and suggesting that they leave their fishing rods in to be overhauled and repaired right away. Take the orders and send the rods to us. We operate the only rod-repairing department in Canada.

Allcock, Laight & Westwood Company, Limited

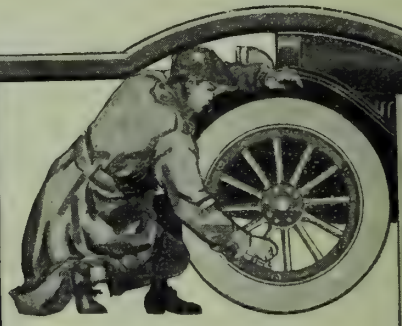
Tackle Exclusively — Established 1800

70 King St. West — Toronto, Ont.

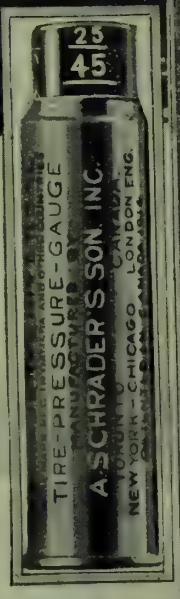
Our Beaver and Stag Brands of Fishing Tackle are sold by leading Dealers everywhere.

Acornette Pump Connection

ECONOMY!



The Improved Acornette makes a timely appeal to motorists because it gives them more for their money.

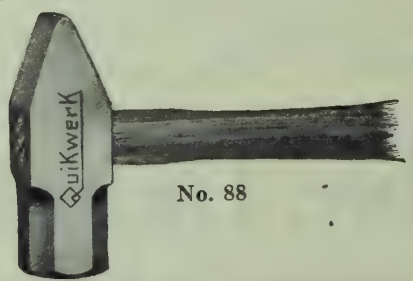


The Acornette design prevents buckling and retards chaffing of the rubber washer. The result—Acornette grips the tire valve tighter and the washer lasts longer.

"Thru your jobber his service is economy."

STEVENS & COMPANY
375 Broadway — New York City

STEVENS PRODUCTS



Have You Had Trouble With Your Tires?

MOST tire troubles can be traced to either too little or too much air pressure. Keep the pressure at the exact point recommended by the tire-maker and your tires will give less trouble and more mileage—to say nothing of greater riding ease. The Schrader Universal Tire Pressure gauge enables you to test the pressure easily and quickly anywhere, anytime. It is one of the indispensables for every motorist.

Price $1.75 anywhere in Canada.

Made in Canada by
A. Schrader's Son, Inc.
334 East King Street, Toronto
London, Eng., New York, Chicago

B.S.A. FIREARM "SAFETIPASTE"

TRADE MARKS
B.S.A.

Retails in Collapsible Tubes, size as illustrated.

B.S.A. Firearms Safetipaste

Something Every "Shooter" Needs

And buys when it's explained

Every man who owns or uses a gun, rifle or revolver hates the unending struggle against the chemical action of modern, high-power, nitro-powder ammunition. When the firearm is used, carefully cleaned and put away it will be rusted the next day. This corrosion nuisance is the bane of modern shooters.

B.S.A. Safetipaste ends this trouble. A little Safetipaste on a flannelette patch run through the bore prevents all trouble from chemical action. The rifle may be put away with perfect safety and cleaned later, or it may be thoroughly cleaned at once. In either case a film of Safetipaste left in the bore protects the steel, and the lands of a rifled weapon from the ravages of the powder.

You can sell Safetipaste to every customer who uses firearms.

Retails in tubes, as illustrated, and also in ½ lb., 1 lb., and 5 lb. tins. Don't miss these sales and the good-will of the delighted "Shooters." Many of them already know Safetipaste and want it.

Here's Another Pexto Wrench

No. 45 Polished; No. 045 Semi-Finished.

No. 45

AN ADJUSTABLE ANGLE WRENCH that is sure to appeal to mechanics, automobilists, garage-men and the trade in general.

The adaptability of the tool is so evident that it will require but a few words to demonstrate its usefulness and that it will replace a number of solid wrenches.

The finish and general makeup of the wrench is such that it will attract attention wherever displayed.

It is a Pexto Product and that alone will recommend it to critical buyers of good tools.

Let your jobber have a generous order; they will be rapid sellers.

If you have not received a copy of our new No. 20 Catalog, let us mail you one. You will find it interesting and instructive.

Your Satisfied Customer

—is the one who boosts for you

He builds your reputation and profits. He brings you repeat orders and new customers.

BURGESS BATTERIES make satisfied customers through the unequalled service they give at no extra cost. If better batteries could be made we would naturally supply them because Mr. Burgess, head of this Company, is the "Edison" of the battery world. His inventions are responsible for the wonderful development of the battery industry and the supremacy of the BURGESS line.

Battery demand goes on throughout the year, and as the seasons change new uses arise for which Burgess Batteries can be confidently recommended. Even in wet and damp weather Burgess Batteries continue to deliver power past their guaranteed capacity—truly proving that their *"Long Life Promotes Long Friendships."*

BURGESS BATTERIES, Limited
WINNIPEG

BURGESS DRY CELLS

Years of research and over fifty different exclusive patented features on batteries and accessories combine to ensure the supremacy of the BURGESS Line.

Our No. 6 battery is energetic, vigorous and enduring. It is tested, inspected and fully guaranteed to give dependable service.

Burgess Flashlight batteries sold in unsealed cartons have strong brass terminals, heavy zinc containers, and are uniform in size and quality

ROUND CARTON

BURGESS UNIPLEX BATTERIES

Made in Six Shapes

Multiples of No. 6 batteries assembled in a water-proof container of felt and asphaltum.

The cells are permanently connected in series with terminals covered by insulation which, with large insulated nuts, make accidental short-circuiting impossible.

This Guarantee Protects Your Profits

"You are protected by our unqualified agreement to replace any BURGESS product which does not give satisfaction"—and we make replacements promptly without any red tape.

Clothes May be All Wool and Yet be Unsatisfactory

There are many grades of wool, some good, but all are wool. The same is true of rope. There are many grades of Manila fibre, some are good. All are pure Manila.

Plymouth rope is made of grades of fibre expressly selected for the work the rope is to do. Plymouth rope is "pure Manila"—more than that it is *good rope*.

Dealers selling Plymouth rope never have "back-fires" at their Rope Department.

GUTTA PERCHA TIRES

The growing demand shows the popular approval of "Gutta Percha" Tires. Dealers can depend upon it, this is no "mushroom popularity"—up in a night and gone in a day. It is based on actual conditions of construction which have been adopted in all tires produced since 1919. The service record since then and the forceful advertising of "Gutta Percha" Tires make them "the Tires that Pay" both the dealer and the customer.

"Go as far as you like on

'Gutta Percha'

Tires"—Cord and Fabric

With every "Gutta Percha" Tire he sells—Cord or Fabric—the dealer makes a friend. The more friends, the better your business, so sell all the "Gutta Percha" Tires you can. Have you placed your order? Make "Gutta Perchas" your first choice.

Your Community Depends

On An Electric Power Station Like This

For Light: to make the factory safer, healthier, and more efficient; to light the dark corners of office, theatre, and store, and to flood the home with cheer.

For Heat: to lighten the labor and add to the convenience of the home by means of a multitude of economical electrical appliances, and to improve the speed and quality of baking and drying processes in the factory.

For Power: to turn the wheels of industry; to take drudgery from the home and monotony from the farm; to move the world, if necessary, by the electric motor.

For Service: on highway or byway, in home, office, factory, store, and theatre, we are served at the snap of a switch, because the electric light and power company had the foresight to build for the future.

Build Up a Profitable Fence Business!

THE substantial reduction in Peerless Fence Prices announced to you by letter recently is going to enable farmers and others to fence their properties this spring which were neglected during the last few years owing to high prices. The wise dealer will go strong on the sale of wire fence this season and will find a waiting market.

If you offer your customers Peerless Fence you'll have no trouble making sales, because it is advertised in a big way and every farmer knows of its high quality. Peerless will outlast any other fence because it is absolutely rust-proof—the secret of which lies in the special galvanizing treatment. You will never have a dissatisfied customer if you sell him Peerless Fence.

Did you get your copy of our new Catalogue No. 9? If not, tell us—we have one for you which fully describes and illustrates our many styles of farm, poultry and ornamental fencing — also farm gates and steel posts.

B. S. A.

No. 4 Sporting Rifles

Lee-Enfield Action
Calibre .303

The B.S.A. Sporting Rifle illustrated has the same action as the famous British Service Rifle which proved so superior in the firing lines of France. In extremely cold weather the bolt always functions, a feature thoroughly appreciated by many veteran hunters where the mercury is well below zero. The Lee-Enfield action is famous for its ability to work smoothly under the worst conditions of mud, dirt or sand.

This sporting model combines the rugged strength of the military arm with the grace and beauty of the purely sporting weapon. The fore-end is shortened and lightened. The small of the stock has been curved into a handsome, comfortable pistol grip, neatly checkered.

Altogether this is a most appealing rifle for the hardwareman with shooting customers who understand and need high-powered rifles.

Specifications :

LENGTH, over all 45 in.—WEIGHT, 7 lb.—BARREL, 25 in. Enfield Rifling—ACTION, Lee-Enfield bolt pattern with safety catch on left side—MAGAZINE, 5 or 10 shot—STOCK, walnut, shot-gun, sporting stock in half pistol grip, checkered—Length from trigger to end of stock 14¼ ins.—SIGHTS, Back 100 yards fixed, folding leaves 200 and 300 yards, tangent leaf 400 to 1,000 yards—Front, bead—All parts strictly interchangeable.

Imperial Polarine advertising in newspapers will reach 2,500,000 people this year. Seasonal advertising in farm and motor papers, supplements this. Advertising on such a mammoth scale—year in and year out—rolls up a vast volume of sales for Imperial Polarine dealers.

Best Advertised Line In Canada--

Imperial Polarine is the best advertised line of motor oils in Canada. Squarely back of this advertising stands its reputation for uniform high quality and dependable service.

What better combination is there for increasing dealer's sales?

Imperial Polarine advertising works for you the year 'round. Consequently, stock moves quickly—fast turnover is assured—a larger margin of profit is yours.

Three out of every four motorists and tractor owners use Imperial Polarine exclusively. This percentage is constantly increasing. The Imperial Polarine dealer gets the business.

Make Imperial Polarine your leader. Tie up your store to our advertising stronger than ever this year. If not already an Imperial dealer, our salesman will gladly explain the profitable Imperial Polarine dealer agreement to you.

Crank-case service is a big drawing card that builds business and goodwill for dealers. It will also increase your Imperial Polarine sales. Be first to establish Imperial Polarine crank-case service in your community.

Every dealer should display the Imperial charts of recommendations for the correct lubrication of automobiles and tractors. Write to 56 Church Street, Toronto, for charts or for your copy of our new booklet, "Automotive Lubrication."

COBBLER OUTFITS

Our catalogue lists quote an assortment of cobbler outfits. We will gladly give further details on request.

MORE IN DEMAND THAN EVER

The average handy man to-day is keen to economize, particularly in the matter of footwear. Where there is a family of growing boys and girls the cost of upkeep in boots and shoes is a continual worry. A positive saving in this regard is readily effected through the use of a handy cobbler outfit, such as we illustrate, and many dealers report an increasing demand for this article. If you have not these in stock, we would strongly advise featuring prominently in your store a few of the various outfits which we have ready for immediate shipment.

Write us for prices and other details.

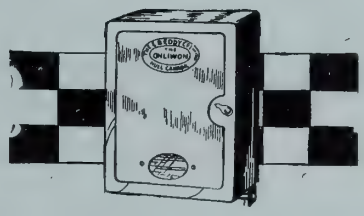
Story for Week Dated March 12, 1921 Being No. 48 in the Series

Substantial Cases for Shipping Eddy Products Made at the Plant

As a retailer you are without doubt familiar with the extremely strong and substantial cases in which the Eddy Company matches, toilet papers, and other products are shipped.

These substantial packing cases are made of paper-pulp just like many other Eddy Company products. They are made at the Eddy Company plant, and so large is the need for them in the Company's everyday business that a whole mill exists by itself simply for the production of these packing cases.



This mill is known at the Eddy Plant as "The Board Mill," because it makes the thick boards for the cases. This board begins its career in the form of thick, grey pulp. It goes through stone grinders which smooth its fibres down, and free it from any lumps, and proceeds to the heaters, which still further smooth its substance.

The reason for this double smoothing process is found in the fact that the board mill uses up any waste materials that would not find place in the manufacture of fine sulphite or mechanical pulp. In fact the E. B. Eddy Company made use during the war of an immense pile of discarded pulp material which had been piled up during many years on ground close to the board mill.

Ground, strained and washed, this pulp proved as good for its purpose as any, and a valuable saving was effected by its use during the war-caused crisis in the paper and pulp trade.

But the pulp for the board is on its way from the beaters to the wet machine, and here comes a curious little instance of clever Eddy Company inventiveness connected with a newly made "benedict" and a bell which refused to ring as merrily as the wedding bells had rung for him. That little story is reserved for next week.

The "ONLIWON" Toilet Fixture

Popular improved cabinet—with paper to fit. A handsome nickel - plated fixture — never gets out of order — is easily filled. Holds 1000 special sheets — very convenient, neat and unobtrusive. Keeps the paper dust-proof and sanitary, and automatically serves two sheets at a time.

This EDDY Pail

is made of indurated fibreware—which is wood pulp—moulded—pressed—baked under terrific heat until it is an all-one-piece-pail of flint-like hardness — strong as steel — lighter than wood.

Gasoline Tanks
For Underground Storage

Made of the finest copper steel procurable, welded and then painted on the outside with Anti-Rust, Acid-Proof black paint, these tanks are practically rust and corrosion proof. For handling gasoline only the very best is safe. The thorough test all our tanks undergo before leaving our factory is a guarantee of their reliability. The prices are most reasonable.

Oil and Gasoline Tanks

Here's a tank made of copper-steel with handy screw cap opening at top for filling and faucet in side near bottom for drawing off contents. Another reliable tank at a moderate price. These tanks have been giving satisfactory service wherever sold.

Your money back if not satisfied

Write us for prices and send us addresses of possible customers to whom we can send literature direct for you. We also manufacture baths, dairy equipment, sanitary closets, etc.

QUALITY COUNTS

YOUR customer invariably wonders, "Am I getting my money's worth?" whenever she buys.

At the moment she doesn't know. She can't tell. But in a week, or a month, or a year, she ***will*** know, because the ***quality*** of the article will have made itself felt.

If the quality proves to be high, your one-time buyer will come back for more, because she "got her money's worth" the first time.

But if the quality was lacking she'll start nosing around looking for a ***quality shop.***

This is especially true of electrical appliances. What is your stock like? They may ***look*** fine, but what will they ***do?***

If you carry the new Canadian Beauty line you are perfectly safe, for we have rigidly insisted on turning out appliances of the very highest quality only.

The public will spot the new Canadian Beauty Appliances right away for their "good looks." They have a smooth finish, brilliant polish, graceful lines, atmosphere—

Their "good looks" will ***sell*** them and their splendid quality will ***keep*** them sold. Your customers get "their money's worth." They'll surely come back for more new Canadian Beauty Electrical Appliances.

And they are right up to the minute in improvements. No worth-while feature is lacking. The new Canadian Beauty line is the last word in electrical appliance perfection.

Order through your jobber, or, if he cannot supply you, direct from us.

Announcement re Status of Retailers

On Eve of Test Case to Establish Whether Retailers are Liable For Taxation as Manufacturers, Government Issues Statement Removing Liability Pending Outcome of Case—Meetings of Retailers to Discuss Taxation Measures

OTTAWA, Ont.—Just as the stage setting was being completed for the hearing of the test case to establish the status of certain retail merchants for the purposes of taxation, word has been given out by the Department of Customs and Inland Revenue that pending the decision in the test case those retailers who have been held to be liable for the manufacturers' license and tax will not be held so liable. The statement as signed by the Assistant Deputy Minister of Customs and Inland Revenue and approved by the Deputy Minister is as follows:—

"Pending a decision in the 'test' case now before the court respecting the question as to whether merchant tinsmiths (etc.) are 'manufacturers' within the meaning of Section 19 BBB of the Special War Revenue Act, you are instructed that the following retail merchants will not be required to secure sales tax license, nor to pay sales tax, namely, merchant tinsmiths, harnessmakers," etc.

Subject of Keen Argument

The point involved has been a keen subject of argument for some time. Practically every gathering of hardware merchants has taken objection to the regulation which classed a tinsmith as a manufacturer merely because he makes a tin cup, an eavetrough or a stovepipe. The injustice of compelling such a merchant to take out a manufacturers' license at $5.00 and compelling him to collect 2% sales tax on all such articles manufactured was early realized and on objection being taken, it was stated that a test case would be held. Meanwhile the Deputy Minister of Inland Revenue was credited with having stated that pending the test case no prosecutions would be made against merchants who failed to comply with the regulation. On the strength of his word the Retail Merchants' Association advised members who were liable that they need not comply with the law, and that the Association would take the responsibility for such non-compliance. Nevertheless there were many merchants who complied with the regulation in fear of the penalties provided by the Government.

The announcement just issued by the Deputy Minister of Inland Revenue is sufficient authority for all merchants who are liable and who have withheld any such action, to continue without such license, pending the outcome of the test case.

Significant of Final Outcome

Such an official announcement coming out on the eve of the hearing of the case is considered by many merchants to be significant that the stand taken by the Government will not be upheld. In any case it will be an interesting discussion, and the result will have an important bearing on the future status of the retail trade in Canada. Developments in this matter have been outlined fully in past issues of Hardware and Metal and future issues will contain a complete report of the proceedings of the case at Ottawa. The expression of opinions of hardware merchants through Hardware and Metal, and at special gatherings, has no doubt had an important bearing on the case and has undoubtedly helped to bring forth the assurance just given that such merchants will not be liable pending the outcome of the case.

Meeting of Retailers

This is, of course, merely one feature of many important developments soon expected in regard to taxation. The question of a form of taxation to be substituted for the Luxury Tax is now being considered by the Minister of Finance, and it is rumored that the excess profits will also be eliminated. Merchants are much interested in what form of taxation will be introduced in the forthcoming budget. In this connection it is interesting to note that merchants in various parts of the country are planning to get together for an open discussion, and no doubt many recommendations will be made to the Government.

Such a conference of manufacturers, wholesalers and retailers is being called in Toronto on March 30 and 31 for a joint discussion of taxation. The system of taxation at present in force, alternative methods suggested by the three interests at the conference, and a possible taxation system which would be acceptable to all will be discussed.

Hardware Exports Balance Increased Imports

Increased Value of Imports of Hardware Into Canada for Eight-month Period Is Practically Equal to Increase in Value of Exports —Chief Increase in Hardware Imports From United Kingdom— Exports of Passenger Autos Increase While Imports Decrease

AN analysis of figures of Canada's trade for the eight month period ending November, 1920, as just issued shows how imports and exports of hardware lines compare with the same period in the previous year. A brief review of some of the more important items will give an idea of how trade is developing, in regard to hardware commodities.

On the whole, Canada's imports of hardware and cutlery for that period greatly exceeded the figures of the previous year, the chief increase being in imports from the United Kingdom. Imports of knives and forks including pocket knives practically doubled in that time. Scissors and shears imports nearly trebled and taking all other cutlery together imports were approximately double those of the same period in 1919.

Imports of butts and hinges were doubled, T and strap hinges trebled, while nuts, rivets and bolts, wood screws, etc., showed substantial increases.

Decrease in Automobile Imports

Imports of passenger automobiles show a decrease for that period, though auto parts show a large increase. Total wire imports were practically doubled, the chief imports coming from the United Kingdom. Total imports of iron and its products for that period are $119,153,393 in 1919 compared with $183,621,048 in 1920.

A substantial increase in imports of aluminum and its products is also noted while imports of gasoline more than doubled. Lubricating oils were also imported in much greater quantity. Imports of paints, pigments and varnishes show about a 50 per cent. increase, this being also the case with amusement and sporting goods. Brushes and refrigerators also show a substantial increase in imports.

Exports

In a number of hardware lines Canada has also shown substantial increases in exports, among which are bolts and nuts, wire nails, screws, washing machines and wringers, passenger automobiles, wire,

Modern Equipment Saves $227 a Year

Comparative Costs of Handling Laundry of Average Family Reveal Strong Argument for Use of Modern Washing Equipment—How One Hardware Merchant Secured a List of Live Prospects for Washers

SOME useful suggestions are made by an Ontario hardware merchant who during the past two weeks conducted a successful washing machine sale, through the medium of a demonstration. A variation of the usual advertising campaign was planned, this taking the form of small five-line "readers" in the newspapers in place of the usual large ads. These readers appeared generously, so that no housewife could read the papers without knowing that on a certain day there was to be a demonstration at the —— hardware of an electric washer. Splendid results were forthcoming and in discussing the matter with Hardware and Metal this merchant made the point that housewives are always keenly interested in knowing what merchants have to offer. The turnout to the demonstration provided the merchant with a large list of live prospects for a high-grade electrical washer. A campaign will now be planned to make these prospects purchasers.

Send a Booklet

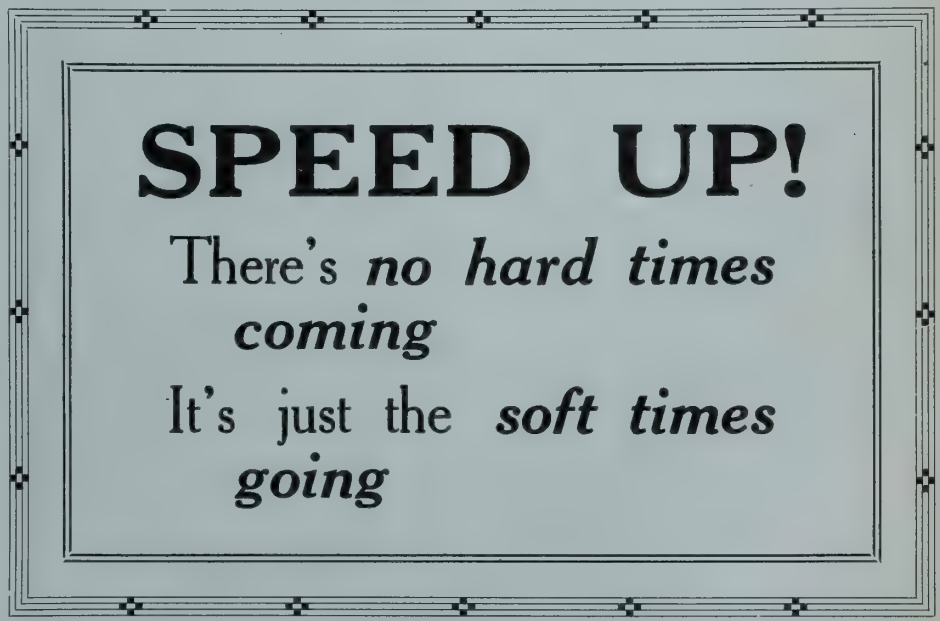
The next move is to send to each one of the women a very handsome and attractively illustrated booklet, which explains the working of the machine, emphasizing its simplicity of operation, economical cost and the elimination of drudgery. This is closely followed by a personal call to talk over the washing machine proposition and an offer to send a machine for the next wash day.

"We are particular," said this merchant, "not to leave the machine sent out any longer than is absolutely necessary for the washing. Our representative is right on the job and the question is put fairly up to the prospect right at the time she has had a chance to see what the machine will do. She is asked to say whether she wants to keep it or not. If she wants terms we arrange the matter. If she decides she does not want the machine it is removed.

Appeal to Rural Districts, Too

"We expect to do a nice business in washers as a result of our demonstration and follow-up campaign. Although the demonstration was planned to appeal especially to city women who have electricity available, we aim to go after one or two places in the country where electric power is obtainable. A special representative will be assigned to go out after business in these sections and to go over the territory thoroughly."

In connection with the demonstration in the store a space was set off so that the women visitors could watch the machine working, see the dirty clothes cleaned, and ready for putting out to dry in a short time. There was no question whatever about the interest the housewives take in the problem of getting their washing done quickly, easily and at a small cost. The demonstration proved also that when the housewives are once convinced that the machine will do all that is claimed for it and that it will operate just as quickly and easily in their homes as in the store they are "sold."



This merchant sees a big field for profitable business in the sale of washers and is planning to go after it aggressively. As the electrical lines are extended into the rural communities he sees opportunities for sales steadily increasing, and he is confident that one of the very best advertisements he has for future business is the satisfied customers he has made and who continually talk to their friends about the satisfaction obtained from their washer.

FACTS AND FIGURES

"IT should be recognized that house work is skilled labor and demands the most up-to-date tools," said a household science lecturer in a recent address in Toronto dealing with labor-saving devices for the laundry. It was pointed out that women have through long usage become accustomed to getting along without such conveniences and this is perhaps one of the chief obstacles in the matter.

The lecturer had worked out an investment of $500 by a business man in some up-to-date time saving devices for his office, and how in five years the investment would pay for itself and leave the equivalent of a new machine. The same principle was applied to an investment in a washing and an ironing machine.

The lecturer listed what might be considered an average laundry for a family of four and worked out that to send these articles to the laundry each week would cost $6.12 a week or $318 per year. To have the same laundry done at home by a woman would mean $197.60 a year. The investment which was proposed in the place of either of these methods was $400 in a washing machine and an ironing machine. Against this investment we placed 7 per cent. interest on the money or $28; 10 per cent. depreciation on the machines or $40; soap at 25 cents a week or $13; repairs $2. Added to this the running cost and heat for the machines for the year and a woman's time for four hours each week at 35 cents, and the grand total for the year is $164.09. Without the outside help which can be eliminated by the machine, the cost for the year is $91. The machines will wear, on the average, for ten years.

The above is a timely suggestion as a remedy for the distorted attitude of mind which many people have assumed in view of prevailing business conditions. The days of the real salesman are returning and the "soft" times are undoubtedly gone. This is being used prominently in the form of a sign in a number of stores.

50 PER CENT. TOOL SALES DUE TO WINDOWS

Tools everywhere, yet perfect uniformity evident throughout, is the best description of this typical display of tools in the J. & P. Davignon hardware, Montreal. The arrangement is pleasing and effective, and shows a very wide range of tools without any approach of confusion to distract the onlooker. The arrangement consists of three shelves tastefully covered, on which are arranged saws, planes, grinders, cleavers, torches, pipe threaders, levels, etc. Neatly finished panels in the back of the display show wrenches, chisels, pliers, calipers, auger bits, screw drivers, etc. A large panel on the side wall of the window shows a group of saws.

A unique arrangement is the displaying of other small tools on panels set in the ceiling of the window. Arrangements of masons' tools, scissors, knives, etc., are here seen.

Close attention to the window displays of tools is responsible for much of the success of this branch of the Davignon business. In fact, the manager states that fifty per cent. of the sales are responsible to the window displays. A definite increase in sales in the tool department is said to be at once noticed when a window display is devoted to this line. The window dresser advises the laying of definite plans for the display and then following them out.

Some Valuable Pointers in

Fifty Per Cent. of Sales Due to Effective Window Displays—Definite Increase in Tool Sales When Window Display is Arranged—Some Novel Ideas Worked Out in Window Displays

"HOW to get the tool trade" was a phrase that stuck in the mind of J. A. Lacasse, manager of the "ferronerie" or hardware department of J. & P. Davignon, 1036 Ontario Street East, Montreal, until he found a solution. This solution rested in his decision to make much of window display, and, in Mr. Lacasse's own words, "Fifty per cent. of sales are responsible to the window displays; it is the best advertisement that we can make use of, and there is a definite increase in the business of that department when we display tools." And the next important step was that of bringing the department closer to the street—nearer the customer.

Of course it is impossible to make displays without careful planning. As a rule, the measure of success attained is dependent upon the plan mapped out, and then again upon the care with which that plan is worked to. "Make a plan; then work to that plan," is a phrase that has been repeated somewhat emphatically in recent months by some big business leaders. It is a thought and an idea that commends itself to every retail hardware merchant. For with a definite plan before one there is a lopping off of that carelessness that spells uncertainty; sometimes disaster.

Davignon's have a wide frontage, and the window used for tool displays consists of two large lights of plate glass. The depth is about six feet, thus enabling the window dresser to place large tools or machines, as well as small and medium-sized varieties. While much may be claimed by advocates of windows with restricted depth, there is wisdom in that provision which enables the hardware merchant to place such heavy and bulky tools in a window which may help to make a well-rounded display, as well as a strong appeal to the mechanic. In such cases it is possible, as well, to occasionally introduce moving displays or figures of mechanics actually at work. For this reason the provision of a deep window has been found a wise one by Mr. Lacasse.

The display herewith reproduced is a typical one. It embodies the "panel" idea of arrangement and this particular window commends itself to the pedestrian in the neatness which it presents. It will be noted that each of the seven panels used as a background carries a distinct line of tools. This prevents confusion to the mechanic or "handy" householder who is always "stalled" when passing such an attractive display. If he wants a chisel he may centre his attention closely upon that panel which carries only chisels; if pliers, then pliers are attractively arranged; if wrenches,

Handling Tool Departments

Shortening the Distance From Street to the Tool Counter Has Helped to Pull in Tool Business—Centralized Plan Works Out Well—Nearly Twenty Feet Devoted to Screws and Bolts

wrenches, and so on. The advantages are obvious from the customer-prospect viewpoint alone.

Here's a New One

If not brand new in its entirety, then it may be said that the arrangement carried out on the ceiling of the display window is at least so well-arranged and neat that it commands special attention. In one respect alone it is well worth the time, expense and care taken to so arrange the tools—it helps make a very complete window, carrying out a unit plan that would not be complete if it ended at the top of the background panelling.

Care has been exercised, it will be seen, to make the panelling very neat in this window. There is a permanent-looking effect all around and the pebbled glass used in the small cross panel spaces above the tool panels serves the purpose of letting light pass into the store. This helps, to some extent at least, to overcome the objection so many would raise regarding the exclusion of natural illumination.

Note the end panels and also the provision that has been made to attach tools to the door panel which affords access to the window and egress from it. Then, after these panels have been set in place, it has been a brief operation to "fix" and decorate with bunting and tools the foreground.

While the central attraction of this window is for the mechanic or user of carpentry tools, there are tools for machinists, car owners, plumbers, steamfitters, etc.

The lighting arrangements are quite satisfactory, and at night few can pass without stopping.

Centralizing Department

Mr. Lacasse has decided that it is well to centralize tools. To this end he has carried out a somewhat unusual plan—that of backing his tool cases inside right against the window background. This means that, when a mechanic or another customer enters the store, there is a minimum of delay in reaching the tool department proper, and here nearly all tools are grouped. Mr. Lacasse remarked, regarding this:

"A salesman can show ten hammers with this plan where he could only show, with convenience, three or four in the old way. This makes it easier for the buyer to select and the salesman can show the stock quicker. Then the stock can be quickly put back into place after a sale has been made. It is a saving of time all around and far more satisfactory to both buyer and

Continued on Page 64.

GETTING CLOSE TO THE STREET

The success which has attended the linking up of window displays of tools with the tool department itself, in the Davignon store, is probably due in large part to the fact that the management has worked to bring the tool department within easy reach of the customers passing the store. Display arrangements having for their object the showing of a complete range of stock are also carried out in the tool department as evident in the above display. Special glass-fronted compartments are provided for hatchets, hammers, saws, levels, etc. It will be noted that there is an unique arrangement in each so that the goods are shown to best advantage and yet within easy reach. At the rear is found a series of small drawers for various lines of tools and builders' hardware, samples being affixed to the front of each drawer so that the stock is easily located and samples are always before the customer for examination. Beneath the case in the foreground are other display cases with glass fronts. The whole arrangement enables the manager of the department to constantly change his displays and thus maintain the interest of customers visiting the store.

Three hundred and forty-eight pockets are provided for screws in this department. This plan has eliminated any pilfering and places the stock within easy reach of the store salesmen. Other unique features of this department are described in the article.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, MARCH 12TH, 1921

THE LARGE number of hold-ups and other criminal actions taking place in many Canadian cities at the present time raises the question as to whether the recent legislation in regard to the ownership of firearms is serving its proper purpose. The criminals have been in the habit of getting firearms and other equipment for their work in any possible way, despite police regulations, but meanwhile these regulations are putting obstacles in the way of the ones whose need of weapons for protection is urgent.

Giving the Facts

A GOOD motto for the business man to keep before himself and his staff these days is that reproduced elsewhere in this issue making the point that there are "no hard times coming, it's just the soft times going." It has been pointed out on many occasions that the present phase of the readjustment process is one which forces a return to those conditions where selling again returns to its former importance. In this connection every merchant should see to it that due attention is paid to the perfection of his selling system to meet present conditions. One of the first steps that might be taken is to see that every salesman on the staff is sufficiently well informed in regard to the lines he sells, that he can give the maximum service to customers. There are many points such as courtesy, to be kept in mind, but it is doubtful if any other element is quite as important in selling as a detailed knowledge of the goods being sold, and as to what advantage will result from their ownership.

A good example of effective argument resulting from a little calculation is found in an article on the sale of washing machines in this issue. Here it is figured out that the investment of $400 in modern laundry equipment for handling the washing of an average family of four, results in an annual saving of $227, after considering depreciation, cost of materials required, etc. Even with the employment of outside help to operate the machine in the home, the saving is $33 in cash apart from the extra saving through having the clothes home laundered.

Such facts as these provide convincing argument and whereas in recent years of prosperity there has been little need for such selling effort, it is now required in full measure. The same principle of figuring may be applied by the merchant in regard to other lines where special selling effort is required.

Hardware Prices

MANY interesting points are noted in a study of the price comparison table published elsewhere in this issue. It is noted, for example, that declines which have taken place during the first two months of this year, nearly wipe out the increases made during 1920. This is of course dealing in average prices representing sixty-seven staple lines of hardware. A table appearing in the first issue of this year of Hardware and Metal showed that taking 100 as an index figure representing the price in January, 1920, the average price at the beginning of the present year was $110.53 or an increase of 10 1-2 per cent. A similar comparison between prices at March 1st, 1920, and 1921, shows the present average at 94.94 or a decline of 5 per cent. in that time.

Comparing present prices with those prevailing in January of this year it is noted that the average decline has been 8 1-2 per cent. represented by an index figure of 91.4. In view of the fact that the total increase during 1920 on these lines amounted to 10 1-2 per cent. it is evident that the increase of 1920 is nearly wiped out by the decline since the beginning of this year, and that the average price on these commodities is nearly back to what it was in January, 1920.

The increases and declines vary greatly as will be seen by reference to the table. Thus while lantern globes, sash weights, Canada plate, etc., are still much above the prices of March 1920, turpentine, sash cord, window glass, tin, lead, and some other lines have declined substantially. A table such as this shown in the market section of this issue will help the merchant to a true appreciation of the relation of prices and enable him to maintain a more intelligent idea of what is transpiring in regard to prices on hardware.

Canada's Trade in Hardware

MUCH is heard these days in Canada of the necessity of increasing our export trade and cutting down on imports, so that the financial standing of this country abroad may be improved. This is not a problem that can be solved by any rule applied alone to domestic business, it is an international problem which is much affected by doings in far distant parts of the globe. Meanwhile, in the words of a prominent U. S. manufacturer who recently visited Canada, we should rather encourage the wider sale of Canadian products than to try to even up matters by endeavoring to curtail imports, having in mind, of course, that imports of luxuries which must be paid for with necessaries is not a condition to be desired.

In this connection it is interesting to note from a review of figures of Canada's trade for eight months ending November 1920, that as far as hardware lines are concerned Canada's increase in imports for that period are practically offset by the increase in exports of those lines during the same period. Applying this analysis to specific lines it is noted that imports of all lines of cutlery were approximately double those of the same period in 1919. Butts and hinges, nuts, rivets, bolts and screws also showed substantial increases in imports, as do also lubricating oils, gasoline, sporting goods, brushes, wire, etc. On the other hand passenger automobiles show a decrease in value of imports while our exports show a substantial increase. Other increases are noted in exports of bolts and nuts, wire nails, screws, washing machines and wringers, electrical apparatus, and paints.

In view of present conditions a study of these figures as applying to hardware lines is interesting. This table is shown elsewhere in this issue.

Indefinite Delay in Test Case

Government Has Not Made Up Its Mind as to What Court to Take Case to—R.M.A. Has Engaged Counsel

A DELAY has been occasioned in the commencement of the test case to establish the authority of the Inland Revenue Department at Ottawa to classify certain retail merchants as manufacturers. At present it is not known whether the case will be heard in a few days or in a few weeks. The whole matter rests with the Government, which is endeavoring to make up its mind what court to take the case to.

Two weeks ago arrangements were practically completed for hearing the test case in the Exchequer court, but since then the Government has been trying to decide whether it would be better to follow the original plan or to proceed summarily in the local police court. The Dominion Board, Retail Merchants' Association of Canada, has engaged counsel in the person of T. A. Beament of the local law firm of Beament and Armstrong, who is prepared to file his defense as soon as he has been advised which court the case is to be prosecuted in. It was Mr. Beament's suggestion that the case be proceeded with summarily in police court. His idea was that the dissatisfied party could order a stated case which would be argued before the appellate division of the Supreme Court of Ontario, all of which could be done more quickly than if the case was taken to the Exchequer Court.

It is realized by Mr. Beament and others concerned in the matter that a decision in the case of the merchant tailors cannot be directly applied to other lines of trade as there is not an immediate parallel, but if a decision is given in favor of the merchant tailors it will undoubtedly affect the Government's attitude towards the other merchants.

SALES TAX ON PURCHASES BY WHOLESALERS FROM MANUFACTURERS

The Department of Customs and Inland Revenue has cancelled the ruling which made it necessary for a wholesaler to certify that the goods purchased by him are for resale.

All that is required under the new ruling of the Department of Customs and Inland Revenue is that the wholesaler should quote the character and number of sales tax license held by him.

Endorse Mutual Fire Insurance Plan

Mutual Fire Insurance for Members of Ontario Retail Hardware Association—Officials Endorse Scheme Outlined at Recent Convention

THE plan of mutual fire insurance, as outlined at the recent convention of the Ontario Retail Hardware Association in Hamilton, by F. A. Martin, Ontario manager of the Hardware and Implement Dealers' Insurance Company, has been recommended by the officers of the association after full consideration of the matter, according to Secretary W. F. Macpherson. The proposition of this company was mentioned in the report of the convention appearing in February 19 issue of Hardware and Metal, which outlined that the hardware association members in the States have been saving 50 per cent. on their insurance through this means and that due to the low ratio experienced on hardware and implement lines and the small expense at which the business is handled, there was no reason why this dividend rate could not be maintained or increased. It was stated that the dealer has positive protection at one-half the cost of stock company insurance. Fireproof garages were included in the coverage, the dividend on this class being 40 per cent.

Correspondence was read from the secretary of the New York State Retail Hardware Association, who stated that the insurance scheme had helped to build up the association owing in part to the fact that the mutual companies have refused to continue insurance for a merchant who withdraws from the association or who defaults in payment of dues.

In regard to general stores, it was stated that where they carry 25 per cent. hardware their entire line will be covered.

Secretary Macpherson advises that on behalf of the O.R.H.A. he has advised the manager of the Canadian Hardware and Implement Underwriters that the proposal as outlined is acceptable on the basis that the company will operate in Ontario, insuring such hardware dealers who are members of the association. The financial standing of the companies has been investigated and reported to be satisfactory. Vice-President George May conducted this investigation and reports that he has no hesitation in endorsing the proposition to the members.

Sugar-making Supplies

Ingram & Davey, of St. Thomas, Ont., have a most attractive window display this week featuring sugar-making supplies. In the centre of the window is an old-fashioned tripod, made by crossing three branches. From this is suspended a large sugar kettle. Beneath the kettle kindling is laid and the whole makes a picture suggestive of the woods and sugar-making. All around are sap pails and other requirements of farmers who boil sap. The window has proved an excellent business producer. The firm backed its window display by special advertising featuring sugar-makers' supplies. The advertisement was freely illustrated and prices were given in large figures. Trade was drawn, it was stated to Hardware and Metal, for fifty miles around the district.

February Building in Canada

In February, building and engineering operations in Canada have shown a marked increase over January. For the month, the value of the contracts was $17,641,000, an increase of $8,693,500 over January, and a decrease of only $696,100 from February, 1920.

The figures represent 544 houses, brick and frame, valued at $2,986,000; 132 business buildings, brick, frame and concrete, valued at $10,814,600; 29 industrial buildings, brick and frame, valued at $1,192,000; 29 engineering construction, steel and concrete bridges and general engineering, valued at $2,648,400.

New Branch Factory

Kingsville, Ont.—A new branch company, the McIlroy Belting Works of Canada, Limited, is now in operation here. The Canadian company are a branch of the McIlroy Belting and Hose Company of Hammond, Indiana, who for the past eighteen years have been manufacturing solid woven and stitched canvas belting, exporting their products throughout the world. They also manufacture fire hose.

Outlook for Cement

At the annual meeting of the shareholders of the Canada Cement Company, held last week, in Montreal, F. P. Jones, the vice-president and general manager, stated that business outlook for the coming year was more or less obscure. He thought that the activity in building trades this year would show an improvement over that of the past two years, but did not anticipate any marked boom. Summing up the prospects before his company, he stated: "I do not hold out any great hopes for an active business in cement in the near future. If our company secures enough business this year to warrant the running of our plants to within 60 per cent. of their capacity I think we shall be doing well." The company is contemplating the erection of a new ten-storey building on Phillips Square, and work on this will likely be started in the near future.

News of Western Canada

"Public Will Solve Your Problems"

"If You Do Not Solve Your Problems, the Public Will Do It for You," Dr. Hindley, Director Bureau of Education, State Retailers' Association, Washington, Tells Vancouver Retail Merchants, in Timely Address

By Staff Correspondent of Hardware and Metal

VANCOUVER, B.C.—A great gathering of retail merchants assembled in Dominion Hall to hear an address by Dr. W. J. Hindley, director Bureau of Education, State Retailers' Association, Washington, on the subject of "The Buyers' Strike." President J. T. Crowder, of the Vancouver branch of the British Columbia Retail Merchants' Association, also made a few remarks.

Starting with trade conditions during the war, when the public accepted everrising prices with patriotic resignation, then the armistice, with the public expecting an immediate drop, and their consequent bewilderment when, through abnormal foreign demand and a triple issue of paper money, the prices rose more than during all the years of the war, right through to six months ago, when the accumulated public indignation, fanned by the press, expressed itself in the refusal to buy, Dr. Hindley took his audience. "When all the thrift campaigns were insisting on 'Do not buy luxuries' and 'Do not buy extravagantly'," said the speaker, "the public became impressed with the first two words only, 'Do not BUY' and they commenced to accept that suggestion.

Attitude of Newspapers

"The newspapers are the greatest constructive factor in this country," he continued. "They must keep up reader interest, else they will have nothing to sell to the advertiser. They therefore always reserve their front page for the unusual—the striking and sensational. I, personally, do not blame them for taking up the question of distribution, it is vitally interesting to the public. That the headings they used and the slant of their news items was damaging to the retailer especially, apparently is a mere detail. A newspaper man is essentially an idealist, a theorist, a publicist, and he is not a business man, as you and I understand the term. Now then, I do blame the retail trade, that individually and collectively they did not go to the publishers, though uninvited, and lay before them the effect of their actions. It will be a sorry day for Canadian institutions when the retailers or any organization can wield the big club over the Canadian press and force their editorial and news columns. That would be disastrous. But it is not unreasonable to point out to a publisher of any kind that a certain course of action is bringing too speedy a reversal of merchandising, and will lead, as it has, to a business paralysis.

Reacts on Farmers

"The farmer felt six months ago that all manufacturers could immediately drop their prices—that the retailer could immediately mark down his goods to near pre-war levels, without the farmer being affected when he sold his products. The fallacy of that is becoming evident to the farmers to-day, and their unlimited demands for low tariffs are becoming modified within the last few weeks as the effect of the slump in the price of goods, that they as well as others have hastened, has not left them untouched.

"The farmers for the last fifty years have made efforts to organize. They made many mistakes. They corrected those mistakes, and to-day, as a result of their organization and strength, what have we? Text books on agriculture in the schools, courses on agriculture in the colleges, hundreds of thousands of dollars expended all over the country, by the governments, on agricultural colleges, experimental stations and farms and research bureaus, Ministers of Agriculture in every Government looking after the interests of the farmer.

"Did you ever hear of a special portfolio in any Government to look after your interests?

What Labor Has Accomplished

"The labor unions in the last fifty years have been organizing. They made lots of mistakes. They were only human. But look what they have accomplished. Union men are in charge of technical and vocational schools. Departments of labor have been founded in the various governments. A Minister of Labor in Ottawa and Washington with all kinds of organizations for adjusting disputes, settling strikes, setting wages has been appointed. They have put through wonderful legislation for the worker, workmen's compensation, women and child labor laws, minimum wage laws, eight-hour days, etc.

"All because they are organized strongly enough to demand attention. The general public," said Dr. Hindley, "has decided that the distribution system of this country has to be improved. Waste has to be eliminated and efficient service will be the price of a legitimate profit. The mortality among retail merchants is colossal. Every year hundreds of merchants fail. Their stocks may be sold for 40 cents on the dollar. Who," demanded the speaker, "pays the other 60 cents? The wholesalers? Yes, probably, for the time being, but you know and I know that that other 60 cents on the dollar ultimately must come out of the public.

More Economical Distribution

"It is not sufficient that we as merchants go serenely along, ignoring the demands of the public. The railroads did that fifty years ago, and, as a result, the public used the only tool they had, clumsy though it be—legislation. To-day the railroads have been so hampered by legislative enactment (and the end is not yet) that no person would consider United States railroad securities a sterling investment. The liquor interests on this continent refused to put their house in order. The public rose in its might and wiped the entire industry off the map. It is not a fair parallel to compare the liquor business with the retail distribution of this country, but, gentlemen, the public is to-day of the opinion that the retail system of distribution could be more economically handled.

"Shall We Do It?"

"Shall we attend to it, or shall we

permit the public to use the only instrument that they possess—legislation? There are five bills before the United States Senate at this moment. They deal with vital matters, such as printing the cost on every article, setting a uniform profit on all articles, putting all distributors under the control of Government bureaus. Don't ever imagine that the problems of the retailers in the United States to-day will not be yours to-morrow. Our problems are common and our solutions will be applicable on both sides of the line. Are you aware of what the trend is here in Canada? Have you read the last issue of MacLean's Magazine? You should all read it. Under the title, 'My Confession of Faith,' Crerar states,"—and Dr. Hindley quoted from MacLean's Magazine Crerar's remarks re the attention that will be given to the distribution system.

"Public Will Do It for You"

"If you do not solve your problems, and have not the courage to effect the necessary changes, the public will do it for you. If there are found practices not in the interest of the public good, among any member of the bar, the Bar Association, with consent of the Government, takes action. If charlatans are found among the medical profession, the Medical Association, with consent of the Government, takes the necessary action to clean house. The same with the wiring of your house, the digging of a sewer or the installation of a water pipe, the same is covered by your city by-laws, acting on the advice of the respective trade association concerned.

Organization Essential

"But in retailing any one can engage, without training, without examination as to fitness, or any supervision whatever, and the public knows this and knows who pays for the failures, and will take action unless you do. You must organize—you must agitate till you have a training system for retailers—you must cut out the inefficiency, the loss, the waste motion. You must be united to fight the demands of radical experimenters who would scrap the present retail distribution system and destroy your investments. You must unite to fight the suspicion that has been cast on your trade by malicious agencies, and unsympathetic newspapers. You must join your association and let it speak for 100 per cent. of the retailers in this country."

In addition to the address of the evening, a musical programme was given, community singing being conducted by Roy A. Hunter, representative in Vancouver of Hardware and Metal. Mr. Hunter also contributed a cornet solo, and vocal numbers were given by Ben Crann and Douglas Whitelaw.

Swift Current, Sask. — MacDonald's Hardware suffered loss in a recent fire here.

Western Notes

J. Drewe, of Winnipeg, chairman of "Save the Surface Campaign," gave an inspiring address to the merchants attending the short course at the University of Manitoba on "Plans for Increasing Your Sales."

A. J. Webb, of Winnipeg, president of the Winnipeg Paint Club, gave a practical address on the manufacturing of paints to the merchants and their salesmen who were attending the University of Manitoba short course.

Camrose, Alta. — Morris & Taylor, hardware, have dissolved partnership, J. B. Taylor continuing. Chas. E. Morris has returned to Charlottetown, P.E.I., to engage in a partnership with his brother in another line of business. Mr. Morris had been for thirty years in Alberta, most of which time was spent in the hardware business. The partnership just dissolved was in existence for twenty-three years.

Western Wholesale Hardware Firm Enters Objection

Winnipeg.—Objection to the recent change in assessment ratings for wholesale houses was made by J. Noel Nivin, appearing on behalf of the J. H. Ashdown Co., Ltd. At a recent meeting the council lowered the rates for wholesale harness premises from 4.2 to 2.8, and raised the rating for wholesale hardware premises from 2.8 to 3.5. The principle involved was that hardware was much less bulky than harness and that more stock could be stored on the same floor space.

Mr. Nivin stated that the stock of the Ashdown Hardware contained much that was identical with the stock of most harness houses and a great deal of very bulky material such as stoves, nails, etc. Much of the floor space of the Ashdown warehouse was used for storage purposes only, and it was not just that the assessment should be charged on all of it on the same basis.

The city council left the matter over for consideration at an early date.

B.C. Firm Requests Increased Duty on Imports of Copper Products

A number of companies operating in B. C. are said to be requesting an increase in the duty on certain copper products coming into Canada. It is said that if copper reaches much higher prices certain consumers will be forced to commence the manufacture of it in order to overcome the increased costs which would be brought about by the duty suggested. In this connection a brief review of the copper situation in Canada in 1920 is interesting. Copper production last year in Canada amounted to 40,577 tons, the imports were 10,500 tons, or 51,077 tons in all. Exports amounted to 44,485 tons, not including copper wire and cable, which has not been reduced to a tonnage basis in the report issued by Ottawa.

LOWER BUILDING COSTS IN THE WEST

Saskatoon, Sask.—At the convention of the Saskatchewan association of building and construction industries, the general feeling was that the cost of building material is decreasing. Figures read showed a decrease of from 12½ to 15 per cent. Further reduction could be made, it was said, when the efficiency of workmen was raised.

Aiming at a Welfare Fund to Protect the Merchant

It was decided at the Retailers' Vancouver Convention last summer that the time had arrived when, in the interests of the retail merchants of Canada, greater assistance was required to fight some of the battles of the R. M. A. To cite one instance: During the fight over the Board of Commerce it required the sum of $1,000 to have the case of the retailers prepared and presented. The decision to go ahead with the case had to be made in a hurry, and had to be made without seeing the money actually in sight. There have been many similar instances in the history of the R. M. A. during the last twenty-five years. Irreparable harm might be done to the cause of retail merchants throughout the country if provision is not made to have legislation watched very carefully and all the interests of the R. M. A. safeguarded. It is beyond the present power of the executive officers to do this work with the money at their disposal; the membership fee is not yet sufficient to cover necessary and advisable expenditures.

Consequently, a Welfare Fund is being solicited from merchants all over Canada. Committees are being, or have been, appointed in the several provinces and in several of the large cities whose business it is to canvass the retail trade. There is nothing obligatory about helping with this fund, but the officers of the association, both Dominion and Provincial, all feel that it will commend itself to the judgment and the generosity of the retail merchants of Canada.

Events in the Trade

Business Changes

Simcoe, Ont. — Chas. E. Boyd, hardware, has sold to W. H. Davidson.

* * *

Montreal.—Latimer & Enright, plumbers, have dissolved partnership.

* * *

Swift Current, Sask. — Rountree & O'Neil, tinsmiths, have dissolved partnership.

Fire Loss

Alexandria, Ont.—R. H. Cowan, hardware merchant, suffered recent fire loss.

New Firm

Marshall Bros. are opening a new hardware store at 120 Van Horne St., Toronto, corner of Dovercourt.

Personals

F. C. Hesketh, of Cupar, Sask., was a visitor at the McClary Mfg. Co., Ltd., Toronto, this week.

* * *

Alex. Johnston, former Deputy Minister of Marine, who left the department to take a position in the British Empire Steel Corporation, has returned to his old position.

* * *

N. M. Currie, managing director, St. Marys Wood Specialty Co., Ltd., St. Marys, Ont., was in Montreal this week visiting the jobbing trade.

* * *

P. F. Nichols, sales manager of the Apex Electric Mfg. Co., 1410 W. 59th Street, Chicago, Ill., is making a business trip through Ontario, Quebec and the eastern provinces.

* * *

A. M. Towe, Duskill Map Co., London, Ont., is receiving congratulations on the arrival of a daughter.

Incorporations

Industrial Products, Ltd., has been incorporated with capital of $40,000 to manufacture and deal in japans, enamels, paints and colors, cements, insulating material, roofing, etc. in Toronto.

Change of Address

The Hurley Machine Co., Ltd., have moved from their former premises, address 413 Yonge St., Toronto, to new offices and sales rooms in the Ryrie Building, corner of Yonge and Shuter Streets, Toronto.

Hardware Merchant Wins Claim

Mr. Justice Rose awarded Thomas H. Boyd, Toronto, $829, full amount of claim against the city, for damage done to his hardware stock at 2252 Queen St. East, done by water backing up from Willow Avenue and flooding the cellar.

Postpone Montreal Retail Hardware Meeting

Montreal.—The meeting of the Montreal Retail Hardware Dealers' Association which was to have been held on March 9 and at which the election of officers for the coming year was to have taken place has been postponed until a little later date.

Scythes & Co. Open Eastern and Western Branches

Scythes & Co., Ltd., Toronto, manufacturers of cotton waste and oiled clothing, etc., have opened branches in the East and West. The addresses of the new branches are:

112 Carroll Street, Vancouver, and Mitchell Street, Halifax.

Injured in Motor Accidnet

Montreal.—J. Thurston Smith, secretary-treasurer, Lewis Bros., Limited, is suffering from a compound fracture of his right leg, as a result of a motor accident last week. Accompanied by Mrs. Smith and their three children, the closed car in which they were riding was hit broadside by a local street car while travelling at a fair rate of speed. Fortunately Mrs. Smith and children escaped with only slight injuries.

Mr. Smith is now in the Western hospital, progressing favorably, but will be confined to the hospital for at least six weeks yet.

Business Progressing Satisfactorily

"Business has been picking up most satisfactorily and I am looking for steady improvement," said Norman Howden, of the D. H. Howden Hardware, London, Ont., to Hardware and Metal, in discussing the business outlook. "Not in many years had so much work been submitted to architects. Whether it will proceed depends to a large extent on the attitude of labor. There are great numbers of people who want to build once they are satisfied they can proceed without interruptions if they start. Speaking generally there has been a steady trade and I am looking forward to an excellent year."

Presentation to W. F. MacPherson

Prescott, Ont. — W. F. MacPherson, hardware merchant, who is becoming permanent secretary of the Ontario Retail Hardware Association, was called to the Presbyterian Church and made the recipient of a very handsome silver tray with testimonial engraved on same as a recognition of his services as choir leader for over 20 years. Mr. MacPherson recently resigned as leader of the choir in order to devote his entire time to association work.

Make a Presentation

Montreal.—At a social evening held in the town hall of Cote St. Paul, the joint social committees of Crane Limited, Canadian Tube & Iron Co. and Canadian Car & Foundry Co. presented J. M. Carson, industrial secretary of the Y.M.C.A. for the western section of the city, with a suitable gift in recognition of his work among the employees of these companies.

Death of G. Y. Chown

Kingston, Ont.—The death of G. Y. Chown, president McArthur, Irwin, Limited, Montreal, is announced. He had been in ill health during the past two years with heart trouble, but previous to this held active positions in many local offices, having many local and outside interests.

Mr. Chown was sixty years of age and was a son of the late Edwin Chown. After graduating from Queen's University in 1884 he entered his father's business, wholesale and retail hardware, later buying out his father's interest. This business was sold to his brother, Oliver Chown, and deceased then became registrar, and subsequently secretary-treasurer of Queen's University in 1897.

Mr. Chown became president of McArthur, Irwin, Limited, in 1912, taking an active part in the paint trade until over a year ago, his rugged constitution giving way under his intense business life.

In addition to being president of McArthur, Irwin, Limited, Mr. Chown was a director of Parker, Irwin, Limited, Montreal; Laporte, Irwin, Limited, Montreal; Miller Extracts, Limited, Millerton, N.B.; Valley Camp Coal Company, Cleveland, Ohio; Great Lakes Transportation Company, Midland, Ont.; Fort William Dock Company, Fort William, Ont.; Canada Dredging Company, Midland, Ont.; president of Weber Piano Co., Ltd., Kingston, Ont.

Says Obstacles to Sales are Merely Mental

Hamilton, Ont.—Claiming that the only obstacle to sales at present are mental ones—a state of mind, pure and simple—officials of a Hamilton electric appliance firm expressed themselves as being confident that if the manufacturer would continue to advertise his product, and salesmen would aggressively push sales, orders would be secured and production increased, providing, of course, that the product in question has merit.

In an interview the sales manager of this company stated that, speaking generally, his company did not believe that the electrical industry and its kindred lines has been affected by the so-called "depression" during the past six months, although it was possible that some concerns had forced the depression on themselves by discontinuing their advertising and ceasing to push the sale of their product aggressively.

Ontario R.M.A. Meets Legislature

This week the Retail Merchants' Association of Ontario went before the Legislature to secure a number of legislative enactments and alterations. A more stringent interpretation of the Transient Traders Act, amendments to the Factory and Shop Act, alterations in the Division Court Act regarding garnishees, moderate treatment of garages under the new bill, No. 76, were among the things asked of the Government.

In the matter of garnishees the retail merchants asked the adoption of a percentage basis, with the merchant issuing the order of garnishee receiving the percentage to be set by the court. At the present time salaries of married men are exempt up to a certain amount.

At the request of many municipalities the Government was asked to pass amendments to the Transient Traders' Act which will make it harder for peddlers to invade the trade territory of the established stores. In the case of the garages the retail merchants feel that the business is already laboring under difficulties and that the proposed license should be only a $1 or $2 registration fee and not be based upon garage income.

Featuring Chain Door Bolts

Montreal.Montreal hardware firms are featuring a chain door bolt as a protection against burglaries, which are now so common, especially in the larger towns and cities. This chain bolt fastens on the inside of the door with the keeper on the door casing. A knob (attached to a short chain) runs into a slot of the keeper from the top. With this fastened to the door, it would be an extra precaution to the common door lock, and entrances gained by the use of skeleton keys could not be made. Wholesalers state a great demand is being shown for these articles.

Will Not Continue Steel Price Concessions

Steel Market in Drifting Stage—Wire Nails Cut to $3 by Some Independents

STEEL prices remain in a state of flux awaiting the appearance of sufficient tonnage to appear to induce producers to establish a definite trading basis, says The Iron Trade Review. As it is, numerous mills, barring the Steel Corporation plants, are meeting the situation as they find it necessary to protect themselves. Apart from a few of the more aggressive interests, however, they are not disposed to press continuing concessions upon indifferent buyers. Consequently a waiting policy generally is being adopted and the market is in a drifting stage. Generally speaking the independent mills by reason of their reduced prices have been able to obtain a larger fraction of the going tonnage and their operating position has been bettered to the extent permitted by a sluggish buying situation. Steel Corporation operations are dropping steadily and this week are not over 50 to 60 per cent. The Gary rail mill is operating at the highest rate since it was built, and is producing about 20,000 tons daily. Steel ingot production for the entire industry in February fell off approximately 12 per cent. from January, or in about the same degree as pig iron. Total February steel output is indicated to have been at the rate of 26,630,000 tons annually compared with a rate of 21,520,000 tons in January.

$3 for Wire Nails

A cut to $3 in wire nails by three independent makers has shaken confidence in the relative stiffness which has been shown in wire products, says The Iron Age.

Two lines which have resisted pressure are tin plate and tubular goods, in both of which there has been a slight improvement, though admittedly temporary.

The February production of steel ingots, according to the records of the American Iron and Steel Institute, suggests a total for the country of 2,055,306 tons for February, or a daily average of 85,638 tons, against 103,533 tons per day for January.

Germany will supply 30,000 tons of heavy rails for North Africa at about $31 per ton, f.o.b. continental ports. Germany was next to the lowest of five bidders on 90 locomotives for Spain, and got the business ahead of Belgium because of favorable conditions of delivery.

Forced selling of tin plate has continued to shove British prices downward, and the Welsh product is now obtainable at $5.36 per base box, or about a 17 per cent. reduction in two weeks.

Foreshadows Early End of Board of Commerce

Ottawa.—The early demise of the Board of Commerce is foreshadowed in the change in the estimate of money needed for its continuance. Last year the sum set aside for the maintenance of the board was $124,000. This year there is a single estimate of $1,000, and that will not carry very far the secretary, stenographer and watchman, who alone remain of the once complex organization.

Now Fraim-Slaymaker Hardware Co., Inc.

Walter E. Fraim, son of the late E. T. Fraim, for twenty-six years prior to January 1 last connected with the E. T. Fraim Lock Co., of Lancaster, Pa., and as president of that corporation since the death of his father in 1917, has purchased the plant and business of the Slaymaker Lock Company of that city in all its details. A new corporation has been organized by Mr. Fraim, and in future the business will be conducted as the Fraim-Slaymaker Hardware Co., Inc., with principal offices in Lancaster, Pa.

Ontario's Leather Output Value High

Products to the value of $36,726,990 were turned out by the leather industry of Ontario during 1919, according to information forwarded by the Dominion Bureau of Statistics. This valuation is based on the selling price of the products at the place of manufacture, and the statistics are gathered from 40 establishments, that may be taken as representing the entire tanning industry. The Ontario tanneries have an output that is approximately three-quarters of the tanning industry of the entire Dominion.

Crane Co. Warehouse in London

London, Ont.—The Crane Company, of Chicago, has purchased a site for a warehouse on York street opposite the Grand Trunk freight sheds, and plans are being prepared for a three-story warehouse. The firm plans to make London a distribution center for hardware and plumbing supplies for Western Ontario. Work on the new building will be commenced in a few weeks.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

COLD CHISELS, CALKING IRONS, ETC.

C. Drew & Co., Kingston, Mass., manufacturers of hardware and specialists in ship and boat builders' tools have issued a catalog covering some of the lines they manufacture. Included in the catalog are calking irons of various design and size, calking mallets, hawsing irons and beetles, reaming irons and marling spikes, coppering hammers and punches. Other lines listed are cold chisels, box chisels and crate openers, ship and box scrapers. Cooper's tools, hammers and irons, are also shown, and mason's tools such as hammers, trimmers, sets and jointers are another line listed.

BILLMONT WRENCHES

The Edgar C. Guthard Co., Chicago, Ill., manufacturers of the Billmont wrench with interchangeable sockets, have issued a Canadian edition to their catalog of this line. With Billmont wrenches the makers claim that it is possible to get a wide range of wrench equipment with little bulk, as all sockets are interchangeable and snap into the Billmont nose piece, being held there firmly by the spring ring retainer and yet can be easily removed. Various assortments of sets are shown, suitable for garage men, mechanics and also small sets for individual use. The entire line is said to equal 768 different wrenches. The Canadian representative is A. J. Hopkins, Montreal.

"NULITE" LAMPS AND LANTERNS

The National Stamping & Electric Works, Chicago, Ill., are issuing new circulars and booklets describing and illustrating their "Nulite" match-lite lamps and lanterns. The makers state that there is a wide opening for these lines all the year round, both in town and country, and that "Nulite" lamps and lanterns give a 400 candle power light at small consumption of gasoline. They light with a match, no torch or alcohol being needed. Pamphlets and dealers' helps are available on writing to above address.

MILL SAWS AND SPECIALTIES

A new revised price list has been issued by E. C. Atkins & Co., Inc., Indianapolis, Ind.; Canadian factory, Hamilton, Ont., as a supplement to their No. 18 catalog. Revised prices are given for mill and circular saws and other inserted tooth saws as well as saw sets, swages, gummers, etc. The new list cancels all lists and prices on pages 26 to 64, 77 to 85 and 93 to 95, inclusive, in catalog No. 18 of 1919 and all former lists. All dealers interested are invited to write for a copy.

ALUMINUM HINTS AND HELPS

The success attending the issue of "Facts and Figures," containing tabular data on the various forms of aluminum in a compact loose-leaf pocket book style, has encouraged the British Aluminium Co., 263-267 Adelaide St. W., Toronto, Ont., to publish a companion series entitled: "Aluminum Hints and Helps." These booklets deal with every-day methods of working the metal. No. 1: Contains Hints and Helps on Aluminum in the Foundry; No. 2: Aluminum Spinning and Press Work; No. 3: Aluminum Shop Practice; and No. 4: Aluminum Finishing Processes.

These booklets are nicely got up with fairly stiff covers so that they can be carried without damage in the pocket and at the same time are not too bulky to be filed with the original issue of Facts and Figures. Those interested can obtain copies on application to above address.

PEERLESS FENCES

The Banwell, Hoxie Wire Fence Co., Ltd., Hamilton Ont., and Winnipeg, Man., have issued a new complete and well arranged catalog of their products. A wide range of farm fences in different styles is listed and illustrated. Hog and poultry fences are also made and cataloged. Other Peerless products are: Ornamental and park fences, wire window guards, flower bed guard, farm and ornamental gates and steel fence posts. Among the other lines listed are: Stretching tools and fence building accessories, barb and coil wire, brace wire, etc. Useful directions and hints for erecting and stretching fences are also included in the catalog, a copy of which can be had on application.

SANDERSON & PEARCY'S BULLETIN

Sanderson & Pearcy, Ltd., Van Horne St., Toronto, Ont., manufacturers of "Hillcrest" paint products, issue a semi-monthly bulletin in the form of a folder. This folder is of good quality heavy stock and is well gotten up and printed. The centre contains a list of seasonable lines that are considered attractive at prices quoted. The "Hillcrest" group of paint products are listed separately at foot of bulletin and the various lines of paint and other allied commodities stocked by Sanderson & Pearcy form a useful reminder to the retailer of lines that he may have overlooked ordering and show him where they can be obtained.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

WALL BOARD

Scriven & Rutherford, Tilbury, Ont.—Kindly inform us who are the manufacturers of wall board and beaver board.

Answer.—Standard Paint Co., of Canada, Ltd., Montreal, Que.; The Beaver Board Co., of Canada, Ltd., Thorold, Ont.; Bird & Son, Ltd., Hamilton, Ont.; The Eastern Paper Co., Ltd., St. Basile Sta., Portneuf, Que.; Bishopric Wall Board Co., Ltd., Ottawa, Ont.

BEAVER BOARD

R. G. Coupland, Bobcaygeon, Ont.—Will you please give us the names of manufacturers of beaver board?

Answer.—Beaver board is manufactured by the Beaver Board Co., of Canada, Thorold, Ont. Other manufacturers of wall board are the following: The Standard Paint Co., of Canada, Ltd., Montreal, Que.; Bird & Son, Ltd., Hamilton, Ont.; Eastern Paper Co., Ltd., St. Basile Sta., Portneuf, Que.; The Bishopric Wall Board Co., Ltd., Ottawa, Ont.

LINING FOR FRICTION PULLEYS

Frank Dafoe, Madoc, Ont..—Kindly tell me where I can get lining for friction pulleys.

Answer.—F. H. Andrews & Son, Quebec City, Que.; The Diamond State Fibre Co., of Canada, Ltd., Toronto.

PLAYGROUND EQUIPMENT

J. Y. Smiley & Son, Woodstock, Ont.—Please advise us who makes playground equipment made from steel tubing.

Answer.—The Shipway Iron Bell & Wire Mfg. Co., Ltd., Wellington St. W., Toronto, Ont.

ALUMINUM WIRE

The J. H. Roper Co., Montreal, Que.—We would appreciate it if you could give us the names of any drawers of aluminum wire in Canada, other than those mentioned.

Answer.—The Canada Wire & Cable Co., Ltd., Leaside, Toronto, Ont.

ALUMINUM TABLE SPOONS

Lewis Bros., Ltd., Montreal, Que.—Please advise if you know of any manufacturers of aluminum table spoons. We have tried the firms whose names we enclose, without success.

Answer.—Other manufacturers of these goods are the following: Aluminum Specialty Co., of Canada, John St., Toronto.; Sidney N. Scharff & Co., 804 Victoria Bldg., St. Louis, Mo.; The Wagner Mfg. Co., Sidney, Ohio.

WROUGHT IRON FENCES

Ingram & Davey, Ltd., St. Thomas, Ont.—Please give us the names of manufacturers of wrought iron fences and gates.

Answer.—Dennis Wire & Iron Works, Ltd., London, Ont.; Aikenhead Architectural Metal Works, Ltd., Toronto; Canadian Allis-Chalmers, Ltd., Toronto; Canadian Ornamental Iron Co., Toronto; J. Corteau, Lac La Biche, Que.; Partridge & Sons, Kingston, Ont.; Shipway Iron Bell & Wire Mfg. Co., Ltd., Toronto; John Watson & Son, of Montreal, Ltd., Montreal, Que.

WIRE CAGE RAT TRAPS

The Russill Hardware Co., Toronto, Ont.—Kindly give us the names of manufacturers of wire cage rat traps in Canada and the U.S.

Answer.—E. T. Wright & Co., Ltd., Hamilton, Ont.; The Ferrier Wire Goods Co., 22 Mulock Ave., Toronto; The T. G. Rice Mfg. Co., King St. W., Toronto; The Abington Trap Co., Abington, Ill.; Michigan Wire Goods Co., Niles, Mich.; N. R. Streeter & Co., Rochester, N.Y.; The Wooster Wire Works, Canton, O.; The Animal Trap Co., Letitz, Pa.

IRON RODS, NUTS AND WASHERS

E. F. Urstadt, Desboro, Ont.—Where can we get iron rods, nuts and washers to specifications?

Answer.—Wilkinson & Kompass, Hamilton, Ont.; McGregor McIntyre, Ltd., Toronto, Ont.; The Phoenix Bridge & Iron Works, Ltd., Montreal, Que.; The Dennis Wire & Iron Works, London, Ont.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

2757. **Arms and munitions and sporting goods.**—A most important Italian firm doing business in the foregoing are anxious to hear from Canadian houses wishing to trade with Italy.

2758. **Electrical goods, leather belting, rubber goods, etc.**—A Turin house are willing to buy the foregoing articles in Canada.

2760. **Representation in British Guiana.**—A firm of manufacturers' representatives in Georgetown, Demerara, desire to represent Canadian manufacturers and exporters in all lines such as foodstuffs, tea, hardware, stationery, on a purely commission basis.

2766. **Steel wire ropes.**—A firm in Naples desire to hear from Canadian companies interested in doing business with Italy.

2769. **Wire rope.**—A Tokyo firm specializing in the import of British goods inquire for crucible steel wire rope of the following specifications:—

Crucible Steel Wire Rope, No. 7 (quality) 6-strand.—Cir. 2", 2,000 to 3,000 ft. length; Cir. 2¼", 2,000 to 3,000 ft. length; Cir. 2½", 2,000 to 3,000 ft. length; Cir. 2¾", 2,000 to 3,000 ft. length; Cir. 3", 2,000 to 3,000 ft. length.

Crucible Steel Flexible Wire Rope, No. 24 (quality), 6-strand.—Cir. 1½", 720 ft. length; Cir. 1¾", 720 ft. length; Cir. 2", 720 ft. length; Cir. 2¼", 720 ft. length; Cir. 2½", 720 ft. length; Cir. 2¾", 720 ft. length.

Twenty Years Ago

Items reprinted from Hardware and Metal of March 16, 1901:

"Harland Bros., Clinton, Ont., have bought the hardware stock of the late David Johnson, Seaforth, and will open a store in the latter town."

* * *

"Mr. Merrick, of Merrick, Anderson & Co., manufacturers' agents, Winnipeg, arrived in Montreal on Wednesday and is spending some time visiting the various manufacturers whom his firm represents in Winnipeg."

* * *

"The hardware, stove and tin business of W. W. Chown & Co., Belleville, and stove and tin business of S. C. Shown, also of Belleville, have amalgamated. The firm is to be known in future as the W. W. Chown Co., Ltd."

* * *

"Dyment, Butterfield & Co., founders, Barrie, Ont., intend increasing their staff to 50 men."

"The J. Still Mfg. Co., Ltd., St. Thomas, Ont., have been incorporated with $99,000 capital."

* * *

"Shurly & Dietrich, Galt, Ont., have decided to start manufacturing harvest tools, particularly rakes, hoes, forks, etc."

* * *

"The Maritime Glass Co., St. John, N.B., have been succeeded by the Maritime Art Glass Works."

* * *

"Some discussion has been going on lately over the practice of sending on post cards net quotations to customers. This is a practice not to be recommended. There is always the risk of quotations thus given being seen by those whom it might be advisable should not see them. Then apart from the question of secrecy, a letter is better than a post-card. It is more business-like and creates a better impression."

1 Per Cent. Tax on All Business Transactions

Such Tax Would Provide Much More Revenue Than Present Taxes on Business

SPEAKING before the Chamber of Commerce at Stratford, Ont., J. F. M. Stewart, of Toronto, a member of the board of directors of the Dominion Steel Co., and of the Canada Steamships Limited, had the following to say on business conditions.

He advocated the abolition of existing methods of Dominion taxation and the placing in effect of a system of taxes of one per cent. on all business transactions. He produced figures showing that the revenue from business sources of the Government would be about $160,000,000 under a system such as he suggests, or between $30,000,000 and $40,000,000 more than that derived under the present plan, and that the proposed plan would stimulate trade instead of stifling it.

In place of the various present systems of taxation, Mr. Stewart suggested that a tax of one per cent. on the net turnover, or rather on all commercial transactions, should be collected by the last man handling goods before they reach the ultimate consumer. This plan, as before mentioned, would bring many more millions of dollars' revenue to the country, and would affect all equally, as the more a man spent the more taxes he would pay, and this would include the farmer as well.

Nearly Back to Prices of January, 1920

Price Comparison Table Shows Present Average Price on Sixty-Seven Lines of Hardware is 5 Per Cent. Below Those of One Year Ago—Average Decline of 8½ Per Cent. in Hardware Prices Since January 1, 1921

A PRICE comparison table on sixty-seven staple lines of hardware, using 100 as an index figure representing the price prevailing one year ago, reveals the fact that the average price on January 1st of this year showed an increase of 10 1-2 per cent. over the price prevailing January, 1920, or an index figure of 110.53.

A comparison of prices on these commodities at March 1st, 1921, with those prevailing a year ago reveals the fact that a decline of 5.1 per cent. has taken place, the present index figure being 94.94.

Present prices show an average decrease of 8 1-2 per cent. since the beginning of the year.

The increase in prices on these commodities during last year has now been almost wiped out and the average price is almost back to that prevailing in January 1920. Using 100 as the index figure representing the price on March 1, 1920, present prices are represented by the following figures:—

Axes, single bit	92
Belting, Leather, Standard	111
Brass, Sheet	81
Bolts, Carriage	80
Washboards	120
Butts, steel	90
Boilers, Range	108

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

AIR WAY ELECTRIC CLEANER

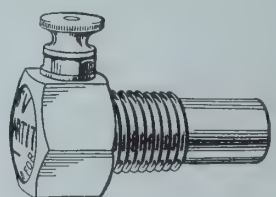
The National Electric Heating Co., Limited, 544-548 Queen St. E., Toronto, Ont., have the exclusive factory distribution in Canada of the Air-Way Electric Cleaner. There are several exclusive advantages claimed for the Air-Way vacuum cleaner. One is the hollow suction handle. This enables the person using it to pick up the light featherweight Air-way and reach hangings, mouldings and high ledges, or the interior of cabinets or pianos and draw the dust like a magnet. This feature also eliminates stooping to attach any of the appliances. These come with the cleaner and are not an extra, and slip on to the upper end of the suction handle. Another patented feature is the universal joint, which is said to put the flexibility of the human wrist into the handle, enabling a person to reach round or under furniture or

"Air-Way" Vacuum Cleaner

into difficult corners. The sanitary paper dust bag avoids the disagreeable "shaking out." When full you burn or throw away the paper bag and insert a clean one. This feature has been widely endorsed by health authorities, it is stated. Then there is a visible dust indicator, which, it is said, is found in no other cleaner. A transparent, practically unbreakable window enables user to see the passage of the dirt and dust and know when cleaning is completed. Another feature shown through the indicator is that the air passes over the fan instead of through it, preventing wear and increasing efficiency, it is claimed. The floor tool, too, is stated to be self-adjusting for varying surfaces—carpets with deep nap or tile or hardwood can be equally cleaned with air only. Booklets, pamphlets and electros and other helps are supplied to dealers.

ELECTRIC OPEN HEARTH GRATE.

The National Electric Heating Co., Ltd., Toronto, Ont., are manufacturing an electric open hearth grate, which they claim fills a long-felt want, and meets a large portion of the requirements of the average modern home inasmuch as it is adapted to fit any style of open hearth fireplace. It is designed in the Adam period style, has a two kilowatt capacity and is finished in various standard finishes.



Electric Hearth Grate

"STARTIT" VAPORIZER

A new electric heater and vaporizer to enable an auto owner to start his car quickly in cold weather has been put on the market by the Startit Mfg. Co., 1523-1529 E. Washington St., Indianapolis, Ind., and has been called the "Startit."

It is stated that a Startit will vaporize gasoline in 12 seconds, but that better results will be obtained by allowing

"Startit" Vaporizer

30 seconds, or even one minute on an extremely cold morning.

The Startit, being made of brass, will not corrode or rust, and the walls are stated to be only ten one-thousandths of an inch thick. It is installed by drilling a 15-32 inch hole in the manifold near the distributing point and tapping with a ¼-inch pipe tap. A switch on the cowl board and a wire from the live side of the ammeter or battery to the switch and from there to the Startit is all else that is necessary.

The makers claim that Startit saves the heavy drain on the batteries by reducing the prolonged use of the starter, and that it uses only 4 to 5 amperes and should not be confused with pre-heaters. They claim that pre-heating the gasoline is wrong, as when pre-heated gasoline is injected into the cold manifold condensation takes place, but that when the cold spray of gasoline from the curburetor strikes the hot Startit located near the distributing point and mixes with the hot air directly above, it is changed into a pure dry gas and ignition is instantaneous.

CALORIC PIPELESS FURNACE

The Monitor Stove Co., Ltd., Hobberlin Office Building, Toronto, Ont., in introducing the Caloric pipeless furnace to Canadian dealers state that the Caloric is the same heating plant that has proved so satisfactory in the United States, in England, and other countries where they have been sold. The Caloric is described as a simplified warm-air heating system, low in cost, for which there is a market in almost every home, as well as for heating stores, churches and other buildings. Some of the features are, the patent triple casing, double ribbed fire pot, guaranteed for five years; extra large feed and ash doors, and heavy galvanized iron outer casing. It is sold under a money-back guarantee that protects both the buyer and seller.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

CHIEF features in the price changes this week are the further declines in cotton goods such as sash cord, cotton rope, etc., and new lower quotations on bright wire goods.

Manila wrapping paper and kraft have also been reduced in price again. Other declines include files and horse rasps, poultry netting staples, steam cylinder and black oils, oakum and solders. Some lower quotations are made on bar iron and mining tool steel. Quotations have been revised on some lines of pipe fittings, and nipples show a decline. New season's prices have been issued on Paris green and show a small reduction from last year's quotations. Arsenate of lead is slightly higher than last season. Turpentine and linseed oil prices are unchanged from last week and the demand shows improvement.

Pipe is held at changes noted last week, and there is no quotable change on black or galvanized sheets or plates. Ingot metals remain dull, and tin shows a further decline, but lead and spelter are exhibiting a firmer tone. The situation in Europe may have some influence, it is thought, on U. S. metals.

Little change is reported in U. S. steel prices during the past week and quotations on bars, shapes, plates and sheets remain practically the same as of the previous week. The chief feature is a cut on wire nails. This is interesting as the regular or Corporation price on these has been regarded as low compared to other steel commodities.

A gradual improvement in business is reported by wholesalers. Shipments of spring goods are going forward, and orders for paint, varnish, and house cleaning needs are increasing in number and volume.

Montreal Markets

MONTREAL, March 10.—A number of price changes are made this week, affecting lines of both shelf and heavy hardware. Bright wire goods show a reduction of about 12½%, and candle-wick packing now sells at a lower price of 46 cents per pound. Declines are made on Black Diamond, K. & F. files and Globe horse rasps. Poultry netting staples have lower quotations for this season and wrapping papers of the different grades and weights are from one to two cents a pound less. In the heavy goods, piping is now selling under a new list, nipples are revised and different lines of lead products are reduced. Many price changes are quoted on the scrap metal market, corrugated sheets in the lighter gauges are lower and bar iron and steel have some new lower base prices. Compression goods, sheets and plates remain unchanged, while ingot metals are quiet with a few easier quotations.

Business has taken a brisker aspect during the past week, with many booked orders for Spring deliveries being shipped. Prices on the many Spring staple lines are remaining steady and unchanged.

Candlewick Now 46 Cents Pound

Montreal.

A reduction has been made in the price of candlewick packing, and is now selling at 46 cents a pound.

Bright Wire Goods Lower

Montreal.

Bright wire goods are now quoted at 82½ per cent. off list, a reduction of about 12½ per cent.

Reduction in Chicago Hinges

Montreal.

Chicago floor and other hinges are shown at reduced prices. The reduction is 10 per cent.

New Prices on Files

Montreal.

Black Diamond and K. & F. files are reduced in price. Black Diamond are now quoted at 32½ per cent. off list, and K. & F. at 50-10 off.

Globe Horse Rasps Lower

Montreal.

Globe horse rasps are also reduced about 10 per cent.

P. N. Staples' New Prices

Montreal.

New prices are now given on poultry netting staples for this season's demand. Following are the reduced quotations on different sized packages:

	Bright	Galv.
100 lb. kegs, per 100 lbs.	7 65	8 55
25 and 50 lb. boxes, per 100 lbs...	8 65	9 55
10 lb. boxes, per 100 lbs.	9 15	10 05

Declines in Wrapping Papers

Montreal.

A reduction of from one to two cents per pound has been made on the different kinds of wrapping papers, and following are the new quotations: No. 1 Manilla 11.00, B Manilla 9.00, Gray 8.50, Fibre 10.50, and Kraft 13.00 per 100 lbs.

Prices on Lawn Mowers

Montreal.

Booked orders of lawn mowers are now being forwarded, and following are this season's quotations on the Taylor-Forbes make: Empress, 15 per cent. off list price; Woodyatt, 10 per cent.; Daisy, 15 per cent., and Star, 10 per cent. off list.

Poultry Netting Moving

Montreal.

Shipments of this season's requirements on poultry netting are now being made. Quotations for this year on the one inch and two inch mesh, Canadian make, are 10 per cent. above list.

Harvest Tools Selling

Montreal.

Garden and harvest tools are selling at 50 and 10 per cent. off list, spades and shovels at 35 per cent. off. Booked orders for these are now being shipped.

Piping at New List

Montreal.

A new list price is now in effect on iron and steel pipe, under number 49. This new list lowers the prices on steel pipe only, the wrought iron remaining unchanged as on the previous list No. 48. Business has shown a slight improvement in the past few weeks, with stocks in fair shape to meet the spring demand. Following is a copy of the new list:

Price List No. 49. March 1st, 1921

Standard Buttweld Pipe

Per 100 feet.

	Steel		Gen. Wrot. Iron	
	Blk.	Galv.	Blk.	Galv.

10 in.	3 40	4 22	4 39	5 21

Fittings Revised

Montreal.

A revision is made in the price of nipples. Close and short nipples up to 4 inch are now 40 off list, longer 50 per cent. off. From 4½ inch to 8 inch, close and short, 30 per cent. is now quoted, and longer 40 per cent. off. These price changes are said to be relative to the new list on piping. Other fittings are unchanged in price. Stocks are now in good shape, with the demand keeping up fairly well for this season. Following are the present quotations:

Bushings, cast	20%
Do., malleable	20%
Flanges	20%
Plugs	17½%
Flange Unions	7½%
Malleable Unions	32½%
Nipples, ⅛ to 4 in. close and short	40%
Do., long	50%
Do., 4½ to 8 in., close and short	30%
Do., long	40%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

Lead Products Reduced

Montreal.

Lower quotations are given on some lines of lead products. Lead traps and bends are now selling at 10 per cent. off list, previous prices being net list. Solders of all grades, except wire solder, are also reduced one cent per pound throughout. Sales of these goods have kept up fairly well throughout the past quiet season and improvement is shown since the beginning of the month. The continued easing of the basic metal may have some effect on the finished lead products, but up to the present no definite result has been shown. Following are the quotations:

Lead pipe	0 12½
Lead waste	0 13½

Note.—Lead pipe is subject to a discount of 10%.

CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10

Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 26
Do., strictly, lb.	0 24
Do., commercial, lb.	0 21
Do., wiping, lb.	0 21¾
Do., wire, lb.	0 35
Zinc, sheets, casks	0 14
Do., broken lots	0 15½

Scrap Metal Changes

Montreal.

Changes in prices have been made on different lines of scrap metals this week. Yellow brass is one cent per pound lower, zinc also one cent. Tea lead is now down to two cents a pound, and heavy copper shows a reduction of half a cent. Scrap pipe now sells at $8.50 per 100 pounds, and boiler plate at $11.00. Dealers still report a very dull period, but expect greater activity as soon as the weather opens. Following are the nominal quotations:

DEALERS' BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 06
Red brass	0 11
Light brass	0 04½
Scrap zinc	0 04
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 09
Heavy copper	0 11
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	8 50
Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	0 11
No. 1 machinery cast, per gr. ton	$25 00 $28 00

No Change in Compression Goods

Montreal.

Compression goods still hold at former levels. A better demand has been shown on these lines since the first of the month, but is still of a sorting order. The building activities will no doubt have its stimulating results in the near future, as many of the different lines are controlled to a certain extent by this. Following are the present prices:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Basin cocks, Fuller, No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, standard	34%
Roundway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Radiator valves, standard	23%
Do., removable disc	38%
Globe, angle and check valves, standard	5%
Gate or straightway	Net
Jenkins globe	10%
Jenkins gate valves	10/7%

Corrugated Sheets Decline

Montreal.

The two lighter gauges of corrugated sheets are shown at reduced prices. Both 28 and 26 gauge are one cent per pound lower. The other gauges remain unchanged, but are by no means steady. Business continues quiet on these sheets and the opening of spring should improve the demand. Quotations are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Sheet and Plate Prices Hold

Montreal.

Quotations on sheets and plates are unchanged this week. Reports from the United States fields state that prices are likely to be upheld more so than in the past winter months, and different exporters claim that present levels will be maintained. Local stocks, which were bought at higher prices than present quotations, are becoming smaller, and slightly lower prices may be quoted when these become depleted, but no extensive reductions are expected for some future time. Quotations are as follows:

PLATES—	
10 gauge	6 25
12 gauge	6 30
14 gauge	6 45
16 gauge	6 55
BLACK SHEETS—	
10 gauge	6 50
12 gauge	6 55
14 gauge	6 60
16 gauge	6 80
18-20 gauge	7 95
22-24 gauge	8 00
26 gauge	8 10
28 gauge	8 20

Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANZED SHEETS—	
U.S. Standard—	
10¾ gauge	10 25
28 gauge	9 75
26 gauge	9 50
22 to 24 gauge	9 35
20 gauge	9 15
18 gauge	9 15
16 gauge	9 00
14 gauge	9 00
12 gauge	9 00

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	11 50	10 50
26 gauge	11 25	10 25
24 gauge	10 65	9 85
22 gauge	10 30	9 40
18 and 20 gauge	9 60	9 25

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Lower

Montreal.

Many lines of bar iron and steel are shown at reduced prices this week. Bar iron, mild steel, band steel, sleighshoe steel, tire steel and harrow tooth steel declining 20 cents per 100 lbs. Refined iron and toe calk steel decline 30 cents 100 lbs. Mining tool steel and Black Diamond tool and cast steel are now quoted at 23 cents a lb., a reduction of 1½ cents. Following are the quotations:

Common bar iron, 100 lbs.	4 00
Refined iron	5 50
Iron finished machinery steel	4 05
Mild steel	4 00
Band steel	4 00
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 00
Tire steel	4 20
Toe calk steel	4 90
Harrow tooth steel	4 15
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Nails Now Selling Well

Montreal.

Sales on wire nails are much heavier during this month. With shipments of booked orders of other spring needs, nails

are included. Stocks are said to be in good shape to meet these demands. The Montreal base price on wire nails remains at $5.20, but jobbers are now selling their quantity deliveries at $5.00 base. Cut nails remain at $5.75 base.

Rope Becomes Brisker

Montreal.

Rope also is much more active during the past two weeks. Prices hold firm since the decline of last month and base prices are as follows: Pure manila, 24½ cents; Beaver and New Zealand, 20 cents; Sisal, 18 cents, and Lathyarn, 18 cents.

Little Change in Ingot Metals

Montreal.

Ingot metals are generally dull and quiet, with no great changes in prices this week. It is felt that the European situation will have to be watched with regard to its future effect on metals, as it may cause a temporary advance.

TIN.—Tin continues to show further declines, and £150 has been reached on the London market. The opinion is expressed, however, that the bottom has now been reached. Local price is a little easier at 37 cents.

COPPER.—Little activity is shown in copper, the market being very quiet, having a slightly easier tone if anytning. Local prices show very little change and are quoted at 18½ cents for electro and 18¼ cents for casting.

SPELTER.—Spelter has had a sharp advance in London, owing to the possibility of the German supply being cut off. Whether this will hold depends on the political situation. Local price is a little stronger at 8 cents.

LEAD—The strength shown last week in London has again faded, and the market has lapsed into dullness. Little change in price is looked for. Local quotation 6¼ cents.

ANTIMONY.—Antimony is said to be a little easier owing to the weakness of silver. The local market continues dull and unchanged at 7¾ cents.

ALUMINUM.—This metal continues dull, showing signs of being slightly easier this week. Local price 34 cents.

Toronto Markets

TORONTO, March 10.—Important price changes are fewer this week, and the outstanding feature is probably the further reductions in cotton rope and cordage. Other declines include files and rasps, gate hooks, screw hooks and eyes, netting staples and black oil.

Lower quotations are made on brass and copper sheets and rods and tubing. Oakum prices are again revised and are lower.

Pipe and fittings are holding at the reductions reported last week, and bar iron and steel are also unchanged at recent declines. Black and galvanized sheets are unchanged and do not yet show much improvement in demand. Waste materials are quiet without change.

Tin is the only ingot metal to show any change in price this week, and is quoted lower, and the market in ingot metals is only dull.

Business is marked by a slow and slight improvement, and wholesalers are making shipments of spring and summer lines. Collections are said to be fair.

Coal Oil Unchanged

Toronto.

Prices are holding unchanged on coal oil and gasoline and quotations are 38 cents per gallon for motor grade gasoline and 27 to 30 cents net for coal oil. A fairly good demand continues for both products.

New Prices on Washers

Toronto.

The discount on washing machines, as announced in last week's issue of Hardware and Metal, has been changed from 20 to 25 per cent. off list, and a further reduction has been made in the price of the Seafoam by reducing the list price. The Seafoam electric, style A, is now listed at $105 instead of $120, and the Seafoam engine drive is now $50 list instead of $55. These new quotations with the change in discount constitute a reduction of about 17 per cent. from the old prices. A new water power washing machine, named the Whirlpool, has been added to the Dowswell line and is priced at $32, less the usual discount.

New Pipe Prices Hold

Toronto.

The new quotations on pipe as reported in the last issue of Hardware and Metal constitute a reduction of nearly 5 per cent. on black steel pipe and a little over 4 per cent. on the galvanized steel pipe. Wrought iron pipe prices remain unaffected. Considering the quiet condition of other lines there is still a very fair demand for wrought pipe and in the United States the Steel Corporation pipe mills are working at practically full capacity. The new list will be found on the current market pages.

Compression Goods Unchanged

Toronto.

Prices are holding at the recent changes on compression work. A slight increase in sales is noted, but at the present it is between seasons for these lines. Stocks are in fair shape for the opening of the spring trade. The following are present quotations:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	25%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	10%
J.M.T. C.	15%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Nail Demand Slow

Toronto.

No change is reported in nails, though the demand is said to be slow and there is a tendency on the part of many dealers to order for immediate needs only. This may be due to a feeling that the bottom has not been reached in prices. Wire rods and other wire products are in an unsettled state on United States markets, but many regard declines of any importance unlikely until wages and freight rates have been revised. Quotations on wire nails are $5.10 base here and for cut nails $6.20 base.

No Changes in Cordage

Toronto.

No price changes have been made in rope, which is held at 24½ cents base for pure manila, and 20 cents base for beaver manila and New Zealand hemp. Sales show a continued slow improvement. The 1921 prices for binder twine have not reached the trade yet.

Bar Iron Still Quiet

Toronto.

Wholesalers report very little change in business conditions with regard to bar iron and steel. Some notice a slight improvement in the demand, but state that it is hardly worth talking about. There is a feeling, though, that inquiries are being held back on account of general conditions and that the coming of spring will witness a revival in business activity. Some big cuts are reported in pig iron prices on English markets and quotations have been reduced by £2 5s. a ton. The quotations here are held at last week's prices and are the following:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 00
Common bar steel, ¼ in. and heavier	4 50
Common bar iron, 3-16 in. dia. and lighter	5 00
Common bar iron, ¼ in. and heavier	4 50
Angle base	4 50
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 00
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop Steel	6 00

Declines Held on Fittings

Toronto.

No further changes are reported on pipe fittings and prices are maintained at the declines noted last week. Busi-

ness is on the light side, but is beginning to show a slight improvement. Stocks are in fair shape. Quotations are as follows:

Cast iron fittings	15%
Plugs, cast iron	20%
Do., solid	10%
Do., countersunk	net
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	**30%**
Nipples, blk. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., long, ⅛ in. to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	**20%**
Couplings, 4-in. and under	**20%**

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B	0 25	0 35
Class C	0 16	0 25

Corrugated Sheets Slow Sellers

Toronto.

There is only a slow demand at present for galvanized corrugated sheets and prices are holding at the changes noted last week. Quotations are the following:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00
Less 7½%.	

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Range Boilers Steady

Toronto.

Prices remain steady at the declines made early in the present year on range boilers. Business has been lighter than usual although a better tone is evident. A 30-gallon electric welded range boiler is being quoted at $11.75 and a 40-gallon size at $16.50. The quotations on the riveted boilers are the following:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$13 00	$15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Brass and Copper Sheets Decline

Toronto.

Following declines in primary markets on copper and brass, there is a reduction of 3 cents per pound on rods, sheets and tubing of these metals. The following are new quotations:

BRASS—	
Sheets, base, per lb.	$0 29
Rods, base, per pound	0 26
Tubing, base, per lb.	0 36
COPPER—	
Rods, base, per pound	0 34
Soft sheets, plain, 16-oz. and heavier, lb.	0 34
Do., plain tinned " " " "	0 40
Do., polished and tinned " " "	0 45
Tubing	0 39

Lead Products Holding

Toronto.

No further changes are reported in lead or zinc products, which are holding at recent declines. There is a slightly firmer tone to outside primary lead markets, and the present low price of this metal brings it nearly to the average price of 1914 and many think that lower quotations can hardly be looked for. There is a slight increase in business in these lines noted during the past week and with the coming of the spring trade a further improvement is expected. Present quotations are the following:

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09¾
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 26
Do., commercial, lb.	0 24
Do., guaranteed, lb.	0 28
Do., wiping, lb.	0 22¼
Zinc sheets, per lb.	0 16

Bright Wire Goods 82½ P.C.

Toronto.

A reduction has been made in bright wire goods, and the new discount is 82½ per cent. The reduction amounts to 12½ per cent., the previous discount being 80 per cent. off list. This covers bright screw hooks, straight shoulder hooks, gate hooks and eyes, screw eyes, etc.

Files Down 10 P.C.

Toronto.

A decline of about 10 per cent. has been made in the price of files. The new discount on Globe, Arcade, Kearney & Foot, Firth, Great Western, etc., is 55 per cent. Black Diamond and Nicholson files are now quoted at 32½ per cent. instead of 27½ per cent. Kearney & Foot horse rasps are now quoted at 72½ per cent. off list.

Columbia Dry Cell Quotations

Toronto.

There is more interest noted in ignition batteries and multiples. These are selling at the new prices announced recently and quotations on Columbia dry cells, No. 6, are as follows: for less than 12, 50 cents each; for over 12 and under 50, 45 cents; over 50 and under 125, 43 cents; barrels of 125, 39 cents.

Cotton Rope Declines Again

Toronto.

Further declines have taken place in cotton rope prices, and another reduction of approximately 15 per cent. has been made. The new base price is 42 cents per pound. Three-sixteenth inch is now 43 cents, 5-32 inch 46 cents and 1-8 inch 47 cents per pound.

Netting Staples Reduced

Toronto.

New lower prices are quoted on poultry netting staples, and new quotations are the following: 10-pound boxes, per 100 pounds, $10.25; 25-pound boxes, per 100 pounds, $9.65, and 100-pound kegs $8.65.

Black Oil Down Two Cents

Toronto.

A reduction of 2 cents per gallon has been made in the price of black oil, and the new quotations are: summer grade, 24.60 cents per gallon, and winter grade, 25.10 cents, list, less 15 per cent.

Sheets and Plates Unchanged

Toronto.

Prices of sheets and plates, both black and galvanized, show no change this week. Business continues quiet, and if a little improvement is shown one day, it is wiped out the next. A substantial falling off in the output is reported from United States markets for the month of February. Many of the independent mills there are making further cuts in prices, and quotations on plates as low as $1.90 base are reported. The English market is very dull, with many of the leading works closed, and recessions have been made there in prices of galvanized sheets. The following are the market quotations here:

PLATES

10 gauge	6 20	
12 gauge	6 25	
14 gauge	6 30	
16 gauge	6 40	

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 40	10 30
U. S. 28	9 00	10 00
U. S. 26	8 70	9 75
22 and 24	8 55	9 50
18 and 20	8 40	9 35
16	8 25	9 20
12 and 14	8 20	9 15

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

No Change in Waste Metals

Toronto.

The scrap metal market continues very dull and shows no change in prices, which remain nominal. Values are very unsettled, and the weakness of virgin copper and the slump in tin combined with the reductions in lead prices have combined to make non-ferrous scrap markets dull and uncertain. There is a tendency for easier quotations in steel and iron scrap. The following are nominal prices:

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass		10 00
No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	2 50
Overseas lumbermen's rubber boots	1 50	2 00

Oakum Prices Lower

Toronto.

Reductions have been made in oakum prices and quotations are made on special No. 1 at $17.00, less 10 per cent. Plumbers' oakum is now quoted at $8.25, less 10 per cent.

Sash Cord Reduced Again

Toronto.

Further reductions have been made in sash cord quotations, and No. 8 to No. 12 are now priced at 55 cents per pound. No. 7 is now 56 cents, and No. 6 at 57 cents.

Cylinder Oil Declines

Toronto.

A reduction of 3½ cents per gallon has been made in the list price of Capitol cylinder oil, and the new quotation is 88.60 cents per gallon, less 15 per cent.

Ingots Quiet—Tin Lower

Toronto.

There has been another quiet week in ingot metals to record, and scarcely any improvement is visible. The market is abnormally dull, even for a quiet season. Tin is the feature with another decline of two cents per pound. Other metals are unchanged locally, although displaying a firmer tone on outside markets. All non-ferrous metals are regarded as exceptionally low in price at the present time and many are of the opinion that buying at present prices is apt to prove a good investment.

TIN.—This is the one metal showing lower prices this week. Prices continued to decline on London markets and the fact of sterling being also weaker tended to bring down prices here and in the United States. Home markets are reported as listless with quotations lower at 38 cents per pound.

COPPER.—There has been little life shown in copper and "drifting" describes the state of the market. Renewed competition has led to further shading of prices on United States markets, but quotations are held unchanged here at 19 cents for casting copper.

LEAD.—A little firmer tone is reported in lead markets. Prices of lead declined $15 a ton at New York and £5 10s. at London during the past month. Quotations here are unchanged from last week and are $6.

SPELTER.—This also shows a slightly firmer tone, and there is little business despite the lowness of price. It is held unchanged here at $7.

ANTIMONY.—The market is still dull in antimony and the declines in silver have brought no new offerings from the East. Prices are unaltered at 8 to 9 cents.

ALUMINUM.—Business continues dull in this metal and no material change is reported in quotations. Prices remain at 35 to 37 cents.

London Markets

LONDON, March 10.—Several changes are noted in hardware lines this week, and among others are new lower prices on files, sash weights, canvas belting, Brasso metal polish, wrought iron washers and shellac.

Business here is reported as fairly good and is improving each week. Paints, stains, varnishes and house cleaning necessities are moving out nicely now. New prices are issued for this season on Paris green and arsenate of lead. Collections are reported fair.

Linseed Oil Down Again

London, Ont.

Linseed oil has been reduced again this week and is now 5 cents per gallon lower. Sales on this product are increasing each week. New quotations are the following:

	Raw.	Boiled.
1 to 2 bbls., per gal.	0 95	0 98
3 to 5 bbls., per gal.	0 94	0 97
6 to 9 bbls., per gal.	0 92	0 95

Less barrels add 15 cents per gal.

Turpentine Declines 10 Cents

London, Ont.

Another reduction has been recorded on turpentine, and new prices are 10 cents lower. More sales are being made now and there is a larger movement. The present prices are as follows:

1 bbl. lots, 95c per Imp. gal; 2 to 4 bbl. lots, 94c; 5 gal lots, $1.10.

Shellac Drops 50 Cents

London, Ont.

Reductions of 50 cents per gallon have been made in shellac prices. Sales are showing a marked improvement. The following are the new quotations:

	Orange.	White.
1 gal jugs, per gal.	4 60	5 10
½ gal. jugs, per gal.	4 75	5 25
¼ gal. jugs, per gal.	5 00	5 50
½ int bottles, per doz.	4 30	4 85
1 pin bottles, per doz.	8 15	9 15
¼ pint bottles, per doz.	2 70	2 90
⅛ pint bottles, per doz.	1 50	1 65

New Pipe Prices

London, Ont.

New lower prices have gone into effect on steel pipe and are a reduction of from 4 to 5 per cent. The following are the new quotations:

Price List No. 49. March 1st, 1921

Standard Buttweld Pipe.

Per 100 feet.

	Steel		Gen. Wrot. Iron	
	Blk.	Galv.	Blk.	Galv.

10 in.	3 40	4 22	4 39	5 21

Wood Screws Reduced

London, Ont.

New and lower prices are in effect on wood screws. The new discounts on bright and brass and bronze screws are as follows:

Flat head bright	72½% off list
Oval head bright	70% off list
Round head bright	70% off list
Flat head brass	60% off list
Oval head brass	57½% off list
Round head brass	57½% off list
Flat head bronze	55% off list
Oval head bronze	52½% off list
Round head bronze	52½% off list.

F. O. B. Hamilton, Toronto and Montreal, with freight equalized thereon.

Files 10 P.C. Lower

London, Ont.

A reduction has been made in the price of files, and the new discount on the Globe file is 50 and 10 per cent. off list. This is a decline of about 10 per cent.

Sash Weights Reduced

London, Ont.

New lower prices are issued on sash weights and the round 3-pound and larger are quoted at $4.40 per 100 pounds. The sectional weights are $5.50 per hundredweight for ½-pound size and $5 for the 1-pound size, net.

Canvas Belting Declines Again

London, Ont.

Canvas belting is lower again and the new discount is 60 per cent. off list.

Netting Staples Are Lower

London, Ont.

A reduction has been made in the price of poultry netting staples, and the new lower quotations now in effect are as follows:

100 lb. kegs, $8.65 per 100 lbs.; 25 lb. boxes, $10.00 per 100 lbs.; 10 lb. boxes, $10.50 100 lbs.

Wrought Nipples Adjusted

London, Ont.

There has been an adjustment in the price of wrought nipples, and the short and close, 4 inches and under, are quoted at 40 per cent. off list. For long nipples, 4 inches and under, the quotation is 50 per cent. off list.

Brasso Metal Polish Lower

London, Ont.

The prices on Brasso metal polish have been revised and the No. 3 size is slightly lower. Quotations are the following:

No. 3 size, $1.40 doz.; No. 6, $2.70; No. 12, $5.20.

New Silvo Prices

London, Ont.

Quotations on Silvo polish are revised and the new quotations are: No. 3 size, per dozen, $1.35; No. 6, $2.25.

Garden Syringes Lower

London, Ont.

The prices for brass English garden syringes for the coming season are slightly lower and are the following: 1½ x 16 inches, per dozen, $22.50; 1½ x 18 inches, $24.50.

English Razors Arriving Better

London, Ont.

There are larger shipments of English-made razors arriving now, and the prices are slightly lower on several makes. Some of the I.X.L. lines are quoted as follows:

I.X.L. Line—No. 5000 Canuck, $18.00 doz.; No. 1000 Conqueror, $21.00; No. 2000 Peerless, $24.00.

Nail Sales Improving

London, Ont.

There is a small improvement in the demand for nails and sales are increas-

ing. Prices are unchanged and wire nails are quoted at $5.10 per keg, base, and cut nails at $6.40.

Wrot Washers Decline Again

London, Ont.

Another decline has been made in the price of wrought iron washers and new quotations are about 10 per cent. lower. The new discount is 45 per cent. off list, with the usual extras for small lots.

New Paris Green Prices

London, Ont.

Prices are just out for paris green for 1921 season and are about 8 per cent. lower than last year's quotations. The following is the new price list:

½ lb. pkgs., 50 cents lb., net cash; 1 lb. pkgs., 48c; 25 lb. drums, 46c; 50 lb. drums, 45c; 100 lb. drums, 45c; 250 lb. casks, 44½c; 600 lb. bbls., 44c.

Lead Arsenate Prices for 1921

London, Ont.

The new prices for arsenate of lead for the coming season are issued and show a small increase over last season figures. The quotations are the following:

½ lb. pkgs, 46 cents lb., net cash; 1 lb. pkgs., 44c; 5 lb pkgs., 42c; 10 lb. pkgs., 40c; 25 lb. pkgs., 36c; 50 lb. pkgs., 34c; 100 lb. pkgs., 32c.

Putty Prices Are Held

London. Ont.

No change has been made in the prices of putty and they are held at the decline of two weeks back. There is only a slight improvement in the demand. Prices are as below:

Standard, 100 lb. drums, $7.05 per 100 lbs.; 25 lb. drums, $7.30 per 100 lbs.

Pure, 100 lb. drums, $8.55 per 100 lbs.; 25 lb. drums, $8.80 per 100 lbs.

White Lead Sales Increase

London, Ont.

No changes have been made in white lead prices since the reduction of a couple of weeks ago. There is a slight increase of sales in this product as the painting season draws near, and it will probably be more in demand each week now. Quotations are as follows:

	Tons.	Less tons.
Pure, per 100 lbs.	14 95	15 30
Elephant, per 100 lbs.	15 45	15 80

Window Glass Unchanged

London, Ont.

Not much change is shown on window glass and sales at present are mostly limited to sorting orders. Prices are holding at 60 per cent. off list for single and double diamond and 60 per cent. is also quoted off cut light list.

Winnipeg Markets

WINNIPEG, March 10.—Some important price changes are shown this week in hardware commodity quotations. The base price of wire nails has been reduced and is now $5.55 at Fort William and $6.20 at Winnipeg.

Other changes include reductions on tapped and blank nuts, wrought iron washers, bolts of various descriptions, coach screws, coil chain, window glass and light tee and strap hinges. A new list has been issued on black and galvanized pipe showing a reduction, and black iron sheets have also been reduced in price.

Business conditions continue to improve, but very slowly however. Wholesalers and manufacturers are very optimistic though and are expecting an increased demand for spring and summer requirements shortly.

Wrought Washers Lower

Winnipeg.

The prices have been reduced on wrought washers and are as follows:

	Case Lots.	Less.
3-16, per 100 lbs.	$18 30	$18 80
¼	16 14	16 64
5-16	15 18	15 68
⅜	14 10	14 60
7-16	13 26	13 76
½	12 78	13 28
9-16	12 66	13 16
⅝	12 54	13 04
¾	12 42	12 92
⅞	12 30	12 80
1	12 30	12 80
1⅛	12 30	12 80
1¼	12 54	13 04
1⅜	12 54	13 04
1 7-16	12 54	13 04
1½	12 54	13 04

Bolts Lower in Price

Winnipeg.

Reductions have been made on bolts, and carriage, machine, stove, plow, elevator, shaft, tire and sleighshoe bolts are lower in price. Coach screws have also been reduced, and the following are the new quotations.

CARRIAGE BOLTS—

⅜ in. and smaller	15% off
6 in. and shorter	15% off
Over 6 inches	Net List
7-16 in. and larger	5% off

MACHINE BOLTS—

⅜ in. and smaller; 4 in. and shorter	32½% off
Over 4 inches	5% off
7-16 and larger	10% off
STOVE BOLTS	60%
ELEVATOR BOLTS, corrugated head	30%
PLOW BOLTS	12½%
TIRE BOLTS	40%

SLEIGHSHOE BOLTS—

⅜ in. and smaller	5% adv.
7-16 in. and larger	5% adv.
COACH SCREWS	25% off
BOLT ENDS	Net List
SHAFT BOLTS	5% adv.
STEP BOLTS	5% adv.
WHIFFLETREE BOLTS	5% adv.

Another Reduction in Nuts

Winnipeg.

Prices have again been lowered on square and hexagon nuts, both tapped and blank, and these are now quoted as follows:

	Square Plain. Case lots.	Less	Square Tapped. Case lots.	Less
¼	$16 50	$17 50	$19 00	$20 00
5-16	16 00	17 00	18 20	19 20
⅜	14 20	15 20	15 80	16 80
7-16	13 60	14 60	15 00	16 00
½	12 75	13 75	14 00	15 00
9-16	12 60	13 60	13 70	14 70
⅝	12 30	13 30	13 30	14 30
¾	12 10	13 10	13 00	14 00
⅞	12 00	13 00	12 90	13 90
1	12 20	13 20	13 10	14 10
1⅛	11 90	12 90	12 80	13 90
1¼	11 90	12 90	12 80	13 80
1⅜	12 00	13 00	13 00	14 00
1½	12 30	13 30	13 40	14 40

Wire Nails Down 25 Cents

Winnipeg.

The price has dropped on wire nails and these are now quoted at Fort William at $5.55 base and Winnipeg $6.20 base.

Reduction in Iron Pipe

Winnipeg.

This week has brought about a reduction in prices of wrought iron pipe. The latest prices are given below.

BLACK PIPE

Effective March 2nd, 1921.

Big Drop in Window Glass

Montreal.

A big reduction has been recorded this week in prices on window glass and new quotations are as follows:

16-oz., 100 ft. cases—0 to 25, $8.00 per case; 26 to 35, $9.72; 36 to 40, $9.72; 41 to 50, $10.48; 51 to 54, $10.80; 55 to 60, $10.80; 61 to 70, $11.20.

21-oz., 100-ft. cases—25 to 34, $14.68 per case; 35 to 40, $14.68; 41 to 50, $15.36; 51 to 54, $16.32; 55 to 60, $16.32; 61 to 70, $16.92; 71 to 80, $17.68; 81 to 85, $20.28; 86 to 90, $21.24; 91 to 95, $23.48; 96 to 100. $28.08.

Linseed Oil Drops 5 Cents

Winnipeg.

The price on linseed oil has dropped five cents per gallon this week and is now quoted at $1.20 per gallon for raw and $1.23 for boiled.

No Change in Turpentine

Winnipeg.

The price of turpentine remains the same as last week, and is still quoted at $1.65 per gallon in barrel lots.

Light Straps and Tees Reduced

Winnipeg.

The prices have been reduced on light tee and strap hinges and are as follows:

	Light Tee.	Light Strap.
3 inch	$1 20	$1 00
4 inch	1 20	1 20
5 inch	1 30	1 40
6 inch	1 50	1 70
8 inch	1 85	2 55
10 inch	2 50	3 60

Pittsburgh Markets

PITTSBURGH, March 10.—Production continues to decline in the steel industry, and as a whole it is operating at an average of 40 per cent. of capacity against an average of 80 per cent. for the first nine months of last year. Pig iron production is at the rate of 50 per cent. of actual capacity, but the decrease by merchant furnaces is much more than by steel works furnaces. Price declines during the past week have been small, and the most noteworthy feature in this respect is the open quotation of $3 per keg, base on wire nails, against the regular or Corporation price of $3.25. As the latter price is regarded as very low relatively to other steel commodities the price shading is the more interesting.

A 50 cent decline has been registered on foundry pig iron during the week, making present price $26.50 valley. Bessemer and basic remain nominally unchanged although sales on the latter are reported at $2 a ton under market quotations.

PITTSBURG, March 10.—Surface developments in the iron and steel market are meagre and of no particular importance, but under the surface important things are working out.

Demand continues stagnant. The independents are booking scarcely any business with their cut prices. The Steel Corporation is not booking much business, but it is booking some. Its bookings are not due to its price or to the service it can render, as the independents will make lower prices and can give fairly prompt shipment. The corporation can usually beat the independents in promptness of shipment by a small margin, as the corporation has all kinds of departments in operation, while with an independent the shipment must frequently wait until enough orders accumulate to start the department involved. The chief reason the corporation is booking business is that consumers wish to secure, or retain, a place on its order books, after the spectacular example in 1920 of how much saving there was in having an allotment by the corporation.

Operations

The common estimate is that the independents are not operating at over 20 or 25 per cent. of capacity. In January they operated at 25 or 30 per cent. The Steel Corporation's operations have dropped to about 60 per cent. against fully 90 per cent. early in January. Some decrease was certain to come, even if the price situation had not been disturbed, since the corporation's customers were in many cases receiving much more steel than they could distribute or consume, but the price-cutting by independents has sharply accentuated the decrease, causing many corporation customers to instruct the corporation to curtail or discontinue shipments. There is not much cancellation, however, and there is no buying from independents as a substitute.

The steel industry as a whole is operating at about 40 per cent. of capacity, against an average of 80 per cent. during the first nine months of last year. After all, the present rate is rather a high one, considering both the general stagnation in business and various other circumstances. There is, for instance, the item that rail production has been curtailed of late because the railroads are unable to pay for all the rails already shipped them thus far this year.

Pig iron production now is at the rate of about 22,000,000 tons a year or at a little less than 50 per cent. of actual productive, not rated, capacity. On account of coke shortage and other difficulties the maximum rate attained last year was 40,000,000 tons, in March. Production has decreased much more by the merchant furnaces than by the steel works furnaces, being not over one-third of capacity, but the steel interests continue to curtail. The Steel Corporation is operating very much better than the independents, and of all the corporation subsidiaries the Carnegie Steel Company stands second in point of operation, yet of its 59 blast furnaces the Carnegie company at last report was operating only 38, against 48 about the middle of January, and additional furnaces are to be put out.

Steel Prices

Minimum prices for steel products done by independents have declined very little, on the whole, in the past week. On ordinary orders bars are still quotable at 2c and shapes and plates at 2.10c, while there is less talk of its being possible to shade these prices materially in case a really good order was going. Sheets are commonly quotable at 3.20c for blue annealed, 4.10c for black and 5.25c for galvanized. These prices could be shaded on a sufficiently attractive order.

The most interesting price decline in the week is furnished by the action of the Pittsburg Steel Company in quoting wire nails openly at $3.00 per keg, base, against the regular or Steel Corporation price of $3.25. Nails were regarded as being priced very closely at $3.25, relative to other steel commodities, hence shading of the price is particularly interesting. When the Midvale Steel and Ordnance Company began cutting prices generally, about a month ago, it sold some nails at $3.10, but afterwards announced that it had withdrawn the $3.10 price. It is understood the Pittsburg Steel Company maintains that it made the $3.00 price because at least two other producers were quietly doing $3.00, although nominally quoting $3.25.

Undercurrents in Steel

The United States Steel Corporation has not reduced its prices or wages, and no indication can be seen that it contemplates doing so in the near future. To many in the trade the Steel Corporation has seemed an enigma, and yet its action is not necessarily out of line with precedents and present conditions if these are considered carefully. Thus, it has been the steel trade practice in the past that when prices are cut by some producers others follow and in a very short time the cut prices become the general market. The present, however, is an exceptional case. The mills used to cut prices when they could get business thereby. This time they cannot and probably they knew they could not. It is commonly believed that the cutting was done with the ulterior object of securing a "redistribution" of business and forcing the Steel Corporation to reduce wages, as practically all the independents have done. But there is no redistribution of business. The corporation has lost in shipments, but that is merely postponement. The corporation has not lost customers and independents have not gotten any business away from the corporation. As to wages, obviously the corporation cannot fairly reduce wages when it has not reduced prices. Its shipments are at the old prices, why should not wages be at the old rates? So the corporation does not seem to be as much of an enigma as is commonly thought.

In the past few days there is beginning to be observed an undercurrent of the independents being less disposed to continue their price-cutting course. Perhaps they are influenced by the extremely small amount of business secured

Continued on page 64

Two Ways of Handling a Quart of Green Paint

The "Retail Hardware Salesman" Sees a Big Selling Opportunity In Every Customer, While the "Clerk" Merely Wraps Up the Quart Can—Conditions To-day Make the "Salesman" Most Essential and the "Clerk" Unnecessary

SHOULD the term of hardware "clerk" be eliminated altogether, and "hardware salesman" used in its place? The latter does sound better, doesn't it? And still is it not possible that both may even yet be found in the local hardware store? Let us take the quart of green paint, and notice the two ways in which it may be placed in the hands of a customer.

Many times in twelve months Mr. Jones walks into the hardware store and asks for a quart of green paint, or perhaps it is Mrs. Jones who wishes to make the purchase. In either case the person is after this can and hopes to take it home and make a "job" of the article which is to receive the refreshing coat.

THE "CLERK"

The "clerk" on hearing the demand for a quart of paint from the customer, produces a color chart, selects a shade that appeals to his own eyes, tries to explain that he does not think a nicer shade of green will be found anywhere else, and stands there with the color card in his hands while the customer is anxiously peering at the color under his finger. If this would-be salesman is fortunate, the shade of green is something near the color desired, and at the bid of the unenlightened Mr. or Mrs. Jones, he wraps up the can. This little imaginary episode has not taken long to put on paper, but has taken about the length of time to write as some clerks like to deal with a paint customer. Not realizing that a satisfied customer is worth more to his boss than any number of unsatisfied people making a purchase, whether it be paint or any other article that may be found on the shelves or floor of a hardware store.

THE "SALESMAN"

The man who has earned the more advanced term of his position as "hardware salesman" is the one who approaches his customer in a very different manner. On learning that a quart of green paint is desired, he, with a cheery and patient expression on his face, enquires whether it is for inside or outside use, knowing that green is a popular color for many articles either inside or out. On learning that the lawn fence on the Jones' property is the article to receive the application, he now produces the color card and helps to make a decision on the shade. This is appreciated, and at once enthusiasm reigns, customer and salesman joining in. In the end the fence will be painted by a satisfied customer, in a desired shade, and applied with a paint brush. Oh, no; this salesman did not forget that paint was put on with a brush, increasing his sale by the price of one.

PAVING THE WAY

The mere asking of a customer just what the article to be painted is, invariably paves the way whereby the sale is much easier made. On ascertaining this, a brief explanation of the different kinds of paint manufactured for their varied purposes oftentimes helps, as your customer may have a floor, a ceiling, or even a buggy or auto body that should have a coat of paint. You can judge your own time to be taken by this explanation, being careful not to run it into a memorized speech. Remember your time is valuable, likewise your customer's. But above all, make sure you leave the impression that you know what you are talking about. Study the paint "game"—it is interesting and instructive, and you will be surprised the good you can do in your community and the business which will be built up for your store.

USING ADVERTISING MATTER

The "salesman" of to-day takes as much care in unpacking the advertising matter enclosed with the spring shipment as he does the paint itself. He reads it all, displays the store cards and counter displays in the right place at the right season, and features his regular window displays with the window trims and show cards. The paint shelves are not overlooked, he keeps them filled up so that they have a neat and tidy appearance. Each line, with its attractive labels, is arranged to convey to all customers "if it is paint we want, we can get it here."

GLIDDEN

Sell Glidden Auto Finish

This year more Auto Finish will be sold than ever before. Car owners are anxious to keep up the value of their cars and there's no better way of doing it than by applying a coat of Glidden Auto Finish. Dealers who stocked Glidden Auto Finish last year have doubled their stocks. They are out to double the good profits made last year.

You can do the same — provided you choose Glidden Auto Finish. This Glidden product is specially made for application by the owner. It levels out easily and quickly. It dries hard over night. No need to lay up the car for a week.

These Finishes appeal to the owner just as the profits appeal to you. Write to-day for plans and prices.

AUTO FINISHES

As An Outsider Sees the Paint Dealer

An Outsider's Impression of the Average Merchant Handling Paints—Importance of Sales Staff Having Detailed Knowledge of All Paints and Varnishes

AS soon as I was large enough to handle a saw or a paint brush I had occasion to frequently visit paint departments in search of information on how to finish something or other and to learn what I should buy to accomplish what I had in mind, says A. B. Taylor, in the American Paint & Oil Dealer. Perhaps I wanted to varnish a fish rod, paint a boat, or put a new coat on the back porch, and I will never forget how difficult it was for me to get one of the people behind the counter to take me seriously. They seemed to consider me only a kid and short answers and indifference were usually the rule when I tried to buy anything and asked questions.

What was true then is true to-day and present day boys are treated about the same as I was—they are not encouraged in their efforts to learn. But they should be taken seriously, they should be encouraged because the boy of to-day is the buyer of to-morrow.

An Air of Mystery

When I grew up and continued to visit paint stores I was given a new impression and it is that the people behind the counters seem to surround themselves with too much of an air of mystery regarding paints and varnishes and kindred lines. Either that or they don't understand what they are selling. Even in small stores where the owners waited on customers I have been impressed with an unwillingness to explain things and assist the customer in solving his problems. This thought I am expressing is shared by many men and women I know.

I recall one experience of a young man who built a library table. After it had been assembled he went to his local hardware store to buy the necessary varnish, filler and stain to finish it. This happened several years ago and the man's memory is a trifle hazy on many of the details, but he does remember the hardware man selling him some things and telling him how to use them with the result that after two weeks of patient effort a man in one of the local chair factories had to undo all that the novice had done, scrape and sandpaper the table down to the natural wood and start all over again. After the chair man had finished the job it was very attractive, but there was nothing that he did that my friend could not have done.

I have known of countless cases where gold paint or gilt has been sold to retouch gold leafed signs and all of us know that after a couple of weeks in outside weather the gold leafed letters looked like they had measles because they were all spotted a brownish green where the gilt had turned.

When I was a boy of seventeen I did fairly good jobs of laying gold leaf. So why let men make their signs look even worse because of the fear to recommend gold leaf and explain how to size the bad spots and then touch the leaf to it.

Need For Information

I know a man whose maid scorched a weathered oak dining table with an electric iron. It wasn't much of a burn—merely the scorched outline of the iron, and the man thought he could fix it up with little effort if he knew what to use, so he tried to get information, but failed at three stores. Finally he had a finisher come out from the store where he bought the table. The finisher worked one Sunday and the man watched the simple operation of restoring the spot within an hour. And it was simple, too, because this same man later challenged me to find a similar spot he had fixed where an electric toaster had made a like burn.

I know of another man who had a hardwood floor laid in his kitchen. He wanted to finish it but couldn't find out how. It took him so long to get the information he desired the new flooring became soiled, and the job was doubly hard when a man finally told him how to go about it.

One woman told me about how unsuccessful she had been in painting her bathroom because of limited instructions the paint clerk gave her. He did not include the suggestion to scrape off loose spots on the walls she was to finish.

I could go on to cite many other instances of disappointed paint and varnish users but the few I have mentioned will serve to illustrate my contentions.

Hiding the Facts

It has always seemed to me that there is a tendency to hide facts in this business, an effort at professionalism, or more like it, mysticism. It is my opinion that paint wholesalers and retailers have been restricting the sale of their products for household uses.

Perhaps some of my readers will say that it is well that the public remain uneducated in the uses of paints, varnish, stains and wall finishes. Perhaps some will argue that it will hurt their trade. Others will say the work is too difficult to be done by the layman, but such thoughts are anything but broad and far-sighted.

The Remington Arms Co. manufacture ammunition, but they also sell material which you can use to load your own shells.

The American Tobacco Co. advertises to smokers to "roll your own" despite the fact that Bull Durham is an inexpensive product and they manufacture many brands of machine-made cigarettes on which profits are greater than on the "makin's."

It is my belief that this broad idea has not yet taken very firm root in the decorating and finishing field.

Crop Destroyers Swell H.C. of L.

Emphasizing the great saving and larger profits that can be enjoyed by the farmers who properly protect their potato crops by spraying as a preventive of blight which results in dry rot and also against the destructive potato bugs, the following is an extract from a paper recently prepared by an expert on the subject:

War profiteers played a considerably smaller part in swelling the cost of living during recent years than the armies of parasites that have invaded Canada's agricultural regions, Professor H. H. Whetzel, of Cornell University, told the thirteenth annual meeting of the Quebec Society for the Protection of Plants, at Macdonald College.

A Costly Potato

In emphasizing the value of plant pathology in agriculture, the professor declared that each individual crop in America yearly suffered damage aggregating millions of dollars, due to the depredations of plant parasites. "Every time you sit at your table and eat a potato, you are paying for two of them," he continued, "because you have to pay for the one destroyed by the insect or disease."

Carpenter-Morton Co.'s Officers

At a meeting of the board of directors of the Carpenter-Morton Co., George C. Morton was unanimously chosen president of the corporation and William E. Gilmour treasurer.

For twenty-two years Mr. Morton has served the Carpenter-Morton Co. as treasurer and his promotion to president comes as a well merited reward for thirty-six years of service.

Mr. Gilmour has served the company for thirty-eight years, having entered the employ of the company in 1883. He served the company in the position of cashier.

Hillcrest Pure White Lead

Every Iron Sold Boosts Your Business

This is smooth, wonderfully-ground white lead of an almost dazzling whiteness. The clear smoothness can only be fully appreciated by seeing it and trying it. This is a real asset to the paint and varnish department of your store. You'll be proud to sell "Hillcrest" Pure White Lead—especially to professional painters that can appreciate it; it brings them back for more.

When the "Hillcrest" salesman comes with "Hillcrest" Pure White Lead, give him a good hearing. He will be glad to tell you more about it and show you how helpful all the "Hillcrest" lines can be in building up lasting trade among your permanently satisfied customers. We are manufacturing "Hillcrest" Paint Products with an exactness that assures you the ability to supply customers with the same satisfying goods now or in years to come.

We Also Manufacture:

Hillcrest Colors in Oil; Hillcrest Colors in Distemper; Hillcrest Colors in Japan; Hillcrest Porcelain White Enamel; Hillcrest Ebony Black; Spanish Enamel; Hillcrest Bath Enamel; Hillcrest Motor Car Enamel; Hillcrest Paste Filler; Hillcrest Crack Filler; Pearcy's Pure Prepared Paints; Hillcrest Barn Red Paint; Hillcrest Outside Gloss White; Hillcrest Inside Flat White; Hillcrest Aluminum Paint; Hillcrest Carriage Paint; Hillcrest California Gold Paint; Hillcrest Graphite Machine Paint Liquid; Hillcrest Orange Shellac; Hillcrest White Shellac; Hillcrest Oil Stain; Hillcrest Varnish Stain; Hillcrest Shingle Stain; Cottage Shingle Stain; Hillcrest Varnishes—all kinds; Hillcrest Pure Lead; Hillcrest Bronzing Liquid.

An Effective Display of Floor Paint

Contrast Shows Effect of Floor Paint—C. C. Falconer, Winnipeg, Arranges a Display Which Pulled Business

THE pulling power of a window trim is measured only by the ability of the artist to interpret public interest in the article displayed, says C. C. Falconer, Winnipeg, Man,

Now floor paint, as we all know, is for the preservation and beautifying of floors to make them a delight to look upon and easier to keep clean. It was with the object of imparting this knowledge quickly to the busy passerby that we secured from a wrecking company a piece of old, very old, floor about three feet square and about ten boards wide.

They were left altogether, of course, just as they were sawed out of the floor. This piece of floor was placed in the window, the boards running up and down with a slight tip back from the top. The left half of the boards were left in their original raw state, the remaining boards to the right were each painted a distinct and outstanding floor paint color. An oval sign of about a foot long was tacked to either side, the left one reading (before) and the other one (after). On each of the painted boards was a small oval sign with the name of the color which was used, such as (orange), (light yellow), (dust color), etc.

Above this wood floor was a large sign calling attention in a few words to the merits of the floor paint, cans of which were neatly pyramided on both sides of the window. Several of the manufacturer's cut-outs, color cards and a sprinkling of brushes completed the display.

We weren't interested in having people compliment us on our window "display." Results speak louder than compliments, and in that we were most generously rewarded, for both men and women bought liberally, not only while the display was in, but long after, and one of the striking incidents was the great many who asked for so much paint as per the color on a certain board in the window.

Improved Market for Turpentine and Rosins

More General Buying in Advancing Market—Rosins Cheaper Than Before the War

A BIT more sanguine temperament seems to pervade the naval stores markets than a week or two ago, says the Naval Stores Review. True, the change for the better in the trade feeling is not very pronounced, but the fact that there is a change for the better is in itself a very hopeful sign. Dealers have become very sensitive to changing conditions, since business conditions generally became so acute, and the fact that they are facing the future with more confidence indicates that they can begin to see and feel the ground swell of approaching demand for turpentine and rosins. A week ago they were merely more hopeful as to turpentine. Today they are finding the foundations for rosins stronger and expressing the sentiment that the bottom has been reached. In turpentine there is the distinct assertion of improved consumptive demand from all directions, the harbinger of the spring demand that should arrive in time to meet the early spring movement of fresh crop supplies. This week the buying on the part of dealers has been more general just as the calls on them from consumers have become more widespread, and the market enjoyed several advances putting it to 54 cents, with all offerings taken. Receipts will continue small for several weeks to come. While the winter has been an open one and some new crop stuff has already moved in to the market it will be four or five weeks before any volume of fresh receipts worth mentioning comes upon the markets.

Along with the better demand for turpentine there have come more inquiries for rosins and increased sales to consumers. Foreign and domestic demands both show signs of increasing in the near future. While the movement into consumption is not at all heavy it does show an appreciable improvement, consumers evidently beginning to awaken to the fact that they can now obtain rosins cheaper than they did before the war opened.

SOME VALUABLE POINTERS

(Continued from page 39)

seller. And, as far as the sales go, we have had a 30 per cent. increase over last year."

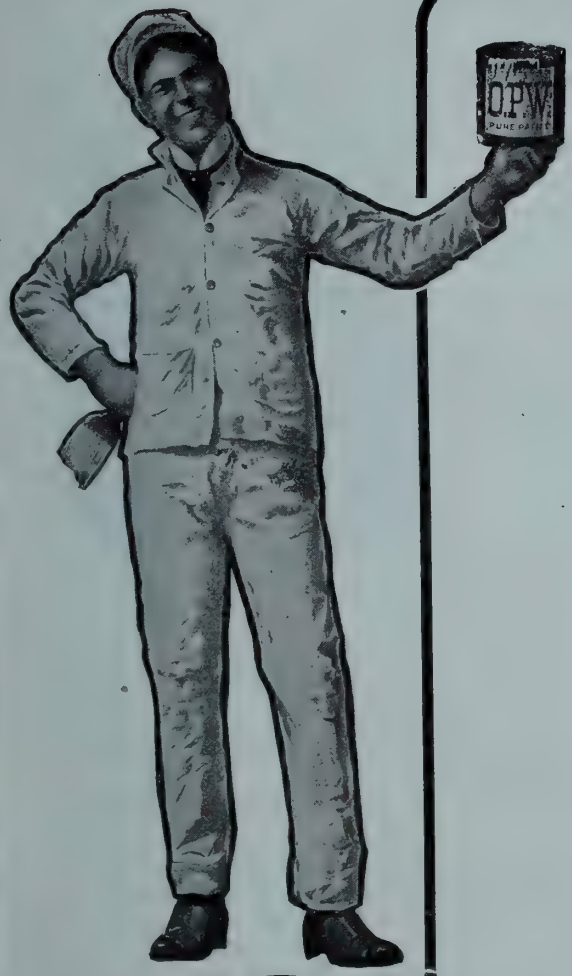
This is one of the best tool departments, as regards location and being compressed into limited space, which can be found. There is the distinct advantage, in the first place, of tool customers having ready access to the tool department, and the arrangements for display as provided for by Mr. Lacasse have embraced many excellent features. For instance, immediately beneath the case in the foreground, provision has been made for glass fronts in the display case, and this enables the proprietor to make a constant change in his tool displays which will draw attention and sell the goods. In addition to this the splendid wall case, shown in the accompanying photograph, carries a variety of tools which cannot fail to impress anyone interested in their use.

Sliding Doors Used

It will be noted that this wall case backing the window has eight sections of glass. These are placed in sliding frames, enabling the salesman to readily procure any desired tools. There is practically no waste of time whatever. Care has been taken to fit these frames with double strength glass, which gives the best possible effect to the goods both in daylight and after artificial light is turned on. The length of this case is approximately twelve feet and immediately beneath these sliding windows a wide ledge provides for the holding of tools which may be temporarily placed there after they have been shown the customer. This is a very wise provision as will be obvious to the average hardware dealer. Immediately beneath this wide ledge is a series of sliding drawers, back of which will be found surplus stock of various kinds. The tinting or finish of all these cases is of bog green and is very pleasing.

In discussing tool sales with Mr. Lacasse he said that a great portion of his turnover is with people who come to the store to buy other products such as stoves and ranges, and of which his firm carries an immense variety. These people argue, he said, that as they carry such a wide array of stoves and heating apparatus, etc., they would be sure to have a wide range of tools, as is the case.

Three Hundred and Forty-Eight Screw Pockets



The display case on the floor of the store already referred to has been topped with a case for carrying screws and bolts. By referring to the accompanying photograph it will be seen that this case for its entire length is given over to an arrangement of flat and round head wood screws. Both brass and bright wood screws are carried in this manner.

The idea, while not entirely new, has been carried out to a very great extent here, there being no less than fifteen feet of space, in length, devoted to this purpose. In all, three hundred and forty-eight pockets are provided for these screws and a unique arrangement given each pocket is a sliding cover to keep out dust. The real feature of this idea is to prevent pilfering, and in a large city like Montreal, where access to big stocks may be readily had, Mr. Lacasse finds that it is not necessary to carry surplus stocks to any extent. These pockets hold a gross of screws or more, each, and it is therefore possible to carry a very wide variety in this

(Continued on page 60)

O.P.W.

It's Quaint About Paint--

Like the old coon trap that "gets comin' an' goin'." If conditions encourage buildin', paint and varnish are demanded in big volume, and if price, labor or other conditions prevent buildin', paint and varnish are in sharp demand for the existin' buildings to make 'em do until the buildin' program is resumed. Fine! That's why she's a real business to be in.

Play it right and you can't go wrong. Join up with a manufacturer who has a reputation for clean business; who meets your ideas on quality and durability and who offers you a line of goods that will afford an adequate return on a sellin' price that you can popularize. All of which brings me to the Ottawa folks and their goods that will help you best to bank the big end of the paint money that's goin' around your town.

. . . .

Weekly Paint Markets

Montreal

MONTREAL, March 10.—Business in the paint trade has taken on a livelier aspect and manufacturers state they are once again in the busy season. Deliveries are now going forward and activity is noted from all producers. The market quotations show more steadiness also, and with the exception of turpentine a firmer undertone seems to prevail. Turpentine is still unsettled, and some dealers are expecting lower prices in the next few weeks. Linseed oil and shellac maintain their prices, putty and white lead remaining at their recent decline. Window glass is still unsettled, with quotations varying to some extent among the different jobbers. Prices for this season's Paris green are now quoted.

Linseed Oil Unchanged

Montreal.

Prices on linseed oil are unchanged this week, and remain at 95 cents for raw and 97½ cents for boiled in one barrel lots. The demand is reported small for this season, very little booking coming to hand. It is hard to determine, as yet, the trend of the market, but until the outside seed makes its appearance on the local market present prices are likely to remain fairly steady. Following are the quotations:

1 to 2 barrels	0 95	0 97½
5 to 10 barrels	0 90	0 92½

Turpentine Price Maintained

Montreal.

Turpentine is held at last week's quotations, with the demand showing a slight improvement over previous weeks. Although present price is at a very low level, the Southern market is anything but promising, and even lower prices may be expected in the near future.

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 00
2 to 4 barrel lots	0 97
Broken lots	1 05

White Lead More Active

Montreal.

A better movement is shown in white lead in oil, and business is gradually improving. However, sales are still below last year's, but buying generally in the paint trade is curtailed. The present condition of the pig lead market may still have a tendency toward lower quotations on white lead in oil, but corroders generally are of the opinion that the bottom has been reached for some little time at least. Prices at the recent decline are: $14 in five ton lots, $14.50 in one ton lots, and $14.85 in less quantities.

Steadier Market on Shellac

Montreal.

The shellac market is much improved over the last two months. The price cutting period seems to be well over and present prices are now remaining steady. The demand is still light, but a certain amount is being forwarded with spring paint requirements. Following are the quotations:

Orange shellac, in barrels, $4.50; in one gal. jugs, $5; white, in barrels, or 5 gal. jugs, $5; in one gal. jugs, $5.50.

Demand for Putty Light

Montreal.

Business is still light on putty and dealers are not yet placing their orders for full spring requirements. Prices remain at declines of two weeks ago and are as follows:

Standard Putty—	5 ton	1 ton	Less ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Paints and Varnishes

Montreal.

Ready mixed paints and varnishes are now moving fairly well. The trade seems settled down to the new prices, and better progress is now being made. Some dealers are still holding off in their buying, but in most cases spring orders are coming in, of a sorting variety, smaller in volume than last year. A very busy time is expected when the spring is more advanced, when all dealers will want their requirements at the last moment, and manufacturers are hoping that an increased activity will be shown from now on, and thus eliminate any cause for complaints of delays or even shortages on some lines when the spring painting really commences. No changes have been made in quotations on any lines.

Window Glass Still Unsettled

Montreal.

There is very little change in the window glass situation, it remaining unsettled and quotations varying to some extent. A slight stiffening on the Belgian market has had no immediate effect here as yet, and it is still felt that an increased demand will be the only remedy for any adjustment. The prevailing price among the jobbers is 50 per cent. off Montreal list, with a little lower quotation for quantity. Montreal glass list is shown on current market pages.

1921 Prices For Paris Green

Montreal.

Prices are now given for this year's Paris green. These new quotations are from 4 to 6 cents per pound lower than the opening prices of last year. Following are the ruling prices on the different sized packages:

½ lb. paper cartons, per lb.	0 52
1 lb. paper cartons, per lb.	0 50
½ lb. tins, per lb.	0 54
1 lb. tins, per lb.	0 52
25 lb. tins, per lb.	0 48
50 and 100 lb. drums, per lb.	0 46
250 lb. kegs, per lb.	0 44½
600 lb. barrels, per lb.	0 44

Terms, 1% 15, or 30 days net.
F.o.b. Montreal, Toronto, Hamilton, London, Ottawa, Quebec, Moncton, St. John's and Halifax. Yarmouth and P.E.I. points ¼c per lb. extra.

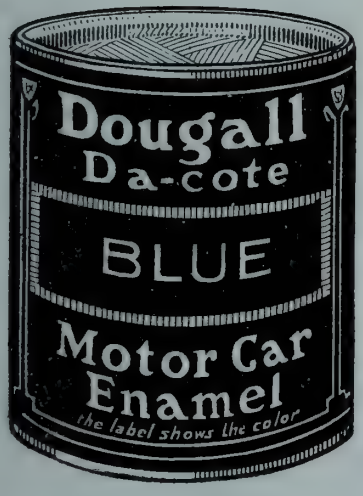
Toronto

TORONTO, March 10.—The chief features of the paint market this week are the new prices for this season on paris green and arsenate of lead which have just been issued. While paris green prices show a decline from last year's quotations those of arsenate of lead are slightly higher. Rosin prices are easier and quotations show a reduction. In other paint products there is no quotable change, and white lead, putty, mixed paints and shellacs are holding at previous quotations. As the painting season—or rather the outdoor painting season, as paints and varnishes should be all the year round sellers—approaches there is an improvement in sales and though it is not as pronounced as many would like to see there is an optimistic feeling that each week now will see a bigger improvement.

Paints Slowly Improve

Toronto.

Week by week a slight improvement is observed in paint sales, and some report a little faster increase in orders during the past week. Stocks in retailers' hands are recognized to be smaller than usual as a general rule, and it is believed that as soon as the spring demand opens up there will be a much bigger volume of business. Many dealers have been sorting up since last season and are apparently waiting until the approach of the spring season before putting in the new stock.



White Lead Steady

Toronto.

White lead sales are gradually showing an improvement, but, as in most other lines, business is below the average at this season. With the beginning of outdoor painting an increased volume of sales is looked for. Prices are holding at recent declines and are to be found on current market pages.

Dougall

For Spring Displays

A creamy, brilliant enamel for home painting of automobiles. Made of high grade varnish and pigments and ground so fine that it flows smoothly and evenly from the brush without any laps or brush marks.

Any car owner can restore newness and beauty to his car by means of

Dougall Da-cote

Made in ten popular colors, from among which it is a simple matter to select almost any combination desired.

You'll be asked for Da-Cote. A good window display will connect you with your rightful share of a growing demand created by the widespread advertising of Da-Cote in magazines and motor publications.

We'd like to send you all particulars regarding the Da-Cote selling proposition. Write us about it to-day.

The Dougall Varnish Co., Limited

MONTREAL

Associated with Murphy Varnish Co., U. S. A.

Da-cote

Slow Movement of Putty

Toronto.

This is not the season of the year that wholesalers look for a great deal of activity in putty, and present sales are naturally small. Present quotations are those made two weeks ago and are the following:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

Shellac Prices Unchanged

Toronto.

Shellac is holding at recent declines and is quoted from $4 for orange and $5 for white. There is little more activity shown in this product and sales are improving.

Glass Situation Unsettled

Toronto.

There is little new development in the window glass situation. There appear to be different opinions regarding the Belgian market conditions, and though some believe that firmer prices may be expected, others state that from present indications there is little to warrant that belief. A little firmer demand is reported in some quarters and some glass jobbers are quoting from a net list. Other quotations are 60 per cent., and 60 and 10 per cent., and there is not much more uniformity in quotations than there has been for the past few weeks.

Chamois Skins Lower

Toronto.

Reductions have been made recently in the price of chamois skins and these are now being quoted lower.

Rosin Prices Lower

Toronto.

The market is easier in rosin and lower quotations are being made. Prices now are $6 per 100 pounds in casks, or 9 cents per pound in smaller quantities.

Turpentine Prices Holding

Toronto.

As forecast in last week's issue of Hardware and Metal the southern market in turpentine has firmed up although there is not much increase in the demand there. There is a movement among the leading producers to limit the output this season but whether it will be successful remains to be seen. An increase in inquiries is reported in wholesale circles here though sales have not begun to show much change as yet. Quotations are the following:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 00
2 to 4 barrel lots	0 97
5 gal. lots	1 05

Linseed Oil Steadier

Toronto.

The linseed oil market is a little steadier and whether lower prices may be expected is uncertain. Taking into consideration the slight changes in oil during the past few weeks with the fluctuations in the flax seed market many are of the opinion that prices will not vary much for a while. A year ago to-day the quotations on raw oil were $2.75 and turpentine $3.35 a gallon. The present day quotations of 95 cents on both products is quite a difference. Following are present quotations:

	Raw.	Boiled.
1 to 2 bbls, per gal.	0 95	0 98
3 to 5 bbls, per gal.	0 94	0 97
6 to 9 bbls, per gal.	0 92	0 95

Less barrels add 15 cts. gal.

Paris Green Prices for 1921

Toronto.

The new season's prices have been issued for Paris green, and are from 5 per cent. to 10 per cent., according to quantity below the prices of last spring. The new quotations are as follows:

PARIS GREEN (100-lb. lots.)	Per lb.
In barrels, about 60 0lbs.	0 44
In kegs, about 250 lbs.	0 44½
In 50 lb. and 100 lb. drums	0 46
In 25 lb. drums	0 48
In 1-lb. packets	0 50
In ½-lb. packets	0 52
In 1 lb. tins	0 52
In ½ lb. tins	0 54

F.o.b. Montreal, Quebec, Moncton, St. John, and Halifax, Toronto, Hamilton, London and Ottawa. Terms one month net or 1% in 15 days.

PITTSBURGH MARKET

(Continued from page 55)

thereby, and probably they are impressed by the Steel Corporation's calm refusal to be governed. Possibly they feel that if steel prices are once gotten down they cannot be gotten up again, as used to be the case. There will necessarily be an improvement in demand in the next few weeks, and later there will be much further improvement, even to a point of there being really a large demand, according to past standards, but that is a different thing from a demand equal to the present capacity, which is 50 per cent. greater than in 1914. In the past steel prices never advanced unless the mills were operating at 85 per cent. or more.

Pig Iron

Foundry pig iron has been quoted and sold at $26.50, valley, or 50c decline in the week. Bessemer remains nominally quotable at $27, valley, and basic at $25, valley, but one sale of a few hundred tons of basic has just been made at $23, under somewhat mysterious circumstances. If it turns out that there is more iron to be had in the same quarter the quotable market will be $23. Only four merchant furnaces in the Mahoning and Shenango Valleys are operating and some of them are thinking of going out, as they are piling up more iron than they are shipping.

The Hamilton Products, Ltd., has been incorporated with head office at Hamilton, Canada, and capital stock of $1,500,000, to carry on the business of iron masters, iron makers, iron and steel converters, smelters, engineers, etc.

Displaying Thermometers

In displaying thermometers in a store window it is a good plan to have them in the foreground. This is because thermometers will make an excellent center for any window, and will help to attract attention more quickly.

One dealer who uses his windows frequently to display a variety of lines fixes the background in plain wallpaper that can be changed once a week at small expense. In his last window he had alarm clocks and thermos bottles in the background; safety razors, soaps, chains, and a miscellaneous assortment in front of this, and in the center foreground a small display of thermometers. The striking feature of the window was that all the goods shown were price marked.

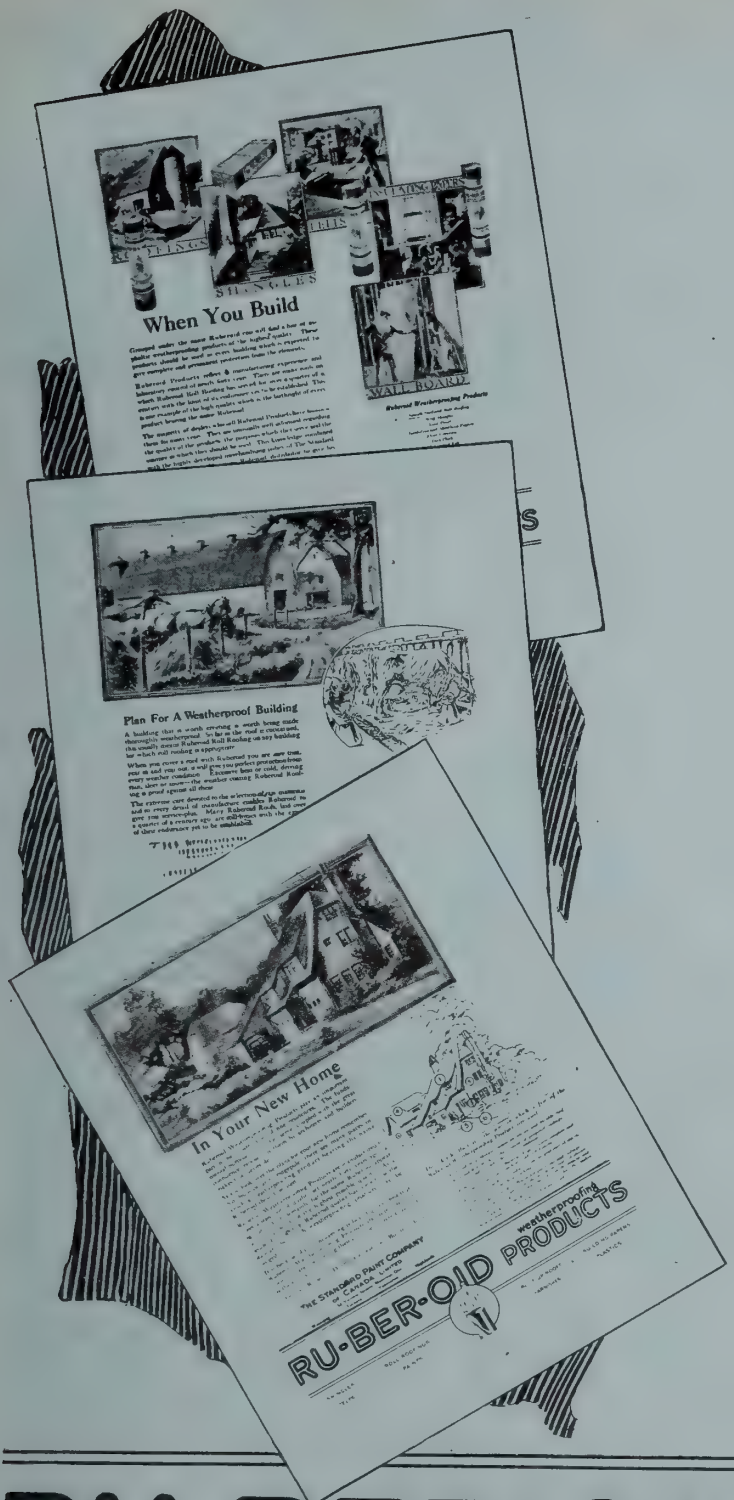
Monday and Tuesday, a dealer in an eastern town believes, are the two days of the week when window displays should not be changed. "Window shopping," he declares, is a popular Saturday evening recreation in his town. The brightly illuminated display windows are as great an attraction as the theaters, if not more so. Those who take this form of recreation do not, as a rule, stop in at the moment to buy, but if they see anything that attracts them they usually decide to come again early next week to confirm their first impressions. For this reason, if they come back Monday and find an entirely new display, their half-formed desire will have no chance to ripen into decision. On any other day in the week, this dealer believes, window displays may be changed, but not on Monday or Tuesday.

POINTERS ON TOOL SELLING

(Continued from page 60)

way. s a matter of fact, screws are carried from ⅝ by 6 up to 3 by 20, and a variety of round head and flat head brass and bright wood screws is carried. Provision has also been made for stocking flat and round head stove bolts of various sizes. The pockets are neatly stamped with size, a steel figure being used. Over all a good, tough varnish is applied.

Mr. Lacasse is making provision for special lighting of these cases during dark hours and at night, and altogether he expects to have a very convenient, well-located and successful tool department.



HARDWARE EXPORTS & IMPORTS

(Continued from page 36)

electrical apparatus, paints. It is significant that while Canada's imports of passenger automobiles are decreasing that exports are showing an increase. The increase in exports of paints and varnishes is also such as to cause comment, these having increased from $906,079 in 1919 period to 1,492,828 in 1920 period.

It is noted that the increase in hardware and cutlery exports for that period practically equals the increase in imports of those lines for the same period.

Ruberoid Advertising Brings Business

The first big guns of the 1921 Ruberoid advertising campaign have been fired, covering Canada more thoroughly than ever before. Advertisements both in color and black and white are appearing in the leading magazines, newspapers and farm journals throughout the Dominion. They reach over 3,000,000 readers.

Reproduced here are a few examples of this advertising. It is permeated with an irresistible appeal of *QUALITY* — convincing the reader that Ruberoid Weatherproofing Products will give him in full measure everything that a material of the highest quality should give. It shows him that these products stand on their past records and on the unshaken policy of the Standard Paint Company of Canada, Ltd., to produce under the name Ruberoid the best weatherproofing materials that can be made, regardless of cost and low price competition.

Think what this advertising means to every Ruberoid Distributor in Canada—increased sales, not only of Ruberoid Weatherproofing Products, but in every department of his business.

Write to-day for the Ruberoid Merchandising Plan which protects the dealer by eliminating competition.

Where Does the Publisher Get Off?

His Rights Are Seldom Respected in the Matter of Contracts—Expected to Reduce His Rates and Give Better Service at the Same Time—Time That the Space-Buyer Played Fair With Press

LAST May there was a director's meeting called by one of the leading farm paper publishers. The record of business booked was submitted. It showed a splendid volume of advertising lined up for 1921, in fact, it was one hundred and two per cent. better than ever before.

The president addressed the meeting as follows:

"Boys, now that they are coming our way, we should do the things that are necessary to put this paper so thoroughly 'over the top,' that its supremacy can never be disputed.

"Let us invest this splendid income in making improvements that will give the advertiser the best proposition there is for the money in our field. Let us make it so good that there never can be any question about his coming back."

Accordingly, plans were perfected for a 20 per cent. increase in circulation. When this circulation was assured it was decided a new press would be required and it was ordered. To give the additional room and other proper facilities for good press work the floor space had to be greatly increased, hence the purchase of a building.

It also seemed, not only advisable, but just the right thing, to make a contract for a better grade of paper, and the extra amount necessary for this 20 per cent. increase added about $85,000 to the paper bill.

The next step was to increase the editorial service by the employing of two college professors. These men were engaged under contract to fill a larger paper.

Finally, a Research and Dealer Help Department was installed at a very considerable expense.

These directors planned to do the things that are most wanted by the advertiser, the advertising agent, the representative and even the reader of the paper, and those plans were made as a result of business actually booked.

All this in the month of May. Presto! Change! The tide turned. "From them which they have." Instead of getting the expected and usual amount of fall orders, added to the surplus on hand, in comes a string of cancellations.

Biff! Bang! Smash! Who cares for the publisher? "Truly we gave him a contract, but what of that? Cancel it—we don't think we can use the space to advantage." Not one in a hundred even grant the courtesy of an explanation. It is just a case of cold-blooded indifference to the publishers' rights or the value of an advertising agent's order.

What can the publisher do? He is under contract for his extra circulation. He is under contract for his extra housing facilities—his extra printing equipment and his extra paper. He cannot discharge his editorial force, neither can he discontinue his Research and Service Department. These improvements, made very largely in the interest of a better product for the advertiser, must be carried on.

January first appears on the horizon. Mr. Manufacturer and Mr. Agent take stock of the 1921 prospects and then they jointly decide that Mr. Publisher must reduce his rates to a pre-war basis or get no business. Yes, the decree has gone forth from a very considerable number, and it goes forth without the slightest assurance of what the support would be were a reduction made. Simply a question of "We insist upon lower rates."

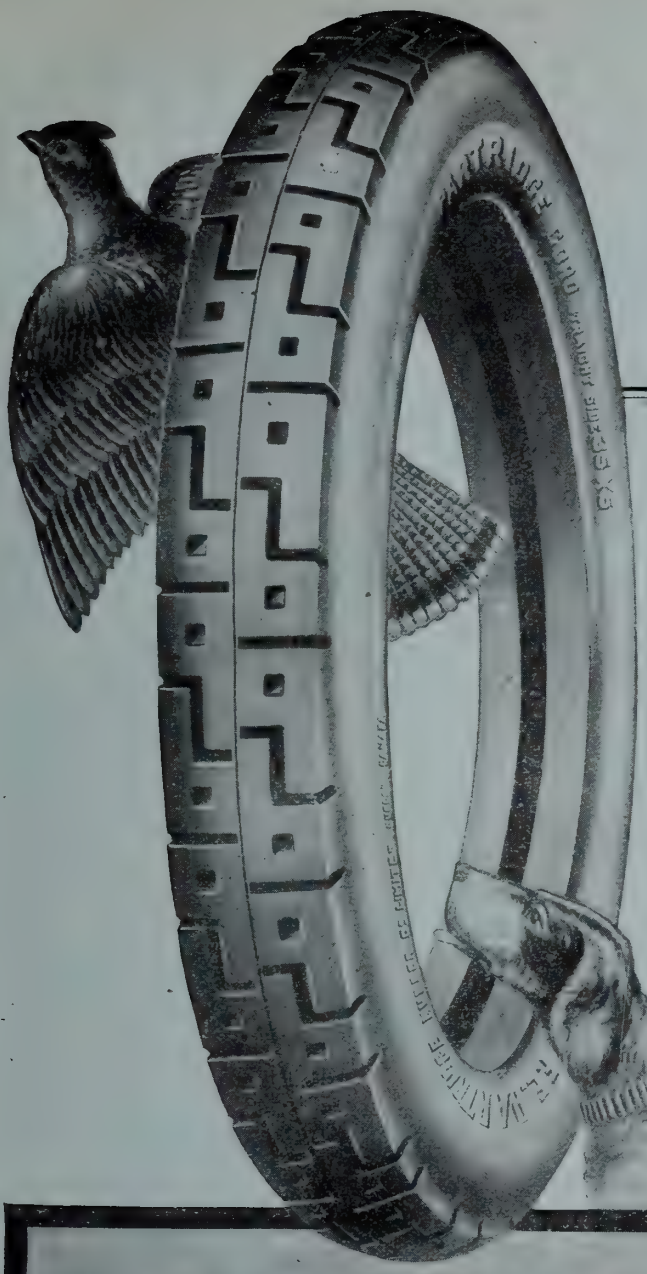
There is no recognition of an improved service on the part of the publisher. There is no recognition of the fact that the farm paper publisher was the last of all commercial industries to raise prices, and then never raised them in proportion to the increase in cost of production.

There is no recognition of the fact that the publisher cannot reduce his overhead as can be done in other lines of business. There is no recognition of the fact that the publisher is probably the most decided loser by this epidemic of "cancellitis." Still he must go on—his issue must come out—he is under contract to his readers to supply a specific article, of a standard quality, and there can be no let-up, no matter what the advertising patronage may be.

There is no consideration of the fact that for years and years the press of this country has struggled and struggled through all kinds of hardships, until it put the very foundation under commercial America.

Let the space buyer play fair—be reasonable with the publisher. If you want to suck the blood out of business, starve the press. If you want to put out the fires under the boiler of your own industry, stop your advertising. If you want to cripple the express, the postal, the freight and the railroad service of the United States, stop your advertising. If you want to dull the intellect, cease to educate the buying population of the United States and spread pessimism, then withhold your patronage from the press.

On the other hand, if you want to see the glorious sunshine of business prosperity throughout the length and breadth of this land, jump to the front with the determination to do your part in its promotion. The surest way you can do that is by giving the publisher what is necessary in advertising patronage, and at a profitable rate, thus enabling him to put forth an optimistic, confidence-inspiring and trade-building enthusiasm that will compel business development.—Reprint from Printers' Ink, issue of January 27, 1921.



New Branch of Manufacturers' Association at Three Rivers, Que.

THREE RIVERS, March 1.—Three Rivers took another step forward in importance as a manufacturing centre recently, when a branch of the Canadian Manufacturers' Association was organized in this city.

R. W. Gould, secretary of the Quebec division, and L. D. Loranger, assistant secretary, were present at the meeting which was held at the Chateau de Blois. After luncheon the members of the new organization, which included representatives of a number of Three Rivers manufacturing concerns, discussed the activities of the new association led by the chairman, Vivian Burrill. It was decided that following the plan of the Canadian Manufacturers' Association of Sherbrooke, Que., a meeting should be held every other month.

The first business of the society was to outline a plan of activities for their association. This included equalization of freight rates, the income tax law, the workmen's compensation act, tax recommendations and a "Made-in-Canada" campaign.

With regard to the equalization of freight rates, it was pointed out that it is believed to be the intention of the Federal Government to appoint a commission to make an investigation throughout the Dominion after the plan followed by the Tariff Commission. It was felt that if a meeting of the association was held previous to the visit of the above commission in Three Rivers a considerable amount of useful data could be compiled by the different industries represented in the district.

Cord or Fabric.

Just a Moment!

When you sell your customers Partridge Tires, both profit; you obtain dollar and cents return; they obtain tires which prove their economy by long outliving ordinary tires, and giving the utmost in satisfactory Tire Service.

From their inception, Partridge Tires have made good. These rugged beauties soon proved to motorists that they had the stamina, resilient strength and sinewy toughness to make them durable and dependable under all road conditions.

Partridge Tires are undoubtedly the best buy on the market to-day. You, as a dealer, know this. Then why not convince your customers of the fact?

In two and a half years the sales of Partridge Tires have increased 1,700 per cent. and the percentage is still going higher.

Some dealers are making big profits on our enormous output. Are you one of them? If not, why not get busy?

Harvest King

Let the Engine Turn the Grindstone

CLEVELAND TRADE MARK GRINDSTONES

Sell power grindstones and let the engine do the work. It only needs the starting of the engine and in a short time all tools are ready for work.

Don't sell cheap grindstones—talk quality and grit—mounted in a well-built frame so it will do the work properly and stand up for maximum instead of minimum amount of work.

Our HARVEST KING POWER GRINDSTONE gives extra good service.

THE CLEVELAND STONE CO. - CLEVELAND, OHIO

Welded and Forged — A Solid Coupling. No Wrench Slips on the Perfect Hex.

Made of Steel—same as the rod.
Hot Forged—perfect hex.
Welded—makes solid job.
Strongest—over three times as strong as a malleable.
Packing—twenty-five in a box to go on your shelf.
Novel—the above advantages make a novelty of a very staple article. The DEMON GRIP cannot help attracting attention.

Demon Grip
Welded Steel
Pump Rod Couplings

The new "Demon Grip" steel Pump Rod Coupling offers the rural hardwareman striking opportunities to increase his business.

The superiority of the "Demon Grip" makes it easy to sell, and the service it gives his customers will establish confidence in his store and goods that will show itself in many repeat sales. It's the best buy, therefore a good seller.

Ask your jobber.

Moulding, Flooring, Slating, Box, Fence, Barrel Nails, 25c per 100 lbs. over common nail prices. Finishing Nails, 50c per 100 lbs. advance over common nail price.

Miscellaneous wire nails, 65% off miscellaneous list, f.o.b. Toronto, Montreal, Hamilton and London

NAILS, CUT

Montreal, $5.75; London, $6.40 base; Toronto, $6.20.

Roofing Nails — American, large head, keg, $11; 25-lb. boxes, per F.o.b. Montreal, Toronto, Hamilton, 100 lbs., $12.

Barrett Roofings, Cements Industrial Paints etc.

THE name "Barrett" on any product is the identifying mark of a quality article. Barrett products are fast sellers because they insure customer satisfaction. The products described below are the result of long years of manufacturing experience and each of them is the best product on the market for its particular use.

Our advertising in the leading publications and newspapers is telling your trade that the Barrett trademark is always a sure pledge of dependability.

Everlastic Liquid Roofing Cement

Unequalled for resurfacing worn-out prepared and "rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1 pint tins to 40 gallon barrels.

Everlastic "Rubber" Roofing

This is a popular priced roll roofing of unusually high quality. It is made of the best grade of waterproofing materials and will give your customers the same sure satisfaction it is giving thousands of users in all parts of the Dominion.

There is a big market in every community for this roofing, and during the past few years its sales have increased enormously.

Everlastic "Rubber" Roofing comes in 1-ply (light weight), 2-ply (medium weight), and 3-ply (heavy weight), in rolls containing 108 square feet. Nails and cement are packed with each roll.

A typical farm building showing effect secured after covering with Everlastic "Rubber" Roofing.

WINNIPEG VANCOUVER HALIFAX, N.S.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

If interested tear out this page and place with letters to be answered.

Write, Phone or Wire for Prices.

HOBBS Manufacturing Company, Limited

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Suppose you write us to-day about Silkstone and other lines that will benefit your business? We know you want to satisfy customers and build permanent, lasting trade; Silkstone is one of a line that does that to perfection.

You can sell it because Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. It is economical, durable and satisfies good taste.

Let us show you that it is profitable to sell. If a thing sells well and pays the merchant well, you certainly want it working for you in your store, don't you?

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Buckeye Incubator and Fittings

Confidence

Like all the lines handled by Ashdown's they're good sellers. For fifty-one years Ashdown's has had the confidence of manufacturers of the best lines.

Let us put a Buckeye in your store to demonstrate and boost your trade.

Good Displays Mean Easy Sales

The hardware dealer in rural districts will find much scope for many new sales by looking up farmers, poultry farmers, etc., and supplying them with new machines or fittings.

Display Buckeye incubators and fittings in your window and where your customers will see them.

The superior merits of these machines will be instantly recognized and sales easily closed.

Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like MacDonald College, Ontario Agricultural College and by many Canadian poultry farms.

O-Rib-O
Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

Thomas Lewis Arnett
SOURIS, MAN.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything, forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500-lb. containers.

GEO. W. REED & COMPANY, LIMITED
37 St. Antoine St., Montreal.

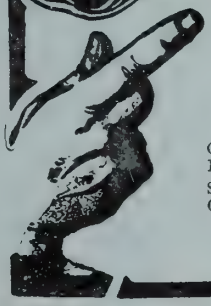
TORONTO HAMILTON MONTREAL WINNIPEG VANCOUVER

Lit With a Scratch of a Match!

Sell on sight. These Lamps and Lanterns are guaranteed to generate and light with a match. Three pints common gasoline (one filling) give 15 hours' continuous radiant pure white light, equal to 20 ordinary coal-oil lamps or lanterns.



"NULITE" Lamps and Lanterns

are minus wick, chimney, smoke, smell, grease, trouble or danger. Every farmer, ranchman, dairyman, poultryman, truck-gardener and hunter in your community needs either or both. Put both in stock—and see how fast they sell.

For prices, write your jobber or us.

SAUCEPAN HANDLE TEST

The "Wellworth" saucepan handle is truly a famous contrivance. Its strength is as important as its sanitariness and its beauty, convenience and design. You can yourself try this test:

Take our seamless No. 91 saucepan; fill it with water, and place on top of it our No. 92 saucepan, also filled with water. Then on top of that place our No. 93 saucepan, also filled with water. After balancing these carefully, so they will not fall sideways too readily, lift the entire load by the handle on the lowest of the three saucepans. The weight is fifteen pounds.

This wonderful handle could lift considerably more than that, but it is not possible, without a great deal of practice, to lift a higher load without a spill. You can also draw your hand quickly over the handle without the danger of receiving a cut by sharp edges. It is the strongest handle for its weight in Canada, and cannot be had on any other cooking utensil.

Wentworth Mfg. Co., Hamilton, Canada

THE GRAHAM NAIL WORKS

Operated by the CANADA METAL CO., Ltd.

TORONTO

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

The 33rd Annual Spring Buying and Directory Number of Hardware and Metal will be issued on March 19. It will be the best number ever produced in Canada. Watch for it.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

EXPERIENCED SALESMEN IN ALL PARTS of Canada to sell staple lines, commission basis. Exclusive territory. A good proposition to business getters. State what lines you now handle. Box 242, Hardware and Metal.

WANTED—EXPERIENCED RETAIL HARDware salesman. Give experience, references and salary expected in handwritng. H. W. Bickle Co., Niagara Falls.

WANTED SALESMAN WHO ABSOLUTELY knows how to sell paint. Must have at least 3 years' exclusive retail paint experience. A big thing for the right man. Mills Hardware Co., Hamilton.

WANTED—A RETAIL HARDWARE SALESman who can write show cards and dress show windows exclusively, but must prove to us that he is almost semi-professional. Big opportunity for the right man. Mills Hardware Co., Hamilton.

WANTED — HARDWARE CLERK, 4 OR 5 years' experience. Must be good stock keeper and salesman. State experience and salary to Box 59, Hardware and Metal.

SITUATIONS WANTED

HARDWARE MAN, THOROUGHLY EXPERIenced in all branches of the trade, wishes to make a change. Has held positions as manager and buyer, and is fully competent to take full charge. Good references. Full particulars gladly furnished. Write Box 36, Hardware and Metal.

EXPERIENCED HARDWARE MAN IS DESIRous of locating position in Western Ontario, thoroughly conversant with all lines for over nine years and capable of taking charge of store, doing advertising and window decorating. Best of references. Services available March 7. Box 93, Hardware and Metal.

STORE MANAGER — TWELVE YEARS' EXperience with one firm, desires change. First-class references. Box 33, Hardware and Metal.

EXPERIENCED HARDWARE SALESMAN, with thorough business training, desires a position either inside or on the road. Apply Box 66, Hardware and Metal.

FIRST-CLASS HARDWARE SALESMAN, single, seven years' retail experience, desires change of position by April 1. Steady and not afraid of work. State particulars and salary. Box 84, Hardware and Metal.

EXPERIENCED HARDWARE SALESMAN seeks position. Retail and wholesale experience. Box 31, Hardware and Metal.

WANTED — POSITION AS SALESMAN, 20 years old, four years' hardware experience. Open for engagement. Box 10, Hardware and Metal.

ENERGETIC SALESMAN WITH TEN YEARS' experience, married, desires position at once. Please state salary and particulars. Box 149, Hardware and Metal.

FIRST-CLASS HARDWARE SALESMAN, 23 years old, single, nine years' thorough experience, seeks position with progressive Western or Ontario firm. Box 44, Hardware and Metal.

Hardware and Metal

Vol. XXXIII. No. 12. THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE: TORONTO, CANADA MARCH 19th, 1921

In Thousands of Well-Ordered Homes

The familiar O-Cedar bottle is regarded as an essential to the perfect expression of the housekeeper's instinct for cleanliness and polished surfaces.

Women who are really particular about the polish that is to beautify their furniture and the Mop that is to polish their floors, have stopped looking for anything cheaper than O-Cedar. They have found that **true economy** is best served by using the polish that unfailingly "cleans as it polishes" and that **cannot do injury** to any wood surface.

Dealers who cater to these particular women are naturally "playing up" the O-Cedar products in conformity with this marked preference on the part of their customers.

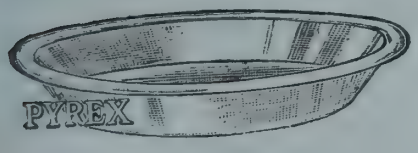
CHANNELL LIMITED, TORONTO

O-Cedar Polish

'RICE LEWIS' NEWS

We carry a complete showing of Pyrex Ovenware in plain and cut with or without silver mountings.

Community Plate



Our stock consists of the "Adam," "Patrician" and "Sheraton" patterns in flatware.

Rogers 1847

Four patterns, "Old Colony," "Cromwell," Continental" and "Tipped," in a full range of knives, forks and spoons.

Cutlery

We carry a fine showing of cutlery of various grades and styles, ranging from low-priced pocket knives to the most elaborate carving sets.

---everyday household lines

The day of the "tacks-and-nails" hardware store is fast dying out and giving place to the household store, the family store.

At one time, and not so long ago, it was not uncommon to hear the remark, "only a hardware store—tacks and nails, hammers and saws and so on!" But to-day the hardware store is the people's store — the household store where mother, father, sister or brother can go and be well served with hundreds of lines of everyday use around the home, for work or play.

We pride ourselves in the completeness of our stocks in everyday household lines. *If you have a need, ask the "Rice Lewis" Man or write direct.*

UNIVERSAL

"The Trade Mark Known In Every Home"

ALUMINUM WARE

Big Sales Grow Where Little Ones Sprout

WATCH a man peel an apple and you'll want a bite. Show any discerning woman Universal Aluminum Ware and you'll make instant appeal to her better judgment. She'll want it. She'll buy it. There are a dozen reasons why she will. And the first twelve are—QUALITY. Big sales grow where little ones sprout because Universal Aluminum Ware is not thin as tin and easily worn out.

Extra thickness without added weight. Curved surfaces,—rounded corners,—tightly-rolled, non-bending rims,—cool bails, doubly-braced handles—all the features that make for practical service and lasting quality are generously supplied.

Selling "Universal" isn't an adventure in darkness along disguised pitfalls. It is clean, sure, sound and profitable business.

THE "NEW IDEA" PIPELESS FURNACE

Presents a golden opportunity for live dealers to make money

We are going to appoint one exclusive dealer in each town and city to handle the "New Idea" Pipeless Furnace and we are going to back those dealers up with advertising in newspapers and farm papers that will create a big consumer demand. Now is the time for you to investigate this wonderful pipeless heating plant.

The "New Idea" Pipeless Furnace is easy to instal—prevents tearing up floors and walls—uses little fuel and will last a life time.

Descriptive pamphlet sent upon request. Write for it to-day—it means real money for you.

Seventy-five years successful manufacturing

The Large Modern Plant of the C. S. G. Co.

1921 Holds Great

The trade press, the optimism expressed at various conventions throughout the Dominion, the speeches of noted economists, and many other trustworthy indications, forecast a normal, stable condition of good business for the hardware market in 1921. Not only this, but convincing facts have been put forward to show that it is a year which will handsomely reward the effort invested. Commercial men may be expected to reap a profitable harvest pretty much in proportion to the way they sow. It is, therefore, a time for planning ahead, for selecting the stocks of established goods that are readily accepted and sell with the most economical use of your time. C. S. G. products have already proved themselves in this regard. In handling them you have a tried and trusted support.

THE HATCH GARAGE DOOR OUTFIT

The Best Known and Most Practical of all Garage Equipment

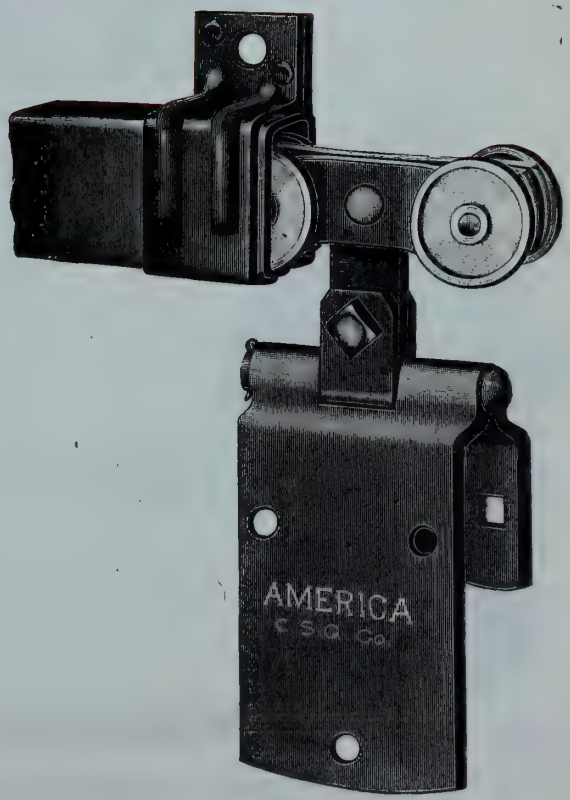
If interested tear out this page and place with letters to be answered.

The Universal Garage Door Set

Handsome, useful sets that add to the appearance of any garage and give service in use that delights customers and assures you their continued trade. Packed to reduce selling cost by saving selling time in the handling.

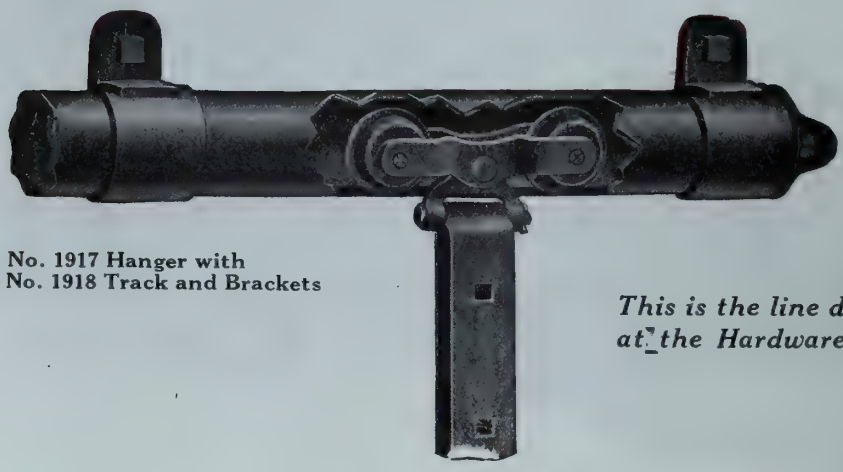
3—Pair 8-inch Extra Heavy Tee Hinges.
1—No. 1056 x 6-inch Wrought Steel Chain Bolt.
1—No. 1056 x 6-inch Wrought Steel Foot Bolt.
1—No. 1240 Wrought Steel Door Latch.

This handsome, easily sold set weighs 10 lbs., and is packed 6 sets to a case. Ask for prices.



Promise for Hardware

The merchant who stocks, displays and sells the dependable, salable products of the Canada Steel Goods Company, Limited, will be sowing good seed in fertile ground. Take Garage Door Sets, for instance: Prominent men in the motor car industry are showing that, although the public believed that the market was overstocked with motor cars, there is actually on hand only a supply about equal to one month's production. As to Hangers and Builders' Hardware: City architects report an increase in the issue of building permits, and in the larger representative Canadian cities the building contemplated exceeds previous years.



1921 is going to be a good year for hardware—suppose you write us for prices and information about your needs.

Company, Limited

No. 1917 Hanger with
No. 1918 Track and Brackets

This is the line demonstrated at the Hardware Convention

Round and Square

Are you displaying your Slater Hangers? The need for hangers is going to be strongly felt as the supply of building gains on the demand. Already there are very favorable indications in the large total money-value for building permits issued.

This exceptionally fine line of Slater Hangers, of which a few are shown here, has merits and selling points that definitely increase sales for hardware merchants. Be sure you have them well displayed. They draw favorable attention and bring about many profitable sales for you.

No. 1918 Flush Hanger with
No. 1918 Track and Brackets

Trolley Hangers

This remarkably efficient type of track is the only self-cleaning track on the market. It will not hold dust or water. The trolley is easy-running and never impeded by snow or ice.

The No. 1917 Hangers are packed ½ or 1 dozen pairs in wooden case. 1918 Track is supplied in 3 ft. lengths only. Packed in 48 and 60-ft. crates.

The Square Trolley Hangers operate easily as shown in the illustrations. Both these hangers are for use in the 1915 Track. This track is square in section, yet it affords the famous special feature—the Round Running Bed. These reliable hangers have high-grade steel, roller bearings and pressed steel wheels. Ask for catalogue.

You Can Satisfy the "Show Me" Woman

About every third woman is the "show me" type! She must be shown *why* every time.

She is a hard woman to satisfy. But once satisfied, she'll stand by her decision through thick and thin. If she declares an article she has bought is all right, she'll preach to everybody within earshot that there is no better article on the market, here or anywhere else!

You can satisfy the "show me" women. You can turn her into a business-getter for your store. Get her interested in SMP household sheet metal ware.

SMP wares will please and satisfy her. She'll find in them the quality she insists upon. The way they are made—their pleasing appearance—and the way they stand up under constant service will satisfy her completely.

SMP *Pearl Ware:* The ware of genuine merit. Pearl gray inside and out. Universally popular throughout Canada. Wears exceedingly well and sells at a price and speed that means good progress and quick turnover.

SMP *Diamond Ware:* "Particular" housewives always choose Diamond Ware. It looks so smart in the kitchen. Alice blue and white outside—snowy white inside. All covers the same, except as shown in catalogue. Bail handles are fitted with varnished hardwood grips. A quick seller and makes a fine window display.

SMP *White Ware:* Snowy-white inside and out. Light blue edge on rims. All bails have black enameled hardwood grips. This beautiful ware has the finish of good crockery without the breakage.

SMP *Hot Galvanized Ware:* Every article in the line made strong enough to easily stand up under the hardest wear and tear. The rust-proof, leak-proof ware that is galvanized *after* the article is made, not before. A most complete line that is creating bigger trade for dealers all over the Dominion.

Beacon Lanterns: The lanterns that are guaranteed not to flicker or go out in any wind. The standard of excellence in Canadian lanterns. The lantern that was designed to fit strenuous Canadian weather. A splendid line that every dealer in Canada should stock.

SMP *Hot Blast Stoves and Heaters:* Hot Blast Stoves give a quick hot flame, are absolutely safe and can be instantly extinguished. Thousands sold every year. Sales increasing very fast.

Hot Blast Oil Heaters are recognized as the simplest yet most efficient heaters made. Blue enamel tops and chimneys, black Japanned founts, nickel-plated Alaska handles make it a smart looking heater. A great seller on which great numbers of dealers are making fine profits.

Other SMP lines include *Stamped Ware, Aluminum Ware, Dairy Pails, etc.; Sheet Iron and Steel Ware, Japanned Ware, Tinners' Trimmings, Milk Can Trimmings, Milk Cans, Pieced Tinware, Stove Pipes, and Elbows, Coal Hods and Stove Boards, Copper and Nickel-Plated Ware, Oilers and Embossed Ware, Eave Trough and Metals.*

Shipments Made Promptly.

Manufacturers of: "Brantford Sectional Buildings," comprising—Stores, Residences, Church and Mission Buildings, Schools, Workmen's Homes, Summer Cottages, Bank Buildings, Fresh Air Cottages, Garages, Knoll Washers, Wheel Barrows, Toys and Wooden Specialties, etc.

Closed

More than two hundred thousand (200,000) Knoll Washers have been sold. There are Knoll users in every corner of the globe.

Labor Saving

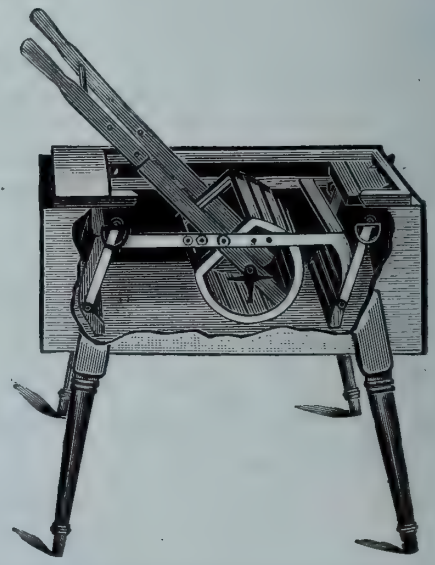
Bread Board

The wide groove around the edge catches all the crumbs. This alone makes it the best board for cutting bread on.

It is turned from a single piece of one-inch, nice, clear maple, birch or basswood, and will not split or break. Diameter, 10¾ inches. Weight, 1½ lbs.

Elevating Clothes Bar

Necessary in every kitchen. It occupies no floor space and when not in use drops down out of the way. The bars slide up and down on the wall rod so that they can be elevated to the desired distance. It saves reaching up to hand the clothes as the bars can be filled when extended open in lower position, and then can be pushed up out of the way. Strength is a predominating feature.



Knoll Washer

There are no dissatisfied Knoll users. Knoll Washers sell on their own merit as a service built machine. Combines all of the principles of the best power machines on the market with only a fraction of the cost.

Delighted users recommend them to their friends because they wash faster, better and easier than any other machine, with absolutely no wear or tear on the clothes and without injury to the finest fabrics. A paying line for the hardware dealer.

Schultz Brothers

BRANTFORD

If interested tear out this page and place with letters to be answered.

Devices for the Home

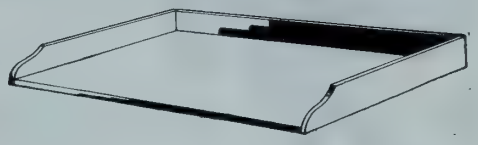
The Schultz line of Novelties has been on the market for many years and has **sold in enormous quantities by reason of merit and worth.**

We receive many unsolicited testimonials from all parts of the Dominion, speaking of the excellent quality of these goods.

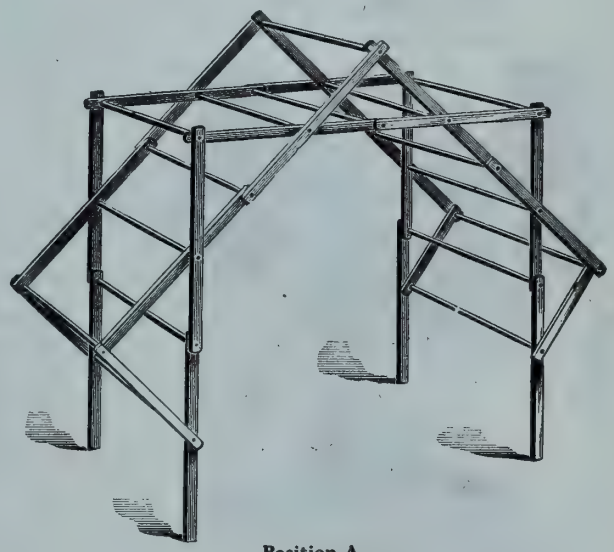
Becker's Ironing Board

This is, without doubt, the most convenient and solid Ironing Board made. Scientifically constructed with due consideration for the Laws of Mechanics and the proper placing of loads, fulcrums and levers. It is appreciated by the thousands of housewives who already have one and find their ironing twice as easy because the board is so easy to handle.

Folding Clothes Bar

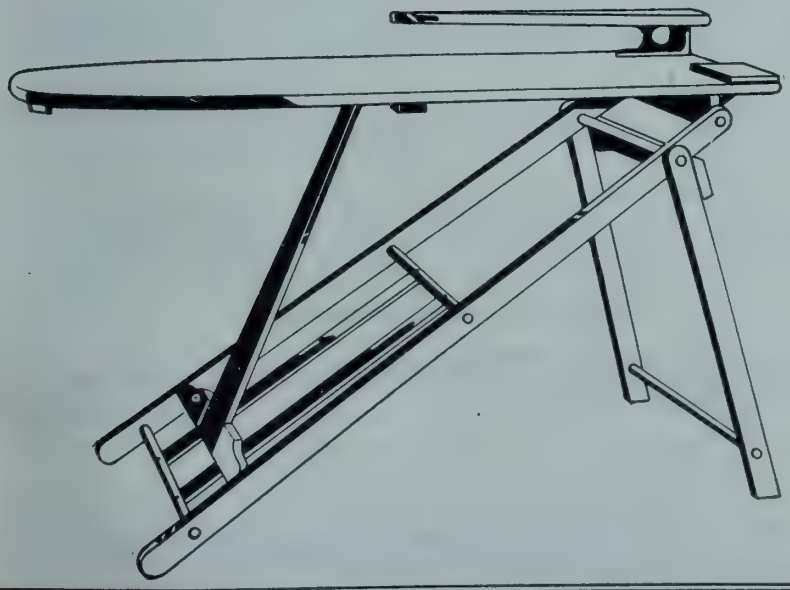


This is the handiest contrivance for drying clothes ever invented. Using but little space, it affords over 40 feet of line room. Is also adjustable to various positions and will stand in position A. Size closed, 28¼ x 21 x 8½ inches. Weight 12 pounds.



Pastry Board

Every good housewife will appreciate this handy board for baking days. It saves time and keeps the kitchen neat. These boards are made of clear ½-inch Basswood or Whitewood, which woods are odorless.



Inside size of board, 27 in. x 18 in.
Weight, 5 lbs. Height of sides, 2½ in.
Shipped one-half dozen in a crate.
Weight crated, 33 lbs.

Perfection Grinder No. 31

Belt Grinder No. 80

W-X Shock Absorber

Open.

Luggage Carrier

Closed.

Perfection Grinders

Perfection Grinder Series 19 to 27 comprises a line of staple sellers. They are made of first-class material, with accurately cut gears, nicely finished, and in every respect an all 'round household and tool grinding machine.

Perfection Grinder No. 31 is a worm gear, ball bearing Sickle and Tool Grinder, made especially for grinding sickle knives. It is fitted with holding attachments for the sickle bar. It is attached to a bench or mower wheel. The sickle wheel is 4½ inches in diameter at the largest part. Tool wheel 5 x 1. It is dustless and provided with convenient oil cups.

Perfection Belt Drive Grinder No. 80 is designed for small machine shops, garages, and farmers having power, either gasoline or electric. It is fitted with two 6 x 1¼ x 1-inch wheels, one fine and one coarse (other sizes up to 7 inches can be used). Frame is 7 inches high. Arbor 13 inches long. Pulley 3 x 2 inches, operated by belt, either direct from gasoline engine or line shaft. Has babbitted bearings.

Automotive Devices

Star W-X Shock Absorber for Ford Cars is simple and easy to attach without extra tools. Installed by merely removing shackles and placing the W-X in its place.

Gives a greater flexibility of action from normal to full load because of changing fulcrum of levers. This, together with two high-grade compression springs at each corner of the car, insures easy riding and prevents breakage.

Prices within reach of every Ford owner, and the device is easily installed by owner.

Star Adjustable Luggage Carrier made entirely of steel and unbreakable; it is attached to the running board by three convenient thumb-screws. When not in use it occupies but a small space. It is adjustable from 10 inches to 50 inches. The cut shows some articles it is useful for, but it has so many useful applications that it would be difficult to enumerate them.

For instance:

How many things could a farmer carry, with one on each side of his car?

How would it be for "cash and carry" shopping?

How about trips this summer and fall? Ask your customers and make sales!

Write for complete catalogues.

Story for Week Dated March 19th, 1921 Being No. 49 in the Series

An E. B. Eddy Company Invention Based on a Bell and Wedding Bells

WHEN the pulp for the board that makes packing cases for the Eddy products reaches the "Wet Machine" it is rolled out into sheets. A big roller gathers around it sheet after sheet of the gray board, binding them closely together to make the board strong and thick. At the side of the machine there is an incandescent electric light which flashes up with a red glow whenever the desired thickness of board has been reached.

This electric light tell-tale is the invention of a young member of the Eddy Company staff, the son of one of the late E. B. Eddy's own employees, and a man who has been brought up from boyhood with the Eddy plant. He invented the electric tell-tale light soon after his wedding. Why?

Because before the light was used for this, the thickness of the boards was announced by the ringing of a bell. The bell had a habit of getting out of order, and it was the duty of the young benedict to repair it and adjust it accurately whenever it went wrong, whether by day or by night.

Before he got married he used to get up and fix that bell at two a.m. and whistle over the job. But after his wedding somehow that midnight summons to mend the bell began to get on his nerves. So he invented the system of warning the watcher of the "Wet Machine" that the board was the right thickness by means of a light instead of a bell.

The light has not proved a "Light That Failed"; the Eddy Company board comes out the correct thickness every time, and the young benedict is no longer disturbed in the wee small hours. You see there's often a little romance behind an invention.

Eddy's Products

The Price of Glass is Low—Order Now!

For several reasons, this is a good time to "lay in" glass. The low price is one, the many favorable indications of building activity this year, including the reduced cost of certain other building materials, such as lumber, is another.

You will, naturally, want to be prepared for the business that comes to you when building begins in the spring. By sorting up your stock and being prepared you will enjoy the advantage of closing even the earliest orders in this line.

We are prepared to give you prompt, courteous attention and quick shipments of all kinds of glass; to co-operate with you in every way that we can.

Sort up on glass; estimate your probable needs for the future and make sure, by ordering now, that you lose no business because of shortage of stock.

We handle glass of practically every kind that you will need to close all your sales: Window glass, plate, figured, mirror glass, stained, wire bent and ornamental glass. Let us supply you with prices and quotations.

Malleable and Cast Iron Pipe Fittings

A Complete Line

Your reputation depends on the quality and service that your goods give to your customers. We have a reputation based on the popularity of our products from coast to coast. Stock and sell our Cast and Malleable Iron Goods and your reputation is assured. The high quality of our lines makes selling easy. We make a complete and full line of both flanged and threaded fittings from ⅛-inch up, and can make deliveries from stock, both standard and extra heavy.

When ordering from your jobber be sure you buy—"the brand that has the quality." They are different. A trial order will convince you.

Cast Iron Fittings

With this brand, mean fittings made with iron of high tensile strength—proper proportions and correct tappings.

Malleable Fittings

With this brand, mean fittings made of Air Furnace Refined Iron, reamed and tapped to gauge with perfect threads.

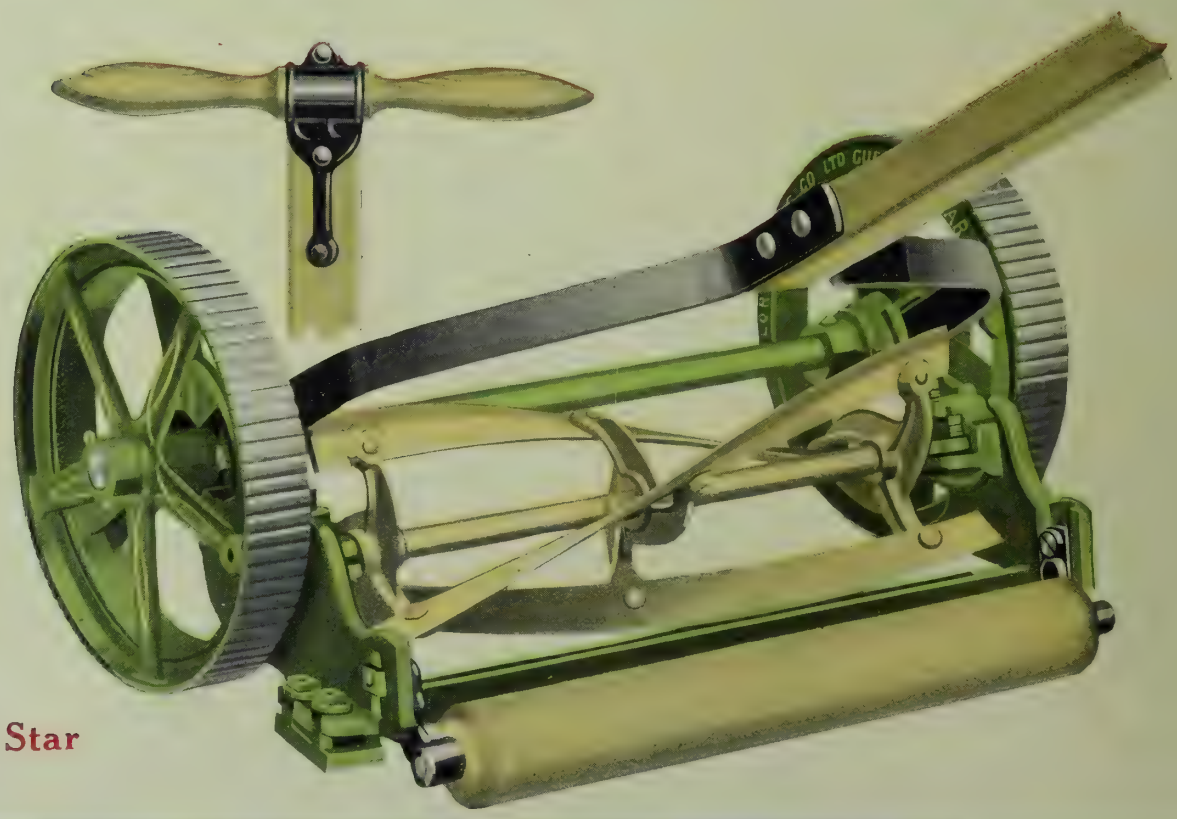
The Taylor-Forbes Company Limited Spring Suggestion



Most Complete Line of Mowers in Canada

By selling Taylor-Forbes Mowers you benefit by the old established standing of their product and line and by the completeness of the assortment you are enabled to turn all inquiries into orders.

The incomparable "Empress" fills one need; the medium-priced "Star" another; "Woodyatt" has no rival in a plain bearing mower; "Adanac" will last longer, and do more work than other mowers; "Daisy" meets a demand for low-priced machines; "Ontario" suitably fills other well-defined needs.

"Star" has:
Drive wheels, 9 in.
Gears or pinions, direct drive.
Cylinder of specially treated Sheffield steel.
Cylinder, 5½ in. diameter.
Cylinder blades, 3 or 4 knives, as required, of the best steel.
Adjustment: cylinder to lower knife-bar blade by set-screws at each end.

Taylor-Forbes Company, Limited, Guelph, Canada

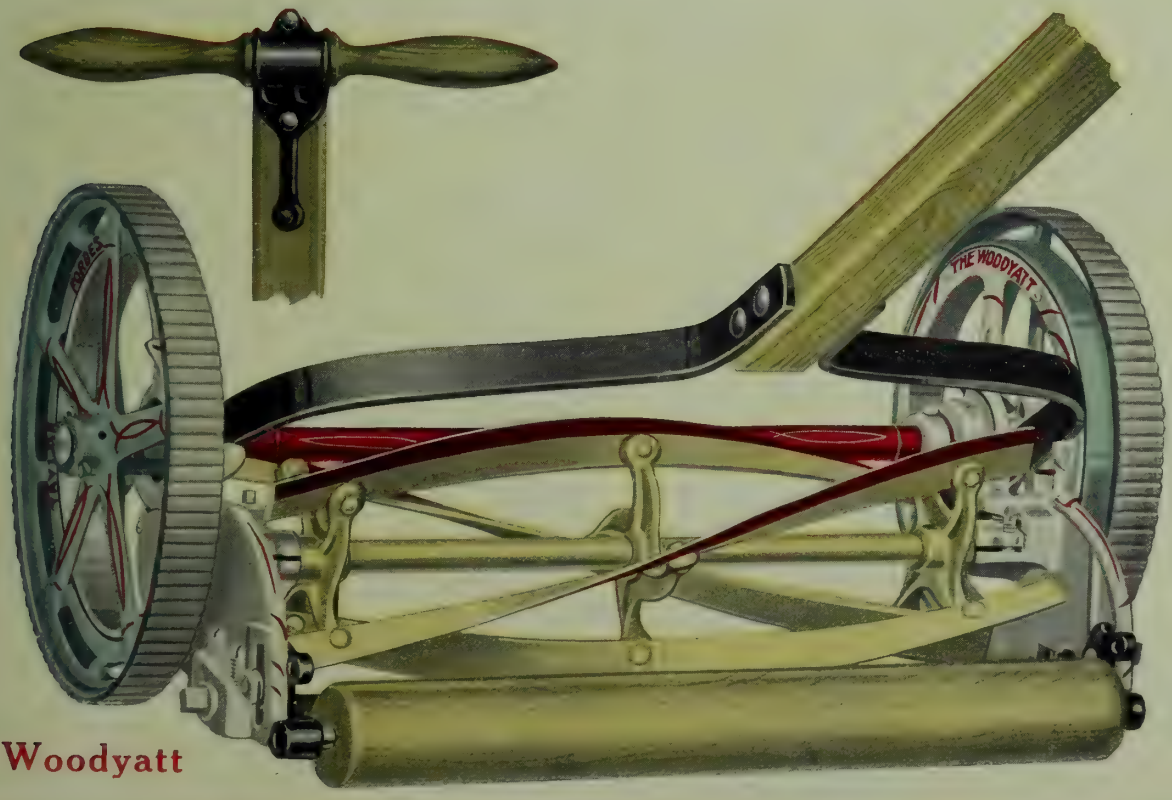
The Taylor-Forbes Company Limited Spring Suggestion



Stoutly Backed by Fifty Years of Experience

In selling Taylor-Forbes Mowers the merchant benefits by mechanical excellence. Long experience and the adoption of every improvement in manufacturing progress, supply Taylor-Forbes Mowers with convincing selling points. Smooth-running trains of gears make cutting easy; the enclosed gears are protected from dirt and wet; thoughtful design assures accessible oil-holes, easy, simple adjustments, and other similar advantages. The alert merchant will capitalize Taylor-Forbes experience and its resultant mechanical excellence in the mowers.

Mechanical excellence in "Woodyatt" includes:

Drive wheels, 10½ in. in diameter.
Gears, direct drive.
Cylinder of specially treated Sheffield steel.
Cylinder, 5½ in. diameter.
Cylinder blades, 4 or 5 knives as required.
Adjustment: cylinder to lower knife-bar blade by set-screws at each end.
Made with grass-catcher attachment.

Where Decalcomania Transfer Name Plates Are Made

YOU know that your goods are reliable, sound, and give satisfaction to the consumer. If you are a manufacturer you want the good-will to be reflected to your goods; you want the consumer to insist on your product at the time of his next purchase.

If you are a distributor you want the satisfaction to be traced back to you when it comes to re-orders.

The trade-mark brings these results, and there is no better way of marking metal or wood than with Decalcomania Transfer Name Plates. They cost less than celluloid or metal markers; they are made and sold in Canada for less than the imported goods; they are easily and quickly applied and cannot be removed without showing intent. Your product is safeguarded. We also manufacture Window Transfer Signs, Wood Panel Signs, and Advertising Display Fixtures.

Fully guaranteed and promptly delivered.

He is the man
for whom we make

Lionroyal

PRIDE OF PRODUCT

is back of our unqualified guarantee.

It is the reason
for the success of

Lionroyal

the BABBITT you can rely on

IT IS NATURAL TO BE PROUD of work well done—we're justly proud of every bar of Lionroyal.

ONE THOUSAND shops commenced to use Stanley Process Alloys in Canada during 1920. *This does not include at least another thousand who bought through our dealers.*

THEY BOUGHT on the definite guarantee of better and longer service and they got both.

WE GUARANTEED:

Longer wear per bearing:—The smooth unity of hard and tough ingredients in LIONROYAL evenly spreads the wear, thus eliminating hard spots, and lengthening the life of the bearing.

Non-separation:—The complete amalgamation of ingredients is accomplished scientifically under the Stanley Process. Thus the Babbitt may be remelted over and over again.

Write for "About Bearings" for our full story.

What a Great Wholesaler Says about the Pyrex Policy

"IF every other manufacturer had adopted the PYREX price policy during the war there would be no price reaction to-day."

Despite the enormous increase in demand, despite a continual shortage of production, even though capacity was quadrupled, the price of PYREX advanced only 20 per cent. during the skyrocket days.

The PYREX policy has been and will be the dealer's protection.

The PYREX advertising has created a good-will for PYREX as dependable as time and tide, and it goes right along. The advertising appropriation for this year is the biggest in the history of PYREX.

Millers Falls

THIS advertisement of the National Automobile Chamber of Commerce, which appeared in the New York newspapers during Automobile Show Week, is a forecast of the big building boom that is just around the corner.

Nobody knows the exact time this building boom will break. The best opinion seems to be that it will begin in the early spring. When it gets under way, you may be sure that Millers Falls Tools will be needed and in demand throughout the entire country.

You should prepare for this period of building activity by carefully checking over your stock now. By eliminating slow-moving lines, and concentrating your efforts on the well-known, thoroughly established Millers Falls Tools, you can decrease your investment in stock and increase your volume of turnover.

The Future of the Automobile and of Your Business

Vast Building Program Assures Prosperity

Your business will prosper just as soon as work upon the greatest building program America has ever known gets under way.

The immediate plans call for railroad improvements, new highways, thousands of homes, hotels, hospitals, bridges, sewer, and water extensions. The requirements exceed ten billion dollars in value

Public work in every part of America has been neglected for three years. High costs and labor shortage last year caused the abandonment of nearly all such projects.

Now materials are available. Labor is eager to work. There is no real shortage of money. It is available for all necessary developments.

What It Means To You

Raw materials will be required. Men will be employed to build and repair. They will buy the articles they require. A hundred million people are wearing out clothing and shoes faster than such articles are now produced.

The world's shelves are almost empty of thousands of needed articles.

The present is but a transfer from one activity to another. The demand for new work is so urgent it cannot be long delayed.

Remember What Was Said When War Ended

Hard times were predicted. Few saw how work could be found for four million men if the army were demobilized before industry could change from making war materials to peace time products. Merchants refused to buy, expecting falling prices. Manufacturers slowed down production.

Yet within six months there was a shortage of practically everything. Forced production—even more intense than during the war resulted.

Prices went up and when they had gone beyond reason in many lines people stopped buying.

The present change is normal. It is healthy and it must be of short duration.

We turn to new work just as pressing and far reaching as was the influence which upset the dire predictions of 1918.

Will You Be Ready Then?

Production of practically all merchandise has been at reduced volume for three to five months.

In the meantime we have been consuming and wearing out clothing, houses, furnishings, automobiles, etc. It is possible we face a shortage similar to that which came upon us in the spring of 1919.

America has not overbuilt or overreached her requirements in any fundamental or essential activity. The accumulated surplus of five years prosperity is stored in many ways.

Not in years has everyone been so eager to work. Economical production and economical distribution will now be possible.

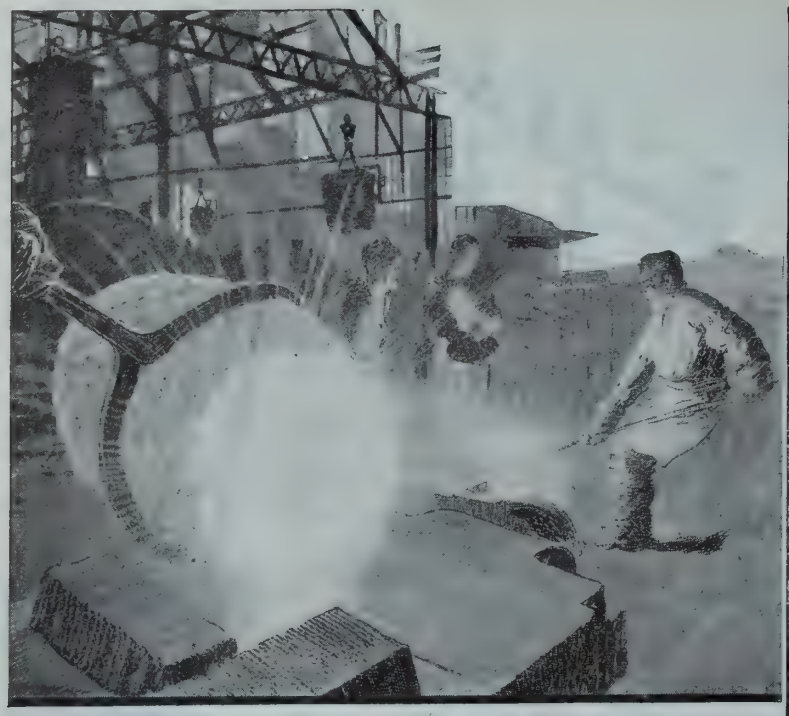
A Million Automobiles For Replacements

That is the normal requirement to fill the gaps left by worn out cars.

No one who has ever owned an automobile will long endure without one. Without the automobile, industry would stop. Transportation would be paralyzed. Distances between town and country and between producer and consumer could not be covered.

Living costs would rise. Land values would fall.

The new need is for transportation and in the part it plays the automobile has no substitute.



See America's future in the light of her needs. There is demand for nearly every article. Be prepared to do your part. Have faith and remember it is not likely that any manufacture will be able to get back into production quick enough when spring buying starts.

Go to the Automobile Show if you would share in the confidence held by America's first industry in finished products.

National Automobile Chamber of Commerce

Where Disston Quality Is Born

There is something more than a proper mixture of metal put into the crucible when Disston steel is made.

It is an unseen, intangible ingredient—yet as big and real as the tremendous plant in which Disston Saws and Tools are made. The long experience of men whose fathers were Disston steel workers, whose grandfathers worked out the secrets of fine Disston steel generations ago—this is what has made the present quality of Disston steel.

Under the greatest test of all, hard service over a long period of years, the quality born in Disston steel is revealed. The greatest praise of Disston Saws and Tools comes from men who have used them longest, men who write of these tools with a friendliness, and even affection, seldom given to inanimate objects—and there could be no higher tribute.

Pulling Business with Aero Cord

The housewife's weekly washing is usually a serious affair, and it is not a pleasant experience for her to have the clothes line break, and the wash dragged over the ground, entailing extra time and labor.

Aero Cord eliminates these annoying features often found in inferior makes of cordage, and comes up to the housewife's expectations of a trustworthy clothes line. Aero Cord is weather-rot, stretch, and rust-proof, a line to which the clothing will not freeze. Aero Cord is inexpensive, yet it gives absolute satisfaction to the user and creates consumers' confidence in the dealer's store—and pays a good profit.

The best article procurable for

Made in Canada

Make Profits on

The necessity of spring clipping has now become generally recognized, and with this has come the use of Stewart No. 1 Clipping Machines for clipping horses and cows.

In the case of horses it is to make them more productive in work and to protect their health. Cows are not only made more comfortable, and fine stock improved in appearance and value, but clipping is essential to keeping the system in order.

For Canadian Trade

Spring Clipping Business

It pays horse-owners to look after the health of their horses. Clipping is an insurance against colds, pneumonia, heaves and other horse ailments. The clipped horse dries off quickly—he rests better and works better. Clipping is as important as shoeing or good bedding.

The Stewart No. 1 Ball Bearing Clipping Machine is the most perfect clipping machine ever made at any price. It has made good through years of satisfactory service.

Gears cut from solid metal and enclosed in dust-proof metal box. All wearing parts of hardened steel. Compact—can be set up or taken down quickly. Light—weighs only 30 lbs.

A necessity for every farm, and you can guarantee it to please or money refunded. Same machine clips horses, mules, or cows, without change of knives or adjustments.

Order from your jobber early so you can display the machines in your window or on the floor, and get the very earliest business.

Made in Canada

"Quality" and "Phoenix" Screwdrivers

No. 60 No. 51 No. 29 No. 42 No. 38 No. 35

This is a pleasing line of screwdrivers; they attract attention by their handsome appearance, convince by their excellent selling points, and close sales by the combination of their pleasing appearance, well-designed usefulness and strong, durable workmanship. Once in the hands of the customer they establish good-will for you.

The blades are splendidly made of crucible steel; the handles of red fibre or black rubberoid, plain, fluted or knob; steel or brass, nickel-plated ferrules. These characteristics are general; each of these efficient screwdrivers has individual talking points of merit. "Quality" are oil-tempered plain finish; "Phoenix" are electric-tempered, blued finish. Ask for literature and prices.

Get Closer to that Customer—the Service Station

FOLLOWING our recent suggestion, let us make another comment on the service we are equipped to give the hardware trade.

You know what our plan is: not to be satisfied with merely filling orders—but to go out and *create* new business.

This is no idle dream of ours made over a desk by men who don't know practical hardware selling. For two long years we've been building up our *plan* of co-operation to help business creation for hardware merchants, and each day that goes by convinces us more and more that it's sound and that it will really work.

Take Service Stations, for instance. Here you'll find threading repair tools needed almost constantly.

Certain cars require one sort of thread repairs — others another. Yet few service station men have a complete equipment of screw-plate sets for doing the work.

If you adopt our plan of selling, you'll make a visit to each of these service stations and try to sell the following:

No. AA4—Little Giant Set (for magnetos and small work).

No. 312—Little Giant Set (for engines and chassis repair).

No. 260 — Little Giant Pipe Stock and Die Set (for pipe connections).

You have in these three sets a total of 35 assorted taps and dies ranging from the smallest sizes up to the largest needed in auto repair work. It's really one complete assortment packed in three boxes—why not sell it that way?

If you're interested in this plan of selling and want help, send us a list of the service stations or garages near you and we will send you special letters and printed matter for reaching them. Write to-day.

Buildings Work For You

When Fitted With Wheeler & Bain Products

EXPERIENCE has shown that buildings fitted with these sheet metal products advertise and pull new business for you.

This round, corrugated galvanized iron or copper conductor pipe is made in 8 and 10-foot stock lengths. It comes in sizes 2, 3, 4, 5, and 6-inch. Each length is reduced at one end, ensuring an easy fit; the seams excel any in the country. Elbows and shoes to suit.

The square conductor pipe, shown below, in 8 and 10-foot lengths, in one piece, without cross-seam. The handsomest pipe on the market and sells best, 2⅜ by 3¼ inch and 2¾ by 4¼ inch. These equal sizes 3 and 4 inches in the round style. Elbows and shoes to suit.

8 and 10-foot lengths of G. I. eavestrough. Easy fitting in any style. Also "circular" eavestrough. Girth: 8, 10, 12, 15 and 18-inch.

Rotary ventilators use wind as motive power. The whirling head creates a suction impossible to stationary ventilators. Noiseless, self-lubricating bearings. Storm proof—no snow or rain can enter. Recommended for poor draft and smoke troubles.

Rotary Screw Fan Ventilators have all the points of the preceding, but in addition have a fan which adds to the suction.

We carry a large stock of galvanized iron and black sheets and also manufacture corrugated iron, roofing, and siding.

We are the original "Quick Shippers" —try us.

French Doors Hung on LAWSON Floor Hinges

This Hinge Is Made for Long Wear and Hard Service

THE new Lawson No. 800 Floor Hinges are the lightest floor hinges on the market, AND—

They stand the gaff! WHY?

Because they are *constructed scientifically*, strong where strength is needed, friction eliminated where the wear comes.

All wearing parts are hardened by a special process. The plunger works against steel rollers without friction. The weight of the door is carried on ball bearings.

Result — light construction combined with greater strength and longer service. On a recent test, a Lawson No. 800 Floor Hinge, taken from a dealer's stock, was given 60,000 violent double swings on a 50 lb. door, *without any appreciable sign of wear.*

The Lawson No. 800 Floor Hinge is made with square bevel-edge reversible side-plates, all standard finishes. A better looking job, easily installed, and at low cost.

It is meeting with a steadily increasing demand from contractors and architects. This means large sales and quick turnover for dealers.

Write today for illustrated catalog describing in detail this and other styles of Lawson Spring Hinges, for residence, office and factory doors, gates, etc.

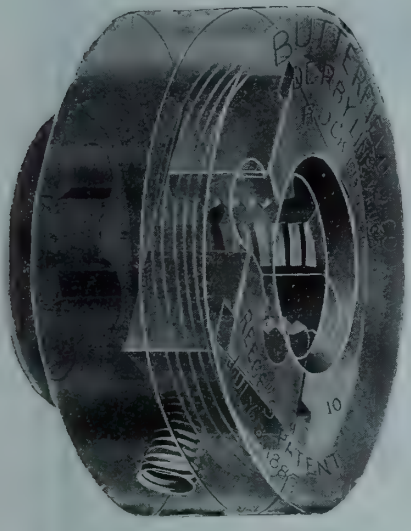
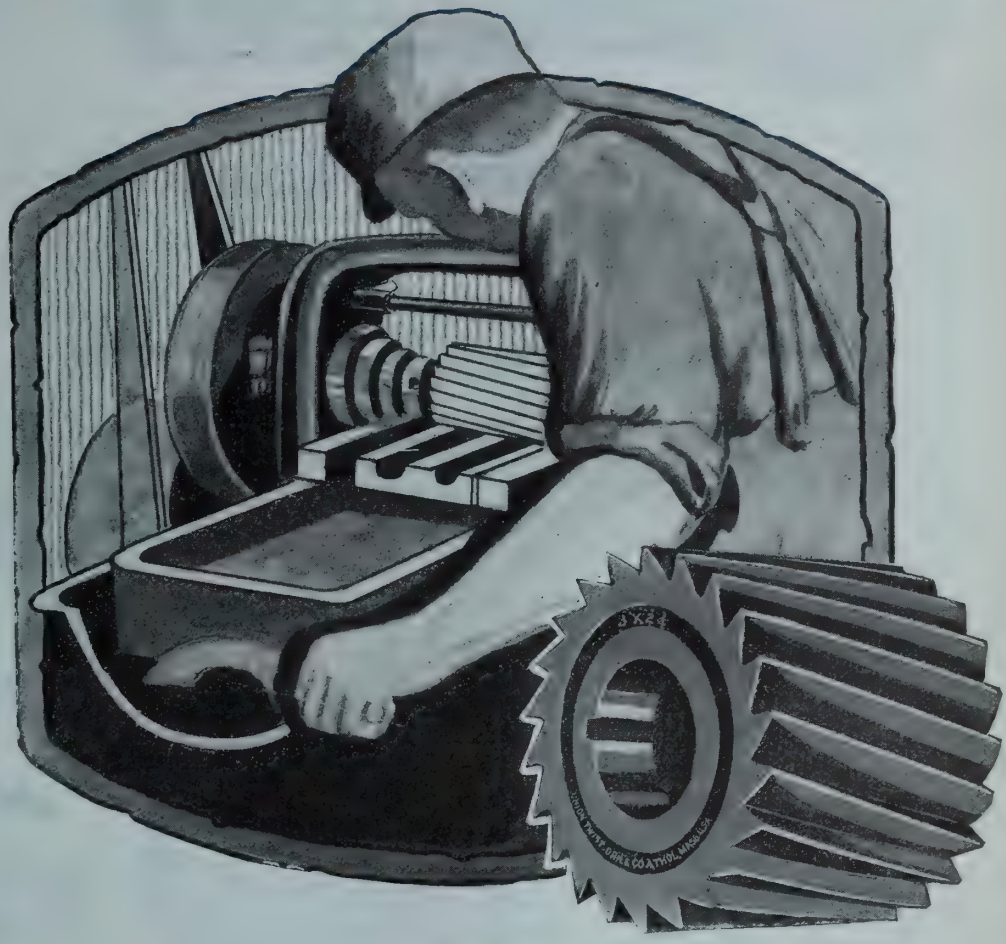
Sell Butterfield Tools
For Speed, Accuracy, Endurance

Tested and proved by 40 years' practical use all over the civilized parts of the globe

You Sell Recognized Efficiency



Butterfield Tools have been used successfully throughout the civilized countries of the world. For practically half a century they have been making good, to the general knowledge of mechanical men everywhere. You know yourself, without any argument, that the name "Butterfield" is familiar to machinists and buyers of tools. For years they have known the name favorably, and they accept Butterfield Tools readily, fully appreciative of their recognized speed, accuracy and endurance.



When you set out to urge on a customer an unknown brand of drills or other tools, made by some obscure manufacturer, it takes some hard, time-consuming selling, doesn't it?

FOREIGN REPRESENTATIVES: Great Britain, Geo. H. Alexander, 83-84 Coleshill St., Birmingham, Eng.; France, Italy, Belgium and Switzerland, Fenwick Freres, 8 Rue de Rocroy, Paris; Sweden, Norway and Denmark, Ab., Sigfr. Mitre, 785, Buenos Aires, R. A.; South Africa, H. Parker Wood, Cape Town, Durban and Johannesburg.

BUTTERFIELD

Butterfield's Established Reputation Makes Them Preferred by Buyers

Buyers or purchasing agents for big industrial concerns are responsible for the performance of the tools they buy. No man that purchases tools to do hard work, to stand up under trying conditions, to withstand shock and strain, to cut rapidly and accurately with a minimum of regrinding, can afford to experiment with lines of little-known tools. They order Butterfield Tools from the most convenient source of supply —it's up to you to make it yours.

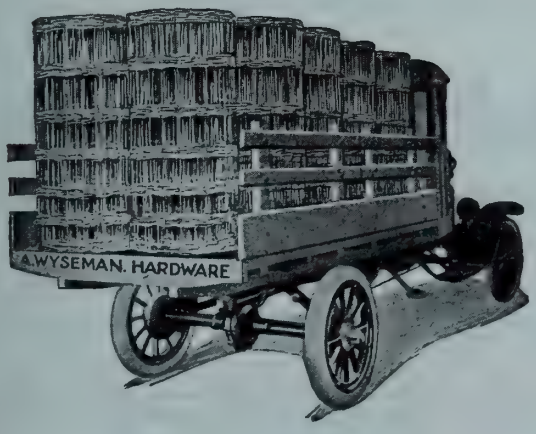
Your Jobber Has Them



If interested tear out this page and place with letters to be answered.

Are You Getting Your Share?

FROST

FENCE

According to Government announcements, farmers are each year removing more and more of the old snake and stump fences and replacing them with fences of woven wire.

Are you getting your share of this wire fence business? Have you a type of wire fence in your store that you *know* will satisfy the needs of your farmer customers? Do you carry a line of Frost fences, or, if not, have you considered the advisability of handling the Frost Fence?

Frost Fences are the answer to the farmers' demand for a fence combining strength, appearance and economy. The wire is tough and strong, and the mesh is held together by the tight lock that grips as no other lock does. The stays are straight and evenly spaced, making a fence that is easy to stretch, and which stands straight as an arrow, and it is truly economical, for the wire used is full gauge No. 9—drawn in our own plant and heavily galvanized with high-grade spelter.

Hardwaremen realize the opportunities of expansion that come through handling a product of superior qualities.

Sell Pexto Service

AN interesting illustrated and instructive booklet of 14 pages is packed with each Pexto Square. It describes the use of the Rafter framing and other Squares thoroughly and intelligently and thereby increases the value of this useful tool 100%.

This Pexto Service is appreciated by the customer and the benefit he derives surely reflects to the credit of the dealer who sells Pexto Service.

Pexto Squares possess many exclusive features, particularly the markings which are arranged so that the mechanic can obtain the desired information at a glance.

The line includes numerous styles of finish and markings.

The Take Down Square is becoming a universal favorite. The adjustment and locking device is simple and strong, giving perfect graduation.

Pexto goods can be obtained through representative Canadian Jobber.
Send for a copy of our No. 20 Catalog. It is interesting and instructive.

MAKERS OF FINE TOOLS

CHICAGO

Vaughan's Vanadium Supersteel Hammer, shown below, is the toughest and strongest hammer made.

Made with a non-chip face and a non-slip claw.

Note wax hole in end of the handle.

No. 41, 20 oz.; 41½, 16 oz.; 42, 13 oz.; 42½, 10 oz.

This is one of a line of 28 hammers, each a leader in its class.

Constant pounding proves their quality.

Plain Face Nail Hammer

Over Fifty Years of FINE TOOL MAKING

Ball Pein Hammer.

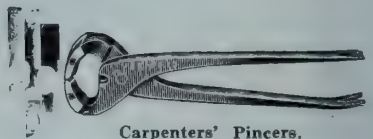
Back of the V & B trademark is the tradition of honesty and thorough workmanship maintained for over fifty years of progress. Only a few of these dependable tools can be shown here. Our product is made on the latest machinery, with discriminating care by most modern methods. It is controlled in material, workmanship and tests by laboratory standards. There is no guesswork about its making. Our workmen are expert through years of specialization.

Nut Pliers with Wire Cutter.

Besides the tools shown and the braces, the line includes wrenches, cold chisels, plumbers' and carpenters' chisels, wrecking bars, star drills, machine and belt punches, reamer and countersink bits, etc.

Refinements of manufacture warrant our assurance of unvarying uniformity of product.

All tools are drop-forged of extra refined steel. Every tool is given a rigid physical test. It must be right before it can leave the factory.



Machinists' Riveting Hammer.

Double Duty Pliers.

Square Head Nail Set

Carpenters' Pincers.

LION BRAND CORDAGE

Established 1825

Is Guaranteed to Give Satisfaction

Rope like Lion Brand can be made only from High Grade Manila Hemp. All pure Manila is not high grade, nor is all Manila Cordage Lion Brand. The various grades of Manila Hemp vary several cents per pound. Lion Brand excels in yardage and strength.

Test Lion Brand; that is the surest way to convince yourself that it is the cordage for you to sell—it satisfies and increases business for the merchant.

It can be only prejudice that prefers foreign inferiority to domestic superiority.

Clears Clogged Pipe

DESOLVO AND COLD WATER

Cleans Closet Bowls

Thaws Frozen Pipe Quickly

Desolvo sells continuously because it makes good and brings re-orders from satisfied customers. This handy cleaner for sewer and drain pipes mixes with cold water and generates heat. It thaws out rain water leaders, frozen drains, and soil pipe stacks with perfect safety to pipes and plumbing fixtures.

Your customers like Desolvo and buy it regularly in quantities because they know it does the work quicker, at lower cost, and with less effort.

Twenty years' experience in the chemical manufacturing industry has enabled us to embody in Desolvo all the improvements and progress in modern science and methods of manufacture.

Desolvo quickly wins a permanent place in the regard and esteem of your customers.

It "makes good" so promptly and effectively that it holds your old customers, and, through the rapid spread of its good reputation, constantly gains new ones.

It pays to stock Desolvo; it pays to display it well, and it pays in the ever-increasing volume of quick, easy, profitable sales.

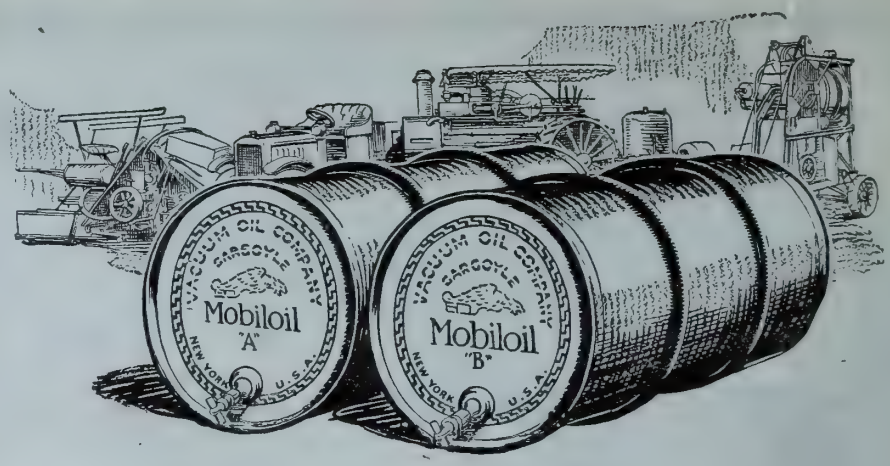
Chart of Recommendations for AUTOMOBILES

(Abbreviated Edition)

How to Read the Chart

The Correct Grades of Gargoyle Mobiloils for engine lubrication are specified in the Chart below:

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic



These recommendations cover all models of both passenger and commercial vehicles unless otherwise specified.

Where different grades of Gargoyle Mobiloils are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and constitutes a scientific guide to Correct Automobile Lubrication.

If your car is not listed in this partial chart, consult the Chart of Recommendations at your dealer's, or send for booklet, "Correct Lubrication," which lists the Correct Grades for **all** cars.

Double-Barreled Salesmanship

A profit source which many hardware merchants neglect

THE hardware merchant who analyses his trade soon finds that a considerable percentage of his customers use machinery. Building contractors, manufacturers, farmers, use automobiles and trucks. Many farmers have tractors and other farm machinery constantly in use.

You will do them a real service by pointing out the inefficiency and waste of haphazard lubrication.

What will be the result?

New customers for a very profitable line and increased confidence in you as a merchant of quality products.

The Gargoyle Mobiloils Chart of Recommendations enables you to advise your customers on their lubrication problems. The Chart specifies the correct grade of Gargoyle Mobiloils for every automobile, truck, tractor and motorcycle.

Show your customers the economy of Gargoyle Mobiloils—particularly when bought by the barrel. It will open a new source of profits for you.

Welded and Forged—
A Solid Coupling

No Wrench slips on the Perfect Hex

To All Who Sell Pump Rod Couplings

There is nothing to be said about malleable couplings. They talk for themselves. Every one who has used them knows their language and you folks who dispense them have listened to their users' ravings.

You know all about them.

Who do you think will buy one of these when he can get a DEMON GRIP—made of **SOLID** steel?

Can you imagine a real hardware man ordering couplings which are shipped to him in a sack—when the words "DEMON GRIP" will bring him forged steel pump rod couplings packed in neat boxes of twenty-five—all ready for display on his shelves? Answer, you can't.

Now! Where is the jobber who will pass up a chance to handle the only rod coupling that gives the CONSUMER the utmost value?

The RETAILER the greatest ease in selling?

And HIMSELF an article, which, because of the two foregoing facts, well advertised, is bound to have a large and constant demand?

Stocks of DEMON GRIP Steel Pump Rod Couplings are carried by the wholesalers listed below:

Beatty Brothers, Ltd.

ARMCO
TRADE MARK
INGOT IRON
Resists Rust

Look for this blue and gold label on Washing Machines, Refrigerators, Stoves, Enameled Table Tops, and other household utilities.

If interested tear out this page and place with letters to be answered.

There is a Type of Store Where Armco Products Are Sold

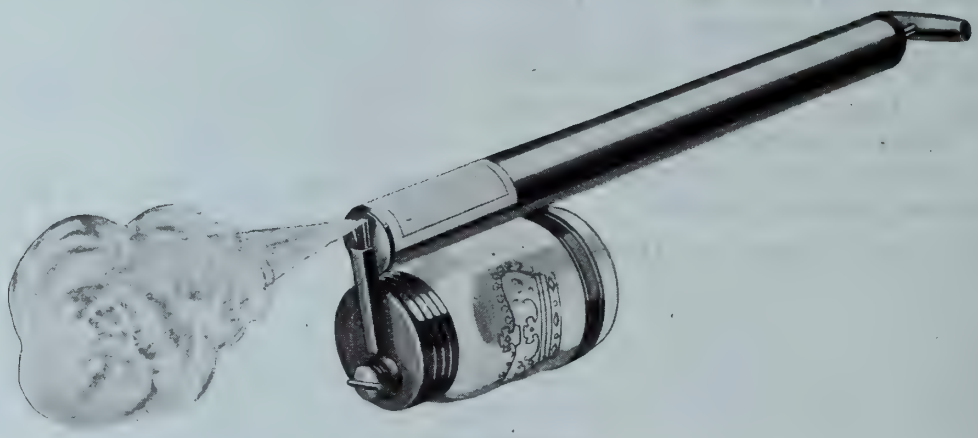
The man or woman who buys a refrigerator, a stove, or a washing machine made with "Armco" Ingot Iron is of a certain type.

The manufacturer who puts "Armco" Ingot Iron in his product must make a worthy article—must be a certain type of man—or he would use ordinary metal.

Even the merchant, the dealer who sells Armco products, can be classified generally by that very fact, for we know of no poor article made from this iron.

Therefore, the blue and gold Armco triangle carries with it an assurance of quality, of solid worth, wherever it is found.

During the week of March 21-28, dealers are planning to make special displays of products made of "Armco" Ingot Iron.



Such nationally advertised products as "Federal Washers," "Sanico Ranges," "Leonard Cleanable Refrigerators," "Buck's Stoves and Ranges," "Eden Washing Machines," "Globe Stoves and Ranges," and "Brascolites," are made of "Armco" Ingot Iron.

Diagram showing construction of a McArthur's Guaranteed Roof

McArthur's Roofing Standard

All flat-board surfaces shall be covered as follows:—

1st—Lay one thickness of McArthur's Resin Sized Sheathing Paper, or McArthur's Unsaturated Felt, lapping the sheets at least one inch. Nail sheets to roof boarding, only enough to hold in place.

2nd—Over the whole area, lay 2 plies of McArthur's "Black Diamond" seven ounce Tarred Felt, lapping each sheet seventeen inches over the preceding one, and nail as often as is necessary to hold in place until remaining felt is laid. Carry the layers up firewalls and all vertical faces, by not less than eight inches, or as may be specified.

3rd—Coat the entire surface uniformly with McArthur's Straight Run Coal Tar "Black Diamond" Pitch.

4th—Over the entire surface, lay three plies of McArthur's "Black Diamond" Tarred Felt, lapping each sheet twenty-two inches over the preceding one, mopping with "Black Diamond" Pitch the full twenty-two inches in each sheet, so that in no place shall Felt touch Felt. To hold the Felt in place, if nails are used, they shall be covered by at least two plies of Felt.

5th—Spread over the surface, a uniform coating of "Black Diamond" Pitch, into which, while hot, embed not less than four hundred pounds of dry gravel, crushed asbestos, or roofing stone, to each one hundred square feet.

Gravel—The gravel shall be graded, that no particles shall exceed ⅝", or be less than ¼" in size. It shall be dry and free from dirt and dust. In cold weather it must be well heated and dried before using. Crushed asbestos, waste slag, or beach pebbles may be used.

Pitch—The Pitch shall be McArthur's Straight Run Coal Tar "Black Diamond" Pitch.

"Frost River" REFRIGERATORS

Made of Galvanized Sheet Steel

THE Davidson "Frost River" for many years has been the first choice with everybody who knows its good points. This is our style No. 26. It is made entirely of galvanized steel sheets, the outside finished in beautiful French Grey enamel, while the inside is lined with pure white enamel. The doors are panelled and made of well-seasoned hardwood and fitted with solid brass locks and hinges. Removable rustless tinned wire shelves make for better air circulation and in addition are more sanitary and easier to clean. Large, roomy ice chest ensures greater economy.

This style is also supplied in two smaller sizes.

The "Frost River" always gives satisfaction and consequently always finds a ready sale.

Full particulars and prices sent on request.

DAVIDSON'S Refrigerators MADE IN CANADA THE THOS DAVIDSON MFG. CO. THE SEAL OF DURABILITY

DAVIDSON

Razors That Are Made To Strop
and Strops that are made for Razors

Every man should strop his razor blade every time that he shaves.

Stropping is not really sharpening. It is the process of straightening out or aligning the little steel particles that are like minute teeth along the edge.

Unless the razor is stropped its edge is not as extremely keen as all shaving edges must be to leave the face cool and comfortable.

GENCO RAZORS
Are made to Strop

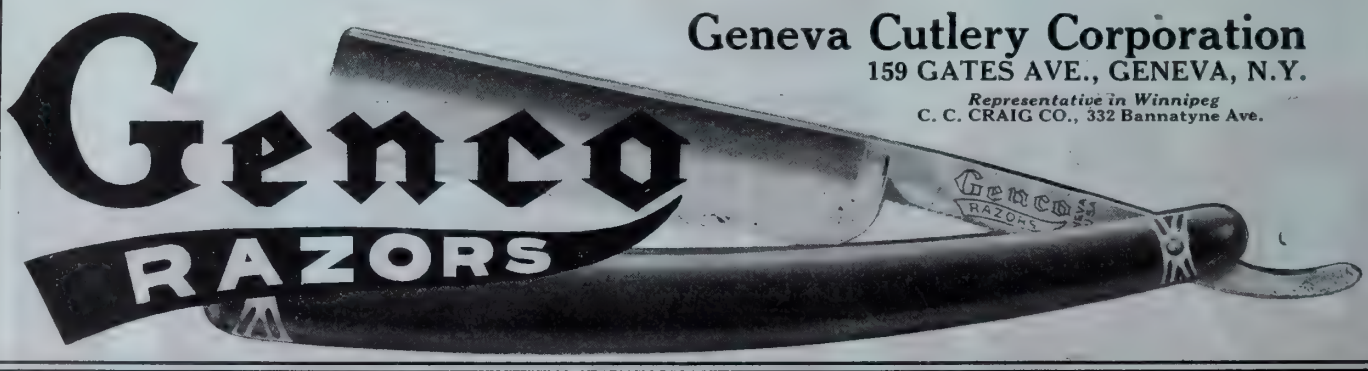
Every Genco Razor, whether for heavy beard or light beard, rugged skin or tender skin, is so ground that it will strop easily and perfectly.

The accurate angle of the bevel and thickness of the back guide every Genco to the proper position on the strop.

GENCO STROPS

The best shaving edge can be easily ruined on a poor strop.

Genco Strops are made from the highest grade materials selected for their delicate abrasive qualities.



There is an adequate line including a variety of styles and sizes.

THERE IS A GENCO RAZOR FOR EVERY KIND OF BEARD AND SKIN

Ranges of Spirit and Class

The Maple Leaf "Falcon"

The Maple Leaf line of ranges, stoves and furnaces is large and varied—covering every known want and suiting all tastes. It offers unequalled possibilities of profit to the wide-awake dealer.

In these three pages we will mention a few of the leaders.

We will be pleased to send full illustrated catalogue and price list on request. Let us hear from you.

Maple Leaf "Falcon"

This is a range that stands in a class by itself. It has every possible improvement and convenience that a woman can want. It is one of the most desirable and quick selling kitchen ranges for sale to-day.

It has a durable duplex grate—large fire-box with perpendicular linings—sliding direct damper—lift-up front key plate—it is handsomely designed with heavy, smooth nickel trimmings.

It is made in two sizes with 18 in. and 20 in. oven. The "Falcon" heats quickly, evenly and will do perfect cooking and baking at all times.

Maple Leaf "Pride" Range

This range is a general favorite, because of its lifelong construction and value. It has earned an enviable reputation for quick, perfect baking and has a very large and ever growing list of satisfied owners.

It is compactly built—handsomely trimmed—fire-box grates and top of standard construction—with a heavy base and legs which give the "Pride" a pleasing, substantial appearance.

Maple Leaf "Pride" Range with high shelf. Several styles of closets and shelves to select from.

Note—We want dealers everywhere.

The manufacturer of Maple Leaf Stoves, Ranges and Furnaces is going ahead everywhere by leaps and bounds.

Our dealers now extend from coast to coast. But there are still many sections where we have no representative. Write us to-day and secure the Maple Leaf products for your section.

Heaters of Reliability and Efficiency

In a climate subject to severe weather changes and where the Winters are particularly cold and long—an efficient heater is of prime consideration.

The Maple Leaf heaters are especially designed to produce the maximum of heat with the minimum of effort.

Maple Leaf "Quebec" Heaters

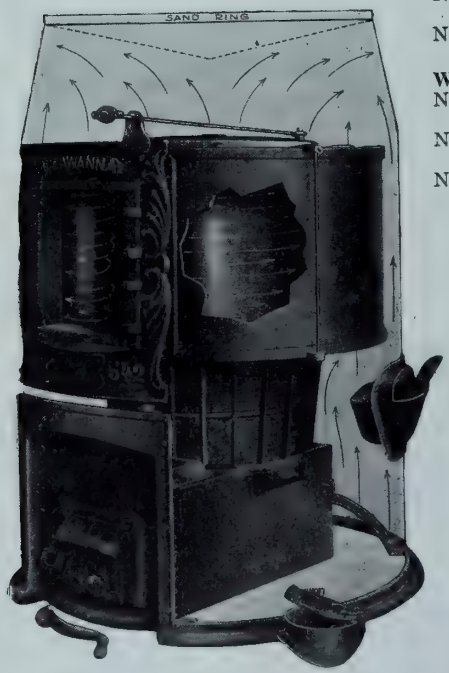
For simplicity and effectiveness there is nothing that quite equals the "Quebec" heater. The Maple Leaf line is fully guaranteed and we can show a very large assortment of styles and sizes—both plain and ornate. These are made with a choice of either triangular or draw-centre grates.

"Quebec" heater with grates as illustrated.

No. B 23—diameter of body 11½"—height 32".
No. B 24—diameter of body 13½"—height 36".
No. B 25—diameter of body 15½"—height 39".

Maple Leaf stoves, ranges and furnaces will make money for you.

Maple Leaf "Quebec" Parlor Heaters



A little more ornate—with or without grates—simple top and foot rails.

Without Grates.

No. B33—diameter of body 11½"—height to base of urn 35¼".
No. B34—diameter of body 13½"—height to base of urn 35¼".
No. B35—diameter of body 15½"—height to base of urn 35¼".

With Grates.

No. B43—diameter of body 11½"—height to base of urn 35¼".
No. B44—diameter of body 13½"—height to base of urn 35¼".
No. B45—diameter of body 15½"—height to base of urn 35¼".

Maple Leaf "Lackawanna" Furnace

This furnace is built for all occasions and has a heating capacity of 9,000 to 70,000 cubic feet, according to size, whether the building be a residence, church, hall or store. It is of low-down construction.

Note how the arrows indicate the currents of draft and how the products of combustion travel to the front of the radiator and divide to go around both sides to smoke outlet at the back.

The radiator of the "Lackawanna" has horseshoe-shaped flues—the ash-pan is exceptionally large with square back—and the grates are triangular anti-clinker type, extra strong and will not become clogged or immovable.

Note—It will pay you to investigate these furnaces.

Two Beauties—Unique and Unusual

In the Maple Leaf line we are always striving for perfection. We are never satisfied until we have absolutely the best appliance possible to do the particular work it is designed to do. An example of this are these two Maple Leaf ranges. Each of them perfect in its kind.

The Maple Leaf "Composite" Range

A heating, cooking and baking stove which is the last word in efficiency—possessing all the points which bespeak quality, economy and service. It combines the perfect combustion features of the "Quebec" heater with a perfect kitchen range for cooking or baking. It is economical in space, allowing you to do the family cooking on the home heater. It burns either wood or coal.

Here's a New One!

Maple Leaf "Thatsit" Range

Here is our latest effort in a combination heater and cooking range. It is a dandy. It is constructed on the idea that the woman who is looking for absolutely the best stove for all purposes will, on seeing it, immediately say, "That's it." It is based on the Quebec heater, but has a full-sized 6-hole range top. The size of the top, exclusive of reservoirs, is 23 x 33½. The heat units are so controlled that whether the heat is on or off the oven, the fire must pass under all six covers. The oven is 13¼ x 11½ x 20″ deep with drop door, balanced spring type—friction catch—non-heating handle and thermometer. The stove is fitted with broiler lift and pouch feed door. Cast iron under top extends over top of oven. Copper reservoir—with or without warming closet.

The pipe in the warming oven passes up the back instead of through the closet, giving more space on the top of the stove and more space in the cupboard of the warming closet.

We will be glad to send you further particulars on any of these ranges, stoves or heaters and also would be glad to receive enquiries about anything in the stove line.

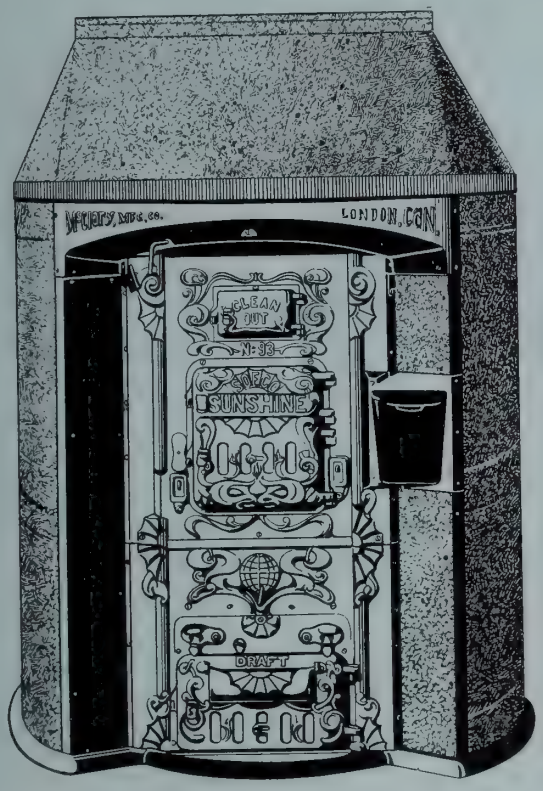
1921 HELPS FOR McCLARY'S DEALERS

The battle is on for 1921 business. The Consumer is cautious. Sellers are alive to the fact that Merchandising helps are needed to stimulate buyers. Attraction is the first step to favorable consideration. The cut-outs and window transparencies shown here are being supplied to McCLARY'S progressive dealers. They will help to make sales. Sales when including McCLARY'S "Good Stove and Cooking Utensils" bring satisfaction. Step into the front rank. Secure the honors which bring you steady business. It will mean success in a "buyers" year. Other helps are coming. Look for them. Use them. Co-operation is team work and team work wins.

Our nearest Branch is well posted. Write to-day if you are seeking information.

If interested tear out this page and place with letters to be answered.

OUR JUSTIFICATION



THREE or four years ago we commenced the production of the one register pipeless system Furnace. With characteristic patience we devoted days, months and years in testing casings. We knew our Furnace was right. We determined to have a casing that we knew would be right. We enlisted all the heating engineers of the organization. Proposals and counter proposals were made. Finally a standard was decided upon and the decision made. **The result is an achievement.**

A long wait has been more than justified. We are satisfied that we now have a casing that will cover every requirement. It is the right casing for the right Furnace.

Production has been centered upon two one register pipeless Furnace.

The SOFCO SUNSHINE, all cast—and the RADIUM

These two Furnaces with the new casings are now ready for shipment. Orders and enquiries will receive prompt and courteous attention.

The Sofco Sunshine One Register Furnace

This is an all cast Furnace. It is very heavy of course and will resist the corroding effect of gases from any grade of soft coal. You can particularly recommend it for soft coal. It is a powerful heater, yet like our regular Sunshine pattern, does save fuel. Straight sides two-piece firepot with famous cup joint. Rigid dome and radiator with special circulating system. A substantial Furnace capable of unusual results both in heating and long life.

The Radium One Register Furnace

The Radium Furnace, so well known to the trade, is with the aid of the new Casing, a one register system that will sell to the buyer who is not prepared to pay the higher price of the "Sofco Sunshine" one register Furnace. It is thoroughly sound in its entire construction. Sell it to the buyer who desires a high grade furnace at a medium figure.

"ENTERPRISE MONARCH"

THE QUALITY MARK OF SUPREME EXCELLENCE

The heart of every Enterprise product, be it stove or furnace, is sturdy and strong. The test of time brings this out clearly and but emphasizes the quality of these goods, built for superservice. At least a generation of comfort and economy is built into each one. Wherever they are sold enduring and enthusiastic friends are made—steady buyers for more of your good merchandise. We make a large variety of stoves and ranges and both pipe and pipeless furnaces. Literature will be gladly sent to anyone interested. Write for it.

THREE LETTERS WHICH CAME IN LAST MONTH

Will you please ship me one stove back for a No. 9-18 Enterprise Monarch Stove? It is in three sections. Might say have used the stove fourteen years and this is the first expense to be put on it.

George R. Whitman,
Lawrencetown, N.S.

In the fall of 1907 I purchased a No. 8-20 Enterprise Monarch. It has been working beautifully ever since, and the only repairs necessary has been the centre section of the back lining in the fire-box.

T. E. Girvan,
Halifax, N.S.

I am writing to ask you if it is possible for me to get a fire back for my kitchen stove, Enterprise Royal Art No. 8-20, bought 1890. If so, let me know by return mail, and how much it will cost. My stove is good, but the fire back has burned through.

Mrs. C. R. Mullins,
Somerset, N.S.

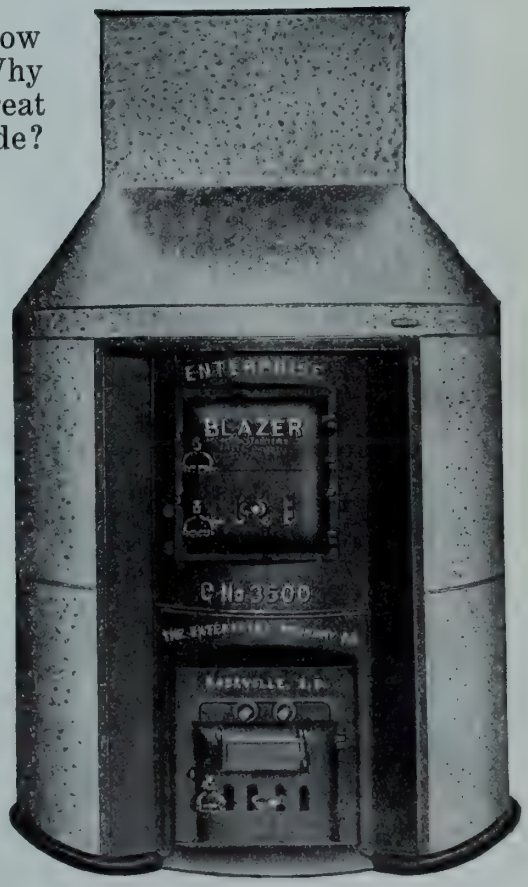
ENTERPRISE
BLAZER
PIPELESS FURNACE

From the start the Enterprise Blazer Pipeless Furnace has met with unusual success. Each installation has built a community of friends. When people see the Enterprise and hear of its comfort and simplicity, they want this remarkable heating system for themselves.



And so a rapidly growing demand has been built, and many hundreds of installations have already been made. Large homes and small, churches, stores, factories—it heats them all.

Mr. Dealer---Think of the Opportunity!

Aggressive merchants in many parts of Canada are selling this furnace and each day their enthusiasm for it grows. Its sale is becoming a big thing in their business—big in volume and in profits.

THE MARKET is almost every home and also stores, churches and other buildings. **THE PROFITS** are exceptionally attractive. **THE FURNACE IS RIGHT,** as the quality and design are Enterprise throughout—hence distinctive, effective and built to endure.

This is a Pipeless Age. If you are not now selling a Pipeless Furnace, you will next year. Why wait until your competitor has secured the great advantage of getting the first grip on the trade? Now is the time for you to get into the game, and get into it right. The furnace for you to handle is the ENTERPRISE BLAZER PIPELESS—a thoroughly tried and tested furnace, built to endure and turned out by a firm, who for over a generation in Canada have been recognized as making good goods only.

Get in touch with us at once and let us give you the details. You are face to face with a great opportunity. Take advantage of it and write us to-day.

BAN

The Banner Pipeless Furnace brings your customers better heating service at lower cost, and does away with the mess and trouble of overhead pipes.

Pipeless Furnace

The Banner Pipeless differs from other furnaces in that it has two casings—the outer casing taking the place of the usual cold-air flue. The warm air rises directly to a larger register over the top of the furnace. This register is divided into two parts, the centre part serving as a warm air register. The outer part acts as a cold air register, drawing cold air down the flue which is formed by the outer casing of the furnace. The outer cold air flue keeps the outer casing always cool, so that it is quite safe to keep vegetables and fruit near the furnace. A warm house and a cool cellar is the result.

FiReCo REGD

Ranges & Heaters

"Different from all Others"

Economy, Efficiency Sanitation, Simplicity

are combined in the FiReCo Range. That this combination is appreciated is proved by the continual sales of this Range, experienced by hardwaremen, everywhere. FiReCo saves fuel because it conserves heat; makes combustion complete; prevents flues being filled with soot; gives absolute control of the fire and no gas can escape from the range; it requires 50 per cent. less labor to operate with 50 per cent. less ashes to struggle with, and it gives its delighted owners 100 per cent. more cooking and heating satisfaction.

A careful and unbiased calculation of kitchen ranges proves that the saving of 50% of fuel increases the value of the range by $200. FiReCo is the answer to your stove question this Winter.

Once You Install a "Hecla" Furnace You Can Forget It

THAT'S why more and more men in the heating business are turning to this dependable furnace.

They get their profit clean—no expense or time lost in tinkering and "fixing up" after the job is through.

No leaky radiators—the Patented Fused Joints in the "Hecla" are guaranteed absolutely proof against leaks of gas and dust.

No "kicks" about coal bills—the Steel-Ribbed Firepot means a *tripled* heat-radiating surface—saves at least one ton of coal in seven. Owners become real boosters.

And you'll never be called upon to replace the fire-pot. There's a five-year guarantee behind it. We've never yet had to replace a "Hecla" firepot.

If you take pride in your reputation—if you want to make real money—talk and install "Hecla" Furnaces this year!

There are hundreds of furnace men throughout the country handling the "Hecla," not only because it is a better furnace, but also because they get valuable service from the factory—plans, estimates, blue prints, specifications free—real selling assistance—and a guarantee that means something.

A postcard will bring you our newest catalogue and full information.

Pipeless Furnaces mean extra business

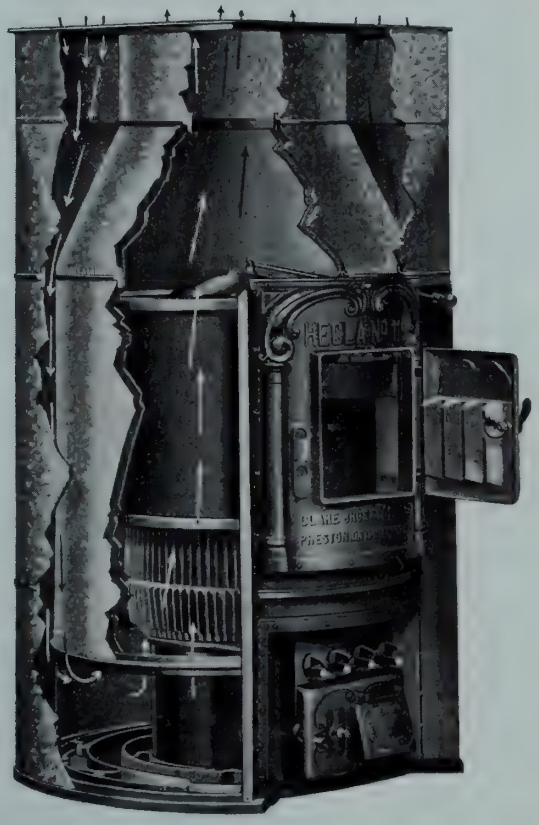
EVERY pipeless job you handle is so much "velvet." It doesn't cut into your sales of piped furnaces one iota. It opens up a new market for you, and it offers quick, clean profit.

Somebody in your town is going to get the cream of this business in the next few months. Why not you?

You're sure of getting sales—reputation—satisfactory profit if you handle the pipeless furnace which has a lot of talking points—all of real merit.

The "Hecla" Pipeless Furnace dealer can outmatch competition when he begins to talk of Patented Fused Joints, Steel-Ribbed Firepot, Cast-Iron Combustion Chamber, Circular Waterpan, Individual Grate-Bars—and all the other "Hecla" features.

And you take no chances when you recommend the "Hecla" Pipeless. Installed according to our plans, we guarantee it to give absolute satisfaction—and our guarantee is the strongest you've ever read!



Moreover, the "Hecla" Pipeless is a proven success. Out of all the hundreds installed we have not received a single complaint.

Don't pass up the extra business the "Hecla" Pipeless offers you.

If only to satisfy your curiosity—send now for: (1) Booklet of photographs and testimonials; (2) Sample enquiry forms for sketch plans; (3) Our famous consumer booklet, "Buying Winter Comfort"; (4) Full facts on the unique and valuable selling and advertising assistance we give to "Hecla" Pipeless dealers.

Simply tear out this page—write your name and address in the margin, and mail.

INSTALL A Pease "ECONOMY" FURNACE

It embodies several features not found in other furnaces and is specially constructed to eliminate fuel wastes.

The vertical shaker does away with stooping when shaking the grates and the convenient cleanout doors enable the user to keep the flues clean without discontinuing the fire.

Openings are provided at the side of the feed door for domestic water heater connections and a large vapor pan provides ample humidity at all times.

The air blast mixes the proper amount of oxygen with the gas generated by the fire and promotes better combustion. This is a real "coal saver."

The fire travel is so arranged that only a small amount of heat passes up the chimney and full benefit is derived from the remainder.

As the first Pease "Economy" Furnace was placed on the Canadian market about forty years ago this heating appliance is now recognized generally as one of the most dependable and economical of its kind.

In a few districts we still have openings for live-wire agents, and would be glad to hear from dealers who are in a position to handle and install Pease appliances. Writing to us entails no obligation. If you are interested send us a postal card today.

"JEWEL PIPELESS" FURNACES

The Finest One-Register Furnace on the Market

Right now we can see that the introduction of this furnace is going to make the year 1921 the banner year for our dealers, breaking all past sales records. This is only natural, because "Jewel Furnaces" have always been producers of large sales for our dealers, and the "Jewel Pipeless" contains the same high qualities that have made the name "Jewel" famous from coast to coast.

Your customers, when buying a heating apparatus, want mainly real Quality Heaters that will give good service for many years.

When you sell them a "Jewel" you sell them what they want.

All materials entering into the manufacture of "Jewel" Furnaces are highest grade and they are erected by skilled mechanics under the supervision of experts, which ensures the dealer and user entire satisfaction.

Safeguard your reputation as a furnace installer by selling your customer a "Jewel Pipeless," a Furnace that is built on knowledge derived from experience.

Take another look at the illustration and ask yourself if the "Jewel Pipeless" is not the most durable, efficiently constructed, and neatest appearing furnace you have yet seen.

No other line offers you, Mr. Dealer, so great an opportunity to give to your customers the best that their money will buy.

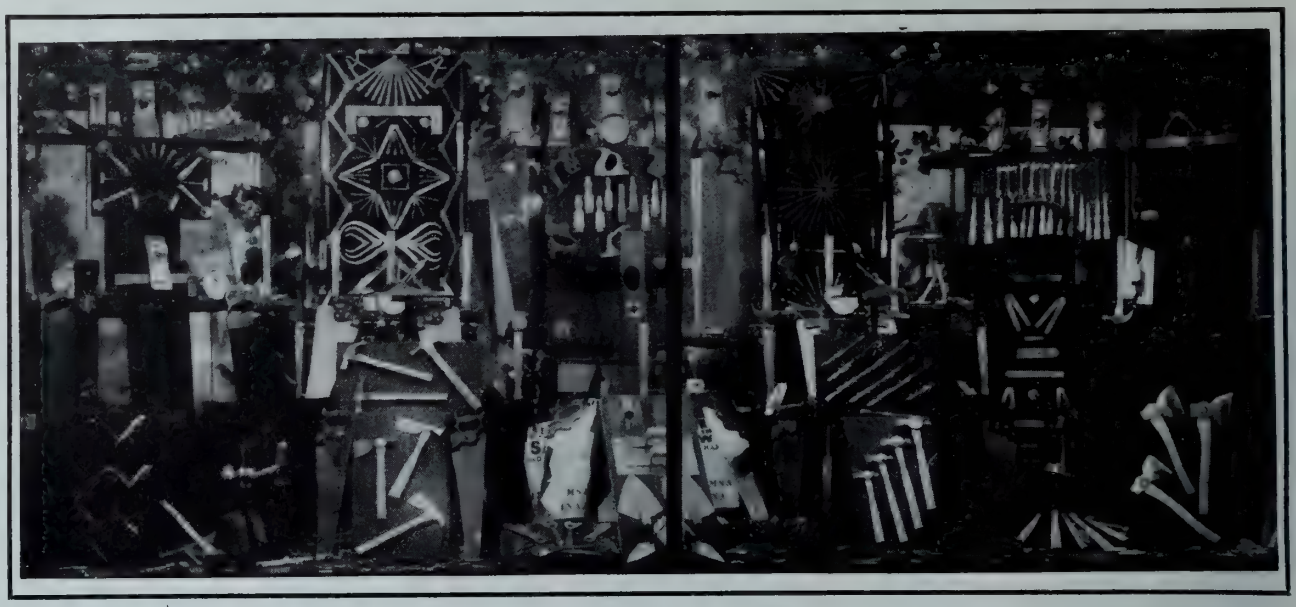
"Old English Gray Ware"

The Standard by Which All Gray Ware is Judged

Genuine "Old English Gray Ware" for years imported by the Canadian Trade, is now being manufactured from the raw sheet steel to the finished utensil right here in Canada. Absolutely all the "Old English Gray Ware" sold in Canada, is Canadian made—a home product, saving you all duty formerly paid, and providing work for Canadian workmen.

Our factory, which started operations in Canada a little over a year ago, is manufacturing a full line of this beautiful and durable gray enameled kitchen ware.



As quality stands paramount in its production, it costs more than some other lines, but is well worth it. You make your money in turn-overs—not in hang-overs. The rapid selling qualities of "Old English Gray Ware" have oftentimes been compared, in actual department store sales with other lines of gray ware, and on every occasion "Old English Gray Ware" has proven the quickest selling line.

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

HARDWARE AND METAL

IS your store in a railroad town? Do you realize there's a chance here to do a thriving business in Carhartt Gloves by selling them to trainmen? Nearly all the men on the road wear Carhartt Overalls and Carhartt Gloves, and if the article bears the well-known heart-shaped brand—that's all they want to know.

But Carhartt Gloves are by no means confined to railroaders; we have them for drivers, motorists, gardeners, engineers, firemen — for every kind of job where gloves are used. Get a sample assortment; display them in the store and in the windows along with tools, lanterns, etc. Ready sales and liberal profits make Carhartt Gloves a highly desirable addition to any hardwareman's stock.

The Dawn of the "Electrical Era"

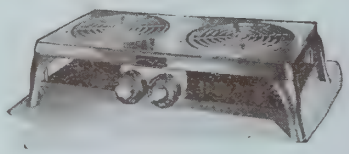
Ontario Soon to Have $212,000,000 Investment in Electrical Power Generation Equipment—Development of Canada's Great National Heritage Will Help a Quick Return to Normal—Opening Up the Rural Districts

A typical display of electric lighting fixtures and appliances attractively shown in a Canadian hardware store. An extensive and well-assorted stock placed where customers may handle the goods without feeling under obligation to buy has helped this merchant to achieve his present large business in this line.

IN predicting renewed activity on a large scale in the hardware business of the near future one has in mind the fact that the great "electrical era" is just now dawning. Much of the transformation in home comforts, labor-saving devices, transportation and other important departments of our national life during the past decade has been due to the development of electricity and yet we are told by electrical engineers that the application of electric power to our various activities has only commenced.

Outstanding authorities on world events state that Canada is in good position for a quick return to normal business conditions largely through the medium of the great natural resources which are awaiting development. One of Canada's greatest national heritages is her unbounded facilities for the development of electric power. Her waterways scattered through many miles of virgin territory represent millions of horsepower of electricity, as yet unharnessed. Existing sources of power are in the meantime being further developed to meet the ever-increasing requirements of electric power. An indication of the progress being made is the work proceeding at Niagara Falls providing for a large increase in the available power from that source.

$212,000,000 for Electrical Development



It is an evidence of the future in store for electricity to note that by the end of 1922 the people of Ontario will have an investment of $212,000,000 in power generating plants and transmission and distributing systems. Over a million electrical horsepower will be available. Were it necessary to produce this energy by the use of coal it would cost $36,000,000 for generation alone, the actual cost by waterpower will be about $10,000,000. Thus it is evident that from the standpoint of cost alone, to say nothing of rapidly exhausting our coal supplies by the use of the former plan, electrical power is much cheaper.

Reaching the Rural Districts

This development is but a sample of the development proceeding in all the provinces of Canada. Transmission lines are being rapidly pushed into the rural districts carrying power to the farmers and providing them with many of the comforts of life formerly identified only with city life. This is having a marked effect upon the development of the country for no nation so agriculturally important as Canada can afford to have its rural inhabitants migrate to the city because of improved living conditions.

Hardware merchants in all parts of Canada are finding an increasing sale for electric lighting fixtures and appliances which add to the comfort of the home and save labor. Economy is a watchword of growing importance and with the extension of electrical power and a consequent lessening of cost the real economy in using the many electrical appliances now available, as compared with the old style laborious methods, will be one of the strongest factors in establishing electrical goods as a national necessity in every home.

National Two-Burner Hot Plates

The Two-Burner Hot Plate has large cooking capacity constructed with heavier elements than the single disc. Extremely handy in small homes, or in schools where Domestic Science is taught.

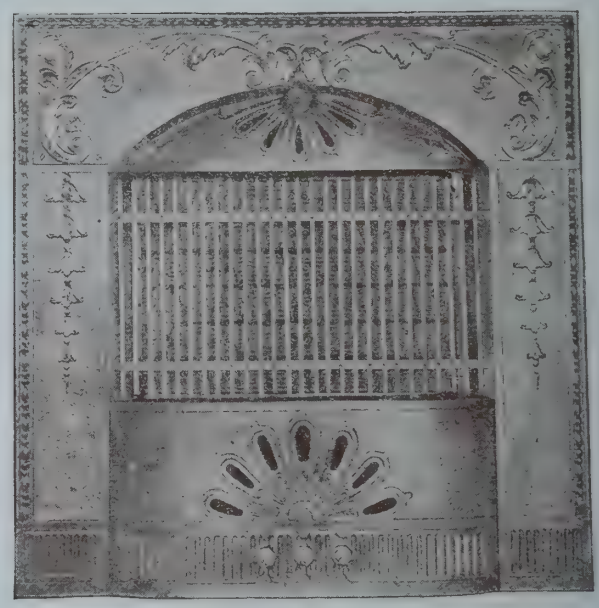
The convenience of this stove is readily apparent—Compact, neat and attractive. Made in two finishes, nickel-plated and black Japan.

National One-Burner Hot Plates

These stoves are indispensable for light housekeeping and also for supplementing a Range where greater capacity is required. They are also suitable for Domestic Science Classrooms. Made in two finishes: nickel-plated and black Japan, neat and compact; and easily controlled by a three-heat switch.

National E05 Range

National ranges were thoroughly tested for years before they were perfected and put on the market. When an elevated oven is desired our model E05 fills the requirements perfectly and capably. This range occupies little space.



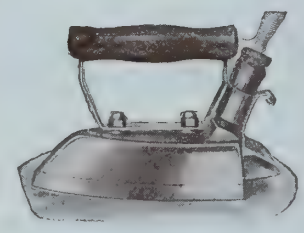
National Air Heater

To supplement the heat in a room or for heating small rooms this little Heater, which is one of the most popular types we make, will be found indispensable. It is built of the best materials and, thereby will give years of service.

660 and 880 watts capacity, 2 finishes—Japan with nickel-plated ends and all nickel.

The New National Electric MANTLE-TYPE GRATE

is the last word in an efficient as well as ornamental grate.



Made in Two Standard Sizes:
24 x 30—2,000 Watts capacity, 3 heats.
30 x 30—3,000 Watts capacity, 3 heats.
Finished in any Standard Finish.

THE NATIONAL ELECTRIC

TORONTO

627 Vancouver Block, Vancouver, B.C. **702 Confederation Life**

National Irons

National Electric Irons are the highest quality irons manufactured, being the result of many years' experiment to develop a perfectly balanced and evenly heated iron.

National Tailor Iron

The National Electric Tailor Iron embodies the highest type of construction. Its superior qualities are recognized by the largest manufacturers in Canada, who are using hundreds of our irons. Supplied with Stand and 6 ft. Heater Cord with Attachment Plugs complete. Made in several sizes 12 to 22 lbs., also machine type.

National Toasters

The National Electric Toaster is made of pressed steel, highly polished and nickel-plated, is very light and neat in appearance, and the operating cost is exceedingly low. There are no places for crumbs to lodge; toast may be kept warm on top while more is being made, or a small kettle can be placed thereon. It is supplied with a 6 ft. Heater Cord and Attachment Plugs complete.

If interested tear out this page and place with letters to be answered.

National ELECTRIC

Water Heater

For heating water in the kitchen tank, the National Electric Circulation Water Heater is a convenience which will be appreciated in any household. Several years of experimenting were required to obtain this highly efficient and reliable heater.

Made in five sizes, from 660 to 3,000 watts; 110 or 220 volts.

National ELECTRIC

Electric Heatray

There's never an uncomfortable corner in the home where there's a Heatray. Instantaneous heat where and when you want it. The same electric service that lights your house runs the Heatray. Attach the plug, set it facing the uncomfortable spot and be comfortable. The few cents extra which the Heatray will add to your light bill will never be noticed, but the comfort it will bring will be a constant source of surprise.

The New National ELECTRIC Electric OPEN-HEARTH GRATE

is now taking the place of the ancient odorous gas and dirty coal grates.

It can be used in open hearths or other mantels. Is massive in construction. Elegant in appearance and efficient.

It consumes 2,000 Watts and is controlled by 2 Tumbler Switches, 2 Heats.

Finished in any Standard Finish.

Size: Width, 30″; Height, 22″; Depth, 8″.

HEATING CO., LIMITED

National ELECTRIC

Ranges

A4 Range

No other invention of modern times surpasses the electric range. Cooking with a National Range is surprisingly economical, due to the scientific construction and control. The A4 range is suitable for large families. It is built very substantially of high quality metals and will give years of service.

National ELECTRIC

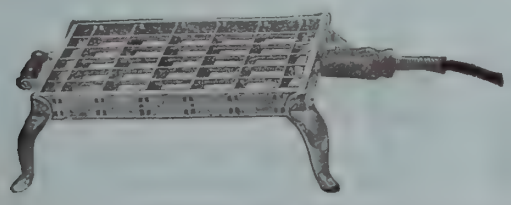
Disc Stoves

These disc stoves are very useful and convenient. The 5″ and 6″ Disc Stoves are supplied with 6 ft. Heater Cord and Plugs complete. The 8″ Disc Stove is supplied with cord and Heater Plug but not Attachment Plug.

National ELECTRIC

C6 Range

C6



Every National Range is thoroughly tested before it leaves the factory and each of the Elements carry a one year guarantee. Every precaution is taken to make National Ranges strong, safe, sanitary and efficient; built up to a standard, not down to a price. For those desiring a cabinet range our Model C6 will be found very suitable.

National Ranges are made in many styles and sizes. There is a National Range for every requirement. Write for special Range booklet.

National ELECTRIC

Toaster Stove

Nearly every kind of simple cooking may be done, with absolute perfection, on the National Toaster Stove. It has a hundred uses in every home. It is compact and attractive. Easily kept clean owing to removable bottom.

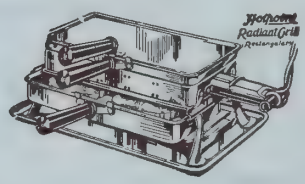
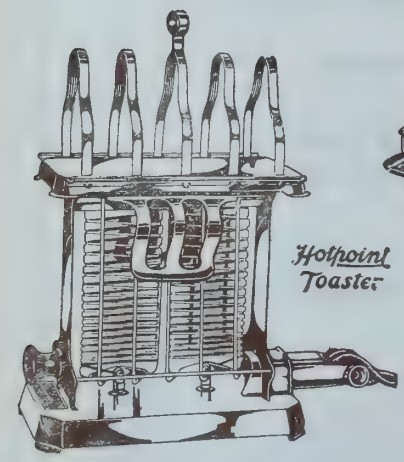
'RICE LEWIS' NEWS

Who said the Hardware Dealers had no right to sell Electric Lines?



Electric Heaters in all styles and makes



Everything in Electric Toasters, Irons, etc.

Vacuum Cleaners
"OHIO"
"CADILLAC"

We sell "AJAX" and "CONDOR" Tungsten and Nitrogen Lamps.

LONG before there was business enough to support exclusive electric shops in the towns and cities of Canada the hardware dealers pioneered the sale of electric appliances and paved the way for one of the best departments in their stores.

The aggressiveness of hardware jobbers in laying out good electric departments and giving A-1 service has resulted in a big turnover in electric lines through the hardware trade.

Our aim is to give service.

We carry a complete stock of "Hotpoint," "Canadian Beauty," "National" and "Radiant" appliances, including Irons, Toasters, Grills, Percolators, etc., also Majestic, National and Hotpoint Heaters, and "Ohio" and "Cadillac" Vacuum Cleaners. Get your Fall requirements of Heaters booked.

Ask the "Rice Lewis" Man or send us your requirements direct.

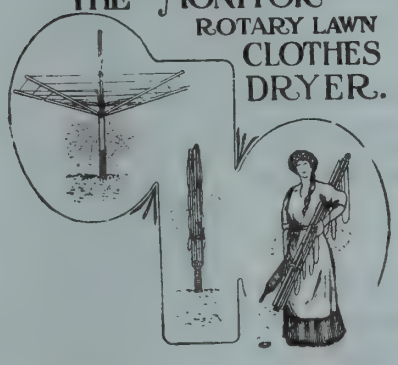
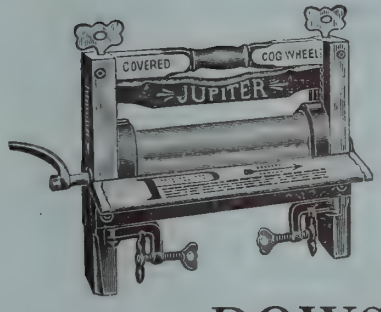
"Seafoam" Electric Washer

THERE IS NO DULL SEASON FOR DOWSWELL PRODUCTS



The BICYCLE BENCH Wringer, which accommodates two tubs, has steel ball bearings, covered cog wheels and reversible water board which conducts water into either tub. The frame is of seasoned hard maple which will not warp or crack.

Extra High Grade Rolls, warranted 3 years in family use.



A most complete wringing outfit.

THE MONITOR ROTARY LAWN CLOTHES DRYER.

The MONITOR ROTARY LAWN CLOTHES DRYER is an extremely handy device that saves many steps and much hard labor carrying a heavy clothes basket around the yard through wet and snow. It can be carried out, set up, and taken in by a woman, as it is light in weight though very strong. Hangs a large assorted wash. When taken down leaves the lawn level and clear, stores in a small space, and lines are always clean.

7-ft. arms—150-ft. line.

The JUPITER Wringer, for round or square tubs, is fitted with highest grade rolls, 11 x 1¾ ins., warranted 5 years in family use; steel ball bearings and covered cog wheels. It is the highest grade obtainable, and on account of its long wearing and easy running qualities is the most economical.

Sales That Grow

THAT'S the kind you want, isn't it? Price low—quality high—good profits—a business builder. And that's the kind you have with Miss Simplicity.

The housewife who possesses a Miss Simplicity is so proud of it, so pleased with the thorough way it "dollies out the dirt," that she is a live advertisement, boosting all the time, making more prospects for you to turn into customers.

With a Miss Simplicity on display in your store you can stage a demonstration more convincing than a hundred talks; more practical and more productive of business than any number of suggestions. Prospective customers can actually test the ease and simplicity of operation and see the handsome appearance and careful workmanship of this electric clothes washer.

The selling price of Miss Simplicity is positively right—quite low and well within the reach of the average purse—yet there is a liberal profit for you every time.

And our guarantee? Why, naturally we are behind our product to the very hilt. Study the points enumerated on the opposite page and you will soon see why. You really should write for our dealer terms. We know that they will interest you as they have many others.

Our motto is "Efficient Service" and we give you a liberal guarantee that enables you in turn to guarantee perfect satisfaction to your customers. We also give prompt shipment of orders.

With your first order we will send you a supply of attractive, four-color folders which explain in convincing language the merits of Miss Simplicity. We will imprint your own name and address if you desire.

If interested tear out this page and place with letters to be answered.

You Can Appreciate These Facts

Though Miss Simplicity sells at a strictly low figure, it is mechanically perfect and will not only do the work it is intended to do, but will give a lifetime service.

Put one on display in your store, try it out yourself and you will find that Miss Simplicity has all the good, mechanical features of a satisfactory electric washer. Here are ten of the features that will surely appeal to you:—

1—A simple screw-plug fits any ordinary lighting socket—perfect connection that will not blow a 10-ampere fuse.

2—All gears are machine cut or accurately moulded. Noise and friction eliminated, insuring long service and quiet running.

3—The self-adjusting, hardwood dolly has a patent cap that protects the clothes from any possible damage.

4—Large, substantial tub of first quality, Louisiana Red Cypress —"The wood eternal"— retains all the heat.

5—Simple belt-tightener and spring cushion for the motor. Belt trouble entirely avoided.

6—Very easy to move—the castors are extra large and roller-bearing.

7—Miss Simplicity is controlled by a single current switch. This switch and the connecting lever of the wringer are close together and within instant arm's reach.

8—Reversible wringer with extra long rollers of best quality rubber. A double, positive, quick-acting release prevents accident or injury to clothes.

9—All metal parts are aluminum painted, rust-proof.

10—Over-size, quarter H.P., water-proof and trouble-proof motor. Power to spare but no power wasted.

Miss Simplicity is well worthy of your interest. It is as perfect as honest Canadian effort and good Canadian capital can make it. Get our dealer offer now. We promise you the keenest prices.

1900
Wood Tub
Electric Washer

Money-Making Opportunities like this do not come to you every day

WHILE our "1900" Cataract is the leader of the "1900" line, merchants handling our Washers find it a fine thing to be able to offer a lower priced machine that is also operated by electricity.

The "1900" Wood Tub Electric is one they can strongly recommend to those not feeling able to pay the price of the "Cataract."

The design of our Wood Tub Electric Washer is up-to-date; and its washing action far superior to that of the "dolly" type. The tub is of Virginia Cedar—which we know to be superior to any other wood for Washing Machines—a fact on which we have satisfied ourselves, as the result of 20 years' experience in making the leading hand-operated machine, the "1900 Gravity."

The "1900" Wood Tub Electric is very durable—all the materials used being of a quality in keeping with the tub itself; and it is equipped with a reliable "swing" wringer.

This machine offers every chance for quick turnover and good profit.

It is but one of five types of Washers that we make—a quality line throughout; and embracing every type of machine that will successfully wash clothes.

Write for particulars.

FLOOR COVERINGS

Comprising Linoleum, Floor Oilcloth, Feltol Also Linoleum and Floor Oilcloth Rugs

Many hardware stores throughout the country find it profitable to handle floor coverings in conjunction with their other house-furnishings.

LINOLEUM

FLOOR OILCLOTH AND FELTOL

floor coverings, as well as linoleum and floor oilcloth, rugs and stove mats, suitable for kitchen or other rooms, are being more generally used throughout the country. Available in many pretty patterns, they are designed to meet every requirement for kitchen, pantry, dining-room, bedroom, bathroom, hall, etc.

Piece goods are supplied in rolls 25 to 30 yards long and two to four yards wide.

Linoleum and Floor Oilcloth Rugs and Stove Mats, suitable for kitchen and other rooms, are made in the following sizes:

FLOOR OILCLOTH
Mats and Rugs

3	feet	x	3	feet
3	feet	x	4½	feet
4½	feet	x	6	feet
4½	feet	x	7½	feet
6	feet	x	9	feet
7½	feet	x	9	feet
7½	feet	x	10½	feet

LINOLEUM RUGS

6	feet	x	9	feet
7½	feet	x	9	feet
9	feet	x	9	feet
9	feet	x	10½	feet
9	feet	x	12	feet
10½	feet	x	12	feet
12	feet	x	12	feet

NOTE—Our Pattern Booklet, in Color, descriptive of nearly 150 patterns, will be forwarded on request.

Large rugs, 6 feet x 9 feet and over, are packed individually in cartons. Smaller sizes in rolls containing six—all of same pattern.

IMPORTANT: These floor coverings are Made-in-Canada to withstand Canadian climatic conditions by Canadian workmen. When you buy and sell these floor coverings you are buying the best, and, in addition, helping provide uninterrupted employment for these workmen. SPECIFY OUR MADE-IN-CANADA GOODS.

THIS IS OUR NEW BURLAP SALES BOOSTER

A New Silent Partner For the Hardware Merchant

Decorative Wall Burlaps, while used for many years as an interior wall finish, are increasing in demand throughout Canada. The Hardware Merchant is the logical distributor and we are making it easier for him to handle the line and feature it.

Your little "Silent Partner"—the "Burlap Sales Booster"—is all ready for you in a strong mailing envelope, and will be mailed the same day we hear from you. Simply detach the coupon at the foot of this page and send it to us in a sealed envelope and your "Burlap Sales Booster" will go forward promptly. Then place it on your counter and let it start working for you.

You may also want samples of Decorative Wall Burlaps in the three Oil-Coated shades, white, drab and green. This will enable you to show the customer the product as he receives it from you—ready for applying to wall the same as wall paper, and for painting any desired shade. It is now high time to plan for the building season. By the time stock reaches you many will have planned to build—some to repair. By having the stock ready when the buyer is minded to purchase, you reap the advantage. A small outlay will enable you to carry an ample stock of Decorative Wall Burlaps.

MAKE UP A STARTING ORDER TO-DAY AND SEND FOR YOUR BURLAP SALES BOOSTER

DOMINION OILCLOTH & LINOLEUM CO., LTD., Montreal, Canada.

Please send me my "Burlap Sales Booster" by first mail. Also indicate how I may increase my sales by selling this line. (Indicate if you desire sample book).

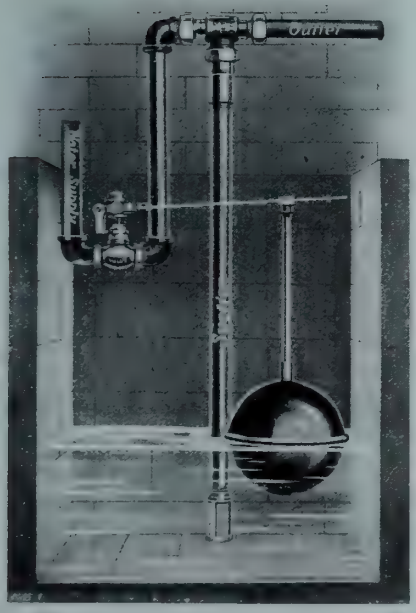
Just a Minute!

That's all it takes to get hot water with



THE STACK HEATER

The selling points of Stack Heaters are very convincing. It is not hard to close sales when you can open the door and show your customer the simple, easily understood advantages of design and construction in these reliable heaters.

The Stack heats water in one minute; heats 5 gallons of water 3 minutes quicker than the average heater. It will raise the temperature of 5 gallons of water 28 degrees higher in 10 minutes than the average heater, also. In fact, Stack Heaters are 15 per cent. more efficient, all around.

The Morrison Cellar Drainer keeps cellars dry in winter, spring, or any other time. For the merchant it prevents deterioration of his stock, if stored in the cellar. It soon pays for itself by this saving. For re-sale it's a definite, positive help to your business. It is simple, easily understood and efficient; operates entirely automatically at 10 lbs., or higher, water pressure.

Morrison Gauges, Morrison Valves, and our many other products, are sources of good sales volume and quick turnover—investigate.

Canada's Famous "Maple Leaf Brands" of Brantford Binder Twine

ARE the recognized "TOP NOTCHERS" in twine products in all parts of the world. If this were a mere statement it would count for nothing, but behind it are the hundreds of thousands of dealers and grain growers who testify to the fact that the "MAPLE LEAF" BRANDS are positively unequalled for LENGTH, STRENGTH, EVENNESS, GENERAL APPEARANCE AND FULL VALUE AND SATISFACTION FOR THE MONEY. Further, practically half a century of experience is behind our products, during which time it has been our constant aim not only to seek the confidence and good-will of our customers by honest and fair business methods, but to maintain and improve the best known devices for the production of binder twines of the highest standard of quality. As proof that our ambition has been fully realized, we submit the enormous growth and development of our business in open competition with the world's Binder Twine manufacturers, necessitating factory extensions from time to time, until to-day we have an annual output of 10,000 tons, which is the largest of any Canadian Factory, and further extensions will be required to take care of the rapidly increasing demand for our quality. Large buyers in all grain-growing countries where Brantford Binder Twines have been introduced, have found them the most satisfactory under all conditions, and if you are not already familiar with this fact it will pay you to get acquainted with us and our line. We are prepared to look after your requirements in binder twine for quantities large or small. Write us for samples and quotations. We invite comparison with other twines. We have thrived on competition because we have excelled in quality. We have specialized on binder twines and made them our exclusive study. We submit all fibres to a special treatment to make them insect proof.

YOUR ENQUIRIES WILL RECEIVE OUR MOST PROMPT ATTENTION — ROPE AND CORDAGE OF ALL KINDS.

Gillette

The Bulldog

The Aristocrat

The Combination

The man who walks into your store to buy a Gillette Safety Razor has formed ideas of more comfortable shaving. He has been "sold" on the idea of No Stropping —No Honing.

If you can sell him the razor he asks for, you bring his vision of better shaving to reality and you make a friend.

You are in business for YOURSELF, and not so much for to-day as for to-morrow and the days to come. Consider yourself by considering your customers first. By realizing their expectations and delivering the article that will fulfill their visions, you build up GOOD WILL—that one great thing on which every business is dependent. A pleased customer comes back to you not only for his Gillette blades but also for everything else in your line.

Under varying conditions, through all seasons, before the war, through the war and after the war, each year's sales of the Gillette Safety Razors and blades have steadily increased. To-day, the Gillette Safety Razor is endorsed by twenty million men, and in a time when careful buying is the right policy, it stands out as an article on which it is wise to stock up and carry a complete assortment.

Hardware and Metal

TORONTO, MARCH 19, 1921

"The Best is Yet to Come"

Canada's National Hardware Weekly

Published Every Saturday Since 1888

SURVEYING development of the past year and with more particular regard to the period since the turn of the year, the opinions of manufacturers, wholesalers and retailers as to the outlook for the coming spring and summer are summarized in the above words. In giving this opinion it is felt that the "best" can only be achieved by making use of every possible factor in efficient merchandising.

A distinctly improved sentiment since January and particularly noticeable in recent weeks is reported, and while no immediate return to the great activity of 1919 is anticipated, it is felt that there will be considerable improvement, on a gradual scale, during the present year. Hardware has not been burdened with the great reductions of some other commodities, and while recent buying has been light, it is noted that repeat orders are forthcoming frequently, and with a good sorting business it is thought that, in at least some hardware lines, business will be equally as good as at this time last year. In paints and varnishes this tendency is particularly noticeable, and last year was the biggest yet in these lines.

Much hinges on the expected revival of building in Canada and it is thought that with ample money available and an ample demand existing the decision that nothing can be gained from further postponement is soon expected to be made.

Hardware merchants emphasize the importance of confidence in the gradual readjustment of business to new conditions. Suggested methods of increasing turnover during this period include the following—more personal contact with customers, more advertising, addition of new lines, close study of stocks, more attention to elimination of dead lines, maintaining well-assorted stock of lines in demand, close watching of credit accounts and advice to customers not to buy above their means, but to buy necessities.

This is the 33rd Annual Spring Number of Hardware and Metal. In the following pages will be found many useful suggestions for business during times such as are now prevailing. Close attention to the trade newspaper was advocated by the president of the Ontario Retail Hardware Association at its recent convention, and it is felt that the suggestions given in this issue will justify frequent reference during the spring and summer months.

Active Sorting Business in Hardware

What Various Hardware Wholesalers and Manufacturers Think of the Business Outlook—Light Buying Continues But Repeat Orders Forthcoming—Active Sorting Business Will Bring Total Volume Nearly Equal to Last Year in at Least Some Lines

FOLLOWING are a number of opinions expressed to Hardware and Metal by hardware manufacturers and wholesalers in all parts of Canada, concerning business conditions and the outlook for the spring and summer months:

Expect Good Sorting Trade

"When we refer back to our sales for the first two months of the present year, business has offered nothing that would tend to show that abnormal conditions exist, or that we are experiencing a very dull period," said Geo. C. Davis, manager Frothingham & Workman, Ltd., wholesale hardware, Montreal. "We are undergoing a period of readjustment, with the volume of business, in some lines, not as great as the few years previous, but we must not forget that conditions did then exist, through the winter months, which benefited us all more or less. January and February, 1918, 1919 and 1920 were active months because we all, from the consumer to the manufacturer, were eager to obtain goods that had shown a scarcity during war years.

"The trend during spring and summer months promises well from the outlook of the hardware trade and we should enjoy a good sorting business. We have not been burdened by great reductions on our stocks as have other commodities and I do not believe we will be faced by any great reductions in the coming season. In fact, on many of the leading lines, we have been assured no declines will be made for spring deliveries and even on some principal fall booking lines. Shortages on many commodities are more liable to be made manifest again when the demand increases."

Edward Goodwill, Vice-President, Thos. Davidson Mfg. Co., Ltd., Montreal

"Business has been light during January and February this year. One of the direct causes for this is that the retail dealer has curtailed his buying, anticipating lower prices. To-day he finds the stock on his shelves depleted.

"We do not anticipate any reduction in prices for at least the first half of the year, except possibly on odd lines here and there. The present prices on our products were made last August. From that period until the end of the year productive costs increased. We did not advance our selling prices, but maintained these prices with a less profit on our output. So that with the slight reductions made on our raw materials since the beginning of this year we are only back at the production cost of August last.

"The improvement shown in the last few weeks gives us the assurance that a good business year may be looked for, especially so when we bear in mind the condition of our country financially and with its productive ability."

Considerable Improvement This Year

"We do not look for any immediate return of such commercial activity as has existed for the past few years, but we do feel that business will improve very considerably as the year progresses. In fact in our own experience we have noted a much better sentiment since the first of the year," said W. Beverley Robinson, president, B. & S. H. Thompson & Co., Montreal.

"Steel prices have been cut in some quarters, but we understand that our principals—the United States Steel Products Company—intend to maintain their present schedule for the time being. I recently visited the important Canadian cities with E. P. Thomas, president of the United States Steel Products Company. We were both much impressed by the reports which we received of improved business conditions from practically all our customers upon whom we called.

"I think it is very generally felt that construction, which is so urgently required, must be proceeded with during the present year, and if so, it should have a very beneficial effect upon general business conditions."

Normal Demand for Brushes

"The start of the year 1921 has shown a decidedly favorable tendency in the demand for brushes, which has been quite normal. We have not experienced the depression as reported in many lines and it is our opinion that our experience is quite general with commodity lines, such as are handled by the hardware dealer," said C. M. Farringer, the Boeckh Co., Toronto.

"We have every confidence in what the near future has in store for our lines and the best example we can cite as to our optimism is the fact that we have not laid off any of our hands. The prospect of an early spring is conceded as the forerunner of a good paint-up and clean-up season, which we feel assured is at hand.

"The hardware dealer who is ready to cash in on this Spring's opportunities will undoubtedly find a nice balance on the right side of his profit and loss account."

Roofings, Building Paper

"The roofing felt and building paper demand has been light so far this year, notwithstanding a very important reduction in prices was put into effect at the end of last year," said D. J. Munn, president, Alex. McArthur & Co., Ltd., Montreal.

"Confidence only is required to bring activity to the building trade. There is ample money available and ample demand for the erection of all classes of buildings, especially of the residential class.

"Waiting on the probability of lower costs is the chief cause of inactivity, but there is much evidence that a decision to go ahead is nearly at hand. And there is every indication of a very great improvement in this line to begin this month."

No Radical Slumps

"We are emerging from the painful several months' period between boom, war and post-war conditions to the beginning of the normal, natural, healthy plane which we feel sure March and April will usher in. We are simply reconstructing our minds from the dizzy, giddy "jazz" period we have been through to normalcy. Dealers' stocks are low in our lines and we are confident regarding the next few months that there will be no radical slumps and no further semblance to panicky conditions."—H. C. Bonney, general manager, the Barrett Co., Ltd., Montreal.

Plans for Increasing Hardware Turnover

More Advertising, Use of Circular Letters, More Individual Effort in Personal Contact With Customers, Adding New Lines, Are Means Suggested by Various Hardware Merchants to Encourage Business—The Business Outlook—Replacement Costs Higher in Some Cases

INFORMATION has been gathered by Hardware and Metal from a representative group of hardware merchants in all parts of Canada as to the present condition of hardware stocks, compared with a year ago, as to any heavy stocks being carried of certain lines, as to the effect of unemployment, as to the policy being followed in view of price declines, as to any signs of a renewal of business activity, as to prospects for future business, means of increasing turnover, and as to whether or not much building is contemplated in the various districts.

There is apparently little uniformity in regard to stocks carried. The majority of merchants report that stocks are lighter, and these range from 15 per cent. less to one-third less. Almost an equal number report stocks are heavier, these ranging from 10 per cent. to one-third greater. A number report that stocks are in smaller quantity but greater in value. In a few other cases stocks are said to be practically equal in volume with those on hand last year at this time.

Lines specified as being the ones which are heavily stocked include: tools, cutlery, prepared paints, builders' hardware, and blacksmith's supplies, oils and greases, ranges, heating stoves (due to the mild winter), foot warmers and sporting goods. Varying conditions in certain parts of the country explain why these lines are more heavily stocked in certain stores now than in others.

Concentrate on Fast Moving Stocks

In speaking of the condition of their stock some merchants state that they now have a clean, well assorted stock, as result of special selling effort on usually slow moving lines. Others report that they are cutting down on heavy goods and concentrating on the fast movers.

Again in regard to the question of unemployment and its effect upon trade opinion is nearly divided. There is a slight majority of those reporting that unemployment has had no effect. Particularly Western dealers in rural districts discount the effect of this. One merchant states that sales of furniture and factory supplies have suffered from this cause, another reports that sales of paints and household hardware have been stimulated due to unemployment.

The policy being followed in view of declining prices in hardware seems unanimously to be one favoring buying in smaller quantities, keeping a close watch to see which lines move most readily, keeping a good assortment so as to take advantage of all possible trade, and follow the prices down and re-marking goods on hand as soon as a decline is noted.

As to plans for increasing turnover during the readjustment period a number of suggestions are made. Some merchants advocate special sales, others recommend preaching optimism and advise others not to get excited nor to "give away" their goods. Other suggestions are to do more advertising, to send out circular letters, to employ more individual effort, add new lines, to use more personal letters on customers, to spend more time in personal contact with customers, to keep up the fast moving stock and eliminate the dead stock. One merchant who made the suggestion to add new lines states that he has recently added crockery, beds and mattresses.

A small majority of replies do not mention that there are any definite signs of an early increase in business in their districts though nearly an equal number report that there are such signs and some others think the outlook is indefinite. Some merchants are of the opinion that further declines are necessary before buying will be resumed on a normal scale. Others report business slowly improving, that business has improved noticeably since the beginning of the year, and others expect an early revival of building will help matters.

Outlook is Good

Opinion is practically unanimous, that the outlook for business is reassuring. Practically every merchant replied that the outlook was better than ever. Some of the statements made were as follows:—"A good year for turnover but profits will be smaller;" "depends on grain prices;" "farmers' purchasing power is not so great;" "first six months may be rather slow;" "summer tourist trade is expected to be good."

An equal number of merchants report "yes" and "no" on the question of building contemplated, and it is evident that opinion is somewhat divided on this subject. Some merchants state that there will be considerable public building done but little private construction.

A number of the replies setting forth some helpful information are reprinted as follows:—

Urges Use of Personal Letters

Box Bros. Ltd., Souris, Man., are using more personal letters on customers in connection with the sale of seasonable goods. Incorporated in these letters is advice to those suffering from financial difficulties, to buy only what they can pay for and to refrain from increasing their liability.

This firm is reducing prices in line with the market and finds that by keeping stocks low in volume but well assorted, they can follow this policy without much loss, while at the same time retaining the confidence of the customers. A policy of light, well assorted stocks and close buying is recommended.

Unemployment Helps Paint and Household Hardware

That unemployment has helped sales of paint and household hardware is the statement of the **Mills Hardware Co., Hamilton, Ont.** In regard to the policy followed in view of present price declines this firm states "on account of our low stock we are able to sell at new prices." It is stated that no decline in business activity has been experienced and the outlook is good. As to plans for increasing turnover the suggestion is made that by eliminating dead stock the good selling lines turn themselves.

Improvement with New Year

I. W. Bennett & Son, Ltd., Gananoque, Ont., report that since the beginning of this year business conditions have certainly improved, and unbounded confidence is expressed in the future. Unemployment is said to have had little effect on business, and price declines in hardware are thought by this firm to have been so light as to be hardly worth mention. A 15 per cent. lighter stock is being carried by this firm than a year ago.

Have the Largest Staff in History of Store

Dealing with conditions in **London, Ont., Cowan Hardware Co.** states: "London is in a peculiar situation as regards trade and it has always been so in our experience. We do not have any great booms but a steady growth, consequently when a slump comes we are never so badly affected as communities which have had more or less of a mushroom growth. While there is no doubt some unemployment here it is scarcely noticeable and while Toronto and other cities are spending huge sums for relief we have, fortunately, had nothing of this sort to contend with here. We have had very few applications for positions in our store, in fact we looked for a very great many and have been very agreeably disappointed. We have the largest staff at the present time that we have ever had and business early this year has justified us in keeping them on. In fact, if business increases as it always has done in the spring, we will have to increase our staff fully 25 per cent.

"As to plans for increasing turnover, our idea is to increase our advertising and by offering tempting bargains, judiciously, to keep up our clientele, at the same time increasing the efficiency of our service and strengthening any weak links that may exist."

Going Down Other Side

"We are going down the other side of the hill of high prices and we are dropping accordingly. We put prices up when they were on the increase and made money so that we can afford to lose a little now by marking prices down. We believe it is wise to go slow and buy with caution. Big orders are out of the question. There will be considerable public building here this year but private house building will be slow. We need the houses but lumber, labor and nearly everything else which enters into building must drop before building can be done in safety, having regard for future values." **A Brantford hardware merchant.**

Banks to Blame

"These big sales are hurting business. The banks and newspapers are to blame to a great extent. Newspapers are talking great reductions and naturally the public want lower prices. The banks are pushing their customers too hard. They are always saying farmers can have all the money they need to run their business but they will not let them have money in this district, even on A1 security. My outstanding accounts are double what they were last year and it is almost impossible to get any money in," says **W. E. N. King, Neepawa, Man.,** who states that his stock is one-third larger than last year and who advocates close relations with customers as a means of increasing business.

Need No Permit as Owner of Firearms

Hardware Merchants Carrying Stock of Rifles, Guns, Revolvers, etc., Do Not Require Permit As Owners of Such Weapons—Technicality in the Recent Legislation

AN enquiry was received by Hardware and Metal from Macnab & Sons, hardware merchants, Orillia, Ont., this week re the status of retail merchants under the part of the Criminal Code referring to the sale and ownership of firearms. The legislation as outlined in a recent issue of Hardware and Metal makes no exception of retail hardware merchants who are carrying a stock of firearms. It states that the wholesaler needs no permit to sell to the retailer and that the retailer must have a permit from the customer before he can sell a gun, but as far as the stock of rifles, revolvers, etc., which the merchant has in his store is concerned, a literal translation of the act would seem to class merchants as owners of these articles, for which they should have a permit as owners.

Taking this matter up with Superintendent Rogers, of the Ontario Provincial Police, Hardware and Metal was informed that it was not the intention of the act to compel retail merchants to have permits for stock of rifles, guns, revolvers and other weapons in the second class of offensive weapons. No permit is required for weapons such as knives and others in the first class when in the shop, warehouse, home, etc., but only when carried on the person.

It is evident from this authority that the retail hardware merchant must only be careful to see that the purchaser has a permit and to fulfil the other duties as outlined in the regulations, such as keeping record of the sale, permit, etc.

Costs More to Replace Some Lines

"The decline in hardware is very slight so far. In fact we find it is costing us more to replace some of the lines we are buying for spring. The high rate of exchange and the present price in the United States make expensive prices on goods from there. Now in order to sell goods it is necessary to slaughter prices and this does not seem like good business in view of the price we have to pay to replace them. This district has had four crop failures and conditions are worse here possibly than in most places. In all lines merchants are putting on sales. At least 85 per cent. of the stores recently had their windows decorated with large sales signs and the local paper was filled with large advertisements at discounts ranging from 25 per cent. to 50 per cent. The papers talked lower prices and the public almost refused to buy without they received a liberal discount. Our advertising in local papers lost its effect because we did not advertise cut prices. Lines advertised at regular prices did not sell.

"Local conditions have much to do with our policy, namely, lack of produce to sell and the reduction in price of wheat and cattle, which are our main commodities to sell. The reductions in these lines add to the delay on the part of the purchaser waiting for lower prices on hardware. Our stock is larger in dollars and quantity than last year and we have made no sacrifices as yet though all the other merchants have had sales and met with some success though the prices were below what the goods can be put back on the shelves for." **Hewitt & Black, Ltd., Medicine Hat, Alta.**

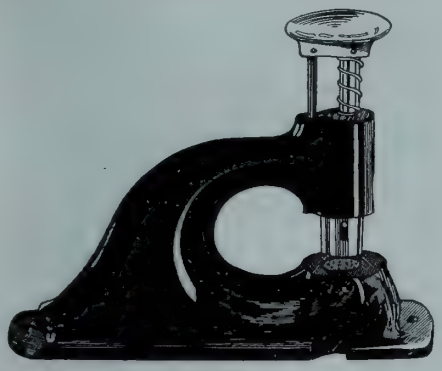
NEW ONTARIO REGULATIONS FOR HEATING OF APARTMENTS

The amendment to the Public Health Act of Ontario dealing with minimum temperature of apartments is as follows:—

87a.—(1) The owner of every apartment house, or other building, in which rooms or suites of rooms or apartments are rented, who has the control of the heating of such building and rents the same or any part thereof and undertakes to keep the same heated, shall keep the portions thereof so rented heated throughout to a temperature of not less than sixty-eight degrees Fahrenheit, between the first day of October in each year and the first day of June in the following year, and in default he shall be guilty of an offence and shall incur a penalty of not less than $50, and not more than $500;

(2) The medical officer of health and any sanitary inspector acting under the instructions of the medical officer of health or of the local board, may enter any such apartment house at any time for the purpose of seeing that the provisions of this section are complied with.

Does More Advertising



More display advertising is being done by **R. Morwood Co., Welland, Ont.,** to stimulate turnover. As to the trade outlook, this firm is of the opinion that much depends upon labor conditions. A well-assorted stock is being carried and prices are being met "square in the face."

Stamp Perforators Cost $77,695.75

Large Sum Secured From Retail Merchants in Return for Licenses Under Luxury Tax is Spent on Machines, Which Are Now Apparently Useless

AN echo of the luxury tax fiasco of the last budget brought down by the Federal Government is heard as a new program of taxation is about to be launched for the fiscal year of 1921. This has to do with the cost of operating the luxury tax.

In this connection it is noted that during the operation of the luxury tax from May 19 to December 20, 1920, stamp perforators to the number of 49,965 were purchased by the Government at a total cost of $77,695.75. The perforators were purchased from W. H. Banfield & Sons, Limited, Toronto, on terms f.o.b. factory Toronto, net cash 30 days from date of invoice. Price first 25,000, $2.00 each; on quantity in excess of 25,000, $1.55 each. Tenders were called for the supplying of these machines. The perforators were simply loaned to retail merchants and local Collectors of Inland Revenue throughout the country have been given instructions to recall the machines.

The stamp perforating machine "loaned" to retail merchants under the Luxury Tax in return for a fee of $2.00 for a license. Figures given herewith show what these machines, now apparently useless, have cost the merchants.

It is evident from the foregoing that the failure of the luxury tax to prove an acceptable and adequate medium of taxation, cost the people of Canada a large sum of money, part of which was made up by the $77,695.75 paid out for the perforators, which as a whole came in for very little use, and which were not used at all by some merchants, who were unacquainted with their use, and who therefore continued to send in their returns with copies of sales slips until the tax was repealed.

Retailers Paid for This

The money spent on perforators did not come directly out of the Government Treasury, for it will be remembered that while no direct charge was made to the retailers for the perforators, such merchants as were liable were compelled to pay a registration fee of $2 to secure a retailers' license, and it was affirmed by a Government official that this $2 was really to cover the cost of the perforator. A reference to the figures will indicate that the collection of $2 from each merchant would pay the cost of the machines and leave a little balance. Thus it looks as though the retailers were directly assessed for this fund, which purchased something which was impracticable and which has now been dispensed with. Apparently there is no further immediate use for these machines. Nothing has been said regarding their disposition.

Board of Commerce Cost $140,412.97

From Its Institution Up Until Now—No Members of Board at Present—Very Reduced Office Staff—Estimate of $1,000 for Expenses of Board This Year

"DID the work of the Board of Commerce justify its existence?" This has been a common question on the lips of hardware and other merchants for some time past.

In this connection it is interesting to note that the total cost to the Government of the Board of Commerce from its institution up until now has been $140,412.97.

As to the present personnel and status of the board it is noted that while the Board of Commerce under the statute still exists, the organization has been reduced to the following: the secretary, one stenographer and one messenger. There are said to be no official "members of the board."

Four enquiries have been held by the board since last session of Parliament. These included hearings in Montreal and Ottawa in regard to sugar prices, and two enquiries in Toronto dealing with price of milk and boots and shoes. Enquiries were in progress at various points with a view to formal hearing by the board, which ceased on resignation of the commissioners.

It is unlikely that the Board of Commerce will be active for at least another year. Last year's estimates set aside a sum of $124,000 for maintenance of the board, whereas this year there is a single estimate of $1,000. The latter sum will not go very far in carrying even the much reduced staff as outlined as still on the roll of the board.

CANCELITIS

SPEAKING on the subject of order cancellations, Thos. Jones, vice-president the Cowan Hardware Co., London, Ont., made the following statement to Hardware and Metal:—

"I feel very strongly on the subject of "Cancelitis" which has been receiving so much attention from some of the trade papers and magazines and I can feel this way with a clear conscience because our concern has not in one single instance cancelled an order in Canada and only two in the United States, which latter were caused by the extremely high rate of exchange.

"During the last four or five years it was undoubtedly a sellers' market and they took full advantage of it. I have been told repeatedly to order four times what we needed as we would be lucky if we got 25 per cent. of our order and even that much at no guaranteed time. We bought goods at one price and paid two, three and even four times as much when they were delivered. Letters to manufacturers were in many cases never answered and where they were, the replies were of an extremely independent character.

"All these things the buyers (who are really the little fellows compared with the manufacturers) had to put up with and to my mind it shows a very great lack of the sporting spirit on the part of these big fellows to squeal now when the buyer who is stocked up refuses to take in the balance of his back orders at present high prices, which he was urged to buy in order, as stated before, to get any goods at all."

Tax on Turnover Is Recommended

Never Before Has Industry Been Organized to a Point That Seems to Offer so Fair a Chance for the Success of This Plan of Taxation —A Tax Upon the Total or Gross Business Done by Every Person or Association of Persons

Written for Hardware and Metal by AUSTIN CAMPBELL, of The Financial Post

TAXATION is undoubtedly the most vital problem facing the world of commerce to-day. Out of the whirlwind of the war all nations and peoples have now to garner a harvest of heavy taxes. It is inevitable. We expected it, and must face it. National debts must be liquidated. Government credit must be maintained and interest payments met. In the words of Lincoln, "We must finish the work we are in and bind up the nation's wounds."

This all requires revenue, and revenue means taxation. It is, therefore, not a question of how little, it is rather a problem of devising ways and means to raise the required amount with least trouble and in the most equitable manner. To this problem Canadian merchants and business men are to-day giving most careful thought. Our immediate and future success and prosperity, they recognize, both as individuals and nations depends upon its adequate solution.

The Condition of Affairs

Burdened with a national debt of over two billion dollars, which it is estimated will require $225,000,000 annually to retire with interest at maturity; witnessing a reduction in customs receipts and a huge deficit in railway operation; recognizing that the much lauded business profits tax has failed of its hopes as a revenue producer—with these and other vital financial problems staring the country in the face, is it any wonder that economists are searching for the all-redeeming solution?

Indirect sources of revenue such as Excise, Postal Service and Customs cannot be expanded to cover the emergency. Indeed the last-named source is due, in 1921, to yield even less revenue than in previous years, if those who advocate downward tariff revisions have their way. By taxation alone, therefore, can the essential revenue be raised.

Ideal and perfect taxation is an admittedly human impossibility. Students of this most vexed problem unite in agreeing that the present system is "a cankering sore eating into the vitals of business." The Excess Profits Tax, they maintain, throttles industry and strangles initiative. The Income Tax practically exempts the little man and affects the wealthy, so that he withdraws both his capital and his brains from commerce. Where then lies the solution?

The Turnover Tax

Into this controversy the Gross Sales or Turnover Tax injects itself with a high hope. The idea is not new. It has been debated for centuries, but never before has industry been organized to a point that seems to offer so fair a chance for the success of this plan. William C. Cornwell, editor of Bache Review, expresses his view in the following forceful sentence:

"There is but one way out; one source untapped; one reservoir with almost unlimited supply; one method simple, smooth working, practicable and business like, instantly available, easy and economically administered—the tax on turnover—it will inestimably benefit every citizen of every class."

The Turnover Tax is, as its name implies, a tax upon the total or gross business done by every person or association of persons. The fixing of the rate or percentage, which for purposes of studying the problem has been figured at 1 per cent., is a matter which will be dependent upon the amount of revenue required from this tax and the amount of "turnover" of the country's business. The tax implies that every one who sells anything, or renders any service for payment, shall collect a prearranged percentage in addition to the actual sale price of the transaction. Essentially this percentage must be capable of being "passed on" to the consumer.

Basically it is the ultimate consumer —and we are all ultimate consumers— who enjoys the benefits and protection of Government, hence, fundamentally, any just tax must be borne by all the people equally in proportion. This is not the case with any system of taxation now in force.

The Problem

Granted then that the Turnover Tax has many strong arguments to recommend it, and admitting that the Business Profits Tax must be repealed, the questions arise: How much revenue is required? Can this tax produce it?

While Sir Henry Drayton has not yet tabled his 1921 budget, we have in hand the estimates of the fixed annual expenses of the Government, and the reasonable knowledge that this year's business activity is not likely on the whole to exceed 1920. With this in mind, and allowing for the repeal of the Business Profits Tax, also calculating a deficit of $50,000,000 on the National Railways, we arrive at a figure of $150,000,000, which has been estimated by some students as the probable yield that would be required from a Turnover Tax in 1921. Can this be done?

The answer is decidedly, yes, easily and cheaply. The actual "turnover" of Canadian business is not known, no official records ever having been prepared, but in the operation of the present Sales and Manufacturers' Tax, however, we have a most fortunate and striking example. According to the records of the Financial Department these two systems, which by the way have operated without friction or complaint, have yielded revenue to date at the rate of over $8,000,000 per month. Nearly $100,000,000 per year, and at that all food products, raw or manufactured, are totally exempt.

Can any better proof be asked? An increase of 1 per cent. in these combined taxes would raise the full amount needed. The extension of the system to the full intent of a Turnover Tax would raise enough revenue to retire our national debt in one or two years. A prominent member of the Senate Finance Committee estimates five billion dollars.

The Application

At first glance it might appear that 1 per cent. added to the cost of an article with each movement from raw material stage to consumer would accumulate a heavy aggregate tax. That this is not so has been proved by extensive studies

WILL HOLD CONFERENCE ON MARCH 30 AND 31

A conference of manufacturers, wholesalers and retailers, will be held in Toronto on March 30 and 31, to discuss this important subject of taxation. The system of taxation at present in force, alternative methods suggested by the three interests and a possible taxation system that would be acceptable to all, will be taken up.

This article on the subject of taxation is one of a series. Taxation will be discussed from different angles and readers are invited and urged to express their opinions on this all-important matter. Hardware and Metal will be glad to receive expressions of opinions from retailers.

of particular commodities, which indicate, in the case of a loaf of bread, an increase of merely one-sixth of a cent. A pound of beef adds, through four taxable sales, only one cent, or say 2½ per cent. to the final cost, while a pair of shoes, which sold in 1919 at $16.75, are increased 49 cents or 2.87 per cent. Jules S. Bache, speaking on this question in the United States, says:

"Those who have given time and thought to the working out of this tax have as yet been unable to find an article on which the tax would aggregate a greater amount than 3¼ per cent."

The Individual's Position

Though every one confesses to a willingness to pay his share, each is equally frank in claiming that conditions in his own particular business are "just a little bit different from every one else." The manufacturers see every reason why the retailer should do all the work of collecting, while the retailer argues that the tax should be applied at "the source." Fortunately the Turnover Tax will admit of many and varied applications and adjustments. On the officials at Ottawa will fall the duty of deciding its details. To us as merchants, business men and taxpayers, lies an obligation to see that our suggestions and views are made known.

This proposed tax should be considered by each individual, its incidence to his own business studied and the results of such investigation forwarded to Ottawa through association channels or direct. At this critical time of Government finance and business history, those who are responsible for national policies should have the benefit of the views of all classes and conditions of business men.

Taxation can make or break a nation —a fair and equitable tax spells progress—discriminatory, burdensome taxation means stagnation. It is our duty as citizens to decide whether we prefer to pay out our profits and income under the present system, or whether we prefer to have the burden spread, as it should be, equally, reasonably and proportionately over all the people.

Joint Conference to Discuss Taxation

Much Interest Being Taken in Conference of Retailers, Manufacturers and Wholesalers—Discuss Application of Manufacturers' Tax to Certain Retailers—Methods of Increasing Sale of Canadian Goods—Means of Adjusting Balance of Trade

By Hardware and Metal Correspondent

OTTAWA.—According to communications being received at the office of the Dominion Board, Retail Merchants' Association of Canada, very considerable interest is being manifest in the joint conference of manufacturers, wholesalers and retailers to be held in Toronto, March 30th and 31st, for the purpose of discussing taxation matters, and the indications are that there will be a large gathering.

The opening meeting will commence Wednesday morning at 10.30 o'clock, and it has been arranged that the three following subjects will be considered:—

(1) If the government should decide to continue the sales tax of manufacturers and importers some decision should be arrived at to define what constitutes a manufacturer, so as to prevent the application of the term to many small retail merchants, such as merchant tailors, hardware and tinsmith merchants, milliners, dressmakers, opticians, etc.

(2) The best method to adopt to increase the sale and purchase by retail merchants and their customers of Canadian-made goods.

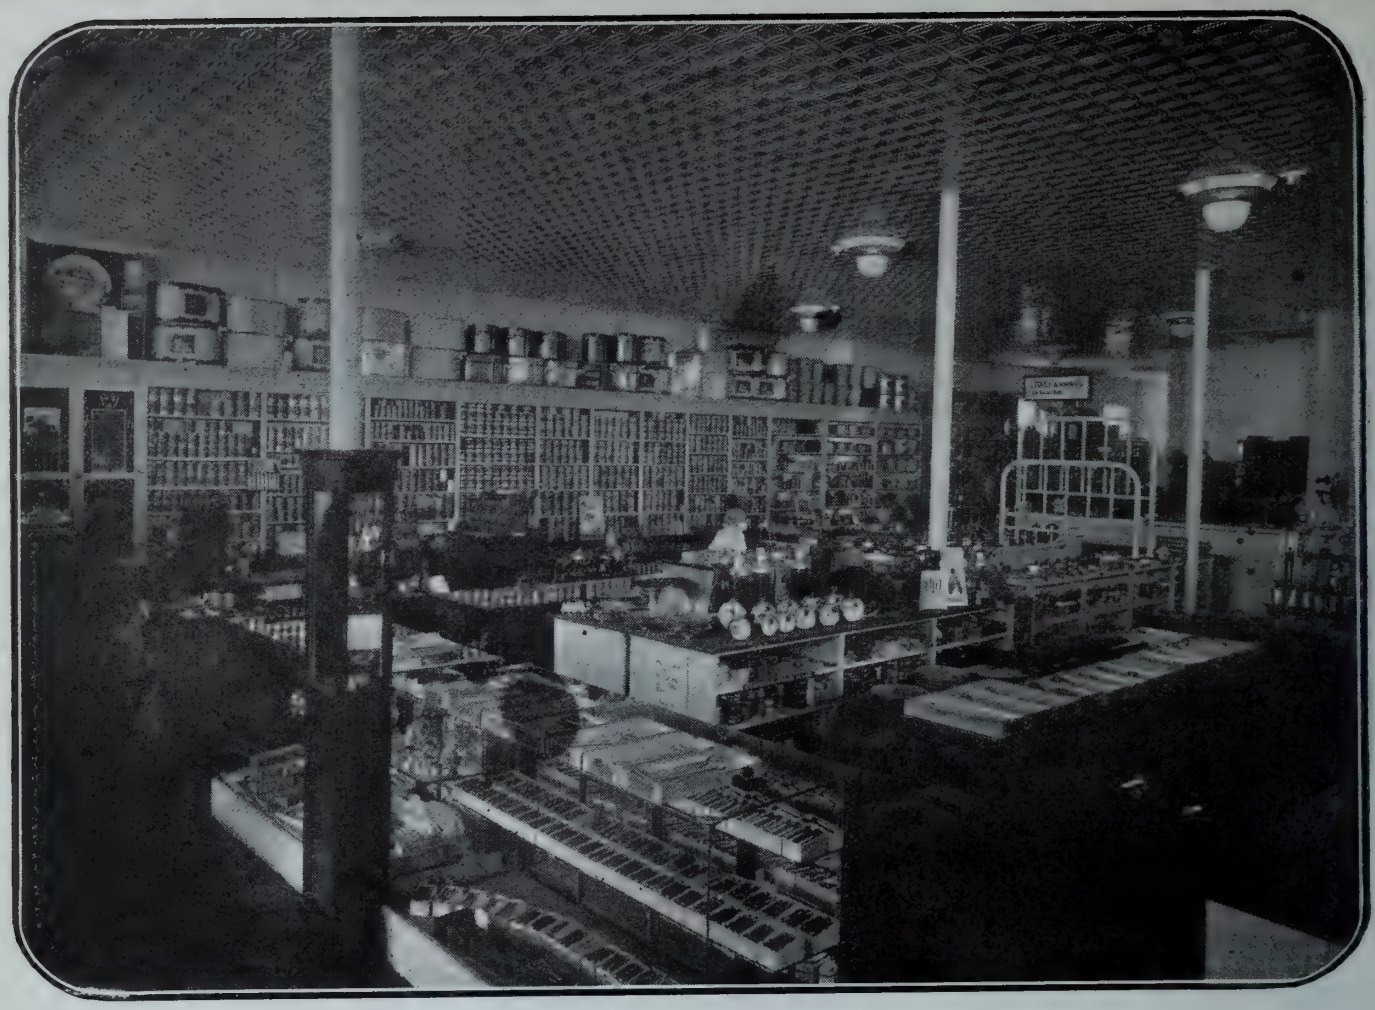
(3) To consider the best proposal whereby Canada can overcome the present unsatisfactory balance of trade which is operating against us to our detriment.

In advising their members of the meeting and the matters to be discussed, the Dominion Board, Retail Merchants' Association of Canada, calls attention to the importance of the first subject, owing to the fact that it relates to the defining of what constitutes a manufacturer. The statement reads: "We believe that this question can be settled in a much more satisfactory manner by holding a conference of all branches of the trade than it can be by government officials."

As the time is short and the necessity of each section of the trade being represented is appreciated, the Dominion Board has invited the members of the various local advisory committees of trade sections to be present and has also invited three members from each trade section from the city of Toronto. By doing this the board feels assured that each section of the trade will be represented. In addition to this an open invitation is extended to any members who may be visiting in Toronto during the time of the conference.

Discussing this forthcoming conference with the Ottawa representative of Hardware and Metal, E. M. Trowern, secretary of the Dominion Board, said: "This will be one of the most important joint meetings that has ever been held in Canada, as we intend to define the meaning of the words manufacturer, wholesaler and retailer, so that their meaning will be clearly established throughout the Dominion and made known to the government.

"In the discussion and consideration of questions two and three on the order paper, the trading policy of certain manufacturers will naturally arise, and this will enable us to clear up many present-day difficulties and formulate some rules and regulations which should be of great importance to the entire retail trade. We want this conference to lay down and establish principles which will form a basis upon which we can build live, active trade sections, which will eventually extend to all parts of Canada, and, in order to do this, we want to get the active co-operation and support of the entire trade."



Disallow Importation of German Detonators and Safety Fuses

OTTAWA.—The Mines Department at Ottawa is strongly opposed to the importation of German detonators and safety fuses, and while no actual embargo has been established, the local correspondent of Hardware and Metal is informed by a high official of the department that it is not likely any authority will be given for their importation.

An enquiry was recently received by the department from a person in Calgary, Alberta, who wanted to know whether an importation license was necessary to import safety blasting caps for exclusive domestic purposes from Germany.

In replying the Department stated that it had information from a German technical journal to the effect that large stocks of evidently inferior detonators and safety fuses had been disposed of by German firms to allied and neutral countries, and that to the use of these might be attributed recent accidents which had occurred in other countries.

The Department's letter concluded with the statement that none of these German explosives had been imported into Canada and it was not to be expected that any authority would be given for their importation.

LEFT SIDE OF STORE

Below is shown a view of the left side of the hardware store of Sutherland-Stelck Hardware, Dauphin, Man. The wall display is almost entirely devoted to paints. The stock is neatly arranged on shelves, easy of access to the newest clerk, and is located where good light is available to assist customers in selecting colors. The whole arrangement is such as to allow the greatest display of goods without appearing congested or disorderly.

At the left front is located the sporting goods department. An original idea in this department has been the stocking of ammunition behind doors which are sampled in an attractive design surrounding panels of hunting scenes.

Cutlery and silverware are shown in the front display case, auto accessories in the case facing the store centre and kitchen utensils and small lines in baskets may be discerned in the rear. A handy reserve stock is kept in the enclosure.

Winning a High Place

Thriving Hardware Business of Sutherland-Stelck Co., Dauphin, Man., a Tribute to Integrity of Two Men Who Went West From Ontario in 1897—"Quality, Service and Fair Dealing," is Motto and It Is Lived

THE recently completed hardware store of The Sutherland-Stelck Hardware and Implement Co., Ltd., at Dauphin, Manitoba, is a credit to the hardware trade of Western Canada, and its opening marks another important step in the progress of a thriving business, established twenty-three years ago. The growth of this and other hardware firms which located in the prairies at or about that time is an interesting phase of the development of Western Canada.

With the motto "Quality, Service and Fair Dealing," this firm has constantly set before it the highest ideals of business and its efforts to live up to that standard have brought it to-day to a place where it is respected by its large clientele, extending beyond the limits of the town to points located many miles away.

A number of interesting principles have been followed by the management in the conduct of this business.

Difficulty of Keeping Trained Men.

Dealing with the difficulty of keeping trained men, A. H. F. Stelck, manager, stated to Hardware & Metal that giving an interest in the business no matter how small was an added incentive for greater loyalty. "Speaking of our case in 1913 the old firm of Sutherland & Stelck formed a joint stock company, allocating four of our best men a number of shares in the business. This has kept them settled and greatly interested in making the business go. This we think is one of the methods that may be adopted by many stores, and it would increase the interest of the employee to have stock."

Emulates 5, 10 and 15 cent store plan.

It was observed by Frank Stockdale, retail merchandising expert of the United States, speaking at a Western convention of retailers that some of the display plans of the 5, 10 and 15 cent stores could well be adopted by other merchants.

in the Public Esteem

Up to—Keeping Trained Men Interested in Store—Adopts Some of the 5, 10 and 15-Cent Store Plans—Separate Dept. for Ranges—Handling Beds, Mattresses, Springs, Etc.—Advantage of Private Office.

Mr. Stelck supports this advice particularly in so far as the use of wire baskets or boxes is concerned. Speaking on this point Mr. Stelck gives this advice.

"Display goods in wire baskets or hardware boxes similar to 5, 10 and 15 cent stores, and display all small articles. It is astonishing the amount of goods that are sold if properly displayed and priced, with price cards about 2½ in. x 3 in. or 4 in. in size, plain letters.

"The time is coming, in our opinion, when progressive merchants will do with less sample boxes on shelves, and adopt the open tray or boxes on tables specially built for the purpose.

"We have found the best type of table about 8 ft. long, 36 in. wide and 32 in. high, with a base 4 in. from floor, with shelves extending clear through, one shelf half between top and bottom, ends closed as per sketch.

"Of course this method of displaying goods requires lots of floor space."

Separate Department for Ranges.

The management of this store are very partial to the idea of having a separate department for ranges. This plan has been followed by a number of merchants to good advantage, it being found that where such a sum of money is involved as in the purchase of a stove, washer or such lines a salesman has a better chance with a customer when interest-detracting influences are removed. The stock can also be kept in better condition under such circumstances. Following is the opinion of Mr. Stelck in regard to this point.

"Ranges should not be on the Main Floor (except one in the window). They should be either in a brightly lighted white enamelled basement room or on the first floor up. The advantages in

RIGHT SIDE OF STORE

A show case of silverware faces the store entrance on the right with a reserve stock in the enclosure of cut glass, carvers, kitchen utensils, etc. The wall display shows samples affixed to the front of drawers and cabinets, with a stock supplementing that shown in the display cases. Modern cash registers with separate drawers for each member of the sales staff are in use.

At the rear spacious display room is provided for harvest tools, and automobile tires, the latter being shown on a specially constructed stand. The entrance to the basement stove display is also noted by a sign prominently placed.

Some of the features which help to make this store so attractive are the indirect electric lighting system, the abundance of daylight, the orderly, convenient arrangement of stock, the general cleanliness of all stock and fixtures, and the courteous treatment accorded by store salesmen.

having them off the main floor is as follows:

"Many newly married people and others who are in the market prefer to look at a range where they will not be noticed by the general public, whereas if ranges are on the main floor, and the salesman has a prospective buyer almost convinced to buy a high standard range, someone happens to butt in and spoil the sale. In our opinion down stairs is the best place for ranges."

Light—Light and More Daylight.

"The importance of floods of daylight through prismatic glass cannot be over estimated," says Mr. Stelck. "A well-lighted store makes work a pleasure. Customers feel optimistic and cheerful in well-lighted stores, and are bound to be attracted to such a store, with lots of light to assist them in making their selection."

Let Customer See the Goods.

"Our experience has proved the old saying 'goods well displayed are half sold.' We contend that goods should be properly displayed and priced so as the customers may see easily the article as well as the price. Nine cases out of ten if at any time in the past the customer has had a desire to possess the article that is displayed and priced well, the sale is made. All you have to do is take the money and wrap up the goods. But that is not all, show him some other article or new style of pliers, get his interest by asking his opinion on the same, and often in this way more sales may be made."

EXTERIOR VIEW AT NIGHT

Exterior view of the Sutherland-Stelck, Ltd., store at night. The full effect of double-deck window displays is strikingly illustrated in this picture. The most modern plan of construction is evident by a close examination of this store front. The tool display in the one lower window, the stove and cutlery display in the other lower window and the display of ranges, refrigerators, beds, dairy utensils, washers, kitchen utensils, etc., in the upper window, all stand out clearly and indicate the extent of display space available by the use of this type of construction. Small windows at each side of the door lend themselves to displays of "specials" on a small scale. Leaded windows at the side of the door and back of the display windows make the appearance very attractive.

Added Some New Lines—Fancy China.

"A neat but not too large a stock of fancy china well displayed adds to the appearance of this store, and this line of goods greatly interests the ladies. We also propose to add in the near future a line of crockery."

Nationally Advertised Goods

"We sell nationally advertised goods in preference to lines not so advertised. Some hardware merchants think the margin in these lines in many cases is too narrow and under such circumstances they get in the other article and push it in preference to the nationally advertised goods."

Steel Beds and Mattresses.

"This is another new line with us, and they may be handled by hardware dealers to great advantage. We have had splendid sale of these lines. We stock a nationally advertised line of beds."

Private Office.

"A private office is very important. Every store, no matter how small, should have a private office, where customers may be invited to talk over such matters as new purchases or accounts owing. Any misunderstanding may be more easily adjusted in private."

Advertising.

"A limited amount of advertising in local papers and use of mailing lists, living up to every statement made, strictly honest in your dealings, giving the customer the benefit of the doubt, treating everybody with the same consideration, and courtesy, irrespective of

her or his standing in the community, is our policy in advertising."

It is pointed out by Mr. Stelck that all the advertising in the world will not atone for faulty or injudicious buying and that in order to give advertising a fair chance all such other matters as local sentiment, buying to best advantage, etc, should be considered. Illustrations are used freely in this store's publicity.

An illustration of the type of advertising done by this firm is found in the reproduction herewith of a circular recently sent out in connection with the opening of the new store. This publicity was linked up with the window displays and brought splendid results from a district extending to McCreary in the south, west to Grandview, and north to Winnipegosis. A selected mailing list of best prospects in this territory is used.

The sale was held to move a surplus stock of hardware resulting from the amalgamation of the Dauphin Hardware Co. and Sutherland-Stelck Co., Ltd. This circular was printed in red and black, was about three feet wide and two feet in depth and was printed on both sides. Bargain lines in the store were marked with red price tags to correspond with the listings on the sheet. Every line was well illustrated, described and price marked and included electrical goods, tools, builders' hardware, stoves, kitchen utensils, cutlery, shaving brushes, on one side. On the reverse side were auto accessories, bicycles, washers, paints, mattresses, beds, springs, harness, etc.

EXTERIOR VIEW

Herewith is view of the splendid new hardware premises of the Sutherland-Stelck, Ltd., Dauphin, Man., showing the modern construction of the building, double-deck window and display facilities. The importance of floods of daylight into the store is realized by the owners, and ample provision has been made for admitting the maximum amount of light. This has been found to improve the general cheerfulness and optimism of customers.

The front of the store is of buff iron spot bricks laid in pattern with cream mortar and relieved with marble insets. The entrance is approached by two landings floored with tile laid in pattern and the word "Hardware" worked into it. Prismatic glass extends the width of the store above the display windows, and the word "Hardware" worked in chipped gold and black on plate sheets. The architecture was designed to produce a quiet dignity coupled with an expressiveness of the magnitude of the business carried on within.

5, 10 15c. Bins.

Special attention was drawn in the ads. to the 5, 10, 15, 20, 25, 35 and 50c. bargain bins, as mentioned elsewhere in this article. The circular could be folded up in very convenient form and when opened out presented a very striking appearance and dealing with a sufficiently wide range of hardware lines that it would be of interest to practically everyone it reached.

The New Building.

The new building occupied by this firm is two storeys and basement, 44ft. 0in.x132ft. 0in. It is one of the most modern and up-to-date hardware store buildings in the West. The front is of buff iron spot bricks laid up in pattern with cream mortar and relieved with marble insets. The entrance door is approached by two landings floored with tile laid in pattern and the word "Hardware" worked into the pattern on the lower landing, each landing is stopped with marble nosing and risers. The plate glass of the ground floor display windows are set in all copper anti-frosting settings, rest on marble sills and bulkheads and are capped with a copper transom bar and awning hood. Above this awning hood copper-glazed prismatic glass extends across the front with the word "Hardware" in chipped gold and black on plate sheets centered over entrance. On the apron wall the name "Sutherland-Stelck Limited" appears in raised gilt letters. Above this, on the second floor, large plate glass windows

extend across the front adding much valuable space to the already generous front display windows.

A Quiet Dignity

In the design of this facade the architect has striven to produce a quiet dignity coupled with an expressiveness of the magnitude of the business carried on within, but, while the facade impels confidence, one has to view the interior in order to grasp the full significance of this firm's 22 years' achievement. From the front door one enters a spacious, high, light and airy salesroom extending the full width of the building and to a depth of 90 ft. In here is a veritable fairyland of display of hardware, auto accessories, electric appliances, harness, etc. In here, too, the lighting, both artificial and natural, has been given careful study; high windows have been so placed, prismatic glass so used and the colors so selected to diffuse the light that there is no noticeable difference in the light outside and inside this salesroom; the colors used being white, light ivory and ashes of roses in vitralite enamels. The artificial lighting is so designed as to produce the natural daylight effect. For this purpose fixtures were selected of moonstone inverted bowls suspended from enameled reflectors attached to the ceiling. In the display windows all lights are mounted in X-ray reflectors, also producing the natural daylight effect without glare. All lights in the display windows are controlled by time clock switches, enabling lights to be shut off at any pre-arranged hour.

Range Display Room.

Conveniently located in the main salesspace are stairs leading to a range display room 20-ft. 0-in.x60-ft. 0-in. in the basement and another staircase leading to the second floor where beds and mattresses, tents, churns, separators, etc, are displayed. A part of this second floor of 44-ft. 0-in.x132-ft. 0-in. space is also used for surplus stock storage. At the rear of the ground floor, space is provided for the display of autos, farm machinery and repairs.

Directly in front of the entrance is a wide plate glass case in which are displayed fancy silverware on one side and cutlery on the other. This case faces the doorway and extends from one side aisle of the store to the other. It serves to face off the front of the store in a complete manner and affords an excellent location for special displays.

Aisles on Two Sides of Store.

At right angles to each end of this run lines of cases toward the rear of the store, one side being devoted to automobile accessories and the other aisle of cases to tableware and electrical goods.

The centre is devoted to stock shelves the height of the cases, with a narrow working aisle between the shelves and cases. Stock associated with that displayed in the cases is located on the central shelves, making it very handy to

ADVERTISING ON A BROAD SCALE

An illustration of one side of a large circular three feet wide by two feet in depth, printed in red and black as used by Sutherland-Stelck, Ltd., Dauphin, Man., in connection with the opening of their new store and used to assist the clearing out of a surplus hardware stock resulting from the amalgamation of this firm and The Dauphin Hardware Company.

On this side of the sheet are featured electrical goods, etc.

Every line is well illustrated, described briefly and priced. A number of specials are marked in red ink to correspond with the red tags on these lines in the store. This circular was widely distributed and linked up with local window and store displays.

This circular is said to have brought splendid results. It is sent out to names on a selected mailing list and this list has been found to be of great help in covering a trade so widely distributed.

SEPARATE DEPARTMENT FOR RANGES, HEATERS, WASHERS, ETC.

Ranges, heaters and washers are kept in a separate department in the basement of the Sutherland-Stelck hardware store, Dauphin, Man. This plan is thought to be advisable in connection with the sale of these lines for several reasons. The stock can be kept in better condition and by being grouped it shows to best advantage. The department is located where there are no interest-detracting influences. Salesmen can work on customers with better results. The department is finished with white walls and ceiling and is kept brilliantly lighted. A service department for installation and repair work is an important phase of store trade as outlined in the article herewith.

WINDOW OF RANGES AND HEATERS

Great care is taken in preparing the window displays in the Sutherland-Stelck, Ltd., store at Dauphin, Man., it being the plan to co-ordinate all publicity effort by linking up displays with local newspaper advertising, circulars, etc.

Herewith is a well-planned window featuring ranges, heaters and kitchen utensils. Cards bearing a brief message, right to the point, are employed where necessary. An invitation is extended to visit the stove department in the basement of the store. A number of handy brushes, knives and other lines for use in the kitchen are neatly arranged on display boards. The stoves and ranges are kept clean and polished at all times.

carry a sufficient variety in a small space. Favorable display space is also available on the flat top above the shelves.

All Space Utilized.

Directly back of the centre square of shelves is the stairway leading to the basement salesroom. Shelves flank either side of this stair, with aluminum ware displays, and kettles and pots. A rather novel and effective idea has been used in the displaying of a bedstead set by placing it over the stairs in the form of an archway. One could not fail to see it while using the stairway.

The left side of the store, looking from the front, is almost entirely devoted to showing of paints stocked on shelves. To the rear of the paint display are shelves of pots and pans.

At the left front has been located a sporting goods department, featuring guns and ammunition. Here has been put into effect another original idea, with ammunition stocked behind doors which are sampled in an unusually attractive design, surrounding panels of hunting scenes.

Shelf hardware takes up the right side of the main floor, arranged in commendable order. The whole layout of this store interior indicates experience in handling of hardware stock, and a great deal of work in systematizing every department to a point of efficiency.

WIDE DISTRIBUTION OF ADVERTISING MATTER

The reverse side of the large circular used by Sutherland-Stelck, Ltd., in connection with the new store opening, as mentioned elsewhere in this article.

Automobile tires, bicycles, washers, harness, trappers' supplies, paints, beds, mattresses, springs, etc., are here shown effectively advertised with illustrations, descriptions and prices shown.

The circular was three feet wide by two feet in depth and printed in red and black, the red being used to draw special attention to specials on which red tags are used in the store. Special attention is drawn to the 5, 10, 15, 20, 25, 35 and 50 cent specials in bargain bins, as referred to in the article.

Orderly Arrangement of Stock.

Only by a trip through this store can one realize the stupendous task involved in stocking up a really modern hardware store. Here in this most modern hardware store and stock the confusion of profusion is only arrested by the visible orderliness of the stock, and one cannot help but admire the grouping of such a huge stock of infinite varieties; so intelligently arranged in logical order that even a stranger feels instantly conscious of the direction and location of any article sought.

Historical

That Messrs. Sutherland & Stelck feel unbounded satisfaction and pride in their new store needs no apologies; for this building truly is a fine and consistent example of art combined with utility, completely adapted to its purpose and is a concrete embodiment of their business integrity and foresight. In the year 1897 these two young men came to Dauphin, Mr. Sutherland from Wingham, Ont., and Mr. Stelck from Zurich, Ont. The following year their infant business was born in a frame building 20-ft. 0-in.x 36-ft. 0-in. Its infant nutrition was derived from incessant constructive salesmanship in which "mere sales" are subordinated to "making customers," this backed by efficient and economical administration, untiring energy, ambition and foresight, reared that infant business into a healthy boyhood state, and in 1904

this robust youth was clothed in a new 22-ft. 0-in.x80-ft. 0-in. solid brick two story building erected on the site of its birthplace. This was the first brick building in the district and an impressive structure for its time, but it was not long until this sturdy youth outgrew this building and for the past few years he had spread himself out into numerous detached buildings and even over vacant lots. Then, while others were counseling "wait for prices to come down" Messrs. Sutherland and Stelck decided to build "before prices went higher," thus again proving their foresight, for with this fine new and spacious building manned by a staff of fifteen highly trained assistants, they are to-day doing a business that in quality and quantity ranks high among hardware firms of the West. And these men justly deserve their business supremacy, for always being energetic and untiring in business, they have not been less so in the public and social interests of the community. Mr. Sutherland served several years on the town council and Mr. Stelck, now president of the Board of Trade and a member of the School Board, also has served on the council.

The phenomenal growth of this business has been watched with interest by old-timers and new-comers alike and to-day the firm take into their new and commodious premises the good will and wishes of all Dauphin and its environs.

What the Townspeople Think

Evidence of the feeling of the townspeople toward this pioneer hardware firm is seen in the following report appearing in the Dauphin Herald of recent date:—

They Have Made Good.

"Many who started business in Dauphin in the early days and who stayed with the town and grew up with it have succeeded, even beyond their expectations. In the year 1897 two young men came west from Huron county, Ontario, one from Wingham and the other from Zurich. These young men were David Sutherland and Arthur H. F. Stelck. Both were tinsmiths by trade and they found no difficulty in finding employment. The former was employed by C. F. Turner and the latter by A. J. McPherson, who were in the hardware business at that time. Besides being industrious they were observing and ambitious. They saw Opportunity and grasped his hand. It was not many months before a partnership was formed and a shingle nailed up announcing the birth of the firm of Sutherland & Stelck, tinsmiths and hardware. It is hardly necessary to state that the firm succeeded from the start. The name "Sutherland and Stelck" is a household word in the district. From a small beginning the business has expanded until to-day the firm is credited with doing one of the largest trades in its particular line outside of Winnipeg. The additions and improvements to their block and warehouses go to substantiate this. One item alone need be mentioned to give some idea of the volume of business of the firm when it is mentioned that a

Continued on page 179

EFFECTIVE SHOWING OF TOOLS

Tools are an important branch of the hardware business of Sutherland-Stelck, Ltd., Dauphin, Man., and this trade is kept active, largely through the agency of window displays and advertising. Some unique ideas in arranging displays of a number of tools are herewith shown. Lines included in this display are, hand saws, screw drivers, hatchets, axes, planes, drills, braces, hammers. Panels are used with good effect in the back of the display. Hand lettered cards with a brief message are used, as are also the cards supplied by manufacturers. A baize covered box in the centre is utilized to display a set of vises, squares, hatchets, etc.

Bringing 1921 to Profitable Conclusion

Rapid Turning of Stock Purchased in Smaller Quantities But More Often is Solution of Present Condition—Put Fair Valuation on Merchandise and Urge Satisfying All Requirements—Each Department as a Unit

Editor's Note: — The following article deals with certain of the merchandising policies adopted by Omer de Serres, Montreal. This article outlines his views as to the present business condition and means adopted by his firm to "carry on" profitably until a return to normal.

"WE are confronted to-day by a declining market, some of the goods on our shelves will show us a very small profit and in some instances may declare no profit at all. However, we are looking forward for 1921 to be a prosperous year and at the end of December next we hope to be able to look back and realize that the present year was very instructive in the retail business; one that required more efficient business methods coupled with extra sales tactics; proving that goods, commencing with this year have to be sold as in pre-war days," said Mr. De Serres.

"At the commencement of 1920 the dealer could dispose of his goods if he could get them; the difficulty was to buy them. Raw materials in general showed a scarcity, labor troubles were very prominent, and production was not forthcoming. This same condition ruled well into 1920, at a time when the public were buying and had the money to continue to buy. These obstructions are well over; deliveries on practically all commodities have improved until now it is up to the merchant to devise some scheme whereby he can dispose of, or, rather, sell, the articles which he, in the few years previous, did not have to sell, but merely wrap up for his customer.

"Turning the stock over oftener is the best solution. If we had been in the habit of turning it over twice or three times in previous years we will now endeavor to turn it over four or five times in the same period. To accomplish this we will now buy in dozens instead of by the gross, or in quarter dozens rather than dozens, thus keeping our stocks well sorted, at the same time having more 'ready money' on hand. As to selling, if we place a fair valuation on the merchandise we must and want to sell, and urge the public to take only what they require for a conservative period ahead, loss of confidence will end and sales will greatly increase.

Departments Must Score

"A close observation will be kept from month to month on the different departments of our store. If any section is not upholding its own end, the manager of this department will be advised, and a greater effort will have to be put forth to keep his stock moving. This can be accomplished as a manager, or man in charge, is placed with each department. Paint, shelf hardware, tools, sporting goods, bathroom supplies and heavy goods, are each under different management.

Building Materials Controlled

"Such items as builders' hardware and bathroom supplies are more or less controlled by the building activities; this is also reflected in our tool department. If a big building programme becomes evident this spring and summer, then we may look for a large demand for builders' hardware and plumbers' supplies. This year we are watching the outlook with great interest. If bricks, cement, lumber, etc., are within reach of the average salaried man, then we may expect a very extensive building year.

Quiet Months Dependent on Staple Articles

"Sporting goods, shelf hardware and kitchen utensils, such as aluminum ware, graniteware and tinware, are the staple lines that at these times keep the ball rolling in the hardware store. Day after day, week after week, and month after month, these commodities move more or less freely with results shown in the tallying of the cash register each night. Each different item has a seasonable offering to make, and every day needs are found among them.

Moving Affects Paint

"Less moving among the tenants of Montreal and other cities has perhaps scored against the sale of paint, varnish stains and wall finishes. Furniture being moved around always has its damaging effect on floors, walls and the furniture itself. People would then come in for the can of paint or varnish to retouch the damaged article or for a new coating for the wall. Tenants moving into new apartments also want some redecorating done and these all stimulate an early sale of paint and paint products. This year, however, the shortage of houses has curtailed moving to a great extent.

"In reviewing the situation of the hardware man to-day, if he has to look to his staple lines for the upkeep of his business in these early months, he may look to the future months with confidence, when labor will again be needed and agriculture will resume its normal position. And with a careful study of existing conditions his business may be brought to a prosperous and profitable ending in December, 1921."

SOME SELLING HELPS NOTED IN THE EXPERIENCE OF OMER DE SERRES

Confine hardware lines to their rightful departments.

* * *

Create department managers and have each department stand as a unit.

* * *

Study various classes of trade and know how to best appeal to each class.

* * *

Have a complete and varied stock with samples of each line in full view of customer.

* * *

Development of auto accessory trade reflected in other departments.

* * *

Effective use of display increases accessory turnover.

* * *

Use of sign boards in and adjacent to the city have helped accessory business.

* * *

Follow definite plan of sampling in each department.

* * *

Have electric fixtures wired and ready for immediate delivery.

* * *

Use of catalog helps sales of sporting goods.

Efficient Departments Strengthen Business

By Distinctly Confining Lines of Hardware Where They Belong and Creating Department Managers Aggregate Business Expands —Every Item at "Finger-Tips" Saves Time and Money and Makes Customers

Interior view of Omer de Serres' hardware store, Montreal, showing several of the display and stock-keeping features mentioned in this article. The high ceiling allows the use of a great number of shelves and drawers, and the use of a reference plan brings all stock within easy reach of the newest clerk. Note the great variety of stock shown by samples extending the full depth of one side of the store. Electric fixtures are wired and suspended above the display cases on the other side. Electric heaters, portable lamps, and other lines are displayed on and in the cases below the fixtures. Stools are provided for the customers' convenience, and cash carriers are employed. This is a good example of a large and varied stock being carried in a comparatively small store without any evidence of confusion.

OMER DeSERRES, St. Denis St., Montreal, has been making strides in the development of his hardware business to such an extent that his premises have grown too small, or better, his business development has demanded more elbow room which has already been secured.

The DeSerres business has been expanding steadily since the present site was secured, corner St. Catherine and St. Denis Streets. This location is a very busy one, there being an extremely heavy pedestrian, street car, and vehicular traffic of many types. Full advantage of this is taken to make the most of display, and the fine plate glass windows are always filled with a most inviting array of hardware of various kinds.

Until a few years ago, the DeSerres store was much farther east on St. Catherine street. The present building is of several stories and it has been possible to carry out the departmentizing idea extensively. This re-arranging process is still being effected. When completed, Mr. DeSerres hopes to claim right to having one of the best-appointed hardware stores in eastern Canada.

Main Floor Attractive

On entering the store from St. Denis street one is impressed with the distinctly hardware store atmosphere. To the left are the builders' hardware sections, complete in themselves. The store ceiling, being high, permits an unusually high section of shelving, and neatly-designed and varnished drawers are sampled with a very wide selection of builders' hardware, shelf hardware and other household hardware. The impression made here is that there is ample variety for even the most particular. This in a big city is important. A contractor or any customer is impressed with the idea of completeness and sales are bound to be larger. When this impression is continually carried out first customers are soon likely to establish themselves as permanent patrons.

The full wall space on this side of the store is fitted with drawers of varying size, and great variety of hardware and specialties are accommodated here. Not only is ample storage provided, but the display arrangements are so excellent as to afford special advantage from the selling standpoint.

Automobile Accessories

Ten years ago it would have been folly to assert that a retail hardware store would be justified in carrying a forty thousand dollar stock of automobile accessories in the year 1920. The possibilities of this new line appealed to Mr. DeSerres and he has been adding to the line until he carries this amount of stock, and at times, even more than that amount.

In setting aside the space necessary for this stock, consideration was given to the matter of creating sales, and with this end in view a generous space was provided to the right of the entrance. In addition, silent salesmen are generously filled with specialties, and in no respect is the showing of these goods slighted. Display is responsible for numerous sales, and it is turnover that Mr. DeSerres has aimed to secure.

In discussing the development of the business Mr. DeSerres told Hardware and Metal that results obtained in reaching out for business were soon reflected in other departments of the business. This, he believes, is an added advantage in considering accessories as a profitable line. "We carry everything in stock and are able to fill any order, large or small," was his comment.

One of the best ideas adopted in displaying has been the decision to keep the accessories well forward in the store. This is thought to be good business with any line that one desires to introduce effectively to his trade. With a line so extensive as this it gives one special opportunity for getting quick results and that has been the result in this instance.

It is but right to say that in addition to extensive and frequent window and interior displays of accessories, huge sign boards have been placed at strategic points within and adjacent to the city of Montreal. These are painted in attractive colors and sometimes depict an attractive automobile filled with pleasure seekers. These signs have been very effective and productive.

New Ways of Sampling

A trip through the DeSerres store was recently made under the direction of Mr. Mosseau, store manager, and the Hardware and Metal representative was much impressed with the method of sampling extensively used in various departments. This has been a gradual development, but gratifying results have been obtained and there is said to have been ample justification for the time and energy spent in working out the plan.

"We make very extensive use of drawers," said Mr. Mosseau, "and sampling saves us a lot of time as well as that of the customer. In many cases we use number under the sample. Reference can therefore be quickly made and stock procured as wanted.

"If a woman comes in for a towel bar or a tooth brush holder, she doesn't wish to wait until we get the screws for the bracket and wrap them up, so we have bar, brackets and screws ready, to save this delay.

Sample Fishing Tackle

"This is the way we sample fishing tackle," he continued, as Hardware and Metal was conducted to this department. Panels of wood, covered with green or red cloth, were neatly sampled with baits, lines, trolling spoons, floats, sinkers, gut and other accessories, each sample or set of samples accompanied with price tickets or lists. When not in season, as in the winter time, these panels are carefully covered with leatherette envelopes to keep dust and light from fading the cloth. "They are always ready for the opening of the next season," resumed Mr. Mosseau, "and there is'nt that hauling down of stock and fixing up of display. These panels are always ready and we also use them in the display cases just as they are."

One of the important points noted as this tour of the store was being undertaken was that hammer, saw and plane may be used by the hardware merchant to good purpose in odd hours and minutes. The DeSerres store is typical of how resultful such employment of time may be.

Fine for Builders' Hardware

Panels are employed to display builders' hardware. "This is our sample room, and we use these revolving panels for the goods; they work fine. All samples are fastened securely to panels and immediate reference, even by a customer, is possible. These show where the stock may be found, the description of article, the shelf and box location. Price comes first, then the row, then the drawer. In this manner the samples are always intact, a highly important consideration."

As showing the recognition of the display, Mr. Mosseau continued:—"I bought some old drawers, put a board under two of them; then nailed them together. They doubled my space in a sense, for where I had two sections before I now have four."

FOR THE SPRING SPORTING GOODS WINDOW

A display of sporting goods which confirms the store manager's statement that when he takes on a line worth while he goes after it in a big way. Here is shown a very complete and attractive display of many lines of sporting goods. A cup is on view in the centre of the display, suggesting the many sporting contests which are open in amateur circles. It is displays of this kind which arouse and hold interest in such goods in season, and which keep the cash register ringing in the sporting goods department.

It will be seen that this plan, especially with house owners who know very little about builders' hardware, has real merit.

Extensive Plumbing

Space is accorded plumbing supplies and accessories on the second floor. Lighting is obtained through large windows facing east.

On the spacious floor there is ample room for an array of bath tubs. These are of various sizes and types, and the photo accompanying will indicate what varied choice is offered the buyer. Six tubs were on display when this article was written.

A very extensive display of fixtures is arranged on a large oblong background. This is raised above the floor about four and a half feet, the boards comprising this being covered with black plush. Over these the mirrors displayed stand out in bold and effective contrast. Little sales argument on the part of the salesmen is required. On this fine background are also shown sponge and tooth brush holders, glass and plated towel bars, medicine cabinets, paper holders and other accessories wanted by the householder. As the fixture is well back from the light the cloth does not readily fade. Electric light arrangements provide for light when needed. One of the additional features is that of a combination range boiler heated with gas. Other lines effectively displayed are lavatories, closets, pedestal basins, etc.

Electrical Kitchenware

In connection with the electrical department—lighting fixtures in particular — the plan is followed of having each fixture ready-wired. This plan has been found the best, because when a customer decides on a particular lamp, it may be at once wrapped up and delivered then and there, or on the next delivery. "If you want that fixture, madam," commented Mr. Paquet of this department, "you may have it; it is already wired for use." These fixtures are all ticketed in plain figures.

A unique plan is used in the kitchenware department, located on one of the top floors. A long series of plain tables of regular height, carry samples of the bigger utensils. Above these tables, and over their centres, are arranged pipe racks. Poultry netting is stretched from one end to the other, and on this the smaller samples are displayed, these being so fastened as not to be removable by a customer. Tagged price lists, with the desired and necessary information pertaining to the location of a given article, as already explained concerning builders' hardware, complete this arrangement. One will see the time-saving again effected.

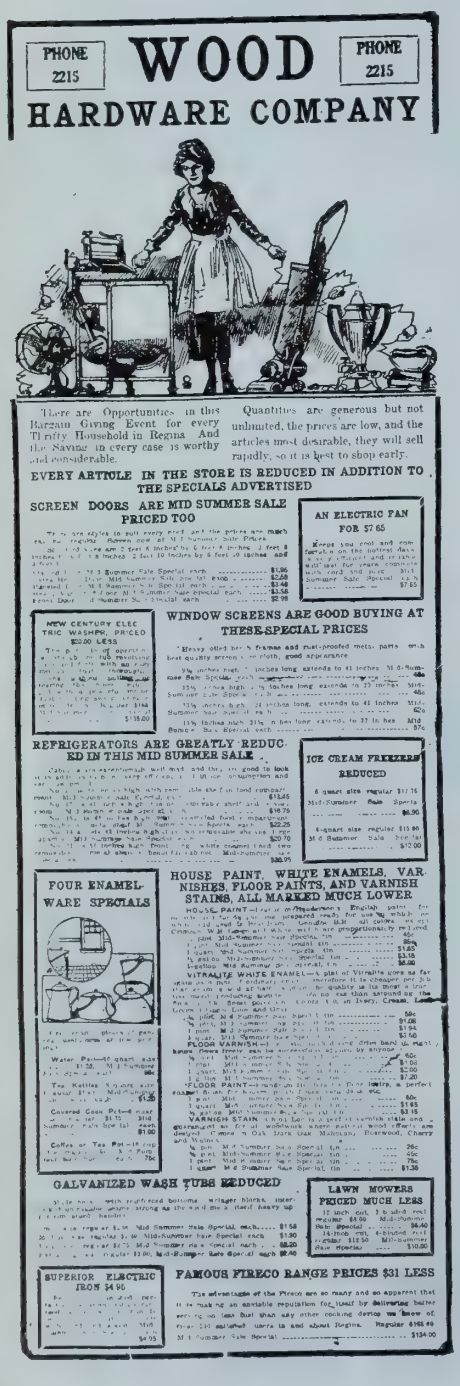
Windows—Offices

There is never a day in the week that hundreds do not pass the DeSerres store. Recognizing the value of this, Mr. DeSerres has planned to make best possible use of his big windows, and one never passes without seeing on display a most inviting and well-arranged display. Prominent among recent displays have been sporting goods, cutlery, bicycles and accessories, and automobile accessories. Paints and varnishes are also shown effectively. The best part of this plan is that displays are left in the hands of one of the salesmen, Mr. Daignault, and to his credit many fine displays have appeared recently. Displays are so arranged as to make full use of the back windows in building strong backgrounds. The goods are chosen and arranged so as to carry some definite appeal. Plate glass shelving on pedestals, raised platforms, together with the employment of crepe paper or cloth on which to show the goods, all work into the display plans.

(Continued on page 173)

DISPLAYING PLUMBING SUPPLIES

A varied stock of plumbing supplies is displayed on the second floor of the De Serres' store as shown herewith. A partition extends around the department and to this partition are affixed wash basins, lavatories, etc. Six bath tubs of various sizes are shown with bath seats and other accessories. Cabinets, towel holders, etc., are effectively shown on a large panel. The stock is kept polished at all times and facilities are provided for ample light in order to show the stock to best advantage.



To Assist in Preparing

HEREWITH are shown a number of advertisements dealing with spring hardware lines. These advertisements are written by a number of the foremost hardware merchants in all parts of Canada and valuable helps in the preparation of spring advertising can be had from a reference to these ads. The generous use of illustrations and brief catchy statements concerning the various lines feature these ads.

* * *

Household Goods

"There are opportunities in this bargain giving event for every thrifty household in Regina and the saving in every case is worthy and considerable," is the heading on the ad shown herewith by **Wood Hardware Co., Regina, Sask.**

FRESH AIR

hasn't advanced in price. Use lots of it. Get into one of our good hammocks and drink it in. We have a beautiful assortment now on hand which you will want to see before purchasing. We have verandah couch hammocks in beautiful green and white pattern, either with or without stand. For solid comfort you can't beat them. We also have all colors and patterns of swing hammocks and they are priced from $3.50 to $10.—Harrison's Hardware, Port Colborne, Ont.

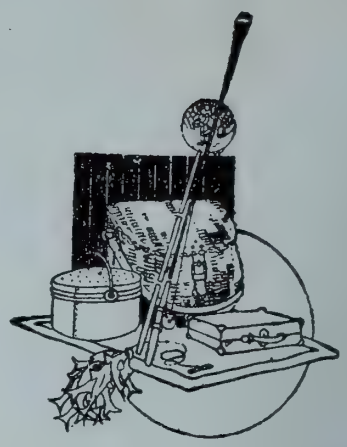
Among the seasonable lines dealt with are screen windows and doors, house paint and varnishes, kitchenware, wash tubs, lawn mowers, etc. A number of lines for use in mid-summer, such as electric fans, ice cream freezers, etc., are also mentioned, it being the belief that early suggestions will do much to start business rolling in at an early date. Note the manner in which certain special lines are grouped in boxes where they stand out from the balance of the ad. The large illustration at the top does much to attract attention of those interested in such seasonable lines as are shown.

* * *

Annual Spring Sale

Dealing with an annual spring sale, the ad by **Baxter Hardware Co., Ltd., Windsor, Ont.,** as illustrated on the other side of the page, outlines an extensive group of spring specials. The ad is headed, "With our plans guided by the needs of the home at this period of the year we have placed on sale this gathering of essentials and priced them in a manner that we feel sure will be appreciated."

Under present conditions, when purchases are largely confined to essentials, the plan followed by this store in studying conditions and arriving at a conclusion as to what are actual necessities, is a good one. It enables the best use to be made of the advertising according to existing conditions.



The ad, as illustrated, has a number of specials, to which particular attention is drawn by the use of boxes, and each line is described adequately. Among the lines advertised are household brooms, sweeping brushes, washboards, bird cages, step ladders, paint, kitchenware, garden tools. Dealing with bird cages, the ad states: "There is nothing that will add more to the cheer of the home than a singing bird."

* * *

Builders' Hardware

"When the time comes for you to build a home" is the heading on an ad dealing with builders' hardware by **Baxter's Hardware, Ltd., of Windsor, Ont.,** which continues: "Of course, you will first select your location, and this is a factor due for much consideration. Then you will want to plan your home; you will want it comfortable, good in looks, and certain of protection in winter and summer.

"But suppose you wish to sell it. Then it is that you will be glad that you selected Baxter's Builders' Hardware, because door locks, window locks, hinges and other small details of hardware choosing will figure big in the eyes of the purchaser." The ad showed an illustration of a door lock and was reproduced in two column size.

* * *

Spring Time Necessities

An ad by **Geo. A. McMurtry Co., St. Thomas, Ont.,** dealing with an extensive group of spring-time necessities, carries illustrations of roller skates, carpet beaters, game traps, watering cans, step ladders, garden tools. The ad is shown herewith. A brief description is given of each line and prices quoted.

* * *

Needs for Housecleaning

Devoting an ad to housecleaning lines **Saskatoon Hardware Co., Saskatoon, Sask.,** in a spring ad outlines polishing waxes, floor mops, stove pipe enamel, aluminum paint, etc. The ad is illustrated herewith.

* * *

Bicycles

Under the heading, "Why Not Have the Best " an ad by **Emerson & Fisher, Limited, St. John, N.B.,** deals with bicycles as a seasonable line for spring, as follows: "When purchasing your bicycle, quality should never be sacrificed for price. Buy a wheel that is

Your Spring Advertising

worth every dollar you put in it. All appreciate the staunch construction of the wheels we handle. They require so little attention. The bicycle for those who require a wheel that will be on the job all the time in all kinds of weather."

* * *

Eliminating the Fly Nuisance

The protection of the home from the fly nuisance of spring and summer months is the basis of an ad by **McAvity's, St. John, N.B.**, as illustrated herewith. It reads: "Not every fly that comes along is carrying disease germs, but many of them are, and you can't tell which is which. Take no chances. Keep every fly out by proper screening. The danger lies in allowing them to enter your home through the open door or window. If they should get in, swat them without remorse. We have several designs in screen doors to choose from. We also have fly swatters of the good, sturdy kind."

* * *

Gardening

Under the heading, "Are you contemplating doing some gardening this year?" the ad by **Stanley Mills Hardware Co., Hamilton, Ont.**, as illustrated herewith, shows some illustrations of garden tools with prices. A section of the ad is also devoted to garden seeds, with an illustration showing the operation of planting. A number of other seasonable lines are shown, each illustrated and briefly described.

* * *

Wide Range of Hardware

"Few people realize the variety and range of stocks carried by a hardware store," says an ad by **Sumner Co., Moncton, N.B.**, which deals with a number of spring lines, each illustrated, described and price marked. See the illustration.

* * *

Wheel Goods

An ad devoted to baby carriages and sulkies, boys' wagons, etc., by **Herity Hardware Co., Kerrobert, Sask.**, makes the point that in the spring, when the streets begin to clear of snow and ice, these lines will be in demand. The ad reads: "With the streets bare you need a baby carriage to replace the sleigh. Or perhaps a sulky to replace the old carriage. In buying you want one that will give service and at the same time have style. That is what we offer you." Regarding boys' wagons the ad says: "Think the next time you want the little fellow to go on an errand how much easier and quicker it would be for you and how much more pleasant for him. When you buy a wagon you make an investment that will pay."

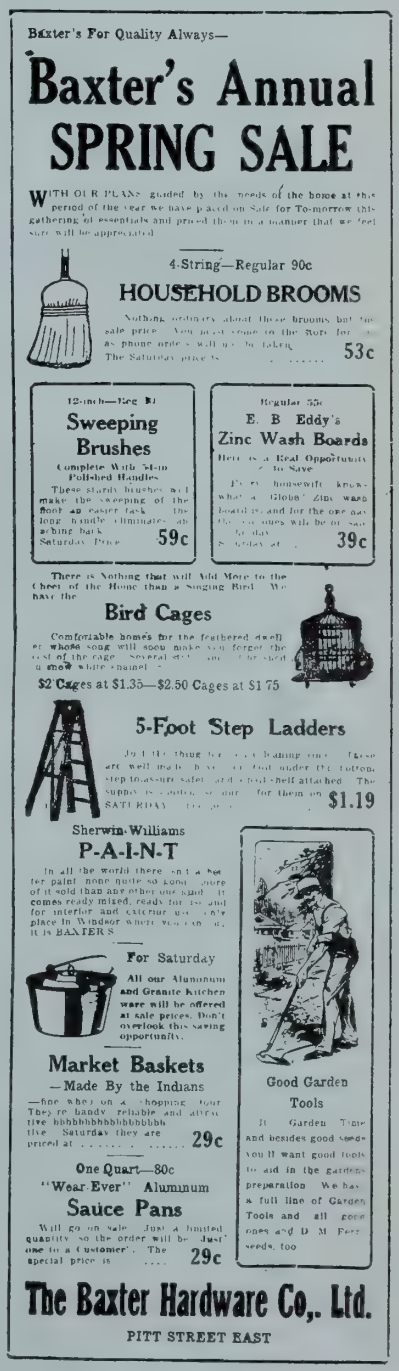
* * *

"The Appearance of Your Home,

inside and out, counts for much in your community influence—in what others think of you—in the time you have to yourself, and therefore in your happiness. That is why you should choose a good quality paint. Another reason is that protectiveness is one of the foremost requisites of paint. A house lasts 100 to 200 years. Why? Because it is painted. High standard liquid paint is the most beautiful—the most protective—and so the most economical."—From ad by **H. E. Moore, Oakville, Ont.**

* * *

"When You Overhaul Your Car



Keep in mind our stock of auto accessories, tires, tools, finishes, etc.," says an ad by **B. O. Parker & Co.**, which outlines the following accessories as suggestions: Spark plugs, switch locks, radiator caps, hub caps, grease cups, piston rings, fan belts, grease guns, oil gauges, bumpers, anti-rattlers, tire carriers, valves, mica for curtains, carbon remover, battery hydrometers, cotter pins, tire chains, tire testers, tire gum, pliers, wrenches, lamps, blowout patches, oil and grease, polishes. There are a number of lines mentioned which might ordinarily be overlooked in the preparation of an ad, and as many accessory lines are sold as result of such suggestion it is wise to mention all of these.

"To Men Only"

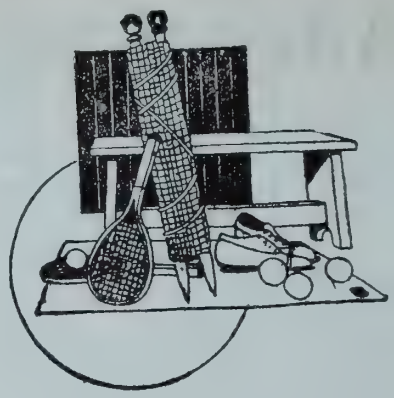
An ad by **F. P. Turner, Port Colborne, Ont.**, dealing with washing machines, vacuum sweepers and other such labor-saving devices, under the above heading, states: "You no longer cut your grain with the sickle or your hay with a scythe. But your women folk, if they are doing your washing on the washboard, are doing pretty much the same as the women did when the Pharaohs ruled in Egypt, You could no longer go back to the crude implements of those days than you could get along without electricity or railways. For one-quarter of the cost of a binder, which is used but a few days and left idle for a year—for the fraction of the cost of a typewriter or adding machine, you could equip your kitchen and laundry with modern implements." After enumerating a number of lines of washers, wringers, electric irons, etc., the ad con-

A PRIZE

is a big inducement to hard work. The summer exams will soon be on in our schools and our boys and girls will decide whether they will pass or stay in the old class for another term. How about offering that boy or girl a prize, say one of our —— bicycles, as an inducement to good hard study for the next few weeks and the exam? It means more to the children, to you, and everything you can do will be appreciated in the years to come. We have all sizes of boys' and girls' bicycles, and can let you have one on terms if necessary.—Gerry's Hardware, Fort William, Ont.

cludes, "We ask you to appropriate a small sum for the better kitchen and laundry."

* * *



Clean Up and Paint Up Week

These special occasions for pushing the sale of certain lines for cleaning up local communities have been followed by many hardware merchants with good results. Here is illustrated an ad by **T. A. Squire, Brantford, Ont.**, dealing with such a week and illustrating a number of spring specials for the occasion. Among the lines illustrated are wallpaper cleaner, garden tools, wire netting, varnishes and wall finishes, paints, floor enamel, curtain stretchers, furniture polish, step ladders, wringers, brooms, roofing, fishing tackle, paint brushes, floor mops, etc. Under the heading, "Spirit and Ability" the ad states: "The spirit with which a person does his or her work is more important than ability. A worker's spirit is contagious; his ability is not. To get that spirit you must have the proper tools and here they are at prices that will interest you." At the bottom of the ad a large number of other suggestions are given for spring clean-up lines.

* * *

Keep the Fly Outside

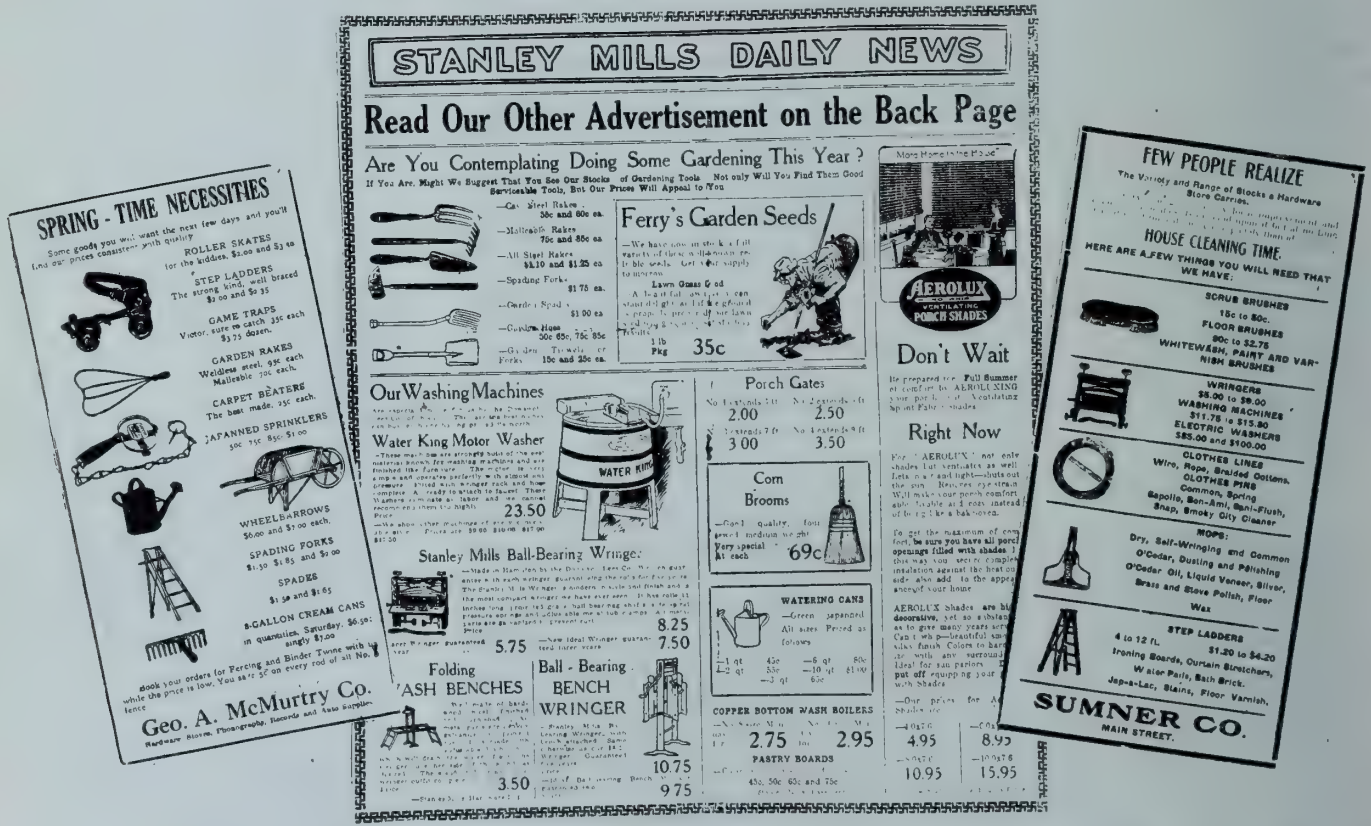
Under this heading an advertisement by W. H. Thorne & Co., Ltd., St. John, N.B., continues: "How? With fly screens, wire doors and wire netting. Now, while it is early, is the time to start

your fight against the fly pest which has been responsible for the spread of so many and deadly diseases. We have a large stock of the better kinds of fly screens and wire doors at the following prices."

* * *

For the Summer Home

"Whatever is needed to make hot weather tolerable and home surroundings trim and comfortable in the summer time is found in its best sort among our stock," says an advertisement by Rice Lewis & Son, Ltd., Toronto, which continues by enumerating refrigerators, water filters and coolers, ice cream freezers, window screens, doors and sets, wire screens, garden tools, lawn mowers, lawn rollers, hose and sprinklers.



Food Protection

"Keeps down the cost of living," according to an advertisement by W. H. Thorne & Co., Ltd., St. John, N.B., which deals with refrigerators. "The proper preservation of food goes a long way in reducing the cost of living besides making for health in the household. In the approaching warm weather especially, a refrigerator will be a vital necessity in every home. "You'll find here an excellent line of refrigerators which are scientifically constructed, with particular attention to the free, even circulation of dry cold air, their roomy compartments being easy to clean. They are shown with white enamel and galvanized iron linings, handsome oak finish and will, with ordinary care, give long, satisfactory service."

* * *

Best Substitute For a Maid

Under this heading an advertisement by McGowan's Hardware, Teeswater, Ont., deals with the advantages of an oil stove during the warm weather. It reads: "Maids are scarce and hard to get but housewives need not worry. An —— oil range and —— oil are the best substitutes. With this stove cooking is cleaner, cooler, and quicker than when done in any other way. Make a special effort to have us put a modern oil stove in your home during our spring sale—special terms and prices. Quality, Service, Value —our three irresistible salesmen."

Three samples of well-illustrated ads. on seasonable lines. Roller skates, carpet beaters, garden tools, stepladders for spring cleaning, are shown in the ad. by Geo. A. McMurtry Co. Gardening tools, seeds, washers and wringers, brooms, etc., are shown effectively in the ad. by Stanley Mills Co., Hamilton., and a somewhat different style of advertising spring lines is evident in the ad. by Sumner Co., Moncton, N.B.

Screen doors, bicycles, garden tools, paints, polishes, etc., are all spring lines which are treated in an effective manner in the advertising shown herewith. Each ad. is well illustrated, the one by T. A. Squire dealing with a week's special sale of seasonable lines.

EFFICIENT DEPARTMENTS STRENGTHEN BUSINESS

Continued from page 163

The office arrangements are unique and there is a big office staff. Mr. DeSerres has planned that there will be ample light and heat. Being one floor up, and well back of the store displays, the manager has full view of all sections. Glass partitions afford ample light during the day, and a battery of electric lamps supply artificial light whenever necessary. Many yards of desk space are at the disposal of the accounting staffs.

* * *

Sporting Goods Trade on a Big Scale

If Mr. DeSerres decides to put in a new line, and if that line be an extensive one, he usually puts it in "big." That is to say, he concludes that if a paying business is to be done, the whole line must be secured, affording wide variety for selection. This is true of sporting goods generally, and the accompanying reproduction of a recent window display will leave no doubt as to the completeness of the stock carried within the store.

Interior display is made very attractive; if results are to be the most satisfying, attention must be paid to this, always. And there is no remissness in the DeSerres plans on this score. The department, under a capable manager, is truly neat at all times, and this is, in no small measure, responsible for the steadily increasing sales that are being recorded.

* * *

Get Their Orders

In discussing this matter Mr. Mousseau, store manager, told Hardware and Metal that it was proposed to issue a catalog which could be used in helping increase the sales of sporting goods. This will be arranged to contain illustrations of those goods, and those goods only which are offered for sale. This helps all around, in that there is little or no confusion. For instance, if a baseball club wants a certain type of uniform, it will select it, knowing that the store has what is described and illustrated. Otherwise, with a number of "dead" lines described, there is bound to be confusion and dissatisfaction. Mr. Mousseau stated that the idea was to cater to the needs of clubs as well as of individuals. By having the big stock it is thus possible, in nearly all instances, to get the business. By making sales in most cases the actual cost of overhead is lessened, for waste motion is increased expense in operating costs.

The excellent display herewith shown scarcely needs comment. It is neat, attractive, sales-provoking and represents good variety. The arrangement indicates the care that has been taken to make this a selling window, and it is but typical of many others that are dressed from month to month. The large plates of glass are kept scrupulously clean and hundreds of interested spectators view each new showing.

CITY LAW TO REGULATE NEW HEATING PLANTS

The Toronto city building by-law is to be amended in accordance with legislation just obtained by the city giving it power to regulate the installation of heating plants in houses. The new bill does not empower the city to specify the size of furnaces, although there has been considerable complaint that some installations have been too small to heat the houses in which they have been set up. The city did not ask for this provision, inasmuch as it would be held responsible in case the heating plant was inadequate. All the city architect will be able to do is to make regulations regarding the installation. These will have reference to the position of the furnace and the pipes. In some instances pipes were found to be horizontal instead of slanting upward, the effect being that the heat would not rise to the upper floors. The city architect will frame a regulation fixing the angle at which they should be placed and also as to their location from a fire standpoint.

Meeting Problems of

Customers Are Watching Merchants' Policy Closely in Regard to Prices—Rather Lose Some Profit Than Customers' Confidence—Buying in Smaller Quantities But Oftener Requires Closer Attention to Stocks, Says McAvity's, St. John, N.B.

CUSTOMERS and visitors to the hardware store of T. McAvity & Sons, Ltd., St. John, N.B., are often heard to express their admiration of the service end of the business. It is an utter impossibility for a customer to enter the McAvity store, and escape the attention of a salesman. For this reason, in planning the layout of the fixtures, the counters were made to extend right up to the main entrance, and as soon as a customer puts his foot inside the door he is at the front end of the counter, at which there is always a clerk, or the general manager himself, S. S. McAvity. This is an idea that could be carried out with profit by a large number of stores, for in many cases it is found that the counter to which all customers direct their steps is a long distance from the front door, and if all the clerks are busy the distance makes it difficult for the customer to see that he has been recognized, so that, if in a hurry, he may walk out before being served.

Three Main Departments

On the ground floor there are three main departments, which are in turn sub-divided, allowing a section for each particular class of goods. The entrance to these departments is also right near the front door, so that the customer upon entering, either goes to the left or to the right as the case may be, or if it is shelf hardware, flashlights or silverware he wants he stays right where he is. Service has been a great factor in building up the business of Messrs. McAvity & Sons. The writer on one occasion asked three St. John citizens why they dealt at this store, and the reply in the first case was, "Because I receive the personal attention of one of the directors of the company." The second citizen replied, "Because there is always a clerk at the door to wait on me," and the third reply was, "They

UNIQUE ARRANGEMENT OF STOCK

The stock of general hardware, tools and silverware in the T. McAvity & Sons, Ltd., store, St. John, N.B., is shown herewith. The foremost gentleman in the centre aisle is S. S. McAvity, general manager.

This view indicates the plan followed in arranging the stock in this store—namely, to have everything in sight and within the easy reach of the customer. The first showcase on the left is devoted to tools, and general lines of shelf hardware are carried in the wall cases, samples of each line being affixed to the exterior of each drawer. These drawers extend right to the top of the store and are reached by use of ladders. It will be noted that samples of a few lines are placed on the top of the showcase for special attention.

On the right will be seen the stock of silverware attractively displayed in glass fronted wall cases and cutlery is shown in the showcase.

Readjustment Period

Extend Counters Right to Main Entrance—Salesmen in Close Touch With the Customers—Auto Accessories and Sporting Goods Go Well Together—Lining Up to the Slogan: "You Can Get it at ———"

always have what I want." These replies all go to show that the efforts of any hardware man along service lines are always appreciated.

Salesmen Imbibe Spirit of the Firm

Many of the salesmen have been with the company a large number of years and have imbibed the spirit of the heads of the firm in their efforts to build up this large and successful institution. It has been proved over and over again that a customer likes to be waited on by a salesman that has been behind the counter with the same company year after year and who knows him by name and does not have to say, "What name, please?" or does not have to make enquiries about credit when the customer says "Charge it." The McAvity clerks all make it a point to remember their customers' names, and even will look up their address in the city directory if the customer does not give it. Experience has proved that all customers, without exception, like to think that they are well known by the store with which they do business.

Comprehensive Stock

"Everything in hardware" is a slogan which might well be adapted to the McAvity Company. Their stock is so comprehensive that it takes in everything from a tack to a concrete mixer, and their activities are not only devoted to store business, but salesmen are out every day selling to builders, contractors, carpenters, plumbers, large corporations and steamship companies. Every steamer or vessel entering the port is met by a McAvity salesman, who is capable of offering and quoting prices on any article in the hardware and marine line, paints or rope. This is a large and important end of their business, and one which the firm has handled successfully since its inception in 1834, the date on which the late Thomas McAvity started in business on his own account, the only vessels at that time being made of wood. It is an interesting fact that Mr. T. Mc-

SPORTING GOODS AND AUTO ACCESSORIES

A large and well-assorted stock of sporting goods and automobile accessories is kept on hand in the McAvity store.

The first showcase on the right in this department shows a wide assortment of games for children and grown-ups. Instructive toys such as wireless outfits, erector toys, etc., have been special favorites with the children customers. The wall fixture behind shows a glass-fronted case containing a display of fishing accessories, baseball bats, etc.

The next case is devoted to automobile accessories and it has been found the two departments go well together in many ways. For instance, the luncheon kits may be an accessory on a fishing trip and yet be of interest to the motorist. A number of accessory lines are shown on the top of the showcase. Surplus stocks are kept on the other side of the store in spacious compartments within easy reach.

Avity was only twelve years old when he entered the business world and became apprenticed to the "ironmongery" business, and "To learn the art, trade, and mystery thereof."

For many reasons it is to be regretted that the time of indentured apprentices to the hardware business is a thing of the past, for there is no doubt, but that it made thorough hardware merchants, many of our merchant princes of to-day, in fact nearly all of them, in their boyhood days were apprenticed.

Mr. McAvity was also a sticker. Thirteen years was his record with the merchant who taught him the business, and at the end of that time, at the death of his employer, he took over the store and there the first stone was laid of the now great McAvity institution, which, with its other branches, during the great war, gave employment to over 2,500 employees.

No Shop-Worn Stock Shown

Window, counter and showcase displays are used to the greatest possible advantage. There are five windows facing King street, St. John's main thoroughfare, and these are changed continually, the stock never being allowed to become tarnished or soiled, therefore the windows have always a fresh and clean appearance, which is a great aid in creating the impression with the public that the stock is brand new, and not shop-soiled. The glass is also cleaned every day, giving the store a spic-and-span appearance. Special attention is paid to the window trims to keep them interesting to the public.

For instance, during the shipbuilding activities in and around the city during the war special displays were made showing the large assortment of tools used in the building of wooden ships, and also showing models of vessels that were built in St. John years ago. A splendid display of all the different kinds of rope and cordage used on board ships was one effective trim. The construction of a shell was also demonstrated from the rough to the finished article. This type of window display causes considerable interest and crowds at a time would gather around the McAvity windows.

Catalogue of Motor Accessories

The show cases, like the windows, are always kept clean and fresh looking and changed frequently, seasonable goods being on view all the time, making it an easy matter for a customer to make a selection. The automobile accessory department is a big feature. A full line of accessories is carried and a large volume of business transacted in this particular line. A catalogue of the needs of the motorist is published and contains full particulars of every article listed. The automobile accessory department is carried on in conjunction with the sporting goods department, under the managership of Mr. Trentowsky. It has been found that these two lines go exceptionally well together, as most motorists are interested in sport, and many sportsmen are automobile owners. Mr. Trentowsky is more than satisfied with the growth of the automobile accessory department, and it has been found necessary to have special fixtures built to accommodate the stock. Special window displays of this line are made from time to time, coupled with newspaper advertising. These displays and advertising are always made seasonable. For instance, if bad weather approaches, non-skid tires, chains and other winter necessities are featured. These are shown in the window, and full particulars given in the advertising.

Advertising

With reference to the company's advertising it might be well to add that

Make Your Car Look New For a Dollar or Two

Sure, you can refinish it yourself with

New car, John?
No, 1920! Refinished her myself with
—— Auto Finishes.

AUTO FINISHES

A few hours of interesting work and 24 to 48 hours for drying will transform an old weather-beaten car into a real automobile.

Let us show you how to make Monday an ordinary day in your home—and in your life.

'Phone M. 2540 **McAVITY'S** 11-17 King St.
St. John, N.B.

Two samples of the advertising done by T. McAvity & Sons, St. John, N.B. Illustrations are generously used in the advertising (illustrations not shown herewith) and a catchy heading in bold type acts as the bait to draw prospects to read the message. The statement in each ad. is brief and to the point, and a study of local circumstances surrounding the use of the article provides the ad. writer with ideas which will attract attention and secure the reader's interest. The attention of readers of the ad. is drawn to displays in the store windows of the lines advertised. Thus the value of both mediums is enhanced.

it is of such proportions that the services of an advertising manager are required. Fred S. Stewart has successfully handled this end of the McAvity business for many years, and has made a thorough study of advertising from all standpoints. "To advertise successfully," says Mr. Stewart, "the story should be told to the individual, not to the masses. When speaking to a crowd the speaker is liable to unconsciously send his message over their heads into space and obtain no results. An advertisement should tell its story in the same manner that it would be told by the efficient salesman to his customer over the counter. Write your advertisements as you talk, and remember that however large a circulation your newspaper or magazine may have you can only talk to one customer at a time."

Sporting Goods

In the sporting department everything is stocked for the many lines of sport. Fishing rods, lines and tackle, rifles and shot guns, camping outfits, tents, hunting necessities and ammunition for every gauge gun. During the hunting season some very artistic windows are shown, displaying the mounted heads of moose, bears, wolves and other animals shot in the New Brunswick forests. These hunting scenes attract much attention from the American visitors who come to New Brunswick during the hunting season and bring in a large amount of business.

Paints and varnishes are handled extensively by Messrs. McAvity, and a special department is devoted to the sale and displaying of these goods.

This department is managed by Stanley Harrison, and here again service is recognized to be one of the most important factors. Service, window displays and advertising have together built up this department until it ranks as one of the main departments, and is always a scene of activity.

The fullest use is made of the manufacturers' window display and show cards. However slow some merchants may be in using the advertising supplied by manufacturers they establish no precedent for McAvity's. Their paint window trims are always accompanied by the large display cards supplied by the paint manufacturers and on the counters the customer finds color cards and all information he may need to assist him in painting up his home or buildings. Motor boat owners and yacht owners are large buyers from McAvity's, and during the season a large amount of space is devoted to the advertising of paints and varnishes for this use, and at the same time the windows are trimmed with everything needed by the boat owners when fixing up for the summer.

Carpenter's and engineer's tools is another very important line. A good deal of space is given to these goods, both in showcases and wall fixtures, and the firm boasts that they can supply any machinist, carpenter or engineer with any tool he may require. In this de-

THE PAINT DEPARTMENT

This is where the giving of service to customers brings real results, according to Stanley Harrison, the manager, who credits the success of the department to service, window displays and advertising. Paint window trims are always accompanied by the cards and literature supplied by manufacturers and color cards are used generously in the store to help customers in their selection.

Much time and space is devoted to the sale of paints and varnishes for use on boats, and this is an important part of paint trade in this city. Special displays, featuring various lines of hardware for use on boats always contain a good showing of paints and varnishes.

A well-assorted and complete stock of paints and varnishes is here shown, and the salesmen make a specialty of advising customers as to best color combinations, best methods of application and other points.

partment the company's slogan, "You can get it at McAvity's," is very appropriate, for to use the words of a St. John carpenter, "You can." The company have on view an old saw supplied to a customer in the year 1860, which is in a remarkably good state of preservation. These saws were at that time manufactured especially for T. McAvity by Marsh Bros. & Co.

Lumbermen's supplies for many years have received special attention. Each year as the lumbering operations commence special window displays of lumbermen's requisites are made, and considerable advertising is carried on.

Shipping and Delivery

The shipping and delivery department is well worthy of mention. The company has two city motor deliveries for light hardware, and heavier teams for the more weighty articles. The entire city is covered twice a day by a morning and afternoon delivery, and in the case of rush orders special deliveries are put on to oblige their customers. The service idea is carried out from the moment the customer enters the store until the goods are placed in his home, and even the shipping tags are used as a means of advertising the company, for on the reverse side they always carry some message to the customer.

Extraordinary Display of Plumbing Supplies

Taking into consideration the fact that McAvity's possess one of the largest plumbers' supplies department in eastern Canada, it is not to be wondered at that their display and stock of bathroom fixtures is a little above the ordinary. This is a separate department on the second floor and in it is a magnificent showcase devoted to the displaying of these goods. Everything that goes to completely furnish the bathroom is shown. This department is managed by T. E. Clark, an old employee of the company, who holds this position because of his efficiency in all matters connected with plumbing and plumbers' supplies. Mr. Clark believes that the attractiveness and sanitary conditions of all bathrooms depend largely on the style and character of the fittings, and with this thought in mind, the stock is of the very latest and most modern on the market. He also believes that to show bathroom fittings and fixtures to the best advantage they should be as well kept as they would be in the most particular homes. The result is that this department is kept in such a state of cleanliness that it could be used as an example for all housewives.

Promotion on Basis of Merit

A survey of the department heads of the McAvity organization reveals the fact that they are one and all occupying their respective positions because of special qualifications in their respective line of goods. Each head is absolutely conversant with the goods stocked in his department, is well known to the purchasers of these particular goods, is able to offer advice and deal intelligently with any question that may crop up. The careful selection of department heads has been a great factor in building up this large hardware business. Great care has been exercised to avoid the placing of square pegs in round holes, and as a vacancy occurs the man best qualified to fill it is the one who gets the job. There are men in the company's employ who entered as boys and have risen to some of the best positions offered by the company; others, using their training to good advantage, are now successfully running businesses on their own account.

Big Business in Skates

During the skating season the company make a bid for all the skate business they can possibly control by advertising and window displays. Full page ads. are used in the local newspapers showing their complete line, together with prices. Leaflets are also distributed, and in every case the cost of postage is announced in the advertising, so that out-of-town customers can make their purchase of skates without visiting the store. A table of sizes is also given so that the customer knows exactly the size skate he needs for the size of his boots. "McAvity's Messenger" is a heading the company often use in their full page advertising. These full page

1 Doctor Arnott's Stove,
100 Kegs WHITE LEAD; 50 tins Paint OIL,
Casks Lampblack, Whiting, Yellow Ochre, Red Ochre, rotten stone, Glue, Black Lead, Salt Petre, Alum, &c. &c.

All the above Goods have been selected by the subscribers, in the best markets in England, and will be sold wholesale or retail, at a small advance for prompt payment.
St. John, 19th May, 1838. (Sentinel)

Fac-simile of one of the earliest advertisements used by the McAvity Firm. It is reproduced here as of historical interest only. The firm does not now sell dry goods; but the thousand and one things in the Hardware, Mill, Plumbing, Steamfitting, Contracting, Automobile and Motor-boat line to be found in their establishment, attest to the progress made since their first "ad" appeared.

Must Watch Prices Closely

Speaking of market conditions to Hardware and Metal, John A. McAvity, vice-president of T. McAvity & Sons, Ltd., St. John, N. B., said:—"The situation to-day is such that, in order to keep the confidence of our customers, we must watch prices very closely. Our reputation for service is not based alone on stock, selling and deliveries, but also on prices. As soon as there is a decline in any commodity, we reduce our price at once. This action is as important, or more so, as it was on rising market. There is no doubt but that the consumers are watching the actions of their merchants very keenly, and the dealers who are the most prompt in adapting their prices to the latest quotations will be the ones who will enjoy the greatest amount of confidence from the buying public. We would rather lose a little on the sale of a few goods than lose the confidence of our customers. I believe that the slightest depression which has been experienced during the last two or three months is about over, and that conditions are commencing to right themselves. While we may not have as big a year as on former occasions, I don't think that we have anything to worry about."

Buying Oftener

With regard to buying, W. G. Stratton, buyer for T. McAvity & Sons, Ltd., said:—"We are buying smaller quantities, but oftener, and are gauging the size of our orders by the length of time the manufacturer can guarantee before a decline. By buying smaller quantities we have to watch our stock more closely, so that we can order again before we are sold out. Declines have not been very pronounced in the hardware business, and as long as they come gradually, the hardware man will be able to handle them without any fear of serious losses."

advertisements are always profusely illustrated, and also accompanied by prices and mail charges.

During the summer months a large business is done in garden tools, and attractive window displays are made of the goods stocked by the company. Every tool needed in gardening, either by the professional or amateur, is stocked, and here again the newspaper advertising is linked up with the window trims.

Cash Carriers Used

Messrs. McAvity use the pneumatic carrier system for conveying the cash from the salesmen to the cashier, and prefer this method of handling the cash to tills or cash registers. A short time back this company installed, at considerable expense, a new carrier system, and now the cash is received up in their office from all the departments. The customer does not have to wait for his change, as the salesman makes out the cash sale slip, sends the cash, and while the change is coming back wraps up the parcel. By following out this method of procedure no time is lost. The salesman also writes on the slip the amount of the bill enclosed. For instance, if the customer makes a two dollar purchase and hands a five dollar bill, the salesman writes "five dollars" at the foot of the slip. By doing this it is impossible for the customer to think that he may have handed in a bill for a larger amount. It is also a help to the cashier and is often of assistance when busy.

To get the greatest possible returns from the window displays Messrs. McAvity leave the lights burning after the store is closed, and many citizens taking an after supper walk view the lines offered.

Cutlery Given Special Attention

The cutlery department is worthy of particular attention for several reasons. For a large number of years this department has been specialized upon, and a great deal of care and attention has been bestowed upon it by the department head, S. C. Hoyt, who is a long service man, and has had considerable experience in handling cutlery from all parts of the world. Mr. Hoyt does the buying for this department, and he watches closely to buy just what the public favors. A full range is carried from the lowest priced goods to the most expensive made. These are displayed in a beautiful showcase, which is often admired by their customers on account of the skill shown in the tasteful arrangement of the goods. Full page advertising is often used in connection with the cutlery department, and often McAvity's will have a window devoted to the showing of pocket knives and table cutlery alone, which will give the reader some idea of the magnitude of their stock. Any hardware man will tell you that it is some job to fill a window with cutlery.

PAINT WINDOWS USED FREQUENTLY

Window displays are an important part of the selling effort made by the paint department at T. McAvity & Sons, Ltd. Generous use is made of window cards, color cards and other advertising literature supplied, as shown in the window herewith.

Paints and varnishes for use on boats are frequently featured owing to the nature of the business. One of the window cards carries the message, "A building not too old to stand is not too old to paint." The other says, "Not what you pay, but what you get is the real test of value. In —— brand paint and varnish you get the value."

A wide range of paints, varnishes, auto finishes and other specialties are shown.

Employees' Athletic Association

The employees of the company have an athletic association and many enjoyable events are carried out. These affairs are often attended by the directors of the company, and have the tendency to keep the whole organization together and promote a co-operative feeling throughout the whole establishment.

WINNING A HIGH PLACE IN THE PUBLIC ESTEEM

(Continued from page 165)

single purchase for this year's trade included over one hundred automobiles.

"But it must not be thought that the success of Mr. Sutherland and Mr. Stelck was gained by any means other than hard work supported by confidence and optimism. These men were not afraid to work, and work they had to because it was their principal and capital as well. And by the way it may truthfully be said that they still work.

"As citizens both men have been identified in a public way with the advancement of the town. They have always been willing to shoulder their share of the work. They have been members of the town council, school board, agricultural society, board of trade, and assisted in every work that had for its object the good and welfare of the town.

"In their new premises they will be able to do business under more congenial surroundings, released from the care and anxiety of the struggle of earlier days; but, on the other hand they will be denied the joy of past days when they worked in their overalls and smocks and were not afraid to soil their hands and faces in tackling any job that happened to come along."

Business Associates.

Associated as stockholders in this business with Messrs. Sutherland & Stelck are James Gardner, Blake Phillips, Wm Sutherland, and Russel Gardner.

Some Practical Ideas for Tinsmiths

Details for Patterns of Grain Hopper and a Hinged Skylight—Some Interesting Data Set Forth in Reply to Correspondents' Enquiries—These Might be Kept by Tinsmiths For Future Reference

SOME instructive drawings of patterns for two fairly common articles in the tinsmith trade are here shown, specially prepared in answer to inquiries from correspondents. The authority for these drawings and data is O. W. Kothe, principal St. Louis Technical Institute.

Patterns for Grain Hopper

Answering the inquiry for layout of a grain hopper according to sketch submitted, and not knowing if this position of bases is the correct interpretation of the plan or not, I have sought to get further information, but even at that the correspondent's drawing is not any clearer, since his measurements indicate one thing and his drawing indicates another.

But working to the measurements, as the plan and elevation in the attached drawing I get that position, and if it is not correct, then the workman must adjust the measurements and positions to suit his work.

Whatever this makes, the working out by triangulation would be the same as in this case.

By reference to a 45 degree line on the plan I take it the heel of elevation is to slant that much.

So draw this slant of elevation and measure over the great diameter and then draw the plan, placing the rectangle base as measurements work out as A-B-C-D in this case.

Divide the round base in any number of equal parts and draw lines to the corners of rectangle as shown.

Now by erecting lines from rectangle of plan we cut the 45 degree line of elevation and this enables us to establish the height H-T.

After this the problem is treated identically line a square to round transition.

The plan lines are picked and transferred to diagram of true lengths, placing the straight number as B-1-2-3-4, etc., to the right of T and the numbers as A-1-2′-3′-4′, etc., to the left of T.

Then by drawing lines to H, we have the true lengths.

The reason for doubling over of the numbers it makes it easier to keep track of your lines, and it is a most difficult matter to work the numbers backwards while developing the patterns.

The pattern is set out the same as any ordinary square to round, only working each half separately.

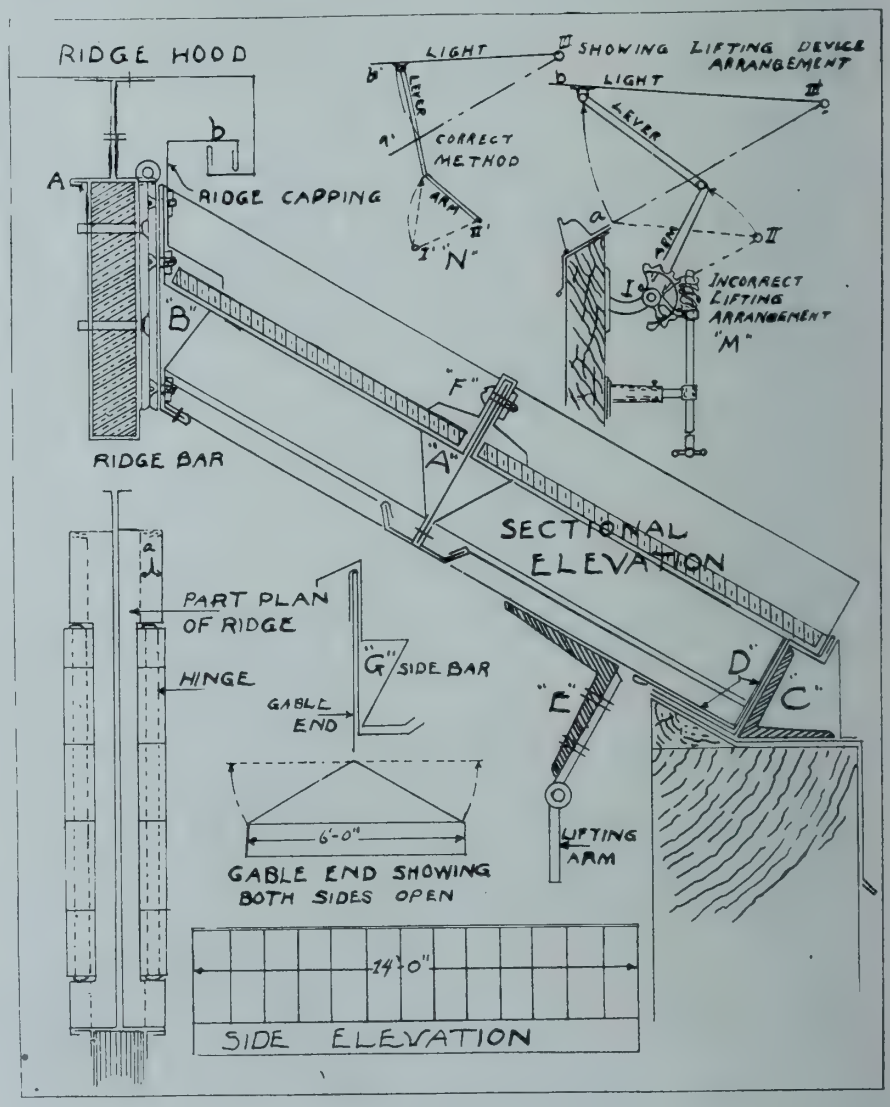
In this case we start with the heel A-1-B and work each way.

The matter of placing the seams is left to the workmen.

But it may be best to lay the full pattern off on a large piece of paper, and then punch off the patterns, making the seams where you want them, and always allowing laps for riveting extra.

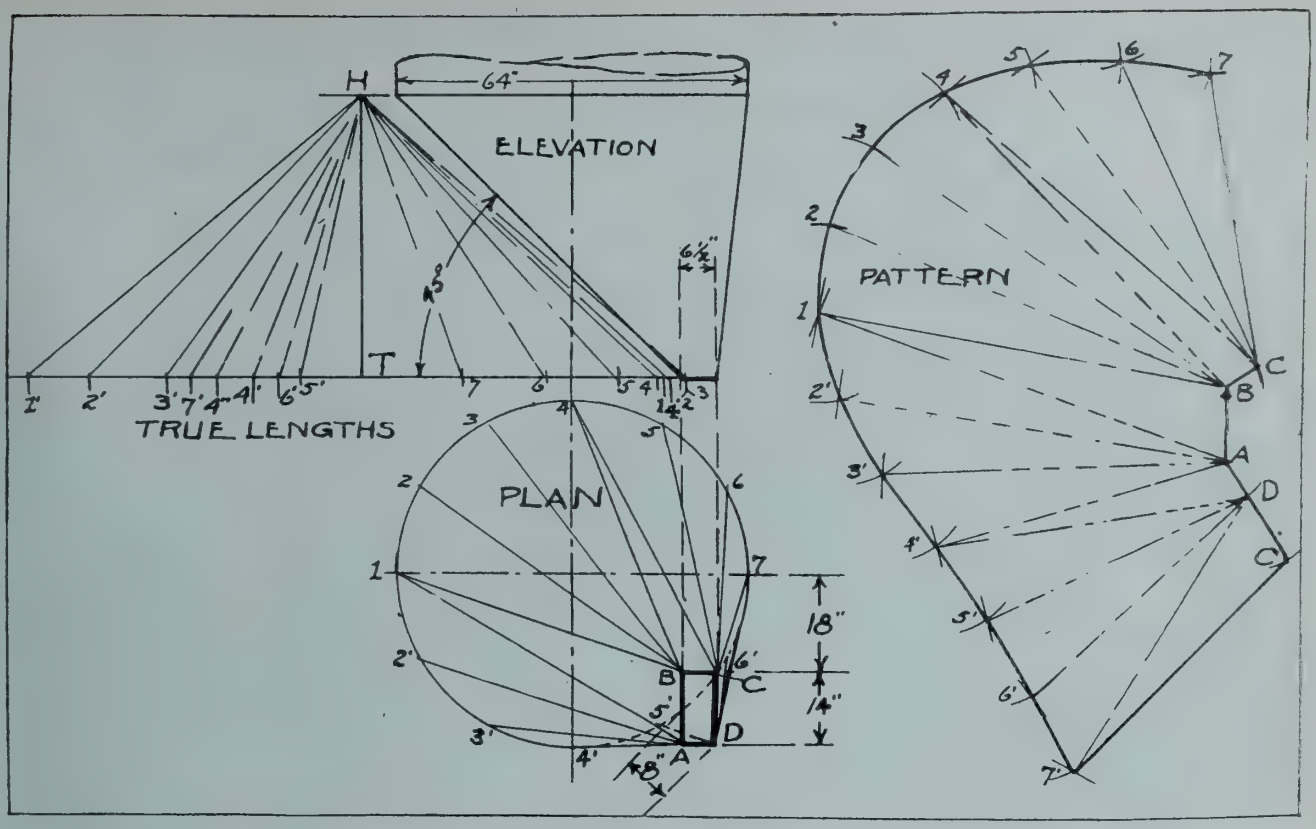
Hinged Skylight

In answer to the sketch for details of a gable skylight with raising lights on both sides, the accompanying drawing will help out.



It is seldom that a skylight where the full sides open up and both sides at that, which makes this problem a little out of the ordinary.

The idea as met with in a gable skylight is followed, only such changes are made to suit our purpose. The correspondent in his sketch showed a 3″x½″ flat bar for the core bar of ridge.



Not knowing if this was specified, or merely placed so in the absence of a better idea, the flat bar is shown here.

It would be better to make this central bar a T-bar, with the flange underneath. This would give greater strength to side pressure.

The skylight is 14 feet long and 6 feet wide and 30 degree pitch, which

Pattern For Hinged Skylight

Pattern For Grain Hopper

makes the length of common bar about 3 feet 6 inches.

This is a good length, and considering the length as 14 feet there will be considerable weight of glass.

Now the common bar section "A" ought to have a core iron of about 16 gauge to lend stiffness of bar.

From each point in this section draw lines at 30 degrees both ways.

At a convenient distance from "A" draw the ridge bar section and add also the curb bar "C."

Observe how the ridge is formed to give strength. Also notice the bottom curb "C" with an angle bar having a closed bevel set in place to support the lower curb.

Some means of support must be placed here, or the raising and lowering of sash will deform the curb, and especially as it is made of copper.

A false curb "D" must be attached to the common bars and made so it will drop in the curb "C."

Now as a means of raising or lowering the sash and angle bar, "E" should be riveted so the lifting arm can be attached.

At least two lifting arms must be attached to this angle, say, about 4½ feet from the ends. Three lifting arms would be better.

Now the correspondent wanted to know how to overcome that opening space -a- of part plan caused by the thickness of the hinges. I would suggest you put a joint as at A at the top of ridge.

This lock edge could be out for hinges or turned up and will cover the open space. This lock edge should not be made too large to interfere with the raising sash.

As a means to keep snow and rain out a ridge hood and ridge capping as -b- can be designed.

By leaving ample space the shield -b- will raise and drop, thus making a comparatively tight joint as concerns driving rain, snow and dust.

These details are suggestions, and the workman can alter them to suit his own ideas of conditions.

The side bar "G" is formed as shown to fit over the gutter of a set in pocket.

Patterns as required are very simple, only good long laps must be allowed on the common bar end for riveting securely to the curb "D" and ridge "B." If this is not done, the twisting of the sash would crack to joints.

It would be better if the sash were made in two pieces so each half could be raised or lowered at a time.

As to lifting devices, I must advise the correspondent to write for catalogs of such firms that advertise in trade journals.

However, there is a correct and incorrect way of installing this equipment.

At "M" our sketch shows a common lift device ordinarily met with.

At 1 is a ¾" gas pipe which is the main pivot.

The sash is shown as 111-a closed, which places the lifting arm as 1-11-a.

Observe the extreme acute angle this produces. So that by raising the arm there will be a strong pulling force on the hinge 111 as well as on the hinge lever.

Now this is overcome by the drawing "N," where 11′ is the gas pipe pivot and 1′ the arm hinge.

Observe that by raising the arm 1′-11′ an almost straight line is maintained for the lever, thus opening the light with the least resistance.

The light 111′-b′ should never be permitted to open wider than horizontal. So in case if left open, and during a rain, the water will shoot over the back edge.

The light in "M" is placed over horizontal and in case of rain, the water would run down at the hinge, and on the inside.

Much of this can be observed while installing the system, and it may be helpful to visit greenhouses and note how the equipment operates.

Hardware Merchants Prominent In Developing Increased Electrical Trade

Evidence From Leading Hardware Merchants Throughout Canada Points to the Important Part They are Playing in Developing Electrical Business—Many Customers Prefer to Buy "Electrics" Where They Buy Their Hardware—Outline of Progressive Ideas Adopted by Merchants in the Interests of Bigger Electrical Business

MUCH success has attended the efforts of a large number of hardware merchants in Canada to develop business in electrical goods. There have been a number of reasons why the hardware store has developed as a logical medium of distribution for electrical requirements and some of these will be outlined in the following brief statements by only a few of the hardware merchants who have successfully developed this line:

Electrical goods have a large place in the business of **W. H. Thorne & Co., hardware, St. John, N.B.,** and of recent years this business has developed considerably. Electric irons and percolators have been found to be exceptionally good sellers and are ranked as staple lines. A complete assortment of electrical household goods is stocked and special showcases always devoted to the displaying of these goods.

In the sale of electrical goods this store has found that better results are obtained when the goods are so displayed that the large number of customers visiting the store for various requirements can pick them up and handle them. A large round polished table was recently added to the department, on which electric irons, percolators, kettles, grills, toasters, etc., are tastefully displayed. Almost every customer entering the store stops and looks at this table of electrical helps, and nearly as many will pick up one or more of the articles in order to examine it more closely. Once in the hand, the desire to own is created and many sales result. Good window displays are made of these goods and they are always mentioned in the newspaper advertising.

* * *

ELECTRICAL DISPLAY ATTRACTS TRANSIENTS

Located at an important junction point on the street railway line, **May Bros., West Toronto,** make best use of their windows for electrical displays, to attract the attention of transients. The display shown elsewhere in this article is typical of the effective arrangements made by this firm and electrical windows are frequently shown. It has been found that the large number of customers for other requirements in the store have been largely influenced by such displays of electrical goods in the windows and in the store interior.

* * *

CATERING TO WOMEN'S TRADE

As the woman of the house very often buys electric fixtures and in some communities the larger portion of them, this fact suggested to **Lacroix & Leger, hardware, Montreal,** that they would profit by confining the display of such goods to one section of the store. Therefore electric goods have been grouped by themselves in a department far from the noise and confusion of other parts of the store. and amid surroundings where a quiet and careful choice can be made.

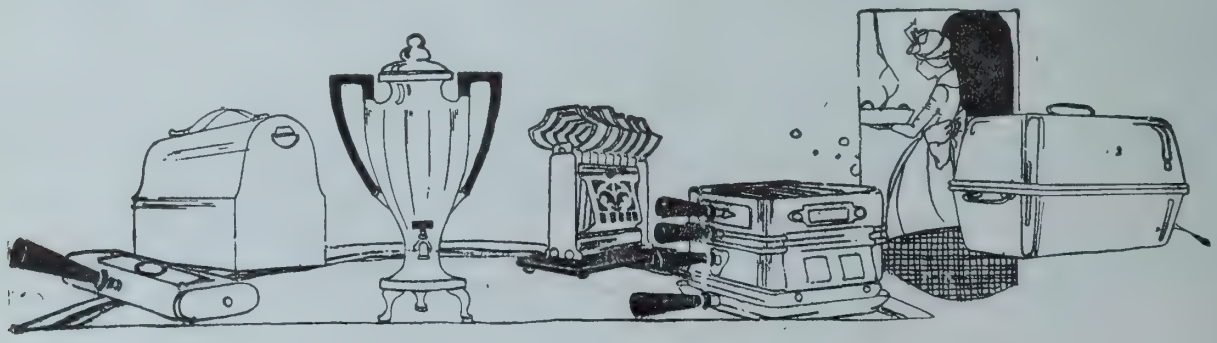
UNTIMELY ADVERTISING

An ad. on electric heaters which has recently come to the attention of Hardware and Metal, and which appeared in an Ontario newspaper on February 10th, is entitled "With the approach of fall the comfort of an electric heater will be appreciated in the household." It was with relief that we noted the ad. was by an electrical dealer, thus absolving the hardware trade from the charge of untimely advertising.

"We have a capable manager of the department who is fully acquainted with electrical matters and he carries out his own policy throughout," said Mr. Leger.

For all kinds of fittings and fixtures used in connecting and installing lights, boxes are used in the shelving and these are sampled. Ready access to any desired fixture is thus secured.

* * *



TURN ON THE POWER

In a quiet but effective manner **A. H. Bedard, 392 Victoria Ave., Westmount, Montreal,** is creating a healthy demand for electrical goods. Turning on the power in heaters, electric lamps, etc., has been found to be a good way of attracting attention to them and the small cost of the current is thought to be good advertising. In selling electrical devices Mr. Bedard always makes sure to give complete instructions for the use of the article sold in order to avoid danger and insure best results.

Mr. Bedard, when interviewed by Hardware and Metal, put forth a strong argument for the store salesman having a definite knowledge of electrical goods so that there is no guesswork in giving instructions for use. Mr. Bedard has also found that to tell a customer, for example, that it costs about 2½ cents per hour to operate an electric heater, that they are agreeably surprised with the low running expenses. He is of the opinion that ignorance as to costs of operation keeps many people from buying electrical goods. He is taking steps to see that this does not happen in his store.

Competition With Electric Stores

Mr. Bedard faces competition in Westmount with exclusive electric stores, but his trade is growing and he finds there are quite a number of his customers who

prefer to purchase these goods where they have been in the habit of buying their hardware regularly. He therefore carries a complete stock of fixtures, toasters, chafing dishes, irons, portable lamps, etc.

* * *

A LIVELY CAMPAIGN

A big drive was instituted by the **Cowan Hardware Co., London, Ont.,** on three days as a means of developing business in electric washing machines. A woman demonstrator was brought to establish more intimate connections with the women prospects and owing to her knowledge of fabrics and the best ways to wash them. Much advertising was done in advance and the results of the sale exceeded the utmost expectations.

* * *

EXTENSIVE ADVERTISING

Ingram & Davey, Ltd., St. Thomas, Ont., have a splendid electrical department and couple up an appeal for electrical goods business with practically all their advertising. A recent advertisement in large space illustrates electrical ceiling fixtures, irons, heaters, percolators, boudoir lamps, vacuum cleaners, electric washers, violet ray machines, etc.

* * *

ADD TO THE COMFORT OF THE FAMILY

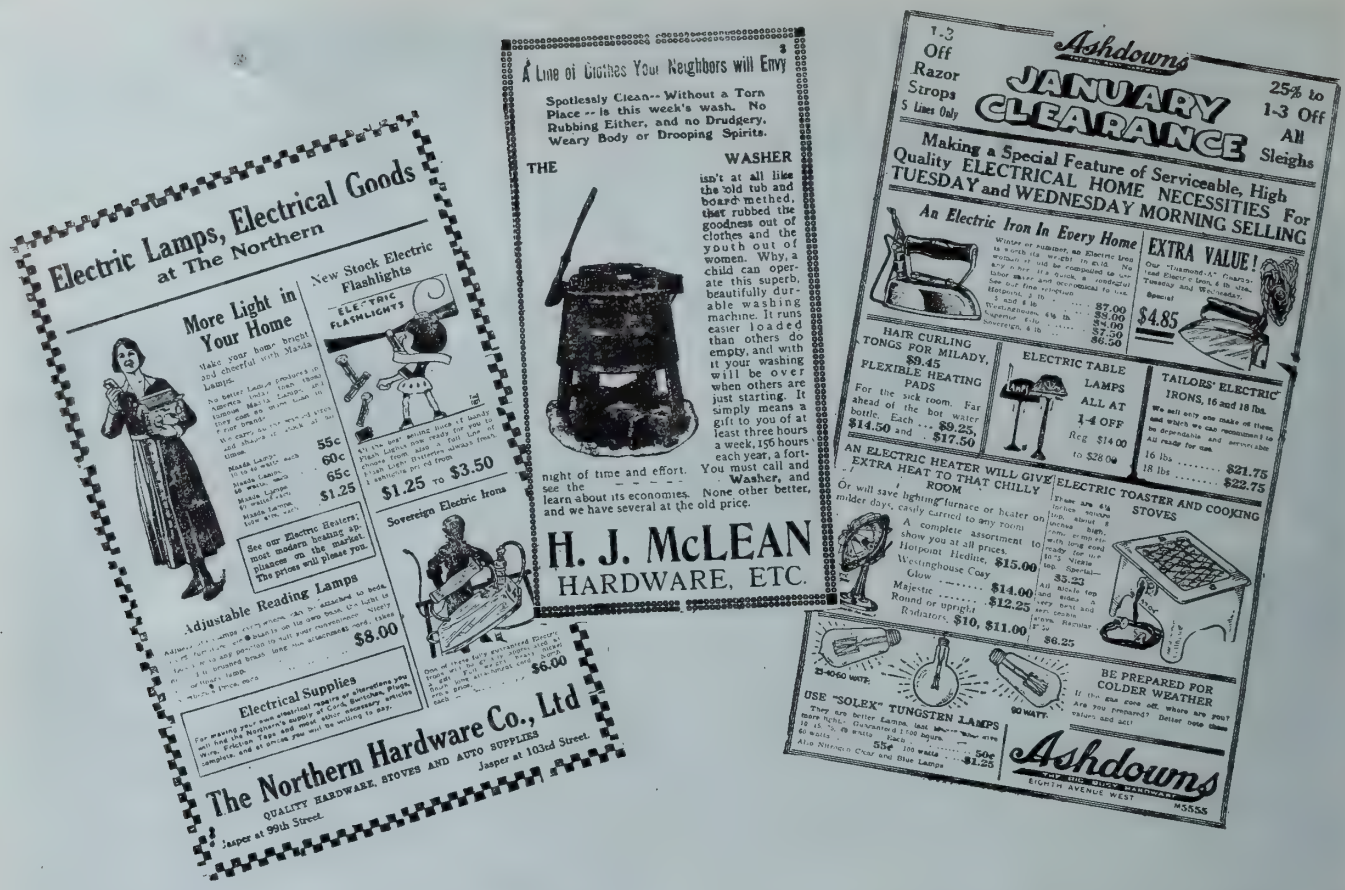
Under this heading an advertisement by **Rice Lewis & Son, Ltd., hardware, Toronto,** points out that by cooking electrically you will add to the comfort of the family and ease the labor of the household. It continues by describing a percolator, grill, toaster, electric heater and other such lines.

* * *

WINDOWS SELL ELECTRIC DEVICES

"Window displays are largely responsible for the success which has attended our efforts to sell electrical lines," said Mr. Perry, of the **Perry Hardware Co., Estevan, Sask.,** discussing the matter with Hardware and Metal. "Windows of electric goods and such lines as appeal to women have had the biggest pulling power." An up-to-date electric fixture display is always shown in this store, fixtures being attached to the ceiling and connected so that they can be illuminated readily.

* * *



PLEASED WOMEN ARE BIG ADVERTISERS

In connection with the sales of electrical goods in the **W. D. Edge, Ltd., store, Ottawa, Ont.,** it has been found that women are the chief buyers and that it pays to cater to their tastes. Thus in the household goods department, in which are displayed electric washers, vacuum cleaners, table appliances, etc., women are employed exclusively to sell these lines. The management felt that women

WHERE EFFECTIVE ELECTRICAL DISPLAYS BRING BIG RETURNS

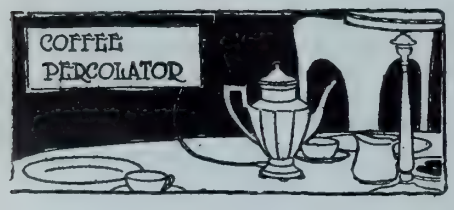
An attractive display of electrical goods by May Bros.' Hardware, West Toronto, which won much favorable comment. The display shows an extensive grouping of electrical lines in sufficient range to make an appeal to practically every passerby. At night the electric reading and boudoir lamps were lit. It will be noted that a great many lines of value to the man handy around the house in fixing up electrical devices are shown. These include wire, rosettes, switches, sockets, receptacles, tubes, knobs, fuse plugs, etc. These are shown in addition to the heaters, reading-lamps, toasters, grills, lamps, batteries which are also tastefully grouped.

Customers entering the store for other hardware often become purchasers of electrical goods through the medium suggestion of a good display. This is where the hardware store has a big advantage and hardware merchants are "cashing in" on it.

were better acquainted with the various uses to which such goods are put in the home and were therefore better able to offer suggestions to increase the utility of the lines offered. This is but one of the novel plans worked out by this store to encourage the sale of electrical goods.

In some recent advertising of electrical goods **The Manville Hardware Co., Prince Albert, Sask.**, makes the point that "electric appliances lighten the housework." It then proceeds to describe electric irons, fans, grills, lamps, ranges, toasters, percolators and bulbs.

* * *



GIFTS FOR THE BRIDE

Under this heading **T. McAvity & Son, Ltd., St. John, N.B.**, advertise grills, percolators, heating pads, toasters, immersion heaters, irons, hot water kettles, curling tongs, etc., as suitable gifts for the bride.

* * *

SHOWING ELECTRIC GOODS TO ADVANTAGE

J. S. Mitchell & Co., Sherbrooke, Que., is a splendidly equipped hardware store. In addition to the generous use of modern showcases, attractively finished high backed wall cases are used for the display of electrical goods. The stock is kept in the best of condition at all times and a substantial business has been built up on this line.

Some samples of electrical advertising by hardware merchants are shown herewith. An extensive group of fixtures and devices are dealt with in the ads and various lines are set forth in an attractive manner. "More light in the home," is the heading under which electric light bulbs are advertised. Adjustable reading lamps, flashlights, irons, etc., are also mentioned and prices quoted. The Ashdown ad deals with a group of electrical home necessities on special sale, and mentions heaters, toasters, curling tongs, etc., describing each and quoting prices.

* * *

EXPANSION OF ELECTRICAL DEPARTMENT

The manager of the electrical department in the **J. H. Ashdown Hardware Company (retail store), Winnipeg**, is a thorough exponent of the principles of advertising and display as applied to the selling of electrical goods in the hardware trade. New and larger premises were recently occupied by the electrical department, due to the expansion which has taken place in recent years. It has been found that if the customer is given plenty of opportunity to see what is new and to investigate the working of electrical devices, and test their ability, that they are a long way toward being sold. Counter displays and window displays are frequently used, these arranged to carry a homelike appeal by showing the various articles in actual use. The use of an illuminated board recently resulted in increasing by 75 per cent. sales of certain wall fixtures. A big demand in the future for electrical labor saving devices and articles of use on the table is predicted by this store.

* * *

SELLS 500 ELECTRIC IRONS IN A YEAR

In electric fixtures and appliances, **Alfred Goyette, hardware, 124 Mount Royal Ave. East, Montreal**, is having increased sales. One of the features of the development of this department is the increasing number of patrons who come from considerable distances to secure a particular fixture and probably at a price which a friend has told them is reasonable. Note this: "A woman came into the store and said she would like to look at some electrical fixtures," said Mr. Goyette to Hardware and Metal. "She said, 'My sister-in-law got a fixture from you and I want one too. Could you wrap it up for me?' " This woman came from St. Rosalie, about forty miles from Montreal, and the incident shows that

Putting electrical goods to the front is the plan followed by Allins, Ltd., Hardware, Lindsay, Ont., as indicated by this view of one of the store display windows. The fixtures and portable lamps are illuminated at night to add to the effect of the display. Vacuum cleaners, heaters and other electrical devices are grouped with the fixtures. The use of such displays has helped much to build up the volume of electrical business which this firm now enjoys.

good service pays. A large amount of the electric business of this store comes from distant points.

"How many electric irons do you sell within a year?" asked Hardware and Metal.

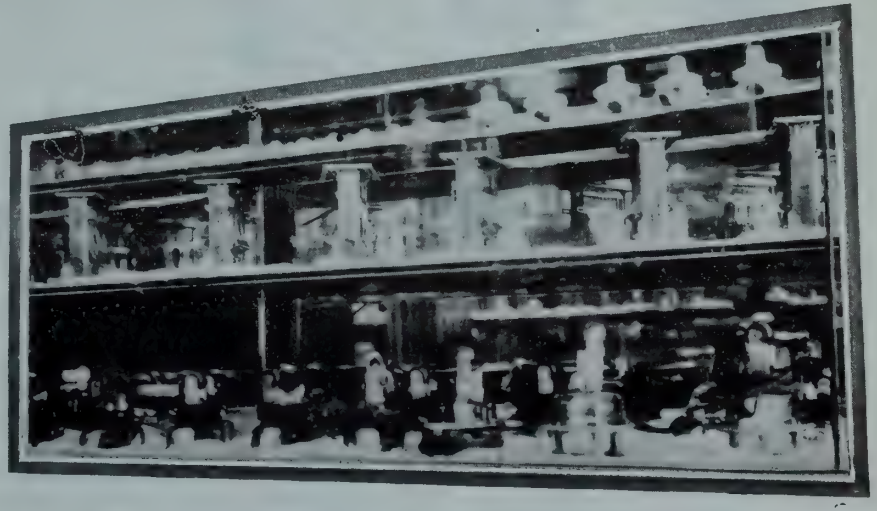
"About 500 of them, I estimate; they are a big seller with us all the year round." He thinks irons are a splendid leader for other electrical goods. Power washing machines are also a big seller in this store.

* * *

GOING AFTER FARM BUSINESS

The firm of **J. C. Wanless, Chatham, Ont.**, has made a specialty of country trade in electrical equipment and has had good success. The rapid development of electrical, radial and power lines into the rural districts has provided an unbounded opportunity and this firm is going after its share energetically. "There is a noticeable tendency in the country districts towards improvement of the homes," says Mr. Wanless, "and the farmers are interested in electrical and other equipment which will make their work easier or their homes more sanitary and attractive. The women are interested in all such articles and they are constantly planning the purchase of some such device. Wonderful opportunities for the sale of lighting fixtures, bulbs, irons and other electrical equipment, have been offered in recent years and this firm has taken a large share of such business.

* * *



STRONGER THAN EVER FOR ELECTRICAL LINES

"We are going into electric utilities stronger than ever," said **George Hubbard, hardware merchant, Barrie, Ont.**, to Hardware and Metal. "In doing this we are not only keeping up with but ahead of the public demands. We have no more popular line in our store than electrical utilities, and every one that is sold sooner or later means the sale of more." In addition to a steadily growing demand for electrical utilities the firm has a good business in electrical fixtures and no opportunity is lost to impress the public that their store is the headquarters for these lines.

* * *

BIG SALES OF ELECTRIC GOODS

"One of the beauties from the hardware merchant's standpoint in selling electrical goods is that a sale generally brings other customers. They may not come at once, but sooner or later the sale that we make to-day of an electrical device brings in Mrs. Brown or Mrs. Smith, who tells us that she saw this device working over at Mrs. Jones and wants to know about it," said **W. H. Otton, of the Otton Hardware, Barrie, Ont.** "We often find that a woman starts her collection of electrical devices with, say, an iron. It isn't long before she wants a toaster or percolator and then a sweeper and washer. People who have worked with electricity are unquestionably 'sold' on it. A recent Saturday 'special' of electric bulbs was so effective

A display case of electrical lines in a hardware store showing toasters, irons, sockets and other devices neatly arranged.

that it kept the clerks busy refilling the display table on which they were shown."

* * *

ELECTRICITY AND EFFICIENCY

"There is an insistent demand for more electric power and for electric devices," said **E. I. Torrens, hardware, Tillsonburg, Ont.**, to Hardware and Metal. "There are several basic reasons for this. One is the great difficulty in obtaining dependable help. Another is the efficiency of electricity. Every time I sell an electric washing machine or a vacuum sweeper or a reading lamp, toaster or iron, I am paving the way for many other sales from our electrical department. That is the way I find it works out."

* * *

HEALTHY REVENUE GETTER

"Electrical goods are a profitable line if handled right and this department in the hardware store will rapidly grow into a healthy revenue getter," said W. F. Moon, Toronto, to Hardware and Metal. Mr. Moon draws special attention to the purchasing department and points out the necessity of carefully guarding against the too heavy buying of specialty lines which are not likely to have a big sale, and which, in some cases, are unable to pass electrical inspection.

"My idea is to buy as far as possible only lines that are most extensively advertised," said Mr. Moon. "I find that sales are more easily made and customers are better satisfied if you can show them articles they know about. And if they happen to have seen the goods at a friend's or read about them, it is usually only a case of wrap them up and take the money. For instance, take electric irons. I always stock two makes, one of the best advertised and a cheaper line. I find it pays to set both irons out on the counter so the customer can handle them. Some minds cannot seem to register an article until the owner has handled or felt it, others judge by sound, while it is

In a small store electrical fixtures may be suspended from the ceiling in the same department in which other lines are shown. The store illustrated herewith is an example of where electrical fixtures are being displayed in the plumbing department.

"Save yourself a great amount of work by working with electrical appliances," says this ad. by Ingram & Davey, Ltd., St. Thomas, Ont., dealing with vacuum cleaners, portable lamps, heaters, percolators, irons, washers, electric fixtures, etc. Note the generous use of illustrations. "Cook electrically and you will add to the comfort of the family and ease the labor of the household," says the ad. by Rice Lewis & Son, Ltd., Toronto, dealing with percolators, heaters, etc.

APPEALING TO THE HOUSEWIFE

A group of electrical devices which appeal particularly to housewives is shown herewith. Electric toasters, grills, portable lamps, etc., are here grouped on a table within easy reach of the customer, and it has been found by the manager of this department that bigger sales result from placing such lines where the customer may handle them. "When the customer gets the article in his or her hands, the desire for possession immediately is aroused, and the sale is half made," is the opinion of this store.

only necessary for some to look at it in order to impress its different qualities on the mind. There are several advantages of setting a variety before the customer. In the case of the irons, if I only showed the higher priced one, the customer would probably think, "This store is very dear. I saw electric irons advertised elsewhere for less money," and probably walk out of the store with the old remark, "I just wanted to know the price." By showing the two together it can be seen at once that electric irons are not all alike. This is what many think and in most cases they will pick the highest priced one to make sure of securing the best.

"Most staple lines do not show as big a margin of profit as we think they should, therefore you are tempted to stock something a little different that is supposed to be as good. Notice our feelings when the inspector will not accept these in his final inspection.

"I find electrical lines one of the best revenue getters," said Mr. Moon, "There are so many electrical appliances that are almost a necessity in the modern home, such as portable heaters, toasters, irons, grills, broilers, table lamps, not to mention sockets, plugs, switches, wire, in fact, the whole line just bristles with opportunities for the hardware man. It pays to handle the well-advertised lines, for the line which is not so well known often takes considerable time to sell and then probably the customer is not thoroughly satisfied and is more or less dubious till she has found out from experience."

Mr. Moon is a very busy man, having three stores under his supervision. This naturally requires the use of a good system. He keeps all contracts and outside work separate and charges a proportionate share to the general overhead expense.

The window displays are changed every week, and of the two front windows, one is always devoted to electrical goods. It is found that one display helps the other both in sales and displays. For instance, take the window showing silverware; two electric table lamps are shown in the background. At night the other window lights are turned out and the display presents a most attractive appearance.

For a number of reasons prospects seem to be particularly good for the sales of electrical goods during the coming spring and summer. Each hardware merchant should figure out the approximate requirements of his community and then by the use of ads. and window displays such as this make a definite campaign to secure that amount of electrical business.

It would be hard to enter this store and not notice the fine show case displays which are devoted to electrical goods. The first case on the east side has a fine display of electrical irons, toasters, grills, broilers and other appliances while the next one shows a line of sockets, bulbs, wire, etc. Joining this is a counter case displaying flashlights and batteries.

Finds Electrical Goods Demand Increasing

"We find the demand for electrical goods increasing all the time," said Mr. Brittain, of Bloom & Brittain, Hamilton, Ont., to Hardware and Metal. "The goods sell themselves to a great extent. Take washers, for instance. We have no hesitancy in allowing people whom we know to be reliable to take home an electric washer. In practically every case the machine sells itself and they never come back. People like electrically-operated equipment because it more than does the work claimed for it. The equipment works quickly and efficiently. These are the big points that the buyer considers. In addition he or she likes to have a nice looking utility and few lines are better or more attractively finished than the electrical devices. On all the lines that we sell we give the widest possible guarantee.

Featuring Spring Lines In

An early spring and summer season will make an early demand for garden tools and such requirements. These are days when economy is being practised and many people are cultivating their back yard gardens, vacant lots, etc. Here is a suggestion for an early display featuring spades, barb wire, forks, hose, shears, etc., lines which will appeal to the enthusiastic gardener.

The annual spring house cleaning will soon be on and there will be much call for such lines as are shown in this display, such as garbage pails, wash tubs, ash sifters and other galvanized ware. Washing machines can also be shown in such a display as there is much washing to be done during the summer months when light, easily-soiled clothing is worn.

Window and Store Display

Business in builders' tools is likely to be active this spring, if early indications of a resumption of building activity are borne out, and some displays, such as that suggested herewith, will help to start this business rolling in. Builders' tools are the feature of this display along with shaving equipment.

Early activity in spring sporting goods is looked for this season. Herewith is a novel suggestion dealing with the spring fishing season. It will be noted that a stump has been placed at the edge of an artificial pond and on the stump rests a little man holding a fishing rod under his arm and the line in his hand appearing to catch the live fish swimming around in the running water. The display attracted much attention

SPRING DISPLAY OF ACCESSORIES

Here is an effective suggestion for a spring and early summer display of automobile accessories. Tires and chains may be strongly featured as necessary during the sloppy weather of early spring and chains for the wet days during the summer months. Repair kits may also be featured at this time along with automobile enamels and other finishes for the man who is handy in fixing up his car after the winter season. In this display a number of small lines are featured on the glass shelf suspended from the ceiling. Generous use has been made of literature supplied by manufacturers, and copies of the store's advertising and special circulars on auto accessories, are also shown on the wall panels. The cup in the centre was donated for a local athletic event and was used to arrest attention. The various lines are well laid out in the display and while price tickets are seen on some lines, they might be more generously used to good advantage.

Building Auto Accessory

Important Points in Buying, Stocking and Selling of Automobile Accessories—Use of Catalogue and Mailing Lists—Points in Advertising Accessories—Always Old Cars to be Renewed

WITH over 400,000 automobiles owned and operated in Canada at the present time, with automobile factories reopening and other signs developing of a renewal of activity in this important industry there would seem to be little reason why the remarkable development of automobile accessory trade in Canada in recent years should not be continued during the coming spring and summer. There will be large accessory requirements to be filled on account of the large number of cars now in operation, the ordinary increase in number of cars will provide additional accessory business and another important factor is the ever-increasing amount of tourist travel by automobile into this country from the United States. Owing to the premium which United States funds command in this country the extent of tourist travel during the coming summer is expected to be even greater than at any time in the past.

Canada stands in a premier place among the countries of the world in respect to automobiles owned and operated by its people. A table reproduced elsewhere in this issue shows the number of automobiles per thousand of population in the various provinces and indicates the fact that in the agricultural districts of Western Canada the proportion is greatest. It ranges all the way from 75 per thousand in Saskatchewan down to 49 in Ontario and decreasing in number in the maritime provinces.

These statistics show that the ordinary requirements of Canadian automobile owners for accessories are substantial and in sufficient volume to justify much attention from the hardware trade. The prospects for this spring and summer season as outlined show that early attention to the arrangement of the accessory department and preparation of selling plans are urgently required.

To help the hardware merchant in preparing his selling plans for the season, following are some ideas that have been found helpful to other merchants in connection with the sale of accessories.

Business in Five Years

Over 400,000 Cars Now in Canada—Prospects Good for Automobile Industry—Large Tourist Travel Expected This Season—Number of Autos Per Thousand Population in Canada

Builds Big Trade in Five Years

FIVE years ago the firm of W. H. Thorne & Co., Ltd., St. John, N.B., did not handle automobile accessories. Today this company has an automobile accessory department in their retail store, a special clerk to manage it, a traveller, a large stock room with a clerk in charge, and a buyer.

Altogether, four men are required to handle the business of buying and selling automobile accessories. All this has been accomplished in the short period of five years, and goes to show what can be done in accessories when handled by a live firm. This department was opened up by S. E. Fisher, the general manager, who personally devoted a good deal of attention to this particular line. One of the first moves the company made was to engage a practical automobile man who was well acquainted with the St. John automobile trade and knew the business thoroughly. This man, knowing the requirements of the trade, was of great assistance in buying the stock, and having been formerly employed in different garages knew the accessories that were in demand all the time for the different makes of cars that were most popular.

Issues a Catalogue

It was not long before it was found that a catalogue would be of great assistance to the customers, and consequently a business getter.

The company wrote the manufacturers advising them that they were compiling a catalogue of automobile accessories and needed cuts for displaying the different lines. These requests were promptly complied with, the manufacturers in all cases being anxious for their products to be shown. When completed, a copy of the catalogue was sent to every automobile owner in the city and province, with a neatly printed folder announcing that W. H. Thorne & Co., Ltd., had on hand a well-selected stock of automobile accessories and would be pleased to look after the motor car owner's requirements. Every article was priced, and accompanied by a short description. This catalogue proved to be such a success that, since that time, two others have been issued to show the ever-increasing number of accessories

PRIMING UP THE AUTO ACCESSORY DEPARTMENT

While some good window displays should be arranged early in the spring season on automobile accessories such as are shown on the opposite page, attention must also be given early in the season to the arrangement of the automobile accessory department. The value of the attention secured by the window displays will be much greater if the interior arrangement is sufficiently forceful to bear out the initial impression. It is always well to concentrate everything pertaining to automobile accessories in one department and get the customer in the habit of looking to that department for his accessory requirements. Sometimes the accessory department can be placed to advantage alongside some other department such as sporting goods as has been done by certain hardware dealers who find much of the interest in these respective departments is co-related.

A full page illustrated advertisement as used by the Sumner Co., Moncton, N.B., in connection with their automobile accessory department. This illustrates a large number of accessory lines and includes articles which would be of value to almost every motorist. The generous use of illustrations is an important help in the spring and summer advertising of accessories and attention should be given to having a wide range of accessories shown.

the company are adding to their stock. The last catalogue issued is about three times as large as the first issue. This fact alone shows the growth of the department.

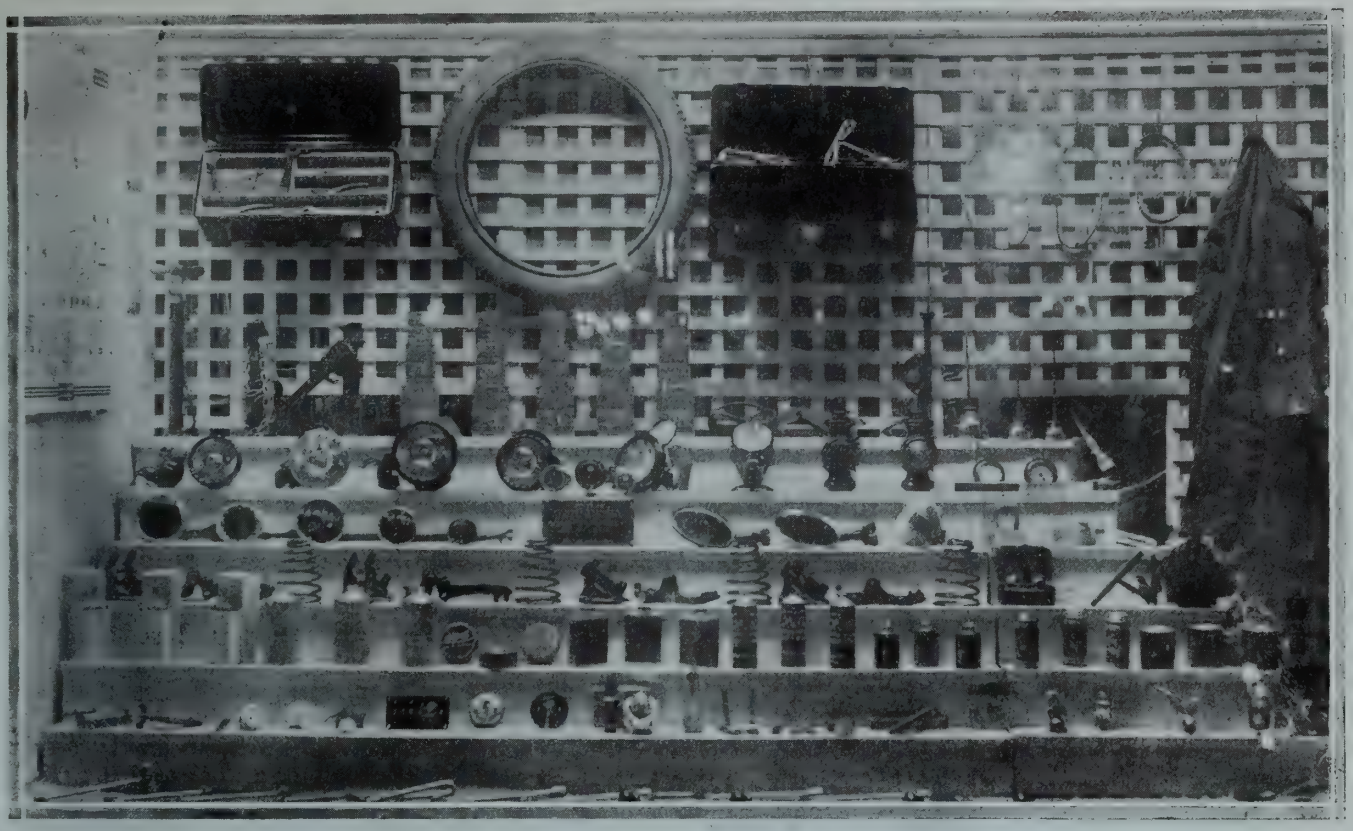
Special Stock Room

When the department was opened up, the stock was carried on the shelves in the department itself, with the exception of tires. Now it is necessary to have a large stock room in which to keep the accessories and a stock keeper is busy all the time receiving and shipping goods. Large space is used to advertise the automobile accessory department in the local newspapers, and one of the firm's windows is constantly showing the public the articles that are needed to add to the pleasures of motoring. The automobile accessory department is now an established department with W. H. Thorne & Co., Ltd., and ranks in importance with any of the other departments that were in existence long before. Careful buying and modern merchandising methods have brought this department up to its present status. At the present time, extensions are being made to the stock room to accommodate more stock. Five years of steady advertising of the atuomobile accessory department has given it such publicity that every car owner in New Brunswick knows that Thornes are automobile accessory dealers. A large business is done with the local garages who realize that it is better to buy their requirements as they need them rather than lay out their capital in stock when in many cases they need it to invest in machinery and workshop appliances.

Always Old Cars to be Renewed

"Auto accessories are a good selling line with us. Perhaps it is because we feature these in our window displays regularly and advertise very extensively along these lines, but they have proven to be an active line from the day we decided to place them in our store and the demand has gradually increased," said Omer de Serres, Montreal, to Hardware and Metal. "One of our salesmen came to me not long ago and advised me that the new model of a certain car was now equipped with a new storage battery, and he thought the sale of the old dry battery would diminish. I was glad to hear of the new battery because it would add a new selling article for our accessory department. But as I replied to our salesman, 'What about the older cars of that make? Will they cease to require the older battery?' Motor cars are not scrapped or discarded very often, they may be resold or painted and overhauled, but they may still be found on the roads and highways and they will always require new accessories."

Cost of Accessory Stock



A Montreal hardware merchant, who has had an increasing turnover in automobile accessories during the past six years in which he has handled this line, has a number of suggestions to make. Asked as to the cost of putting in a stock, in view of the fact that many merchants balk at taking on accessories, thinking the cost is too high, this merchant replied, "For two thousand or twenty-five hundred dollars." He makes the suggestion that if confidence can be placed in the salesman representing the supply house from which stock is to be bought, that it is better for the inexperienced hardware merchant to allow the salesman to decide upon the nature and quantity of stock to be carried.

Surprised at Results

Another hardware dealer enthusiastic over the sale of auto accessories is George Mathewson, Toronto. He frankly admits that he is surprised at the results obtained. Prior to opening a department for accessories Mr. Mathewson made extensive enquiries as to the success of this line in other hardware stores. The result of his enquiry was such as to convince him that this line could be successfully handled in his trade, so a start was made with a small stock. They were soon surprised to find accessories selling in the same proportion as any staple line in the store.

This firm makes use of a special display board consisting of a panel held erect by two cross pieces attached to the legs. It is made of soft wood and samples are readily changed from time to time.

"I always try to keep a stock of the goods that an ordinary person who has not studied engineering, can adjust or attach themselves," said Mr. Mathewson. "When a new article is asked for more

A somewhat unusual arrangement of accessories is seen herewith. By the use of a number of small shelves, gradually receding from the window, an extensive range of accessories is shown without any appearance of overcrowding and where attention is not focused on any one part of the display. The arrangement is very simple, and, according to the hardware merchant who dressed it, the window proved very effective.

than once within a reasonable time I try it out in small quantities at first. I would just like to devote my whole time to selling accessories. I think it one of the most satisfactory lines a hardware man can handle. For one thing, it is an easy seller. A car owner comes in for a small article and it is the simplest matter to sell him other things, such as mirrors, tire gauges, wrenches, polishes, in fact he is a prospect for anything that will improve his car. It is also a good cash business, as very few car owners ever ask for credit.

Trade Has Grown Steadily

The auto accessory trade in Platt Bros.' store, Toronto, has grown steadily. A large wall case close to the entrance of the store on the right is constantly devoted to auto accessories. "It is a nice business," said Mr. Platt, "and one which has grown steadily. We started in a small way and have reached the point where we have to carry a complete stock to meet the demands of car owners, of whom there are a large number in this vicinity."

These are just a few of the many hardware merchants who have found auto accessories to be a desirable line to sell. At no time in the history of the automobile business have there been better chances for selling accessories than right now. Working on the principle that the way to keep merchandise turning over is to let people know you have the goods, the hardware dealers are arranging attractive window displays of accessories, they are advertising in the newspapers and many of them are sending out lists to car owners. Aggressive merchandising of this kind brings results and the hardware dealers are reaping the reward. They are holding the business that their advertising copy, their window displays and their other methods bring in because they are rendering service in their stores. They not only have the stock, but they have a stock they can stand behind and guarantee to the limit.

Fast Growing Department

"It is one of the fastest growing and most promising departments in the whole store," said G. A. Elliott, of Elliott's Hardware, Brantford, Ont., to Hardware and Metal. This firm has been selling accessories for about three years and reports a steady growth in the business. "Auto accessories are a legitimate part of the hardware business," said Mr. Elliott. "To go into this line, though, I think a man should study very carefully automobiles and the supplies required. There is, perhaps, no department in the store which needs such careful attention in buying and sorting and keeping the stock in shape. I have a separate price book for all my accessories. That is the only way I can figure out how to keep track of them."

This store has two main display windows and one of them is devoted entirely to accessories during the big season

HARDWARE STORE RIGHT PLACE FOR AUTO ACCESSORIES

Stating that in his opinion no hardware stock is complete without a good line of automobile supplies and tools, A. H. F. Stelck, vice-president and manager The Sutherland-Stelck Hardware and Implement Co., Ltd., Dauphin, Man., adds: "Eventually garages will leave the selling of auto supplies where it rightly belongs, to the hardware dealers, and devote their time to repairing cars."

Dealing with the development of the automobile supplies department in their business Mr. Stelck states: "Our auto supply department was opened in 1911 and we were the first to instal B—— Gasoline Service and Free Air Station in town. In 1913 general business went rather flat, but this department made good right from the start, and has been a real live one ever since, due to personal effort and displaying parts well in the main store during the auto season. In fact the season is now open for auto supplies the year round."

Getting The Spring Paint Business

Getting Paint Business by Mail—Keeping Mailing Lists Up-to-Date—Economy is in Spending Money Judiciously

Written exclusively for Hardware and Metal by F. A. FARRAR

ABOUT this time of the year the salesmen in the paint departments of our best hardware store are figuring out ways and means of getting spring business, and as trade will be less easy to secure than heretofore, it is none too early to formulate your plans.

One good way of getting new business is to keep your eyes open for places where business can be had. You do not look for sturgeon in a trout stream, nor do you hunt bear with a .22 rifle. You must look for business where you have the best chance of finding it.

Why not look around in your own particular neighborhood and see what homes or other buildings *need* painting. Then write a good, courteous letter with an effective follow-up to the owner, and try to get him to start his spring painting early.

Business by Mail

This idea of getting business by mail is a very important and profitable one, and a word about lists and prospects may be in order. From the standpoint of economy in direct-advertising, mailing lists take first rank. This is very evident when we consider that statistics show that there are about 3,000 changes in business in Canada each business day. Firms suspend business, change hands, consolidate, move, individuals die, men and women marry, young people enter business, move away, etc.

A good list is the very foundation of success in this line, and the means of getting the best returns from direct-advertising. Using an old, uncorrected list or a list not compiled to order, to meet your requirements, is penny wise and dollar wasteful. Economy isn't always in saving money, it's in spending money judiciously to get the best possible ultimate returns.

You will find that the use of a good list will pay you very well in the following ways:—

It gets your propostion before all logical prospects, or a very large percentage of them.

It saves postage and stationery, wasting and circularizing "dead" names.

A Few Kinds of Lists

Now, here are a few kinds of lists. First, there is the old one which you have on hand; then there is the stock list, or a list of unknown quality taking them from a telephone book or the city directory, without regard to rating, possible buying power, etc. Then there is the list compiled from the latest sources or from individual effort to meet the special requirements to which you wish to put it. There is no use, for instance, in circularizing city trade on barn paint.

Experience has proven that it is not economy to use an uncorrected list that is more than six months old except in exceptional cases. It is well to make a list of all purchasers, for if you have supplied good goods and good service on an initial purchase it is easy to make them a permanent customer, and always remember that it is better to promote a good, live list of fifty than to take a long chance on 500.

Co-operating With Local Advertisers

There has been a great development in the last few years in co-operative advertising, that is, in the selling helps supplied by the manufacturer, which is a good idea. In many instances the "SAVE THE SURFACE" campaign has co-operated with local associations, furnishing a series of advertisements. As a result of this work, new jobs and new appreciation of advertising have come to members of each group. For instance, twelve painters got together in a certain Eastern town on a little campaign, and the names of each were signed to each piece of copy which ran in the Sunday editions only. Everyone of the painters received good results from the merchandising of his offering, and some of the painters followed up with individual advertisements of his own particular business.

This is a very cheap form of advertising because it enables individuals to have a large advertisement which will attract a good deal of favorable comment at far less than it will cost each painter to run even a small advertisement.

This advertising on the part of the painters can be hooked up with a good live dealer, and you can readily see from this plan what a good quantity of business will be directed to your store.

The Right Perspective on Trend of Paint Prices

Extreme Fluctuations in Linseed Oil, Turpentine, etc., are Very Disturbing—Ready-mixed Paints Increased in Cost 120 Per Cent. From 1914 to 1920—Linseed Oil and Turpentine Were Increased 630 and 530 Per Cent. Respectively

Written for Hardware and Metal by John Irwin, vice-president and general manager, McArthur-Irwin, Ltd., Montreal

THE year 1920 was unique in many respects. In its first months the demand for commodities was at its height; the supply of money was abundant. Freely circulating money and normal bank credits provided together an enormous buying power. Then came the press demand that the public abstain from buying and the exhaustion of credit facilities. The effect was inevitable; prices fell. In the United States, where the currency advanced so much beyond normal value, to sell on the basis of dollar value became an impossibility. To ease the situation America cut commodity prices to such an extent as to make her productions unprofitable. Losses had to be made good, and securities which were intrinsically sound were sacrificed. The reflection of this has been felt in Canada, and importers and manufacturers have had to face a serious decline in order to avoid checking the public buying. Co-operation from the merchant and retailer must be whole-hearted and persistent, and all that intelligence and foresight can conceive must be used to recreate, as quickly as possible, the normal condition of money circulation.

Underlying Conditions Not Unhealthy

Underlying conditions are much more healthy than they seem to be. The length of time when business will remain stagnant depends upon the energy that is put into the business of to-day. Those who have the courage to go ahead will find themselves in a position to do so. Confidence is the backbone of prosperity. Confidence, however, is not a mushroom-like growth, springing into being overnight, but is begotten of a careful study of the markets and of comparative values. The dealer who believes that price reductions in all lines must be equally severe and immediate cannot inspire the purchasing public with the idea that to-day is "buying time." Advertisements of enormous re-

(Continued on page 196)

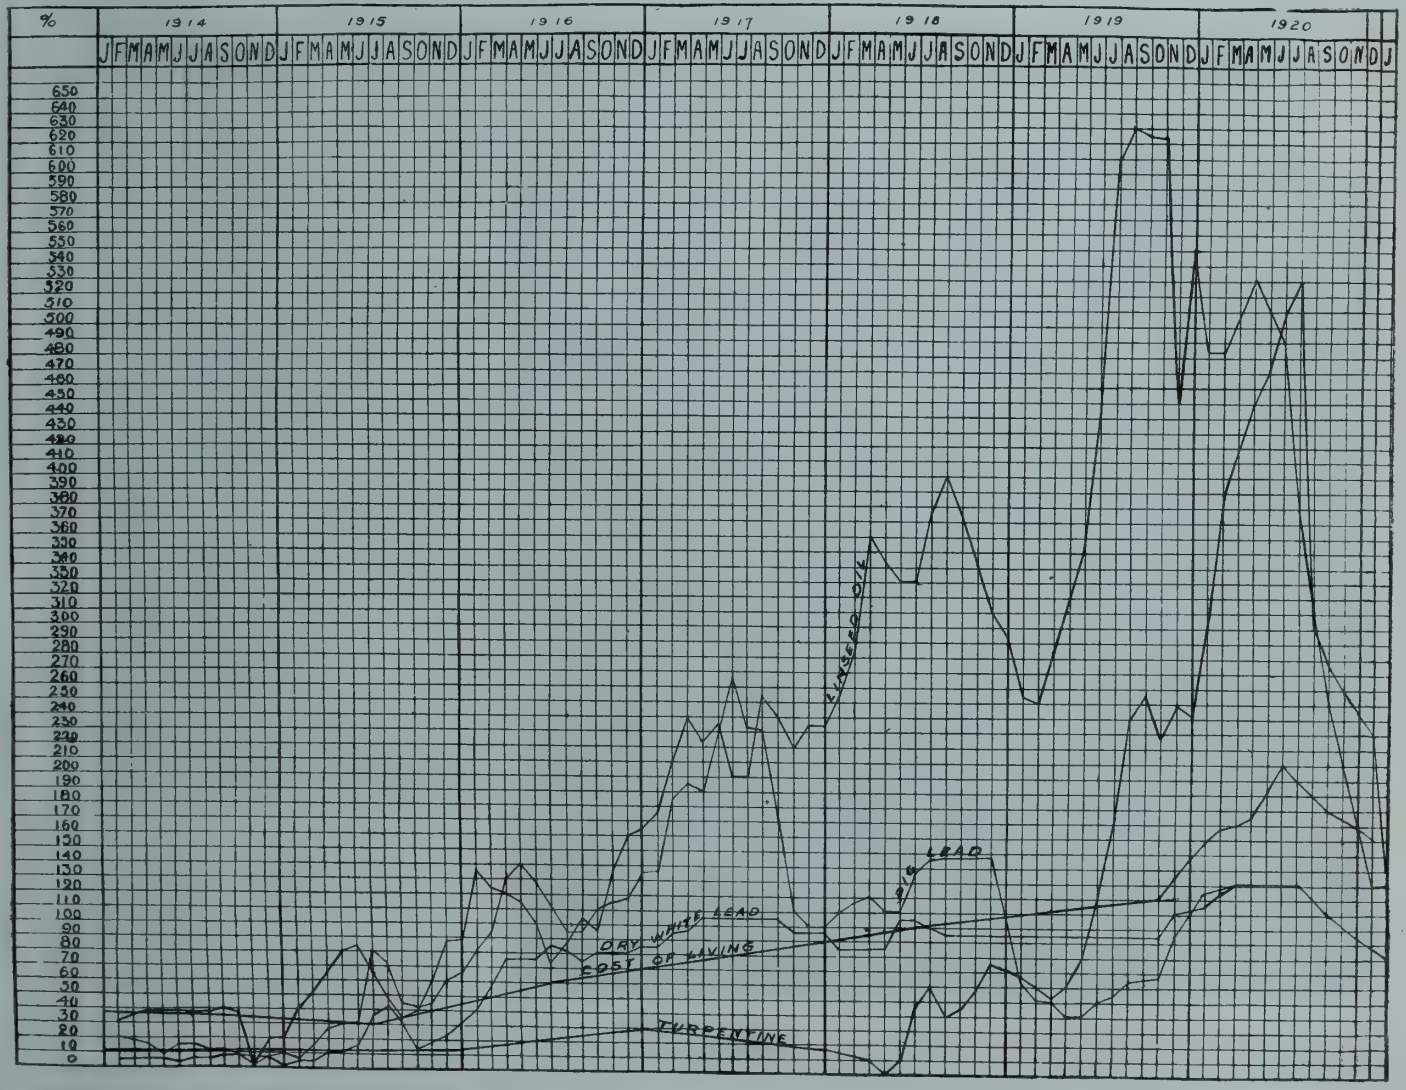


Table showing the course of prices on white lead, linseed oil and turpentine as compared with the cost of living in years 1914-1920.

The Brush Department

Lightening the Burden of Housecleaning

Housecleaning Burden in the Spring Can be Lightened by the Use of Various Brushes

HOW many women dread spring painting and housecleaning? For weeks before it is time to take up carpets or rugs and prepare for the necessary "paint up" and "clean up" process they dread the bugbear that must be faced with determination. The temper which usually accompanies it is actually detrimental and does anything but lighten the task which spring housecleaning brings.

This is where the hardware dealer gets an opportunity to not only get in right with his lady customers, but also add to his legitimate profits, if he will only take advantage of the situation as it exists.

The suggestion to use housecleaning helps to lighten work is sure to appeal to the housewife. They not only lighten the work, but do it more quickly, which means that the old-time, uncomfortable, upset condition is a thing of the past. This is only one of the arguments to be used to push the sale of brushes. You have other innumerable good ones and the busy season is in sight. Make your preparations for a big brush season, and do it now.

A real "paint up and clean up" campaign, backed up with good displays and good salesmanship, will create much new business. The merchant who makes the best uses of displays, both in the store and the window, will get results. Show your goods is an old-time slogan, but stands repetition, and it should be followed at every opportunity. More people are induced to buy goods because of attractive and forcible displays than many dealers realize.

An effective display of brushes can very often be arranged showing the various types provided for painting and for housework. Spring housecleaning season is here, as well as the spring painting season. A suggestion is all that is needed in most cases to bring in business in brushes. Displays such as the above can be used to advantage at this time.

THE RIGHT PERSPECTIVE ON TREND OF PAINT PRICES

Continued from page 195

ductions in some classes of merchandise lead the unthinking and uninformed to expect similar reductions in all. Because furs may now be reduced 50 per cent. is no criterion of the present values of paint products. The cost of thirty staple commodities comprising the ordinary expenditure of a householder increased 210 per cent. above the 1914 prices, but 50 per cent. from the 1920 value of furs still left their cost 303 per cent. higher than in 1914. Similarly in the paint trade, linseed oil and turpentine were selling in 1920 at 630 per cent. and 530 per cent., respectively, above their prices in 1914, and to-day are retailing at 140 per cent. above pre-war prices.

Ready Mixed Paints Increased 120%

The effect of these extreme fluctuations is most disturbing, because without the aid of comparative figures it is easy to be led astray in deducing what is the present value of other products. Both ready mixed paints and white lead in oil increased in cost approximately 120 per cent. during the years 1914-1920. Supposing the decline in linseed oil was used as a basis for the computations of present prices, then white lead in oil should be selling to-day for $6 per 100 pounds and mixed paints of first quality for $1.70 per gallon.

This example gives a clear idea of how easily false impressions may be got of present values. The appended chart clearly demonstrates the present values of linseed oil, turpentine and white lead compared with the cost of living, and by inserting lines representing other commodities it may be used by the merchant in his business with considerable profit and enlightenment.

Declines Spread Over Lengthy Period

It is essential, above all else, to remember that the record of the past clearly demonstrates that while in times of war or upheaval price peaks may be reached in two, three or four years, the decline to normal conditions must be spread over so lengthy a period as will safeguard the community. Were the decline in values to be as sudden as the advance is, the whole business fabric would fall into chaos. The wage of the proletarian in the ascending scale follows the price of merchandise, but as labor accounts for 90 per cent. of the cost of all goods, it is evident that reductions in wages precede the lowering of commodity prices. This economic law alone means that at least a generation must elapse before the dollar will have the purchasing power it had in 1913-14.

Prospects For Spring Paint Trade

Decided Increase in Paint Business Recently—Many Orders Were Held Up Pending Lower Prices—Manufacturers Equip Extra Machinery to Take Care of Expected Demand—"Spring is Bringing Settled Business Conditions"

FOR the information of the trade as to the probable trend of paint and varnish business during the spring months, Hardware and Metal has secured interviews with a number of manufacturers. These are reprinted herewith and represent many points of interest to hardware merchants:

Walter B. Ramsay, president, A. Ramsay Son & Co., Montreal

Our experience in connection with the developments of our business during the month of January and up to the 15th of February was inclined to be on the quiet side, owing to the fact that a great many hardware concerns take stock during this period, and with the tendency of lower prices in sight postponed purchasing their requirements awaiting price reductions and an improvement in trade conditions generally.

Decided Increase

However, we are pleased to report that shortly after the 15th of February a decided increase in business was noted, to such an extent that all departments are working practically back to normal conditions. I feel very optimistic as to the results of the balance of the spring trade, whic his turning out as we expected—that the trade would leave off purchasing until they were more or less satisfied that the prices now prevailing will remain stationary for some time to come.

Expect Much Business

Now that we have got down to such figures that costs must be forgotten, and bear our share of reconstruction losses, and with the immense amount of building that is in sight within the near future in Canada, which will not only require paint, varnish, etc., but an endless amount of articles in the builders' hardware line, we believe that lots of business will be forthcoming. We also feel that before long our factory will be taxed to its utmost to provide the trade with all the supplies necessary, and have therefore equipped ourselves with extra machinery to take care of what we con-

Continued on page 199

Along with other spring lines such as bicycles, sporting goods, etc., paints, varnishes and specialties may be grouped to good advantage. The paint stock shown herewith is neatly arranged, handy, and is well located toward the front of the store where good light is available. Also note that a few cans are placed on the top of the showcase over which the merchandise is sold. Here these cans are handy for a casual reference by the salesman, and such reference might be all that is required to set the customer thinking along the lines of painting.

The Sale of Insecticides In Canada

Spraying Has Recently Become More General for Protecting Fruits and Vegetables and Sale of Spraying Materials is Increasing—Some Useful Details as to Cost of Spraying Which Merchant Can Use to Advantage

Written for Hardware and Metal by ROYAL CLUXTON, Manager The Canada Paint Co., Montreal.

UP to three or four years ago Paris green was the only insecticide sold in any quantity in Canada, but today large quantities of dry arsenate of lead, arsenate of lime and other combination sprays are in general and increasing use.

Paris green is sold today in just as large quantities as ever, but spraying has become more general for the protection of all kinds of fruits as well as vegetables against loss due to leaf-cutting insects, fungus diseases, etc. The Dominion Government estimates the annual loss in fruits and vegetables that could be prevented by proper spraying at $100,000,000.

It is no wonder that the sale of spraying materials is increasing, as their use and cost is small compared with the increased yield and better crops.

Here are a few interesting facts:

Sixteen cents sprays a barrel of apples four times.

Spraying increases the quantity of apples 80 per cent.

Spraying increases the value per barrel of apples, tree run, by 70 per cent.

Spraying causes the foliage to remain healthy and the leaves to be retained late in the fall. The blossom and fruit of the following year largely depend on the tree retaining its foliage well into November.

Paris Green

Paris green is used almost exclusively for spraying potatoes, although it has also been found very effective in the West against the grasshopper plague.

Paris green is a very strong poison composed of arsenic, copper and acetic acid, and with 50 per cent. of arsenic it is sure and sudden death to the bugs. It is too strong for any other foliage than the potato vine. One pound of Paris green to 50 gallons of water is the usual spray for potato plants at intervals during the growth of the vine. Small quantity, 1 to 2 teaspoons to 1 gallon water.

Dry Arsenate of Lead

Dry arsenate of lead is now used extensively when mixed with water as a liquid spray and also for dry dusting or powdered spray.

Dry arsenate of lead is composed of about 32 per cent. of arsenic oxide combined with lead. It will kill all leaf-eating insects and prevent the apple worm; it will not injure the tender foliage of the apple, pear, plum tree or vines such as the currant, grape, raspberry. It must be kept in mind that the leaves are the lungs of the tree or vine and if partly destroyed the yield is greatly reduced in quantity and quality.

SPRAY CALENDAR.
Dry Arsenate of Lead.

Fruit	Pest	What to Use.	Dilution Per 100 gals. water	1st Spraying.	2nd Spraying
Apple	Codling moth.	Arsenate of Lead.	2 to 3 lbs.	Immediately after blossoms fall.	10 days later.
Apple	Curculio.	Arsenate of Lead.	2 to 3 lbs.	As soon as blossoms fall.	10 days later.
Peach	San Jose Scale.	See recommendations for apple.			
Pear	Slug.	Arsenate of Lead.	2 to 3 lbs.	When insects appear.	Repeat after 10 days or 2 weeks.
Plum	Curculio	Arsenate of Lead.	2 to 4 lbs.	With starting of buds.	Just after bloom falls from calyx.
Grape	Berry Moth.	Lime Sulphur and Arsenate of Lead.	1 to 50; 2 to 3 lbs.	Just before bloom.	At intervals of ten days.
Grape	Flea Beetle.	Arsenate of Lead.	2 to 3 lbs.	Immediately upon appearance of beetles.	Whenever necessary.
Strawberry .	Leaf Roller.	Arsenate of Lead.	2 to 3 lbs.	In August.	After fruit has been gathered burn fields over.
Currant ...	Aphis.	Arsenate of Lead.	2 to 3 lbs.	Early in Spring before buds are exposed.	
Currant	Imported Currant worm.	Arsenate of Lead.	2 to 3 lbs.	As soon as insects appear.	A week later.
Gooseberry ..	Fruit Worm.	Arsenate of Lead.	2 to 3 lbs.	As soon as insects appear.	If necessary ten days later.
Raspberry .	Byturus.	Arsenate of Lead.	2 to 3 lbs.	1st of May.	2 weeks later.
Cabbage	Cabbage Worm.	Arsenate of Lead.	2 to 3 lbs.	When worms appear.	Do not spray after plants begin to head.
Tomato	Tomato Worm.	Arsenate of Lead.	2 to 3 lbs.	When they appear.	

Small Quantity Spray.

Dry Arsenate of Lead—Seed Fruits and Truck Crops: 3 to 4 tablespoons to 1 gallon water.
Stone Fruits: 2 to 3 tablespoons to 1 gallon water.

Dry Lime Sulphur

This product is extensively used for controlling sucking insects and fungus diseases that attack the trunk and limbs of the tree such as San Jose scale, oyster shell bark louse, scale insects, and fungus diseases such as peach leaf curl, apple and pear canker, apple scab, brown rot of peach or plum, blister mite, etc.

DRY LIME SULPHUR.
Spraying Calendar.

Fruit	Pest	What to Use.	Dilution	1st Spraying.	2nd Spraying
Apple	San Jose Scale.	Lime Sulphur.	1 to 11; 1 to 8 in bad cases of infection.	10 days after leaves have dropped in Fall.	Early in Spring before leaves appear.
Apple	Bitter Rot.	Lime Sulphur.	1 to 11.	Spray in dormant season.	When rot appears on fruit (1 to 35).
Apple	Oyster Shell. Bark Louse.	Lime Sulphur.	1 to 11; 1 to 8 in bad cases of infection.	When trees are dormant in early Spring.	
Apple	Scab.	Lime Sulphur.	1 to 11.	Just before buds open.	When blossoms have dropped (1 to 35).
Peach	Leaf Curl.	Lime Sulphur.	1 to 11; 1 to 8 in bad cases of infection.	Late in March when trees are dormant.	After buds open (1 to 100).
Peach	Peach Mildew.	Lime Sulphur.	1 to 100.	When disease first appears.	At intervals of 10 days to 2 weeks.
Peach	Brown Rot.	Lime Sulphur.	1 to 11.	Just before buds open and trees are dormant.	Just after blossoms drop from Calyx (1 to 100)
Pear	Rust.	Lime Sulphur.	1 to 11.	Before buds open	After blossoms fall (1 to 40).
Grape	Berry Moth.	Lime Sulphur.	1 to 50.	Just before bloom.	At intervals of 10 days.
Grape	Black Rot.	Lime Sulphur.	1 to 11.	Before buds open.	After fruit has set (1 to 50).

1 to 11 means 1 pound Sulphur to 11 gal. water.

Small Quantity Spray.

Dormant Spray—8 to 10 level tablespoons to 1 gallon water.
Summer Spray—1 to 2 tablespoons Dry Lime Sulphur. (Seed Fruits).
Summer Spray—Stone Fruits: ¾ to 1 tablespoon Dry Lime Sulphur.

Arsenate of Lead and Lime Sulphur

This is a combination spray now in general use in apple orchards.

Spray Calendar for Apple Orchards
Lime Sulphur and Kalcikill (Dry)
(Kalcikill is an arsenate of lime)

FIRST SPRAY

Time—When leaves about blossom, clusters are showing green. For canker worm, defer this spray for a few days.

Material—Lime sulphur, 3 gallons, commercial strength, to 100 gallons of water, adding CP Kalcikill, 2 pound to 100 gallons.

SECOND SPRAY

Time—When blossom buds are showing pink at tips. For canker worm apply slightly earlier; for green apple bug, leave until just before the blossoms open.

Material—Lime sulphur, about 2 1-3 gallons to 100 gallons of water, adding CP Kalcikill, 2 pounds to 100 gallons.

Application—Drench thoroughly at 200 pounds pressure, using a drive nozzle.

Pests Destroyed — Apple scab, budmoth, browntail moth, canker worm, fruit worms, etc. If green aphis or green apple bug is present, add nicotine sulphate, ¾ pint to 100 gallons, making sure that every insect is covered with the spray. For very severe infestations of green apple bug, the tree must be banded with tree tanglefoot before spraying and kept clean cultivated until July 7.

THIRD SPRAY

Time—When blossoms fall.

Material—Lime sulphur, about 2 gallons to 100 gallons of water, adding CP Kalcikill, 1½ pounds to 100 gallons.

Application—Use 200 pounds pressure and a calyx nozzle.

Pests Destroyed—Apple scab, pit rot, codling moth, fruit worms, budmoth, etc. If green apple bug is present add nicotine sulphate, 1 pint to 100 gallons, using a drive nozzle as in previous sprays.

FOURTH SPRAY

Time—Ten days to two weeks after the third spray.

Material—First choice: Bordeaux 7-7-100, adding paste lead arsenate 5 pounds to 100 gallons, or CP Kalcikill, 2 pounds to 100 gallons.

Second choice: Lime sulphur, 1 2-3 gallons to 100 gallons of water, adding 1¼ pounds CP Kalcikill to 100 gallons of water.

Application—Use 200 pounds pressure and a calyx nozzle.

Pests Destroyed—Apple scab, pit rot, fruit worms, codling moth, tussock moth, fall webworm, red-humped caterpillar, yellow-necked caterpillar, fall feeding browntail moth caterpillars, etc.

FIFTH SPRAY

In very wet seasons a fifth spray may be necessary to control apple scab. This is applied ten days to two weeks after the fourth spray, and is the same in material and application. When tussock moth and browntail moth caterpillars are present in injurious numbers, the application of this spray is recommended.

PROSPECTS FOR SPRING PAINT TRADE

Continued from page 197

sider will be one of the best years in the history of our business.

J. H. Conover, General Manager, Martin-Senour Co., Limited

The outlook is comprised in a sentence, a sentence of optimism. Spring is eagerly looked for by all, the preparing season for another year's production. This spring 1921 has brought us settled business conditions. The long adjusting period is over. Results of this period have caused trade depression. Today the differential between now and pre-war time prices and conditions in all common commodities is very narrow. There are, no doubt, some staple lines being slipped too far, therefore, a slight reaction may be looked for. Our daily reports from coast to coast have been showing encouraging increases during the past twenty days. Activities of all citizenship are now responsible for the extent of this year's successes.

Royal Cluxton, Manager Canada Paint Co

"Paint and varnish sales are now equal to March of a year ago and last year's sales represented a most prosperous year in the paint and varnish industry. Everything points to a very heavy increase in consumption of paints and varnishes throughout Canada this year and our sales since January 1 amply warrant this statement.

"Prices are now back to a normal basis and the vast amount of painting which has been put off during the past few years will now have to be carried through by property-owners in order to protect their investment. The lower prices also will stimulate painting from the decorative standpoint."

F. Moore, General Manager Benjamin Moore & Co.

"Judging from the first three months of 1921, we have every confidence that the spring and summer months are going to be good. At the beginning of the present year orders were not as large as other years, and we congratulated the merchants for buying carefully. The outcome of this is that during the past few weeks we have received several repeat orders, one merchant stating that he is selling more paint at this time than he was a year ago.

"Canada is absolutely sound. Let us have courage and go forward. The best is yet to come."

Crow Shooting Should Be Encouraged

In Country Districts Hardware Merchants' Business Suffers if Crops Suffer—Guns and Ammunition Can Also be Moved in the Spring

THE more one looks into the life of the crow and studies his habits, the less good can be said of him. His record is black throughout, as black as the coat he wears. For this reason his destruction should be encouraged, and carried out whenever possible. The farmer has reason to condemn him when he states:

"We worked hard to plant a lot of sweet corn and then went out the other day to find two-thirds of those beautiful shoots of sweet corn laid low and perishing with the kernel of corn eaten off at the roots. The only thing good enough for a crow is a shotgun, because he destroys other birds, which are of value as insect destroyers. The crow often preys on fowl, and he is a dreaded carrier of disease."

Springtime offers the most opportune time for concerted action against this bird, as it is this season he selects his home for the coming warmer months, making sure he is near a farming community, where he can later prey on his victims. The sowing of crops and the raising of fowl will now soon be in progress, and this is where the "black devil" reaps his harvest.

Municipal Prize Awards

In the few latter years, manufacturers of ammunition are not offering prizes for the greatest number of crows destroyed, but municipal or community prizes might be awarded, and arouse more interest among customers than a nation-wide crow shoot. In the Western provinces some localities are now offering prizes for the destruction of pests and proving of great benefit to the community at large.

The hardware merchants should encourage crow shooting by every means possible. In the smaller towns the merchant is dependent on the farming trade, and if crops are poor his business will suffer through sales and collections. If the crow has uprooted a field of corn or has destroyed the birds who keep in check the ravages of insects, he can not anticipate as large a turnover at the end of the year as he would have had if a "bumper" crop had prevailed.

Also his ammunition stock is lying on his shelves since the winter sporting season has been cut off with the disappearance of the snow. Broken boxes of cartridges and paper shotgun shells are now in stock and will, in all probability, be there until the fall shooting commences. Whether it be a crow shoot, a sparrow shoot, or a party shooting match, any of these should be encouraged and "pushed" by the aggressive merchant. The crow shooting has been brought to attention because helping to eliminate this destructive bird works both ways. A sportsman once said, "Any old load will kill a crow." This is literally true, thus it is a wide range of cartridges left over from last season may be employed in crow shooting.

IMPORTS OF ROSIN AND TURPENTINE

Exports of rosin and turpentine from the United States to Canada during December, 1920, were as follows:

Rosin—3,171 bbls., valued at $39,464.

Turpentine—51,328 gals., valued at $48,038.

Novel Ideas to Help Sell Hardware

Jottings From the Notebooks of Other Hardware Merchants as to Novel Plans of Selling Certain Hardware Lines—Using the Telephone—Using Dull Days to Help Speed Up Service During Rush —The 5, 10 and 15-cent Table, Etc.

FULL days are utilized to good effect by one hardware merchant by having the clerks put up in packages of the most salable sizes the various lines usually sold from bulk, such as nails, kalsomine, whiting, yellow ochre, paint, lubricating oils, etc. Cartons bearing some good advertising for the hardware store are used for nails and bulk colors. Bottles are used for the oils in quantities varying from pints to quarter pints and quarter, half gallons and gallon cans used for large quantities. These packages are then neatly arranged on shelves within easy reach. Rope has also been put up in handy form for quick service in 24, 50, 75 and 100 ft. lengths. This merchant states that this practice has helped wonderfully in giving rapid service during the rush.

* * *

ENAMELWARE

To help sell enamelware, a hardware store arranges a table in a prominent location, over which is a sign drawing attention to a "Daily Special" and advising customers to watch the table daily for specials in enamelware, pointing out that some special article at an attractive price will be displayed each day and advocating the rule of buying something in enamelware each day. It has been found that such a table attracts much interest from regular and transient customers and sales were greatly helped by the plan.

* * *

THERMOMETERS

Thermometers are always a seasonable line. One hardware merchant wishing to speed up their sale utilized large show cards on which certain sales talk was lettered, this covering about two-thirds of the card. At the bottom was placed a row of thermometers, with prices in plain figures. One card grouped thermometers at 25, 50, 75 and $1. Another card had a more expensive group. These cards were on display at a dozen places in the store, so that no matter what section the customer was in they were bound to be faced by one or more of these cards. The sales talk was timely and suggested a definite and immediate use for the thermometer. Many sales resulted.

* * *

TOOLS

A somewhat unique method of displaying tools, as carried out by a hardware merchant in the West, is to hang the tools on a light curtain pole, about 1¼ inches in diameter, supported in the window frame by home made brackets. The pole is stained to match the color of the woodwork. Bright screw eyes are screwed into the pole at regular intervals and the tools are either suspended by wire on these hooks or hung in the eyes. The contrivance is a method of display which can also be applied to many other lines of hardware.

* * *

SMALL GOODS TABLE

One hardware merchant who recently bought out a hardware store found that he had no room for a 15c and 25c table, but realizing the value of such a table he made use of plant which might be helpful to others. He hung wire poultry netting, taking up a space of about 12 x 15 feet in the rear of the store. Using a card holder he has a great variety of hardware arranged on this netting, and the appearance is good. Tinware, woodenware, housewares, etc., are so displayed and the results have been good.

* * *

ODDS AND ENDS

Early in the year a general sale of odds and ends has been found helpful by another hardware merchant. While carrying on the inventory all the goods for the odds and ends sale are laid out, prices varying according to the urgency of the sale. Bulk displays and generous use of price tickets were found to be important, also large showy cards drawing attention to the sale. In advertising the sale mention is made of the number of the various articles on sale, to give the impression that the opportunity is limited. Experience has proved that usually the first crowd well served and satisfied is what makes the sale a success.

* * *

TELEPHONE SALES

One hardware merchant got good results by offering a small prize monthly to the members of the sales staff who made the greatest number of sales over the telephone. He found that when there was a little time to spare the clerks would be active with the telephone getting in touch with prospective customers. In some cases this consisted of drawing the attention of acquaintances and relatives to some new lines being introduced. It also helped to bring the maximum business from regular telephone calls for goods, and from those making enquiries.

* * *

"WHAT ELSE"

This is a common expression used by hardware clerks, who think they are living up to the qualities of a sterling salesman by making any such remark. If the customer knew of anything else he or she wanted they would say so. Why not, therefore, suggest something else which might fit in with the customer's requirements. A suggestion might be taken from the lines already purchased or from a knowledge of the customer's habits or hobbies. One merchant increased his business by deciding on one certain line to be brought to the attention of every customer each day.

* * *

ELECTRIC IRONS

Another merchant, who makes a specialty of home utilities, such as electric irons, finds a good plan is to send one of the store salesman on a house-to-house canvass of the section immediately surrounding the store, among which people the store is known. Demonstrations are made of the iron and easy terms are offered. A baby iron is shown as a premium to be given when the final payment is made. This baby iron often interests the little girls in the family, and this will help to push the deal. A personal call is paid monthly to collect the instalments and a sample of some other utility is shown on each visit.

* * *

WASHING MACHINES

Tips on selling washing machines, from the experience of a number of hardware merchants, all emphasize the importance of a thorough knowledge of the machine handled, and as much knowledge as possible of the machines with which it is in competition. The good features can then be brought out prominently. A suggestion is to keep a record of the address of all sales of washing machines and when a prospect comes in, to draw his or her attention to the other party in their immediate neighborhood, who is using the machine. This often results in a visit to the neighbor in question, who through pride in the possession will mention its good points. Such information coming from other than the dealer will help to make the sale.

Want Parcel Postal Rates Increased

Canadian Wholesale Grocers' Association Endorsed by Retail Merchants' Associations and Boards of Trade, Will Petition Government in Effort to Have Parcel Postage Increased—Charge Rates on Parcel Postage on Basis of Third-class Mail Matter

ENDORSATION of Retail Merchants' Associations and Boards of Trade throughout the Dominion is being sought by the Canadian Wholesale Grocers' Association on behalf of a petition to be forwarded to the Right Honorable Arthur Meighen, Premier of Canada, and the members of the Dominion Cabinet. This petition is the outcome of some concerted action decided upon by the Wholesale Grocers' Association in an endeavor to remedy what the association claims is unfair discrimination in favor of mail order houses. For some time past this organization has discussed the question of parcel postage rates, pointing out that the same are unreasonably low and have not increased correspondingly with the advances that have taken place in freight and express charges. This discrimination, it is pointed out, has operated to the disadvantage of small towns and villages and very much to the profit of mail order houses in large cities.

The petition that is now being signed in its entirety is as follows:

Your petitioners humbly desire to show that your Government is distributing general merchandise at a tremendous loss to the revenue of the country, injuring the regular distributing trade and the village and rural interests of the country. That your Government in the distribution of third-class mail matter has given an option to the sender to forward by parcel post, which permits the large catalogues from the mail order houses to be distributed at parcel postage rates.

A Loss to the Country

That your Government has been distributing second-class mail matter at a considerable loss to the country, the Minister of Labor in September, 1919, having stated that in delivering newspapers alone there was a loss to the revenue of approximately $6,000,000 annually. That during the session of 1920 the Parliament of Canada increased the postal rates on newspapers, but no increase was made in rates on catalogues or parcel postage.

That your Government is charging excessive rates on first-class mail matter, which shows a large profit, which is being absorbed by the loss in the other classes.

That this condition results in a practical alliance between your Government and the mail order houses for the distribution of catalogues and general merchandise at less than cost, in competition with the regular distributing business of Canada.

Four Increases in Freight Charges

That at the time the Government of Canada entered into the contract with the railway companies for the transportation of mail matter, the dominating influence of the Government secured a more favorable contract from the railways than the rates charged to the general public, which we contend is wrong, as the Government (representing the people collectively) should pay on the same basis as the people individually. Otherwise, there is a discrimination against certain class interests.

Your petitioners humbly show that there have been four increases in freight rates since the contract was entered into, viz.: December, 1916, 5 per cent.; March, 1918, 15 per cent.; August, 1918, 25 per cent., and September, 1920, 40 per cent., making an accumulated increased charge of 111.3125, which applied to the full extent on all classification goods except the item of fresh milk, which is not dealt in by mail order houses in the way it is handled by the farmers and distributing trade. Since January 1, 1921, however, the 40 per cent. advance of September, 1920, has been reduced to 35 per cent., making the present increased charge 103¼ per cent.

Express Charges Also Advance

That the rates by express have also been substantially advanced from time to time. On September 1, 1919, the Board of Railway Commissioners made an order giving large increases in rates, which, however, in view of the change to the "Block System" to correspond with that adopted by the United States Interstate Commerce Commission, it is difficult to ascertain the exact increase, but it was considered to be not less than 37 per cent. on first-class rates. On 9th February, 1921, the rates were further advanced by 35 per cent. on first-class rates, 25 per cent. on second-class rates and 20 per cent. on commodity rates. Goods distributed by parcel post would be first-class by express and these two advances would make 84.95 per cent. As a transportation problem parcel postage distribution is in direct competition with the express companies and should be subject to the same treatment from that point of view.

That the Board of Railway Commissioners of Canada investigated the terms of the contract between the Government and the railway companies on October 3, 1911; November 17, 1911, and March 18, 1919, and it was shown that while the railways charged 16 cents per full car mile (the basis of calculation) they should have increased it to 34.7 cents for a full car mile, an advance of 116⅞ per cent. Since that investigation there has been an advance of 40 per cent., less 5 per cent., equalling 35 per cent.—which would increase the 34.7 cents to 46.845 cents as against 16 cents, an advance of 192¾ per cent.—a condition that the Government surely must admit as unjust to the railway companies, and creating an unwarrantable discrimination against the regular distributing interests of the country.

That on the 16th February, 1921, the Government, by order-in-council P.C. 379 has given effect to the Board of Railway Commissioners' judgment of August 29, 1919, and established 34.7 cents as a full car mile rate, an advance of 116⅞ per cent., which, however, does not take care of the last advance in freight rates allowed the railway companies of 35 per cent.

Mail Costs Are Higher

That there has been a large general advance in the cost of distribution to the Government. Wages have increased and further increases are apparently in order, and the equipment in every branch for the distribution and delivery of mail matter has also advanced.

That the system of mail order houses being able to, under such circumstances, there having been no increase whatever in parcel postage, deliver their goods at less than cost through the Government service, and at a loss to the Government and transportation companies, is seriously injuring village and country life. Millions of dollars have been taken away from the small villages and surrounding country and centred in the large cities, to the detriment of the general welfare of the country.

That the question has been seriously considered by the local legislatures, but no system has been found practical for assessing the mail order houses in the village or rural municipalities where these houses send their goods without paying any taxes towards the upkeep of such municipalities. These privileged advantages accorded the mail order houses preclude the country retailer from profitably keeping a well-assorted stock of the best quality of goods, and prevent him from being able to give an efficient service to his customers.

Sanitary Appeal Sells Water Systems

Rural Dwellers Pay Attention to Statistics Showing Better Sanitary Conditions With Water System—Long Hours of Drudgery and Unhealthy Conditions Can Be Eliminated—Water Systems Pay Big Dividends—Farmer Buys Facilities of Less Importance

THE WASTE of woman power is one of the greatest menaces to the rural life of the nation, according to those who have made a study of such matters. A well directed investment in modern equipment for farm homes would prevent a large part of this wastage of the energy of the nation's rural homemakers and it is a very doubtful business policy for farmers to use increased income to buy more land instead of using part of it in raising standards of living so that women and young people will not want to go to the cities in search of more attractive living conditions.

The working day of the average farm woman is 11.3 hours and 87 out of each 100 women on farms have no regular vacation during the year. According to an estimate in 60 per cent. of the homes there is no water in the kitchen and the women must go to the spring or pump and carry all water needed for cooking, bathing and washing. Ninety-six per cent. of the farm women do the family washing, and only half have washing machines. Seventy-nine per cent. of the women depend upon kerosene lamps. Ninety-two per cent. do some or all of the family sewing. Ninety-four per cent. make some or all of the bread. Garden work is done by 56 per cent. and 60 per cent. have churning to do. More than 80 per cent. of the poultry flocks are cared for by women. One-fourth of the farm women help to feed and bed the livestock and 24 per cent. of them spend over six weeks in the year assisting with some part of the field work. All this is in addition to cooking the family meals, caring for the children and keeping a fair-sized house in order.

The installation of running water, a bathroom, a modern heating system, a lighting system, power to run the washing machine, churn and other labor-saving implements would release these women from most of the drudgery which now sends them to bed with a prayer "that their strength may be equal to to-morrow's duties." In other words, the farm home should be as well equipped as the up-to-date barn, which the practical farmer has now come to believe a necessity.

Appeal on Behalf of Women Folk

The use of modern facilities in the barn is equally as much advantage as in the home, but oftentimes a farmer can be appealed to stronger if the question of lessening the strain on the womenfolk and the improving of conditions so the children will not wish to leave the farm are brought into it. There are many farmers of the old school who feel well enough inclined to continue their daily toil as they have always done, without the aid of modern facilities, who would be moved by an appeal based on actual figures as to how the housework could be lightened and lighting and water systems made to pay dividends.

The sanitary appeal is also an important one in connection with the installation of water systems. A farmer recently stated to Hardware and Metal that if farmers realized the danger of contamination from closets located near the well water, they would be quick to take action towards more sanitary installations.

One Home in Five Has a Bath-tub

An investigation recently conducted by the U. S. Department of Agriculture, after a nation-wide canvass of farmers' homes, showed that while only one home out of every five had a bathtub, nine out of every ten homes had sewing machines. This condition indicates that the true importance of sanitary equipment is not appreciated as it should be. Under the conditions described, the labor-saving and money-saving factor was appreciated and a sewing machine purchased, but the health-saving quality and the improvement of farm conditions were overlooked in neglecting to instal a water system.

It was found that in the barn and for outside work on the farms there were all sorts of equipment and conveniences in use. It was in the homes of the farmers' families that the lack of sanitary equipment was found. The following figures compiled by the Department of Child Welfare at Washington show the need for sanitary facilities in the home.

It was found that:

Where water must be carried into the house from outdoors, the death rate of babies is 198 out of every 1,000.

Where water is piped into the house from city services, the death rate decreased to 117 out of 1,000.

Where there are bath tubs connected with running water and sewerage, the death rate decreased to 72 out of every 1,000.

In homes where there are water closets, the death rate is 108 out of every 1,000.

While the statistics given here refer to conditions in the United States, they are equally, if not more, relevant to Canada. Plumbers will not wonder why nine out of every ten homes have sewing machines when they consider how active agents for sewing machine companies have been in canvassing the farmers' homes and how lax has been the effort to educate the farmers along sanitary lines.

Merchants, in placing these facts before farmers, as sewing machine agents have done, will bring them to the right point of installing sanitary equipment in the home, that is necessary to health, comfort and prosperity.

Buys Articles of Less Importance

The claim is made by some students of economics that farming must be more profitable before farmers can afford such conveniences. It has been proved, however, that the farmer has spent money on facilities which have less value to him than water systems and it is one of the strongest arguments in favor of water systems that their installation can be made to pay dividends in the shape of better living conditions, improvement in the health of every human being and animal on the farm, and the resultant increase in efficiency and production as a result. Many plans to assist the plumber in selling water supply systems have been outlined in Hardware and Metal from time to time, but these suggestions may be linked up effectively with other efforts.

Farmers during the early spring months have more leisure than in the summer and it is therefore a good time to go strong after the business. A canvass of every farmer in the district by mail and by personal call should be productive of many good prospects. Some definite plan outlining the advantages of water systems, and if possible a model showing such a system in use as compared with conditions before its installation, will help to sell the prospect on the idea.

Window of Poultry Supplies

St. Thomas, Ont.—A window display not only full of "pep" but also said to be a real business producer was put in by Ingram and Davey of St. Thomas this week to boost sales in incubators and poultry supplies. In addition to incubators in action the firm had a number of eggs and little chicks on display. The fluffy nestlings made their way about this window, and as busy as only young chicks can be, attracted general attention and it was widely talked about. Backed by the firm's usual aggressive advertising, it brought in business from a wide territory.

The Clerks' Department

Don't Just Take Orders— A Chance for Salesmanship

Written by a Clerk

NOW that we have passed through a period of hustle bustle, the time has come to forget that hustle bustle and settle down to real business methods. Don't just take an order, but add to your order items which mean selling power. Be a real salesman. Let us come back to a point where real salesmanship counts for much. This will mean eliminating inexperienced help and putting in their places a class that will sell goods, in other words, trained men and women who can deliver the goods. In the past years we find too many who just drew their pay, whose minds were so filled with ideas hurtful to business and body that a special strain has been put on the so-called proprietors. To remove this strain, trained men and women who know their business and who are interested in their work will hold these positions and will fill the gap. Efficiency is lacking.

Indifference of Clerks

A customer will enter a business place and in many cases we find the clerks and sometimes the proprietors indifferent. You wonder why it is too much trouble to show and sell goods, Too many just satisfied to take an order. No time to use the selling powers in order to attain a better standard of salesmanship. Too many goods in the cellar, or under the counter, that should be moved and sold, due to poor stocktaking or keeping stock. In most cases they are keeping the stock all right.

Many merchants are not interested during the working hours in business as to the increase in sales but sit and either rejoice or despair over the day's sales. In most cases the clerks are blamed. In many instances they deserve the blame, but remember co-operation, pleasant personalities in performing your duty on the part of both proprietor and clerks have much to do with your success. When this is the mood and standard of your business methods don't you think your customers will notice this spirit exercised in your business?

More Co-operation Is Needed

How can you expect a concern to be courteous and pleasant towards its customers when between employer and employees there is discord and discontent. In order to get the best out of your employees, take them into your confidence. Don't do as the custom has been, work your proprietor, but work for your proprietor. Put the best that is in you into your work. At times you may think it is not appreciated, but remember if you are not as you think rewarded in remuneration, remember your efficiency increases, your ability is strengthened, and at times perhaps when your boss thinks it is he who should have all credit, your stick-to-itiveness, your plugging away, minding your own business will bring you that which you hope some day to attain.

Must See Goods

Remember, if you are not interested in working for others, as stated in the foregoing lines, you can never expect to be a successful business man or ever be able to run a business successfully. To-day we have no time to stand around and scratch our heads wondering. What we must do is sell goods, be more efficient, get over this slackness in business methods.

Always Buying at Home

Now a few words re buying at home. We find that 75 per cent. of those who send away moneys for goods out of town burden the home merchants with unlimited credit accounts. Would our merchants organize and do a strictly cash business, 75 per cent. of the money sent away would stay at home, and remember you could sell cheaper if all goods were paid for in cash. What is a mail order catalogue? Nothing more than a force of salesmanship put on paper, which if exercised by real salesmanship at home would very quickly eliminate the buying away from home. If you would put forth the same effort in selling your goods as you do in advertising, we needn't wonder what the result would be. You will find men who write and can write a good advertisement, one that will induce you to buy. You will find he or she can also sell goods, for in such an advertisement you will find the fundamentals of real salesmanship.

Therefore, you will surely agree where these are put into force personally you can soon see the result. Many will read these items and say, oh! anybody can write such stuff, but as one who is going through the mill and has not as yet finished, with many years of experience, let me tell you why we have only about 5 per cent. business men in our country. It is because they are not following out the foregoing rules re good business methods and real salesmanship.

TIPS FROM A HARDWARE CLERK'S NOTEBOOK

To render more certain the continued patronage of a customer it is advisable to make him feel at home when he enters your store. It pays to make a special effort to become fairly well acquainted with each individual who comes into your place of business. Clerks should learn the customer's name as soon as possible without direct questioning and to address him by name.

A successful hardware dealer who attributes much of his prosperity to this individualized form of courtesy says: "There is one little practice which we have adhered to in late years which I believe is productive of much good —that is, for as many salesmen as possible to speak to each customer who comes in.

"For instance, Mr. Atkins enters the store to buy a pound of nails. John meets him at the door with a pleasant 'Good morning, Mr. Atkins,' and proceeds to attend to his wants; then while Mr. Atkins is waiting for change, I approach him with a cheery salutation, and engage in a brief conversation."

Many times in the course of a day customers come into the store and call for this or that salesman. In most instances these are customers the salesman won by his personality and they stick to him simply because he has been so accommodating and courteous that they seem to feel that it is their duty to buy from him and from no other clerk. The old salesman in the course of time builds up a regular trade, while the new one invariably gets the casual customer. It is a fact that some new salesmen attract a regular following in much shorter time than others.

Hardware and Metal

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, MARCH 19th, 1921

RETAIL merchants in Canada who were liable for the collection of the Luxury Taxes subscribed $2.00 each in the form of a license fee, which provided a fund out of which $77,695.75 was spent in the purchase of the perforators which were subsequently rendered useless by the repeal of practically all the luxury taxes.

* * *

THE Board of Commerce, which bore the brunt of much comment, both favorable and adverse, during its term of office, is now reduced to a secretary, a stenographer and a messenger. The meagre estimate of $1,000 for expenses of the Board this year as compared with the estimate of $124,000 last year would seem to indicate that the organization's usefulness is well nigh over, at least for this year. Since its institution it has cost the country $140,412.97.

* * *

A REFERENCE to figures of Canadian trade for the calendar year 1920 shows that Germany imported from us goods to the value of over seven million dollars while Canada imported from Germany considerably less than one million dollars worth of goods.

* * *

A DEFINITE argument for the sale of grub destroyers to farmers is the statement made by Professor H. H. Whetzel, of Cornell University, to the effect that when we sit at the table and eat a potato we are paying for two potatoes owing to the depredations of parasites. The Professor thought that the cost of living had been increased much more from this cause than from the doings of the war profiteers.

* * *

NUMEROUS authorities have contended that the present business condition is largely a psychological one, that the facts reveal that the fundamental factors in business are not as bad as many people are making themselves believe. The motto: "Speed Up. There's no hard times coming, it's just the soft times going," is particularly applicable to the present case and a number of merchants are displaying those words prominently on signs in their stores.

The Business Outlook

IN this 33rd Annual Spring Number of Hardware and Metal are found expressions of opinions of retailers, manufacturers and wholesalers, representative of the hardware trade in all parts of Canada, in regard to present business conditions, means of developing trade and as to the outlook, such opinion being based on experiences of the period since the turn of the year.

It is the feeling that the financial status and the productive ability of Canada dissipate any idea that business depression can last long in this country. No immediate return to the great business activity of the period immediately following the war is anticipated, but a steady improvement is looked for during the present year. Buying of hardware has been light and will continue light, but an encouraging factor in the situation is that repeat orders are forthcoming in fairly good volume and a good sorting business throughout the spring and summer months is expected to bring the volume of hardware business for this year in at least some lines pretty close to the volume of trade done early last year.

Conditions prevailing in the past few months were not abnormal, according to certain opinions, but were the anticipated months of painful emerging from the boom, war and post-war periods to the more healthy plane of normal business. In this readjustment hardware lines have not been burdened with the sweeping price reductions made on some other commodities and there seems to be little expectation of any such difficulty in the immediate future.

Retail hardware merchants in all parts of the country have expressed to Hardware and Metal their confidence in the trend of business during this year and emphasis is laid on the necessity of adjusting business methods to suit the general condition now prevailing. The adoption of some or all of the suggestions offered elsewhere in this issue for developing hardware business in view of present conditions might well be advocated as a step in aiding the readjustment of business to the plane on which it will more effectively coincide with the requirements of customers and thereby secure the maximum returns.

Basic Factors

THOSE who have studied the present business situation with a view to linking it up with some definite trend and thereby establishing what course it will take and when normal conditions will again return are inclined to the belief that the present condition is part of a cycle which repeats within certain periods of time. It was pointed out by B. J. McCormick, General Sales Manager, Canada Foundries & Forgings Co., Welland, Ont., at the recent convention of Ontario retail hardware merchants in Hamilton, that every seven years has recurred a condition resembling that now prevailing. No doubt this is part of the cycle to which students of the situation refer.

In this connection it is interesting to note some of the so-called barometers. A comparison of bank clearings in Canada indicates a steady rise since 1915, which culminated late in 1920. Since then a downward trend is noted, though it will be some time before the low point of the cycle is reached. Canada's trade reports show much the same condition. Canadian imports from the United States have declined during the past six months and similarly exports of our products to the U.S. show a decrease. The index of wholesale prices in Canada shows a figure of 281.3 at February 1 compared with 140 before the war. This indicates that at that time prices were still 100 per cent. above the pre-war level in Canada. In other countries liquidation has proceeded at a much greater rate, the decline from the peak being only about 20 per cent. in Canada compared with 40 per cent. in the United States. One reason advanced for this is that credit deflation has not been accomplished as rapidly in Canada. This is due in some part to the fact that Canadian banks are not paying gold to depositors and can therefore make credit extensions more liberally than in certain other countries.

Data on Hardware Markets

THE hardware markets present an interesting study at the present time owing to the unique conditions which are prevailing. Tables have been reproduced in various issues of Hardware and Metal showing the trend of prices compared with a year previous and other such comparisons, and the matter is dealt with more fully in an article in this issue. In view of the fact that much of the general slackness in business to-day is due to a lack of confidence on the part of the customer in prevailing values, it is necessary for the merchant to give close attention to prices and be able to give definite data to his customers in an endeavor to win their confidence that buying of most lines is justified at present prices.

The index figure of commodity values in Canada shows a substantial decrease in the past year, a much bigger decrease than has been the average on hardware commodities, thus bearing out the fact that as the advance on most hardware goods was gradual and spread over a number of years, so will be the decline. Sixty-seven staple lines of hardware have declined about five per cent. since this time a year ago, at which time prices were not at the peak of 1920. The decline since the beginning of the present year has amounted to approximately eight per cent. Compared with 1915 to-day's prices on certain basic commodities such as copper, tin, zinc, rubber and hides are lower, while other lines which are higher than 1915 show substantial reductions since 1920. The index figure of fifty staple hardware lines to-day is 240.22 compared with 100 in August 1914. This will convey the best idea of the average trend.

A point to be kept in mind in reviewing the present situation is that with lower prices less business appears to be done just as when prices were advancing the same amount of goods sold gave a larger cash turnover. Another point is that price recessions enable the country to do more business with less money.

Revise Parcel Post Rates

IT has long been felt by retail hardware and other merchants that the continued low rates on parcel postage in the face of increases in freights and express charges has resulted in unfair discrimination against the merchants and in favor of the mail order houses. It is further felt that this practice has been a discrimination against the small towns and in favor of the cities in that business is drawn away from the merchants in smaller centres and is attracted to the cities through the mail order houses.

Definite steps to secure a revision of parcel postage rates is being taken by the Canadian Wholesale Grocers' Association, who are seeking the endorsation of all organizations of retail merchants and Boards of Trade throughout the Dominion. A petition is to be forwarded to the Premier of Canada and members of the Dominion Cabinet setting forth the views of the merchants on this subject. Attention is drawn to the fact that during the 1920 session the postal rates on newspapers were increased but no corresponding increase was made in rates on catalogs or parcel postage. The point is also made that whereas there is an admitted loss in the carrying of some of the lower classes of mail matter large profits on first class mail are being secured by charging excessive postage and this profit covers the loss on other classes. This indicates a preference for the mail order house for the distribution of catalogs and general merchandise at less than cost in competition with the regular distributing business of Canada. This condition of affairs is absolutely unfair to the merchants who have established business throughout the rural and urban sections of the country and anything which seriously affects these merchants is a serious blow at one of the most important channels of business which the country possesses. This is a matter deserving of all the influence which can be brought to bear by retail merchants.

The Uncertain Steel Market

THE steel market is not in a healthy state, either in Canada or United States, and no good purpose is to be served by claiming anything to the contrary.

The reason is not hard to find—it is, as a matter of fact, lying right on the surface. Neither the buyers, the steel merchants or the steel makers have any confidence in the present situation, particularly in the present price schedule.

We are right in the middle of a sagging market. A careful scrutiny of the markets week after week generally brings to the surface some item that has been more or less whittled and hacked at in order to bring a purchaser to the point where he will place his business.

The steel merchant who wants to liquidate has a peculiar position in the present non-buying market. Even if he is prepared to cut his prices in order to clear out his high-cost material, regardless of whether he breaks even or takes his loss, he has to face the condition of only hand-to-mouth business coming into the market. In plain English, although he wants to liquidate, he can't do it.

One can go over almost the whole run of the iron, steel and metal market to-day, and he will find that there is a feeling of uncertainty as to whether the bottom of the market has been reached. Whether that is really the reason for the attitude of the buyers is open to doubt. Were they in need of iron or steel they would buy and make the best of the price.

The United States Steel Corporation, by adherence to its schedule, has done more than any other agency to keep the steel market both in United States and Canada from running away and losing itself entirely. It has yet to be shown that the raids of the price-cutters have brought an extra ton of business to the books of any of the mills.

The Buyer in Control Now

THE buyer is in possession of the market now and he knows it. The good salesman is not going to object to this condition as long as the buyer is inclined to play the game square. The average salesman is keen for business and is ready to get down to brass tacks with any man who has business to place.

One dealer was giving his opinion of a certain purchasing agent this week and added, "He is certainly a hard buyer and when he gets his prices just now there is not much left in it for the dealer. But we know he means business when he asks for a quotation. We don't mind that sort of a man, because he is out to place some business in the market and it is his duty to his firm to get the best price he can. But we all know he is not just asking for prices to see how things stand. He buys hard, carefully, keenly—whatever you care to call it—but the big fact is that he buys and does not run away out of the market after getting the whole trade to give him quotations."

It is much better to study the market closely and then buy, than to simply stand on one side and wait until the whole market has adjusted itself to your liking.

WE READ of a little strike here and others there, and to some extent we have seen the local waste of these movements. It is not often that a person has the opportunity of taking a world-wide view of the situation and getting an idea of the strike waste of the entire world for a given period. Such an idea is conveyed by a summary compiled by the Manchester Guardian, which shows, for the first six months of 1920, a world-wide loss of 114,814,980 days and 8,977,798 persons affected.

News of Western Canada

One Hundred Merchants in West Attend Short Course

Splendid Addresses are Given at Merchants' Training School, at the University of Manitoba, on Subjects of Vital Interest to the Retail Trade—"Henry Johnson, Jr." Speaks

WINNIPEG, March 17.—In the neighborhood of one hundred retailers attended the fourth annual training school for merchants at the University of Manitoba here. Winnipeg, as well as many Manitoba and Saskatchewan towns, was represented.

Efficiency in Retail Stores

Paul Findlay, Los Angeles, Cal., better known as Henry Johnson, Jr., was one of the speakers at the training school, speaking on "Efficiency in Retail Stores." Mr. Findlay showed the fallacy of extensive price cutting and the reaction on the goods to which it is applied. One of the biggest principles in efficiency of retail stores was the ability to say "no," he declared. This had special significance in the conduct of a credit business.

Study Mail Order Prices

Retail merchants who examine the catalogues of mail-order houses and study them carefully are able to compete successfully with this class of business, said Robert C. Line, retail merchant, of Columbus, Montana, in addressing the training school for merchants. The mail-order business stimulates business generally, and local trade is benefited because of the fact that new business has been created and because of the creation of new demands. This Mr. Line illustrated by the introduction of new devices for production on the farm bringing about increased farm production and greater wealth to the farmer with a consequent better purchasing power.

Judge Frank T. Wilson, of Minnesota, spoke on "The Co-operative Marketing of Farm Products," in which he emphasized the importance of local merchants making themselves familiar with the marketing conditions in their own town so that the farmer could receive the top price for his products.

During the course, a dinner was tendered those attending, by the Sales Managers' Association, representing the wholesalers and manufacturers of Winnipeg.

Hardware Merchant

Among the hardware merchants attending the short course for merchants in Winnipeg are the following: L. W. Denstead, Brandon; J. B. Curran, the Brandon Hardware Co., Brandon; W. R. Jaffray, Johnson Hardware Co., Brandon; W. C. Atkins, Atkins Bros., Morden, Man.; O. F. Denstedt, of Beaver Hardware Co., Ochre River, Man.; W. F. Weir, Weir & Wilson, Winnipeg; W. J. Illsey, J. H. Ashdown Hardware Co., Winnipeg; H. H. Harris, Winnipeg; J. H. Anderson, of Wm. Anderson & Co., Melville, Sask.

McPherson Bros. Move to Calgary

Medicine Hat, Alta.—McPherson Bros. have sold out and discontinued their businesses in Medicine Hat and have moved to Calgary, where they have opened an office at 509 MacLean Block. They still retain their country stores and will acquire others from time to time, the intention being to operate a chain of retail hardware stores. The firm will be glad to have trade catalogs sent to the new office.

Manitoba to Tax Companies' Profits

Winnipeg.—A tax of one per cent. on gross profits of all incorporated companies operating in Manitoba is the effect of a measure to be brought before the House at an early date by the Provincial Treasurer in the form of an amendment to the Corporations Taxation Act. This form of taxation is expected to bring in an additional revenue of $375,000.

The province faces a deficit of approximately $500,000 on current expenditures for 1921. This is the reason given by a member of the government for the proposed new taxation.

CONVENTION OF SASKATCHEWAN R.M.A.

The annual convention of the Saskatchewan Provincial Board of the Retail Merchants' Association will be held in Saskatoon from June 7 to 9 inclusive. The program for the convention is now being prepared and will be outlined in a subsequent issue of Hardware and Metal.

Western Notes

L. C. Stephens, of the G. F. Stephens Company, Limited, Winnipeg, Man., has been suddenly called away to Pasadena, Cal., by the sudden illness of his father, G. F. Stephens.

* * *

Crandall, Carpenter & Reid, of Winnipeg, Calgary and Vancouver, have been appointed representatives for the Province of British Columbia for Kinread Halters.

* * *

A. E. Dykes, general manager of the J. H. Ashdown Hardware Company, Ltd., Winnipeg, Man., has arrived home from his trip very much improved in health.

* * *

Luseland, Sask.—Mr. Cunningham, who formerly was employed in Nicholson's hardware store in Kerrobert, has arrived in town and will be employed in the Nicholson hardware store here.

* * *

Humboldt, Sask.—E. Fletcher has returned home from a business trip to Winnipeg, Toronto, London and Hamilton. He reports that business in the East is fast returning to a normal condition, and that the factories are now all working. He looks for very little decline in hardware prices, owing to the scarcity of raw material.

Work of Manitoba Board R.M.A.

Winnipeg.—Discussing the work of the Manitoba Board of the R. M. A. with Hardware and Metal, Secretary J. H. Curle stated:—

"The immediate work being undertaken by the Manitoba Board is to organize the province into sixteen districts, the officers in each district to be called together annually for the purpose of conducting the business of the association in this province. As soon as the districts have been formed, the question will naturally come up of holding trade section conventions.

"The University of Manitoba has just completed its fourth annual school for merchants. I believe that this province is the only one that has undertaken these schools in Canada."

Optimism Helps This Hardware Business

Watt Hardware Co., Ltd., Innisfail, Alta., Maintain Well Assorted Stock Sufficient to Customers' Needs and are Optimistic That Normal Business Will Shortly Return—The Best Way to Bring a Return of Good Business.

A FINE example of the progressive type of hardware store to be found in many communities throughout Western Canada is that illustrated herewith—the Watt Hardware Co., Ltd., of Innisfail, Alberta. Crops in this district last year were good, and owing to the fact that the district is also noted for mixed farming, this community has not felt the full force of the recent quiescent period of trade. In any case the policy of this store has been to maintain a well assorted stock of hardware so as to be in a position to meet all the requirements of their customers and thus get all the business that is to be had and maintain their reputation for having what the customer wants.

This firm reports business has been a little quiet since the new year but that indications are that the opening of the spring season will find the usual large volume of business to be had. Within a few months this firm expect normal business will be resumed in this line of trade. Collections are stated to have been rather slow in recent months owing to the fact that farmers have been holding back on their grain crops. It is pointed out, however, that the farmers will wish to dispose of their crops before seeding time and will probably move the grain before the spring season is here.

Well Arranged Stock

The photo of the Watt Hardware Co. store shows a complete and neatly arranged stock well displayed. The photo was taken during the Christmas season, hence the decorations. Modern showcases are used on both sides of the store near the entrance, the first one on the right being devoted to cutlery, silverware, etc. The display of ranges is next in order, the stock kept well polished and neatly printed cards used to attract attention. The wall fixtures back of the display of ranges are devoted to the showing of paints with color cards and other literature used generously.

Racks Suspended from Ceiling

To the left at the entrance is a showcase containing, among other things, a display of skates. Some lines of tools and other shelf goods are next shown, drawers bearing samples on the exterior being used for this stock. A saw rack is suspended from the ceiling. A rack is used showing samples of rope brought through the floor from the basement.

The space in the centre of the store is used to good advantage to display stoves and heaters, washers and kitchen utensils. Toward the rear in the centre is seen a novel display table which by using a narrow raised shelf allows the more extensive display of kitchen utensils without the usual difficulty of the goods under the top shelf being scarcely visible.

The hardware store of the Watt Hardware Co., Ltd., Innisfail, Alta., photographed looking toward the rear and showing the employment of many of the most modern ideas in store display as adapted for a small store. Note the display

Special attention is drawn to the number of racks and other display devices suspended from the ceiling utilized to show seasonable lines. These have been placed to best advantage and are said to have produced good results.

WANT PARCEL POSTAGE RATES INCREASED

Continued from page 201

Only a Partial Service

That your petitioners claim that the Government should not be a party to a system of distribution of merchandise, especially a system which gives only a partial service, in competition with the regular trade and commerce of the country, which gives a universal service, but if such should still be the policy of your Government you should increase the rates on parcel postage to the same extent as the rates on the same goods have been increased to the other distributors and charge the rates on parcel postage on the basis of third-class mail matter, in which case we are confident that the prosperity of the small villages and rural localities would be revived, and such a revival would obviously be greatly in the interests of the nation. No nation can expect to be truly great whose policy drains the life blood out of the villages and country districts and centres wealth and influence in its large cities instead of diffusing it as widely as possible.

Your petitioners therefore humbly request that a commission be appointed to take evidence and inquire into the whole question of the distribution of mail matter and report to your Government, making such recommendations as it may deem to be fair to the distributing trade and in the interests of the Canadian people.

OTHER WESTERN FEATURES

Some splendid selling ideas as worked out by Western hardware merchants will be found in the article dealing with the store of Sutherland-Stelck, Ltd., Dauphin, Man., and others appearing elsewhere in this issue. This section is merely for "news" of Western Canada. Western market quotations will also be found in the regular market section.

Events in the Trade

Business Changes

Port Rowan, Ont.—T. D. Pierce, hardware, has sold to U. F. O.

Simcoe, Ont.—Chas. E. Boyd, hardware, has sold to W. H. Davidson.

Toronto.—Baird & Canu, hardware, have dissolved partnership, A. D. Baird continuing.

Obituary

Montreal.—J. O. Gaboury, hardware merchant, is dead.

Fire Loss

Montreal.—J. A. Blais, hardware, suffered fire loss.

Commenced Business

P. S. Hyatt has commenced business with a complete hardware stock at 1726 St. Clair Ave., Toronto.

Personal

A. G. Scott, Montreal, manager Scythes & Co., Ltd., is somewhat recovered from recent illness.

* * *

W. S. Leslie, president A. C. Leslie & Co., Ltd., Montreal, will spend the next two weeks with his family in Atlantic City.

* * *

Royal Cluxton, general manager the Canada Paint Co., Ltd., Montreal, was in Toronto and other Ontario points this week.

* * *

E. J. Cookson, Northern Ontario representative of the Martin-Senour Co., Ltd., was in Montreal on Friday and Saturday.

* * *

A. H. Jenkins, of A. C. Leslie & Co., Ltd., Montreal, is taking a two weeks' rest at his brother's home in Peterboro, Ontario. Mr. Jenkins has not been feeling well for the last few weeks.

* * *

D. L. Scott, manager; A. Rodrigue, George Thompson and A. Valiquette, from the Montreal plant of Canada Metal Co., will attend the annual meeting of the company in Toronto next week.

Increase Storage Tanks

Montreal.—Five new storage tanks are nearing completion at the local plant of the Barrett Company, Limited. This new extension will practically double the capacity for the storage of liquids.

Veteran Hardware Traveller Passes Away

Montreal.—After a brief illness, George Browne passed away at the Royal Victoria Hospital, Montreal. Mr. Browne had been connected with Caverhill, Learmont & Co., wholesale hardware, for 38 years, representing this firm in the Eastern Townships and Quebec, and leaves a number of friends in these districts. Mr. Browne was born in Montreal in 1849, and was a charter member of Royal Victoria Lodge, A.F. & A.M., being master in 1880 and 1881. Two sons and one daughter survive him. The funeral was held under Masonic auspices on Tuesday from the Church of St. John the Evangelist. Many out-of-town travellers and others came to Montreal to attend the funeral.

GEORGE BROWNE,

for many years representing Caverhill, Learmont & Co., Montreal, in Eastern Townships and Quebec, whose death is announced.

Proceed With Test Case

Ottawa.—It has been definitely decided by the government to proceed in the Exchequer court with the test case to establish whether certain retailers are liable for taxation as manufacturers. For a time there was some question as to whether it would be advisable to dispose of the case in this way or take first proceedings in the local police court. No date has been set for the hearing of the case, but it is likely it will be commenced about the beginning of next month.

Open New Branch in Hamilton

Hamilton.—The McClary Mfg. Co. have opened up a branch store at 177 Sherman St., Hamilton. N. Fisher is in charge.

Visit St. Catharines Industries

St. Catharines.—A party of the Ontario branch of the Canadian Manufacturers' Association visited St. Catharines and after an inspection of the McKinnon Chain Company's plant and a motor trip about the city the visitors were banqueted. Mayor Lovelace and President Graves, of the Chamber of Commerce, welcomed the visitors. Addresses were made by Thos. Roden, hon. treas., Samuel Harris, Toronto, and Geo. H. Douglas, Hamilton.

Canadian Trade With Germany

Germany is seeking to re-establish trade with the countries against which she was struggling less than two and a half years ago. So far as Canada is concerned, exports from this country greatly exceed the imports of German products. In the calendar year 1920 Germany imported goods from Canada to the value of $7,033,550, and Canada took German merchandise to the extent of $840,203.

The principal commodities taken from Germany during 1920 were: clocks, magnetos, vacuum bottles, enamelware, lead pencils, glassware, sewing machines, thermometers, machinery, tools, scientific instruments, chemicals and dyes, cutlery.

Rope Movement is Slow

Montreal.—That buying has been curtailed in rope is manifest, when at this season sales continue small. Retail dealers in many localities have their spring orders for seasonable lines now in stock, others have no doubt placed their orders and are awaiting delivery. Has rope been overlooked, or do present stocks not require replenishing? The solution no doubt can be found in the fact that rope is not being bought until the present coil, now in use, is nearing its end. And dealers will not place orders in accordance with other years, notwithstanding that rope is 20 per cent. cheaper than twelve months ago.

This by no means spells "blue ruin" to the rope manufacturer; he is sitting tight, awaiting the demand that must come with the opening season. Navigation will open, and rope will be required, the fisherman and farmer intend to use rope again this season, and the improvement will be forthcoming when the spring activity shows itself.

Western Ontario News

R. P. Butchart and Bro., hardware merchants at Owen Sound, are now occupying premises at 9th St. and 2nd Ave. East.

* * *

In the death at Bothwell, Ont., of Richard Avery, aged 61, the district loses a veteran merchant. He had been in the leather and harness business for 25 years.

* * *

John Kay Darch, aged 55, a member of the firm of J. Darch & Sons, wholesale and retail harness, London, Ont., died on Sunday following a short illness.

* * *

George Ratz & Sons, who recently took over the hardware business of John Rankin, at Mitchell Ont., have finished stock-taking and are now making a drive for the spring trade.

* * *

R. M. Birce, hardware merchant at Essex, Ont., has purchased one of the best corners in town, at Talbot and Gordon Avenues, and plans to erect a fine new two-storey business block, in which his own store will be located.

* * *

W. E. Finnegan, general sales manager of the Gray-Dort Motors, Limited, Chatham, Ont., general director of sales for the Ruggles Motor Truck Co. at London, Ont., is moving to London this week.

* * *

Ray Ellis, of Wallaceburg, Ont., left this week to take charge of the tinsmithing shop of the W. A. Barr Hardware at Merlin. Mr. Ellis recently disposed of his business in Wallaceburg to Tompkins Bros. of Chatham.

* * *

Percy R. Kendall, of Simcoe, Ont., has the sympathy of a wide circle of friends in the very sudden death on Monday of his wife after an illness of only two days with meningitis. Mr. Kendall has been closely connected with the hardware business of Chas. Boyd for many years.

* * *

In the arrest at London, Ont., of Mervin Wickett, the police are confident they have the youth who has been swindling merchants all over the country by presenting worthless cheques. Up to Thursday six charges had been laid against Wickett and a number of others may be laid in a few days.

* * *

The Cities Service Oil Co., Ltd., recently organized in Canada as a subsidiary company of the Cities Service Company, 60 Wall Street, New York, has purchased the oil refining plant of the old Great Lakes Oil Co. at Wallaceburg and will commence manufacturing as soon as possible. H. W. Camp, of Tulsa, Oklahoma, the new manager, arrived this week.

* * *

"Dollar Day" at Wallaceburg on Wednesday of this week was perhaps the busiest day in the history of the town. Merchants co-operated splendidly and their advertising brought in buyers from all parts of the country. Among those taking part were the Zavitz Hardware and Messrs. Shaw and Shaw. Both of these firms had splendid window displays. Shaw and Shaw made a special drive in connection with paints and varnishes, and had a nice turnover. As an extra special they offered 5 per cent. off on all cash purchases made during the day.

New Steel Business Being Placed

Lower Prices by Independents and Approach of Open Weather Helping the Situation

REDUCED prices for steel quoted by the independent producers added to the approach of open weather conditions appear to be having more effect in stimulating the placing of new business. Miscellaneous tonnage, though far from being in satisfactory volume, is being released by buyers with less reluctance as compared with the stagnant condition of trade in recent weeks. How much of this represents clear addition to the total tonnage of the market, however, cannot be said with assurance in view of the continued contraction of production by Steel Corporation mills under their higher price policy, says the Iron Trade Review.

The National Tube Co., which has been running full, is being forced to make some curtailment. Other Steel Corporation subsidiaries show a loss in operations. The Carnegie Steel Co. has blown out three more blast furnaces, reducing its active list to 28 out of 59. Its ingot output is at 45 per cent. this week and this is expected to drop to 25 per cent. shortly. Independent company operations are fluctuating, but on the whole show some gain. In exceptional cases they have been pushed up above 50 per cent. Sheet schedules are heavier at Chicago, Middletown, O.; Canton, O.; and other points, but are not so good in the Mahoning valley. In the latter district, however, 19 of 51 independent open-hearth furnaces are in production this week, which is a better showing.

With merchant pig iron production down to one-third of the recent high point, close buyers continue to follow the situation more carefully. Signs of a moderate revival of the automobile industry are more numerous in the market. Best informed circles continue to emphasize that a 40 per cent. automobile output for the year is as much as can be expected. Japan again is appearing as a buyer of American steel. It placed 1,800 tons of black sheets in the Youngstown territory. A 2,000-ton sheet sale to the Orient also is reported at Chicago. A 3,100-ton bank building at Yokohama has been awarded, and 5,000 tons of pipe has been closed. Belgian steel bars have been sold on the Pacific Coast at 2.65c, or far below the domestic price. The composite iron and steel market average of the Iron Trade Review is little changed this week. It is $45.25 against $45.53 last week and $47.10 four weeks ago.

Axe and Spring Factory Closes

St. John, N.B.—The axe and spring factory of Campbell & Fowler, Ltd., City Road, St. John, N.B., has been shut down for more than a month. The employees went on strike against a ten per cent. wage reduction on Feb. 4, and since that time the factory has been idle. Representatives of the company say that owing to business conditions they were compelled, in order to protect themselves, to make a ten per cent. reduction in the men's wages. The company had been running on full time and had intended to keep on doing so, but the men refused to accept the cut.

Will be Tariff Revision at This Session

Ottawa, Ont.—A question was raised in the House of Commons as to the probability of a revision of the tariff at the present session. The question was raised chiefly as a result of the recent publication of reports that there would probably be no revision this session. The Minister of Finance denied the report stating that he had nothing to do with its publication and that the work is proceeding by day and night. Asked as to whether the revision would be general, Sir Henry Drayton would make no commitment, stating that there were strong demands from some parts of the country for revision of the tariff on various lines and that there was need for much anxious thought.

Course for Dealers in Electrical Supplies

The Edison Electric Appliance Company, of Chicago, has done a somewhat unique thing in merchandising. It has realized that a new period of real salesmanship has set in. The pressure of competition and the awakened sense of thrift of the buying public will no longer tolerate the indifference or ignorance of salesmen. Better and more intensive methods of selling are now in order. To meet these new conditions the Edison Electric Appliance Company has launched a school of salesmanship for the use of all engaged in selling all kinds of electrical appliances.

The course is offered to all electrical dealers and jobbers in the field and is extended not only to those dealers and jobbers handling Hotpoint, Edison and Hughes appliances, but also to those who handle competitive lines.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

R.I.W. WATERPROOFING CEMENT

The Cochrane Hardware Co., Sault Ste. Marie, Ont.—Can you advise us who manufactures a waterproofing cement for foundation work, called R.I.W.?

Answer—R.I.W. Damp Resisting Paint for cement, stone, brickwork, etc., is manufactured by Toch Bros., 320 Fifth Ave., New York City, U.S.A., and Canadian distributors are Drummond & Reeves, Ltd., 43 Jarvis St., Toronto, and the Premier Paint & Varnish Co., 8 McGill College Avenue, Montreal.—Ed.

UNIVERSAL BELT FASTENERS

John Bailes & Sons, Oshawa, Ont.—Can you tell us the name of the maker or a jobber of Universal belt fasteners?

Answer—We understand the makers are the Climax Mfg. Co., London, England. These fasteners can be obtained from the J. C. MacLaren Belting Co., Ltd., Colborne St., Toronto, Ont.—Ed.

ELECTRIC COOKING STOVES

Scriven & Rutherford, Tilbury, Ont.—Kindly let us have a list of manufacturers of electric cooking stoves.

Answer—The following is a list of Canadian manufacturers: Canadian Westinghouse Co., Ltd., Hamilton, Ont.; The McClary Mfg. Co., Ltd., London, Ont.; National Electric Heating Co., Ltd., Toronto; Canadian Edison Company, Stratford, Ont.; Moffatt Stove Co., Weston, Ont.; Renfrew Electric Products, Ltd., Renfrew, Ont.—Ed.

NO. 1 FARMER BOY SICKLE GRINDER

J. H. MacNeil, Delia, Alta.—Kindly inform me where I can get repairs for No. 1 Farmer Boy sickle grinder.

Answer—We have been unable to trace a Farmer Boy, but there is a Farm Boy Tool Grinder made by the B. L. Fry Mfg. Co., St. Louis, Mo. There is also a Farmers' Joy sickle and mower knife grinder made by the Western Implement Co., Port Washington, Wis.—Ed.

REPAIRS FOR 9-25 MONARCH MALLEABLE RANGE

Patterson & Park, Dummer, Sask.—Can you advise us where we can procure repairs for the 9-25 Monarch malleable range?

Answer—This range was manufactured by the Malleable Iron Range Co., Beaver Dam, Wis., who can still supply repairs for same.—Ed.

RECORD VISES

In answering enquiry in February 12 issue for name of maker of Record vise, the name of the Canadian distributors, Marshall, Son & Bunney, Richmond St. E., Toronto, Ont., was inadvertently omitted.

RICHELIEU COUNTER SCALE

Leith Bros. Hardware, Prince George, B.C.—We would like to know the name of the manufacturer of the Richelieu counter scale.

Answer—Our information is that this scale was made by the Richelieu Scale Works, of Montreal, Que., but that this company is now out of business.—Ed.

BABY WEIGHING SCALES

The Fawcett Hardware, Ltd., Saskatoon, Sask.—Kindly advise us where we can procure scales for weighing babies.

Answer—The Burrow, Stewart & Milne Co., Ltd., Hamilton, Ont.; Braun & Bonnick, Ltd., 86 John St., Toronto, Ont.—Ed.

BULL'S EYE LANTERNS

Mills Hardware Co., Ltd., Hamilton, Ont.—Can you inform us who makes a bull's eye hand lantern with shut-off attachment, suitable for police use?

Answer—The R. E. Dietz Co., 60 Laight St., New York, N.Y.

MOULDERS' RIDDLES

W. Walker & Son, Ltd., 1228 Yonge St., Toronto, Ont.—Kindly advise us who are the manufacturers of moulders' riddles.

Answer—B. Greening Wire Co., Hamilton, Ont.; Canada Wire & Iron Goods Co., Hamilton, Ont.; The Major Mfg. Co., Ltd., Montreal, Que.

WALL BOARD MANUFACTURERS

Emile C. Ricard, Sudbury, Ont.—Please give us the addresses of manufacturers of wall board other than the Beaver Board Co.

Answer—Bird & Son, Ltd., Hamilton, Ont.; Eastern Paper Co., Ltd., St. Basile Sta., Portneuf, Que.; The Standard Paint Co. of Canada, Ltd., Montreal, Que.; The Bishopric Wallboard Co., Ltd., Ottawa, Ont.

BATHROOM FIXTURES

J. G. Tweddle, Fergus, Ont.—Would you kindly advise us where we can procure a complete line of bathroom fixtures?

Answer—N.P. Brass Fittings—The Gendron Mfg. Co., Ltd., Toronto, Ont.; Kinzinger, Bruce & Co., Ltd., Niagara Falls, Ont.; Sternan & Co., Brooklyn, N.Y.; Art Brass Co., Inc., 299 E. 134th St., New York, N.Y. White Porcelain—The China White Porcelain Co., Canton, Ohio; The Church Mfg. Co., Holyoke, Mass.

EASY WASHING MACHINE

Jas. Sewell, Cadillac, Sask.—Can you inform us where we can purchase the Easy washing machine?

Answer—The Easy Washing Machine Co., 4 Clinton Place, Toronto, Ont., are the manufacturers of this and will be pleased to give you all particulars.

HYDRATED LIME AND HARD WALL PLASTER

R. T. Kemp & Son, Listowel, Ont.—Could you give us the names and addresses of manufacturers of hydrated lime and also hard wall plaster?

Answer—Lime, Hydrated—The Alabastine Co., Ltd., Paris, Ont. (X); Albert Mfg. Co., Hillsborough, N.S. (X); Christie-Henderson & Co., Toronto, Ont.; Elora White Lime Co., Ltd., Elora, Ont.; Hastings Quarry Co., Actinolite, Ont.; Laurentian Stone Co., Ottawa, Ont.; Manitoba Gypsum Co., Ltd., Winnipeg, Man. (X); The Ontario Plaster Co., Ltd., Paris, Ont. (X); Pacific Lime Co., Ltd., Vancouver, B.C.; Standard Lime Co., Ltd., Joliette, Que.; The Standard White Lime Co., Ltd., Guelph, Ont.; Stinson-Ree Builders' Supply Co., Ltd., Montreal, Que. (X); Toronto Plaster Co., Ltd., Toronto, Ont.; Windsor Plaster Co., Windsor, Ont. (X).

Plaster, Hard Wall—Alex. Bremner, Ltd., Montreal, Que.; Iona Gypsum Co., Ltd., Iona, N.S.; Keystone Wall Plaster Co., Ste. Therese, Que.; Albert Parsons, Walton, N.S.; Wright & Co., Inc., Hull, Que. Also firms in above list marked (X).

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

2794. **Canoes.**—Secretaries of various Belgian aquatic clubs desire to receive catalogues and prices of Canadian canoes delivered in Antwerp.

2795. **Canoe motors and outboard motors.**—Belgian aquatic club desire to receive full particulars and prices of Canadian canoe motors and outboard motors.

2796. **Sporting guns and ammunition.**—President of Belgian gun club desires to receive Canadian catalogues and prices of firearms and ammunition.

2797. **Mica and asbestos.**—Dutchman in Belgium desires to receive quotations from Canadian manufacturers of mica and asbestos.

2798. **Flake graphite.**—One of the largest and most influential British concerns in Japan are in the market for large quantities of flake graphite, 82 to 98 per cent. carbon, and would be glad to have fair average samples of Canadian graphite, together with best prices c.i.f. Kobe, and all other information in connection with shipment of same.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

"SCYCO" OILED CLOTHING

Scythes & Co., Ltd., Toronto, Ont., with branches at Montreal, Winnipeg, Halifax and Vancouver, have issued a new catalog of "Scyco" oiled clothing, or wet weather garments for all. The cover design is a miniature reproduction of the "Scyco Cut Out" suitable for window or store display. The actual size of the cut out is 13 in. by 18 in. and it is equipped so that it will hang or stand. Copies of this "cut out" will gladly be forwarded on request to jobbers and retailers and it is stated to be valuable from an advertising standpoint and also as a silent salesman.

"Scyco" oiled clothing comprises two lines: the red label, black or khaki, and the blue label, black or yellow. The various lines made are illustrated by cuts and catalog is well gotten up. Among the lines shown and stocked are sport coats, auto coats, slickers, miners' clothing, workmen's pants and overalls, fishermen's garments, canners' slipovers, etc., etc.

A COAT POCKET COLLEGE OF ELECTRICITY

A book has been issued by the Edison Electric Appliance Co., Inc., Chicago, Ill., and is intended for the use of all engaged in selling electrical appliances and it is claimed that a careful study of it will give one a good working knowledge of electricity, electrical appliances, salesmanship, advertising and store management as related to electrical lines. To sell electrical goods efficiently it is necessary to understand the principles of electricity and to know what the various electrical appliances are, the principles on which they are built, the particular work each is supposed to accomplish, their strong points and their proper care and repair. This course is covered in five lessons and the study of them in every case is said to be practical and to the point. Besides the construction and use of appliances other subjects are included in these courses as enumerated above. The course is free and is stated to mean only two hours a week of one's time for four months, and all who wish to gain benefit from this opportunity are invited to write to the Edison School of Salesmanship, 5660 West Taylor St., Chicago, Ill.

AUTO ACCESSORIES

A spring bulletin has been issued by Towe & Towe, 363 Talbot St., London, Ont., of auto accessories. It contains a good assortment of the various tools and appliances needed by the motorist and the garage man. A copy will be sent on request.

FIREPLACE FURNISHINGS

The Toronto Foundry Co., Toronto, Ont., have issued a catalog of fireplace furnishings. The lines illustrated in catalog comprise portable baskets for coal or wood fires in various styles and sizes, fire grates, andirons, iron fireplace linings, dampers, ash dumps, etc.

The Toronto Foundry Co. manufacture and carry a stock of other lines not listed in the catalog, such as bell traps, ventilating air brick castings, dish covers, soot doors, etc., and invite enquiries for all material not listed.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of March 23, 1901:

"Thos. Birkett & Son Co., Ltd., Ottawa, have built a large brick wareroom on Canal St., next door to H. N. Bate & Sons. The firm in their new premises will be able to give better attention to all their old customers. The firm has been in business for the past 34 years, during which time they have worked up the largest wholesale and retail hardware trade in Eastern Ontario."

* * *

"The members of the office staff of the McClary Mfg. Co., London, assembled at the Palace Cafe on Saturday evening last and tendered a farewell dinner to Mr. John J. Foot, who has been promoted to the management of a branch for the Eastern Provinces just opened by the company at St. John, N.B."

* * *

"The accompanying cuts are fairly good photos of the two eldest sons of John P. Seybold, Montreal, whom he has just admitted to partnership in his wholesale hardware business. The firm has been organized into a company. John P. Seybold is president; Gordon C. Seybold, vice-president, and Herbert B. Seybold, secretary. The style has been Seybold, Son & Co., but it now reads, The Seybold & Sons Co."

* * *

"The business of A. J. Jeffrey, hardware, Stratford, Ont., established by Mr. Jeffrey's father about 40 years ago, was sold last week to T. H. McCurdy, who will continue in partnership with his brother under the style of McCurdy Bros. The Messrs. McCurdy were formerly in the employ of the Hobbs Hardware Co., London."

* * *

"Gilpin Bros., hardware dealers, Orillia, Ont., have added about 40 ft. to the rear of their store, making it 120 ft. deep. They have also renovated the interior."

* * *

"On Thursday last week a by-law was passed by St. Catharines granting a percentage on the pay-roll of the McKinnon Dash & Metal Works to induce that firm to build a large factory there."

* * *

"The James Smart Mfg. Co., Brockville, have secured the Canadian agency of the Kelsey Corrugated Warm Air Generator."

* * *

"In conversation with Mr. James S. N. Dougall, of McCaskill, Dougall & Co., Montreal, we learn that the demand for this firm's varnishes is increasing."

Free Farmers From Income Tax

Advises President of Canadian Manufacturers' Association to Draw Manufacturer and Farmer Closer Together

HAMILTON.—The four groups of the Ontario division of the Canadian Manufacturers' Association which are touring the province visited Hamilton this week. In an address the president, J. F. McKinnon, advocated freeing the farmer from the income tax. This suggestion, he said, would be considered by the association, and he predicted it would have the effect of drawing the farmers and manufacturers closer.

Thomas Roden spoke on the organization of the C. M. A., and T. J. Stirrett explained the object of the present tour.

Among those in the party were: J. F. McKinnon, president C.M.A.; Col. A. F. Hatch, Canada Steel Goods Co., Hamilton; J. A. Scythes, Toronto; B. J. McCormick, Canada Foundries and Forgings Co., Welland; George Spence, Hamilton; N. Slater, Hamilton.

Difficulty Is Experienced in Turning Out Good Brooms Now

Such a Small Percentage of a Good Grade Broom Corn is Available That There Never Was Such a Spread in Prices as Now Exists.

SELL a customer a good broom and you have that customer's friendship for life, but sell her a poor one and —well, it is useless to comment upon this point as the majority of merchants have had some experience along this line.

From time to time since the last season's crop of broom corn was harvested, there have been reports as to the condition of the crop as to quality and as to the probable trend of prices. From information gathered it has been learned that a large portion of the crop was damaged by rain, leaving the corn stained and brittle and unfit for the manufacture of a good quality broom. Manufacturers have never had the difficulty in turning out their quality product as they are now experiencing. There is such a large portion of the poorer grade and such a small percentage of good grade that perhaps there never was such a spread in prices as exists at the present time. This nas resulted in brooms of superior quality holding at high prices and the poorer grades dropping to a lower price than has been the case for several years.

The Present Situation

One manufacturer in summing up the present position in brooms says, "I may say that the situation is perhaps the most peculiar in the history of the broom business, and brooms can be bought from $13 per dozen down to $5 per dozen, and perhaps considerably less. This is due to the very unusual spread between the prices of the best and the lowest grade corn.

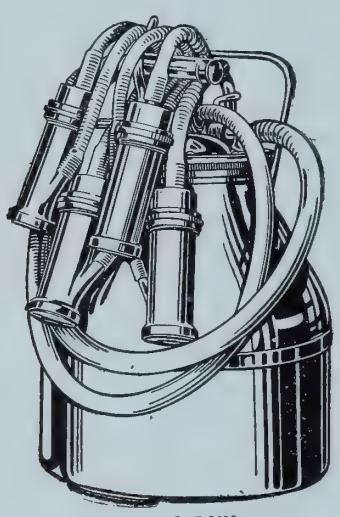
"Buyers will note that in brooms of equal weight and appearance there may be quite a large difference in price, and this is not necessarily an evidence that the one at the low price is the better value. The best colored corn produced in 1920 was grown in the most westerly broom corn section. It is a beautiful green color but as brittle as a pipe stem, and has very little wear. A good looking, low-priced broom can be made from this corn because the corn can be bought very cheaply. There is also a very great amount of dark brown, rain-damaged corn, and this also is very brashy.

"There is a tendency on the part of buyers to purchase brooms made of hard, brittle corn, if it is green, in preference to brooms made of corn which may be a little red but is very tough. A great percentage of the best wearing corn this year is somewhat red in color, but it has very fine, tough fibre.

"Real good quality corn of good color and fine, tough fibre still commands a high price, as it is very scarce, and therefore it is our opinion that the trade cannot expect to buy good brooms at any lower prices until another crop is harvested next fall."

Display Brushes and Brooms

London, Ont.—A very attractive and very simple display arrangement for brooms and brushes was used in the window of Kilpatrick Bros. hardware recently. A large triangle was formed on the wall by three long-handled brooms and the space inside was filled with various sized brushes neatly arranged. Although extremely simple the display stood out splendidly and the effect was heightened by having one of the broom handles in red. In the main part of the window the firm showed a number of articles of interest to housewives for their spring cleaning work.



New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

DE LAVAL MILKER

The De Laval milker made by the De Laval Co., Ltd., Peterborough, Ont., is said to eliminate the drudgery of milking, to do the work in one-third of the time tends toward a solution of the labor problem and helps keep young men on the farm. The makers state that the De Laval milker was not put on the market until it had been proved to be the most simple and practical machine for the work expected of it, the company preferring to first try out the milker under constant observation on many herds under different conditions.

The De Laval is said to be simple in construction and operation. Anyone of average intelligence can operate it, and

De Laval Milker

simplicity, durability and low cost of maintenance are important matters in machinery, especially in farm machinery.

The success of the De Laval milker is stated to depend to a very large extent upon the udder pulsator, and because of its importance particular attention is called to this feature. The udder pulsator is located within a few inches of the cow's udder, and is stated to be an exclusive De Laval feature. This insures that pulsations are transmitted to the teat cup exactly as produced, and without variation, as inevitably occurs when pulsator is located at some distance, and where the action depends on springs or weights. An independent pipe line controls the action of the pulsator, the milk drawn alternately from the front and rear teat passes directly into the pail without coming in contact with the outer air. The vacuum produced by the pulse pump is transmitted through a pipe running through the barn above the stalls. The pump is said to require very little power or floor space and can be belted to any available power.

All those who are interested are invited to write for particulars and further information.

"WHIRLPOOL" WASHING MACHINE

A new water power washing machine called the "Whirlpool" has been put on the market by Dowswell, Lees & Co., Ltd., Hamilton, Ont. This machine has been designed to meet the demand for a water power machine with a perforated rubbing board. Many people prefer this principle of washing and after successful experimenting the Dowswell Co. have evolved the "Whirlpool." The perforated rubbing board is operated to and fro with a squeezing, rubbing motion, which is stated to force the hot suds through the clothes without injuring the finest fabrics. The motor is similar to the one used in the "Ideal," and there are no delicate parts to get out of order. All parts coming in contact with water are made of brass. The motor is tested before leaving the factory and runs on low pressure from a regular ½-inch house service pipe having a flow of 3½ gallons or more per minute. The tub is made of Louisiana cypress and is corrugated and specially waterproofed inside, and wringer board is permanently attached.

"METALOID"

"Metaloid" is a new bar metal used in place of welding for filling purposes. The makers claim that it will produce a better finish than welding and has high adhesive qualities, and that it will repair cracked water jackets, intake manifolds, crank cases, as well as fill sand holes, and blow-holes in defective castings. Other uses claimed are that it will permanently repair cracked water pipes, boilers, radiators, etc., at a minimum expenditure of time and expense. It is stated that it is not necessary to clean the parts to be repaired, as the "metaloid" will adhere to any metallic surface and will stand 300 pounds water pressure. It is applied by heating slightly the part to be repaired and applying the cold bar. No acid or flux is used. It is said to be as effective on aluminum as on cast iron, bronze or steel. The Canadian distributors are Kennedy & Kennedy, Tyrrell Building, 95 East King St., Toronto, Ont.

No. 359 UNIVERSAL BEVEL PROTRACTOR

In the new Universal Bevel Protractor, No. 359, recently added to the Starrett line of machinists' tools, several improvements are shown.

The dial is graduated to degrees round the entire circle. It is equipped with one vernier instead of two, is very easily read and is said to be convenient for a wide range of work. It has encased a positive method for fine adjustments, and these, as well as the other

No. 359 Bevel Protractor

adjustments, being controlled entirely from the centre of the front side of the tool justify its being called an improved bevel protractor. The lower nut locks the dial in its rotative path, and the middle nut, at a slight downward pressure, engages the fine adjusting device, while the upper nut locks the blades at any point in its length. The acute angle attachment renders it available for obtaining small angles.

A NEW MATCH STRIKER FOR AUTOS

The Rosor Auto Match Striker is now being put on the market by the Hamilton Mirror Plate Co., of Hamilton, Ont. The "Rosor" is a piece of corrugated glass three inches in diameter, enclosed in a handsome aluminum frame. It may be fastened to any part of the car—dash, sides or on back of front seat. Its desirability from the standpoint of convenience and its protection of the car interior from careless match scratchers need not be pointed out to motorists who smoke—or whose friends smoke.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

CHIEF features this week are lower quotations on some lines of stoves and furnaces and new binder twine prices, which show a small decline from prices quoted at the beginning of last season. Bar iron and steel have again been reduced and lower prices are quoted on various iron products such as sledges, masons' hammers, sad irons and clothes line reels.

New price lists continue to be issued on many lines of builders' hardware and carpenters' tools, and in most cases show small reductions from previous prices. New quotations made on fence wire show slight declines in plain galvanized wire, coiled spring wire and barbed wire. Among other lines showing lower prices this week are machinists' hammers, grindstone fixtures, blind hinges, and some lines of pipe fittings, mica axle grease and cup greases. Prices have been maintained on most ingot metals, but copper is weaker and spelter is quoted higher. A better feeling is reported in the metal market.

Prices are nominally maintained on sheets and plates, wrought pipe, lead and zinc products and compression goods show no further change.

A slight but distinct improvement in buying is reported from Pittsburgh in the primary steel markets, but prices on finished steel commodities show little variation. Blue annealed and galvanized sheets are easier, though there is less disposition on the part of the independent steel mills in the U.S. to make recession in prices. Another small decline is reported in the foundry pig iron market, but consumers show little inclination to buy at present.

Wholesalers report an improvement in business during the past week, and a more optimistic feeling is prevalent. With the present mild weather continuing it is likely that many shipments booked for a later date will be needed earlier than intended. House-cleaning needs, paints and varnishes are in better demand than formerly.

Montreal Markets

MONTREAL, March 17.—Lower prices continue to be made on many hardware lines, the featured decline this week being on the heavier goods, namely stoves and furnaces. The reduction covers cast and steel ranges, 10% lower, and furnaces 7½%. These are rather unseasonable at present but important, as booking along these lines will soon commence for fall deliveries. Another feature of this week's report are the new prices on binder twine. Although practically the same as the closing prices of last year, the trade has no doubt been anxious to obtain this year's quotations. Cotton rope again features, now selling at the low figures of 37 and 38 cents for 3-16 inch and ¼ inch. Mrs. Potts' irons and handles have a slight decline, blind hinges, machinists' hammers and sledge hammers are all lower. Wires, including barbed wire, plain galvanized, coil spring and plain twist wire, are revised; No. 9 plain galvanized now selling at $5.70 f.o.b. Montreal. Corrugated sheets, galvanized and black sheet prices are now more or less nominal, quotations varying among the different jobbers, iron and steel, lead products and compression goods holding unchanged, while ingot metals show very little change from last week.

Hardware jobbers report an increased volume of business from week to week, the past few days of open weather giving a decided improvement to trade.

Cotton Rope Lower

Montreal.

A large reduction has been made on cotton rope, and present prices are 3-16 in., 38 cents; ¼ in. and up, 37 cents. Former prices were 51 and 50 cents respectively, making the reduction about 25 per cent. Cotton goods have featured very often recently with lower prices, and cotton rope has been one of the foremost products to show regular reductions.

Mrs. Potts' Irons Down

Montreal.

Mrs. Potts' irons are now about 5 per cent. lower in price and following are new quotations: Polished, $2.18 set; nickel plated, $2.30 set. Mrs. Potts' japanned handles, $2.20 dozen.

Reduction in Blind Hinges

Montreal.

A slight reduction is made in blind hinges, and No. 1 are quoted at $2.75, No. 3 at $3.80 a dozen.

New Barbed Wire Prices

Montreal.

New prices are now available for spring business in barb wire, showing slight reductions from last quotations. Following are the present prices: 2 x 5, $4.60 reel; 4 x 6, $4.90 reel; 4 x 4, $5.30 reel; reels are 80 rods in length.

Plain Wire $5.70 Base

Montreal.

A further reduction is made on plain galvanized wire, and No. 9 or base is now quoted at $5.70. Following are the net prices on all sizes:

Galvanized Wire—Per 100 lbs., No. 3 to 8 inclusive, $6.55; No. 9, $5.70; No. 10, $6.70; No. 11, $6.80; No. 12, $5.85; No. 13, $5.95; No. 14, $7.25; No. 15, $7.90; No. 16, $8.

Galvanized Coil Spring Wire—No. 9, $5.75; No. 12, $5.90.

Galvanized Plain Twist, $6.75 per 100 lbs.

Machinists' Hammers Reduced

Montreal.

A reduction of 10 per cent. is made on machinists' hammers, and No. 30, 1-lb., is quoted at $12.60 dozen; 1½ lb., at $13.50.

Decline in Sledge Hammers

Montreal.

Revised prices are now quoted on sledge hammers, affecting all weights: 2 to 2½ lbs. is now 24½ cents pound; 3 to 4½, 21 cents, and 5 lbs. and over, 16 cents per pound. This is a considerable decline.

Wood Handle Prices

Montreal.

Following are this year's prices on all kinds of handles, pokes, neckyokes and whiffletrees.

All hickory handles, list plus 35%; all oak, ash and maple handles, list plus 20%; Hay fork, hoe, rake, shovel and manure fork, list plus 20%; whiffletrees, doubletrees and neckyokes, list plus 35%; wood rakes, list plus 10%; horse pokes, list plus 10%; pike poles, list plus 30%.

1921 Binder Twine Prices

Montreal.

New prices are now issued for this year's binder twine. These quotations are slightly lower than last year's opening prices, and are as follows: 500 feet to the pound, 17¼ cents; 550 feet, 18¾ cents; 600 feet, 20¼ cents; 650 feet, 21¼ cents. Shipments of 300 pounds and over, freight prepaid to destination. Terms, net, October 1. One-eighth off on orders of five tons and over; ¼ cent off on orders of 10 tons and over.

Rope is Quiet

Montreal.

No great improvement is noted in sales of rope, and business remains dull for this season. Last year at this time jobbers were shipping rope in good quantities, but up to the present this year shipments have been smaller. Manufacturers also state the demand is quiet, and attribute the cause to the fact that retail merchants are not buying, and do not seem willing to buy until the actual requirements are needed. With navigation soon opening and the consuming demand near at hand, an improvement is looked for. Present quotations will be found on current market pages.

1921 Prices on Lawn Hose

Montreal.

Manufacturers of garden and lawn hose state that orders and bookings are heavier than last year, and a good season is expected on these lines. Jobbers are not yet forwarding their booked orders, as next month is generally considered early enough for lawn hose. Following are present prices on the best selling grades and sizes:

Lawn Hose—½ in. x 3-ply, plain, 11½c per ft.; ½ in. x 4-ply, plain, 13c; ½ in. corrugated, 19c; ¾ in. x 3-ply, plain, 15½c; ¾ in. x 4-ply, plain, 17c; ¾ in. corrugated, 25c.

Gasoline and Coal Oil Held

Montreal.

No change has been made in gasoline or coal oil, and prices are held at 39 cents for motor grade gasoline and 28 cents for coal oil. A reduction has been made on gasoline in the United States, but as yet this has not affected the Canadian market.

Cast and Steel Ranges Decline

Montreal.

A revision has been made in cast iron and steel ranges, and a reduction of 10 per cent. is quoted on many lines. Heaters at present are unchanged. One dealer stated that at the present time this lowering only affected ranges of a higher grade, while the lower-priced stoves are unchanged under the revision. Another manufacturer states their cast and steel ranges of all kinds show a decline.

Hot Air Furnaces Lower

Montreal.

Relative to the revision in stoves, manufacturers also report a slight reduction in hot air furnaces of approximately 7½ per cent. This is hoped to have a stimulating effect on the sales, more particularly now when fall bookings will soon be made.

Wares Holding Their Own

Montreal.

The demand for the different wares is continuing fair, both granite and tinware being sold in good sorting orders. Sap buckets, however, are not as brisk as last year, the weather in Quebec not being promising for a good soap run as the past open season is not favorable to the syrup and sugar making. Also many makers are not boiling this year, the low price of sugar being said to be one definite reason.

Range Boiler Prices Hold

Montreal.

No change is made in the prices of range boilers, with the demand improving slowly as the season advances. The 30 gallon standard is quoted at $13.00, and the extra heavy at $15.00.

Roofings and Papers

Montreal.

The roofing business has been quiet during the past months, but a better outlook has been showing during the past week or two. The open weather will have a stimulating effect, if outside work can be followed up. Dealers are apparently buying in small quantities and the actual demand is the one factor to increase activity on these lines. Following are quotations of the Barrett Company:

Roofings—	Per roll
Red Star, 2-ply	2 13
Do., 3-ply	2 55
Panamoid "Rubber," 1-ply	1 90
Do., 2-ply	2 30
Do., 3-ply	2 75
Everlastic "Rubber," 1-ply	2 10
Do., 2-ply	2 50
Do., 3-ply	2 95
Sheathings—	
Stag brand	1 15
Anchor brand No. 1, dry	1 65
Do., No. 2, dry	1 10
Do., tarred, No. 1	1 70
Do., No. 2	1 45

Corrugated Sheet Prices Nominal

Montreal.

Quoted below are prices on corrugated sheets, with the decline of two weeks ago on the lightest gauges recorded. These are only considered nominal and quotations on 28 gauge now range from $7.50 to $8.75 net per 100 sq. ft. This is practically the only gauge selling at present, the heavier gauges being stagnant. Following are the list prices:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Wrought Pipe Improves

Montreal.

Wrought iron and steel are reported a little more active during the past week. Stocks are in very good shape, with the mills also ready to supply depleted stocks, having been able to ship back orders and shortages during the winter months. The selling prices are now under the new list of two weeks ago, No. 49.

New Discounts on Fittings

Montreal.

Some lines of fittings are selling under new discounts, slightly lower than previously. Bushings, both cast and malleable, are now 22½ per cent. off list. Plugs are 20 per cent. off, and malleable unions now 35 per cent. off the list prices. Nipples of all sizes were revised last week. Following are the present prices on most lines:

Bushings, cast		22½%
Do., malleable		22½%
Flanges		20%
Plugs		20%
Flange Unions		7½%
Malleable Unions		35%
Nipples, ⅛ to 4 in. close and short		40%
Do., long		50%
Do., 4½ to 8 in., close and short		30%
Do., long		40%
Couplings, 4 in. and under		20%
Do., 4½ in. and larger		Net list
Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

Lead Products Steady

Montreal.

With the exception of wire solder, which is quoted one cent per pound lower this week, lead products are remaining fairly steady. Pig lead continues on a very low level, but this has had no drastic effect on the different finished products. The demand for these goods is reported fair for this season, but an improvement is hoped for when the season opens. Following are present quotations:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11

Do., broken lots	0 15½

Scrap Metals Inactive

Montreal.

The dull period continues in the waste material market, both buying and selling

being at a standstill. Reports have been current that other markets have experienced a great falling off in prices, causing some anxiety, but nothing very drastic has developed locally. Dealers state that business being very quiet the market remains much the same as has been reported during the past few months. No price changes are made and following are nominal quotations:

DEALERS' BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 06
Red brass	0 11
Light brass	0 04½
Scrap zinc	0 04
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 09
Heavy copper	0 11
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	8 50
Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
No. 1 machinery cast, per gr. ton	$25 00 $28 00
Boiler plate	0 11

No Sheet and Plate Changes

Montreal.

Until a more active demand is shown on sheets and plates there can be very little to report on conditions. Sales are continuing small with jobbers, and they are receiving small sorting orders. Imports from United States are not as heavy, and the English market is reported dull and quiet. Price cutting by some independent mills is not quite as prevalent as a few weeks ago, however this had little results on the local market, this being controlled by present stocks on hand. Following are the present prices, showing no changes from previous quotations. Most of these quotations, however, are only considered nominal.

PLATES—	
10 gauge	6 25
12 gauge	6 30
14 gauge	6 45
16 gauge	6 55
BLACK SHEETS—	
10 gauge	6 50
12 gauge	6 55
14 gauge	6 60
16 gauge	6 80
18-20 gauge	7 95
22-24 gauge	8 00
26 gauge	8 10
28 gauge	8 20

Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANZED SHEETS—	
U.S. Standard—	
10¾ gauge	10 25
28 gauge	9 75
26 gauge	9 50
22 to 24 gauge	9 35
20 gauge	9 15
18 gauge	9 15
16 gauge	9 00
14 gauge	9 00
12 gauge	9 00

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	11 50	10 50
26 gauge	11 25	10 25
24 gauge	10 65	9 85
22 gauge	10 30	9 40
18 and 20 gauge	9 60	9 25

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Unchanged

Montreal.

Most jobbers state that a slightly better demand is shown for iron and steel. This, if anything, is very slight and sales continue small. Better business is looked for soon now, the opinion being expressed that open weather will bring better business in these lines. Quotations show no changes and are as follows:

Common bar iron, 100 lbs.	4 00
Refined iron	5 50
Iron finished machinery steel	4 05
Mild steel	4 00
Band steel	4 00
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 00
Tire steel	4 20
Toe calk steel	4 90
Harrow tooth steel	4 15
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.
Band steel in scroll bdles., 50c per 100 lbs. extra.
Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Compression Goods Hold

Montreal.

In company with many lines of lead products fairly normal conditions continue to prevail on compression goods. When the weather permits the plumber to work on outside contracts a greater activity in business is expected. No changes have been made on the different discounts, and they are as follows:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Basin cocks, Fuller, No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, standard	34%
Roundway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Radiator valves, standard	23%
Do., removable disc	38%
Globe, angle and check valves, standard	5%
Gate or straightway	Net
Jenkins globe	10%
Jenkins gate valves	10/7%

Ingots Quiet, a Few Changes

Montreal.

The different markets on ingot metals continue quiet, the lack of demand still prevailing. Some local quotations are slightly easier, while others show more strength and are quoted with little higher figures.

TIN.—Tin showed an advance early in the week over the bottom price of £150 on the London market, but eased off again later. It is not thought, however, that it will go any lower than this figure. The local market is a little easier at 36½ cents.

COPPER. — Copper evidenced some strength toward the end of the week, advancing £1 15s. in London. New York market is practically unchanged. Locally, however, the market is slightly easier, electro being quoted at 18 cents, and casting at 17¾ cents.

SPELTER.—The advance of last week continued until the past few days, when it has steadied down. East St. Louis closed at $4.75. The demand is fair on this metal and the market a little stronger at 8½ cents.

LEAD. — Lead showed strength in London this week, having its effect on the local market. East St. Louis prices are unchanged. Quotations locally are a little stronger at 6½ cents.

ANTIMONY.—This metal is very quiet, with slightly easier tendency on outside markets. The local market is dull and unchanged at 7¾ cts.

ALUMINUM. — Aluminum continues dull, with practically nothing to report on it. Local price is unchanged at 34 cents.

Toronto Markets

TORONTO, March 17.—The outstanding features in the markets this week are the reductions in bar iron and steel and the new season's prices for binder twine. The latter are slightly lower than those issued last spring. Price changes are fewer this week but many lines of imported tools such as wrenches, screw drivers, pliers, etc., have been revised and are mostly a trifle lower though one or two lines are showing a small advance. Scissors and shears are lower in price, but little change is shown in kitchen, table or pocket cutlery. Sad irons and handles are lower and reductions have been made in sledge hammers, grindstone fixtures, and clothes line reels. Some declines are shown in cup grease and axle grease. Staple lines such as pipe and fittings, sheets and plates, etc., are holding unchanged at recent changes. Ingot metals show a slight improvement in the demand, and while copper is lower, spelter is firmer. An improvement is reported in business, and with the weather continuing open there should be an increase in the demand for spring lines.

Mica Axle Grease Lower

Toronto.

New prices have been issued on mica axle grease and show a slight reduction from previous quotations. The following are the new prices:

MICA AXLE GREASE

1 lb. size (case of 48), list	$ 7 60
3 lb. (case of 24)	10 40
5 lb. (case of 6)	4 55
15 lb. can	2 35
25 lb. pail	3 45

Less 15 per cent.

Binder Twine Prices

Toronto.

The prices for binder twine for the coming season have just been issued and are ½ cent per pound below those issued last spring. Quotations are, 500 feet, 17¼ cents per pound; 550 feet, 18¾ cents per pound; 600 feet, 20¼ cents per pound; 650 feet, 21¼ cents per pound; ⅛ cent per pound is allowed on orders of 10,000 pounds and ¼ cent per pound on 20,000 pounds. Freight allowed on lots of 300 pounds and over.

Cup Grease Declines

Toronto.

Reductions of about ½ cent per pound have been made in the prices of Arctic

cup grease and the new quotations are the following:

ARCTIC CUP GREASE, No. 2—25-lb. pail, list, $3.75; case of 6 5-lb. cans, list, $4.75; case of 24 8-lb. cans, list, $4.45.
Less 15 per cent.
ARCTIC CUP GREASE, No. 3—25-lb. pail, list, $4; case of 6 5-lb. cans, list, $5.10; case of 24 1-lb. cans, list, $4.60.
Less 15 per cent.

Some Calipers Higher

Toronto.

New price lists of the Union line of calipers, dividers, take-down squares, etc., show some slightly higher quotations. The new lists are higher although the discounts are better.

Westcott Wrenches Trifle Lower

Toronto.

A small reduction has been made in the price of the Keystone make of Westcott wrenches. These are now about 5 per cent. cheaper.

Bar Iron Down 50 Cents

Toronto.

Exactly a year ago the base price of bar iron and steel was raised 50 cents, from $5 to $5.50. This week it has been reduced 50 cents per hundredweight, from $4.50 to $4. This follows a decline, too, of two weeks back of 25 cents. Wholesalers appear to be taking a loss on existing high-priced stocks, as although mill quotations have been declining for some while, much of the stocks in hand were bought at the higher prices, it is reported. Little improvement is noted in demand, but when business picks up there should be a considerable movement, as it is believed that dealers' stocks are far from heavy, and would need replenishing. In United States iron markets the tendency of prices is still sharply downwards, and little increase in demand is reported. The new quotations here are the following:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 4 50
Common bar steel, ¼ in. and heavier	4 00
Common bar iron, 3-16 in. dia. and lighter	4 50
Common bar iron, ¼ in. and heavier	4 00
Angle base	4 10
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 00
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop Steel	6 00

Wrought Pipe Holds

Toronto.

Pipe prices are holding at changes which went into effect at the beginning of the month. Stocks are reported to be in fair shape now, and sales are lighter than they have been. With the coming of spring an increase of activity is expected. Unlike a good many other steel products mill prices are being maintained in the United States, even by the independents, at Corporation levels, and a good demand is being experienced. Many towns and cities are having replacement work and extensions made to gas and water mains at the present time, a lot of this work having been held over during the past few years. This is held to account for the present good demand for piping. The quotations will be found on current market pages.

Gasoline and Oil Unchanged

Toronto.

No changes have been made this week in coal oil or gasoline prices, and quotations still are 27 to 30 cents per gallon for coal oil, according to grade, and 38 cents for gasoline. Some reductions are reported in U.S. prices, but wholesale prices there, allowing for the difference in the size of the gallon and exchange, are practically the same as prices here.

Perfect Handle Screw Drivers

Toronto.

The Perfect Handle screw drivers are showing a slight reduction in prices, and are now quoted at about 5 per cent. lower.

Common Brick Trowels Lower

Toronto.

The common makes of brick trowel, pointing trowel and plastering trowel are now down about 5 per cent.

Nail Sales Improve

Toronto.

Nails are holding at previous quotations, and are $5.10 per keg base for wire nails and $6.20 base for cut nails. Better sales are reported during the past week and shipments going forward, although not as heavy as usual, are showing an improvement. Reports from Pittsburg state that quotations of 25 cents a keg below the Industrial Board level are being made openly now, and other wire drawers are meeting the price. The Corporation price had been regarded as low in comparison with other steel wire products.

Scissors and Shears are Reduced

Toronto.

Reductions have been made in different lines of scissors and shears, and the Seymour make, and Landers, Frary and Clark are reduced in price. The reductions vary in different numbers and are from 10 to 20 per cent.

Some Pliers, Etc., Down

Toronto.

There has been a reduction in some of the prices of the Smith & Hemenway lines of pliers and screwdrivers. The declines are round 5 per cent.

Kitchen Cutlery Prices Revised

Toronto.

Prices of different makes of kitchen cutlery, butcher and cooks' knives, cleavers and paring knives have been revised, but show very little difference from previous quotations. Some lines are about 5 per cent. lower.

Galvanized Wire Prices

Toronto.

Prices are quoted on fence wire, but owing to the state of the wire market are variable and liable to change. The following are wholesalers' quotations:

PLAIN GALVANIZED WIRE

Nos. 6, 7, 8, 9, per 100 lbs., $6.50; No. 10, $6.55; No. 11, $6.60; No. 12, $6.75; No. 13, $6.90; No. 14, $7.10; No. 15, $7.70; No. 16, $7.90.

COILED SPRING WIRE

No. 9, $5.65; No. 12, $5.80.

Barbed Wire Quotations

Toronto.

Barbed wire is being quoted at $6.20 per 100 lbs. As with the plain and coiled spring galvanized wire, the prices are liable to change without notice.

Canvas Gloves Lower

Toronto.

Slight reductions have been made in the price of canvas gloves, and these are now quoted from $1.25 per dozen pairs up.

Glass Rolling Pins Available

Toronto.

Glass rolling pins, which have been very scarce for some while, are again available and are quoted at $5.75 per dozen.

No Change in Valves

Toronto.

A little better feeling is noticed in brass compression goods, although orders are small in size. An increase of business should be felt in these lines very soon now, but the hand-to-mouth buying is no doubt the result of the uncertainty regarding prices. No further changes are noted and the current quotations are the following:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	25%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	10%
J.M.T. C.	15%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Steady Improvement in Cordage

Toronto.

The demand for rope and cordage is reported to show a slow but steady improvement. Quotations are holding at 24½ cents per pound for pure manilla, and 20 cents base for Beaver manila and New Zealand hemp. The sisal base is 18 cents. Binder twine prices have been issued and are given in another place. The market in cotton cordage continues to show weakness, and present indications are pointing to further recessions. It is stated that the U.S. is carrying over from last season a year's supply of cotton.

Auto Accessories Selling Better

Toronto.

There is an improvement in the sales of auto accessories, and among other lines and tools, wrenches are in good demand. Auto pumps are another good seller and the Ideal auto pump is about 5 per cent. lower in price than formerly.

Children's Aluminum Sets Lower

Toronto.

A reduction of about 15 per cent. has been made in the price of the imported lines of children's aluminum sets of plate, cup and saucer.

Fitting Prices Are Held

Toronto.

There are no changes in the prices of pipe fittings. Sales show very little variation from the last month or so, and stocks are ample for normal needs. The following are current quotations:

Cast iron fittings	15%
Plugs, cast iron	20%
Do., solid	10%
Do., countersunk	net
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., long, ⅛ in. to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B	0 25	0 35
Class C	0 16	0 25

Sap Supplies Moving Well

Toronto.

There has been a good movement of sap supplies, and repeat orders are now coming in. Prices continue firm and show no change.

Corrugated Sheets Quiet

Toronto.

Business has not shown any increased demand for corrugated galvanized sheets, though a better tone should be visible in a few weeks now. Prices are holding at the changes noted at the beginning of the month and are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00
Less 7½%.	

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Better Movement of Wares

Toronto.

A better movement in wares is noted and sales of tin and galvanized ware especially are showing a healthier tone. Prices continue firm and manufacturers state that quotations last year in wares did not advance in proportion to the increase in sheets, and therefore did not represent the market price of the raw materials, and no changes in prices are apparent.

Lead Products Are Steadier

Toronto.

A small improvement in the sales of lead products is reported in some quarters, and orders have been more numerous, though not of great size. With the early resumption of building activities there is expected to be a better demand. Lead markets in the U. S. are showing little change, but London markets are firmer, and the zinc market in England has stiffened up, evidently on account of the political situation, as Germany had been able lately to quote under any other country on zinc.

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.

Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., guaranteed, lb.	0 28
Do., wiping, lb.	0 22¼
Zinc sheets, per lb.	0 16

Sheets Show Little Improvement

Toronto.

There is little change in the plate and sheet situation here this week. The demand is said to be very slow in picking up. Customers are carrying on with as small a stock as possible and buying from hand to mouth. This would not be so bad if there was any demand to speak of. There is a feeling, however, that business will shortly show an improvement, and stocks will need replacing. American sheet mills report a better demand from the automotive industry, and it is believed that the turning point has been reached. It is reported from Youngstown that sheet mill workers' wages have been reduced 13½ per cent. Independent mills in the Pittsburgh districts are less disposed to make recessions from the Corporation prices than was the case formerly. Quotations here are unchanged and are the following:

PLATES

10 gauge	6 20	....
12 gauge	6 25	....
14 gauge	6 30	....
16 gauge	6 40	....

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 40	10 30
U. S. 28	9 00	10 00
U. S. 26	8 70	9 75
22 and 24	8 55	9 50
18 and 20	8 40	9 35
16	8 25	9 20
12 and 14	8 20	9 15

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Grindstone Fixtures Lower

Toronto.

Some lower prices are quoted for grindstone fixtures and following are present quotations on these lines.

GRINDSTONE FIXTURES

No. 22, per doz., $9.60; No. 33, $9.95; No. 2½, $11.90; No. 3, $12.50.

Clothes Line Reels Revised

Toronto.

There has been some revisions in the prices of some of the makes of clothes line reels, and new quotations are lower. Following are the new prices:

No. 3, per doz., $20; No. 3½, $21.65; No. 4, $28.30.

Sad Irons Reduced

Toronto.

New prices have been made on sad irons and are about 10 per cent. lower. The new quotations on Mrs. Potts' irons, No. 55, polished, are $2.18 per set. The nickeled plated, No. 250, are now $2.30 per set. The common sad irons are also lower, and the No. 1, 4 to 5 lbs., are now quoted at $17.50 per cwt., and the 6 lbs. and over at $15.70.

Sad Iron Handles Reduced

Toronto.

The japanned sad iron handles have been reduced in price and are now quoted at $2.15 per dozen. This is a reduction of about 5 per cent.

Sledge Hammers Lower

Toronto.

Lower prices are being quoted on sledge hammers, and the No. 37 are now, 2 to 2½ lbs., $25.00 per cwt.; 3 to 4 lbs., $23.00, and 5 lbs. and over, $16.00.

Thumb Latch Prices Revised

Toronto.

Prices have been revised on some lines of thumb latches, and the steel, No. 2, are now $2.25 per dozen; No. 3, $3.15, and No. 4, $4.70.

Slow Movement of Scrap

Toronto.

The movement of scrap materials has been slow, and few changes are noted in prices. The consumers of waste metals seem to have sufficient raw materials on hand to meet present needs, and are disinclined as yet to purchase. Prices are generally easy on account of the tone in new metals, but they are nominally unchanged. Scrap rubber continues low and few sales are reported. The following are average prices for large quantities.

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass		10 00
No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	2 50
Overseas lumbermen's rubber boots	1 50	2 00

Some Lower Stove Prices

Toronto.

Lower quotations are being made on some lines of cook stoves and ranges, and also on furnaces. All lines are not affected, but it is stated that the reductions amount to from 5 to 10 per cent. on ranges and about 7½ per cent. on furnaces. Prices on heaters remain unchanged. With the continued high freight rates and little or no changes in wages it is felt that there can be no great change in stove prices, but it is hoped that these reductions will have an effect on the bookings of stoves for next fall.

Ingot Metals; Better Feeling

Toronto.

TORONTO.—A better feeling is prevailing this week in the ingot metal markets, and it is believed that the worst is over, and a turn for the better has started. Not much change in prices is recorded. Copper is weaker, and spelter has advanced slightly. The Eur-

opean political situation and the proposed changes in the U. S. tariff may both have an effect on metal prices in various markets.

TIN.—There has been an upturn in the London markets on tin, due, it is stated, to covering movement. There has been besides a good buying demand. New York markets are also stronger in response to this, combined with stronger sterling exchange. Local quotations are unchanged at 38 cents.

COPPER.—A new low price of 12 cents has been reached in U. S. markets on copper, but despite low price consumers show little interest. London markets have been quiet and easier. Prices here are down 1 cent, and casting copper is quoted at 18 cents.

LEAD. — This metal shows little change on U. S. markets and has been quoted at $4.00 at New York and St. Louis. It is noted that this week a year ago quotations at New York were $9.50. Prices advanced on London markets, but have dropped again slightly. Local quotations remain $6.

SPELTER.—More interest has been shown in spelter, but demands have been for small quantities. A firmer tone is shown on outside markets and an advance in price at London has been due to prospect of supplies being curtailed from German sources. Germany has been producing cheaper than any other nation and has been underselling Belgium and English producers. Quotations here are higher at $7.25.

ANTIMONY—Little business is shown in this metal. The expectation of an increase in the tariff is interesting American dealers and may strengthen the market in the U. S. Quotations locally remain at 8 to 9 cents.

ALUMINUM.—Buying has not been stimulated much in this metal. Slightly lower prices are quoted on outside markets, but are unchanged here. Quotations are 35 to 37 cents.

London Markets

LONDON, March 17.—Changes in prices are fewer this week, and and the chief features are the lower prices on cotton goods. Cotton rope, sash cord, candle wick, etc., are reduced in price again. Horse rasps and files are showing some lower quotations, and sad irons have been reduced slightly. Plaster Paris has been advanced a little in price, and turpentine shows a slight increase from last week's price. Business here though showing a steady improvement is only fair as yet, but with continued mild weather there should be a demand for spring goods. The bad condition of the roads at present is retarding trade as many farmers are not coming to town on that account.

Turpentine Advances Slightly

London, Ont.

There has been a slight advance in the price of turpentine, and it is quoted at 5 cents above last week's price. There is a better demand for this now. Quotations are the following:

One-barrel lots, $1 per Imperial gal.; 2 to 4 barrel lots, 99c; 5 gal., $1.15.

Oil Unchanged This Week

London, Ont.

The demand for linseed oil has greatly improved this past week. There has been no change in prices from previous report. Quotations are the following:

	Raw	Boiled
1 to 2 bbls., per gal.	$0 95	$0 98
3 to 5 bbls., per gal.	0 94	0 97
6 to 9 bbls., per gal.	0 92	0 95

Less barrels add 15 cents gal.

White Lead Sales Starting

London, Ont.

Sales of white lead in oil are beginning to show signs of the coming season's activity. There has been a better demand for this product lately. Prices which are unchanged are as follows:

WHITE LEAD IN OIL

	Tons	Less tons
Pure, per 100 lbs.	$14 95	$15 30
Elephant, per 100 lbs.	15 45	15 80

Nail Prices Are Holding

London, Ont.

Prices are holding unchanged on nails and a better volume of business is noticed. The wire nail base is $5.10, and the cut nail base $6.40.

Sash Cord Down Two Cents

London, Ont.

The lower values in the cotton market continue to reflect in declines in cotton products, and sash cord is again reduced in price. The decline is 2 cents per pound, and new quotations are the following:

No. 6, per lb. 57c; No. 7, 56c; Nos. 8 to 12, 55c.

Bright Wire Goods Lower

London, Ont.

Reductions of about 12½ per cent. have been made in bright wire goods, screw hooks, screw eyes, gate hooks and eyes, etc., and the new discount is 82½ per cent. off list.

New Liquid Veneer Assortments

London, Ont.

The manufacturers of Liquid Veneer polishes and mops have put out two new assortments or "deals" on the market, and the assortment known as No. 1 is priced at $33.40 net and the No. 2 at $21.40.

Plaster Paris Slightly Higher

London, Ont.

A slight increase has been made in the price of plaster of Paris, and the Hammer brand is now quoted at $6 per barrel net.

Cotton Rope Again Declines

London, Ont.

Reductions have again been made in cotton rope prices and the new prices are approximately 12 per cent. lower. The quotation for ¼-inch size and larger is 44 cents per pound and 3-16-inch 45 cents.

Candle Wick Is Reduced

London, Ont.

A lower quotation is made on candle wick and the new price is 45 cents per pound.

Sad Irons Decline Slightly

London, Ont.

Mrs. Potts' sad irons have been reduced slightly in price, and the new quotations are $2.25 per set for the plain and $2.40 for the nickel-plated irons.

Horse Clippers Selling Well

London, Ont.

There is a good sale at present for horse clippers and quotations on some of these goods are the following:

Stewart, No. 1 BB, each	$14 00
Less 25 per cent.	
Handicap Hand Clipper, each	2 80
New Market, each	3 50

Globe Horse Rasps Lower

London, Ont.

Globe horse rasps have been reduced in price and are now quoted at 72½ per cent. off list.

Black Diamond Files Reduced

London, Ont.

A decline of about 8 per cent. has taken place in the price of Black Diamond files, and the new discount on these is 32½ per cent. off list price.

Alarm Clocks; Improved Stocks

London, Ont.

Alarm clocks, which were not any too plentiful last season, are in better shape now and stocks are improved. The prices are unchanged and some of the leading sellers are quoted as follows:

Good Morning, each	$1 90
Lookout, each	2 35
Sleepmetre, each	2 50
Big Ben, each	4 00
Baby Ben, each	4 00

Poultry Netting Selling

London, Ont.

Sales of poultry netting are good just now. The retail sale has nicely started for the season. The Canadian make is quoted at list plus 10 per cent. for the 1-inch and 2-inch mesh.

Screen Wire Cloth Moving

London, Ont.

Booked orders for screen wire cloth are beginning to move out and this season's price for the black painted cloth is $3.50 per 100 square feet.

Garden Tools In Demand

London, Ont.

Retail merchants report that the demand for garden tools has already begun and sales are being made. Booked orders for these and also for harvest tools are now being shipped by wholesalers. These are selling at list less 50 and 10 per cent.

Spades and Shovels Moving

London, Ont.

Orders for shovels, spades and scoops are moving out, and the quotations are 35 per cent. off list. The net prices on some of the good selling lines are as follows:

SPADES AND SHOVELS
Full Polished

Black Cat or Star, doz.	$16 60
Fox or Olds, doz.	17 25
Bull Dog or Jones, doz.	19 85

Paint Sales Increasing

London, Ont.

The sales for prepared paints and varnishes are showing an improvement each week, and alabastine is also in good demand. The latter is priced at 48 cents for 5-pound packages and 25¼ cents for the 2½-pound packages.

Sap Supplies; Good Sales

London, Ont.

Sap supplies are moving out very well at present and sales have been good. Prices on the better selling lines are the following:

1-C sap pails, 10 qt., flaring, 1-C sap pails, 2 gal., straight, $26.25 per 100.
SAP SPILES—Eureka, $16.85 per 1,000; S.M.P., $3.80 per 100.
SYRUP CANS—¼ gal., $13.50 per 100; ½ gal., $19; 1 gal., $26.

Auto Accessories Improving

London, Ont.

The sales for auto accessories and tires are showing an improvement. Prices are fairly firm and show little change.

Tools and Builders' Hardware

London, Ont.

There is a better movement of carpenters' tools now, and a good sale is expected in this line and also in builders' hardware as soon as the weather permits of building operations being resumed. Prices of builders' hardware are from 5 to 7½ per cent. lower this season.

Window Glass Prices

London, Ont.

Sales of window glass are beginning to improve. The prices in effect here at present are 60 and 10 per cent. off list for single and double diamond and 60 per cent. off cut light list for single lights. The net prices for 100-foot cases, figured at these discounts, are as follows:

Per case, 100 ft.	Single	Double
Under 25 in.	$7 16	$ 8 25
26 to 34 in.	7 49	8 95
35 to 40 in.	7 85	9 50
41 to 50 in.	8 46	10 90
51 to 60 in.	8 86	11 09
61 to 70 in.	9 54	11 78
71 to 80 in.		12 75
81 to 84 in.		16 37
85 to 90 in.		17 59
91 to 94 in.		17 93
95 to 100 in.		21 08
101 to 105 in.		23 53

Tub Stands Are Lower

London, Ont.

The Dowswell make of tub stand or wash bench was affected when the change in washing machine prices was made recently, and the new net price is $47.25 per dozen.

Winnipeg Markets

WINNIPEG, March 17.—Some important price changes have been made here this week and the chief items affected are wood screws, and bar iron and steel, which are showing lower prices. Wrought iron washers which were only reduced last week, have again declined in price. Lead traps and bends and sheet lead are quoted at a lower price, and other lines showing reductions are bright wire goods, Stillson wrenches, and spring hinges. Lower quotations are made on turpentine. No further change has been made on black or galvanized sheets, nor on wrought iron pipe.

Business is improving week by week, and it is thought that in the course of the next few weeks a considerable increase of trade will be felt in hardware circles.

Turpentine Down in Price

Winnipeg.

Another decline in turpentine brings the price down to $1.30 per gallon in barrel lots and 10 cents per gallon extra for smaller lots. Containers 25 cents per gallon extra.

No Change in Linseed Oil

Winnipeg.

The price quoted last week for linseed oil still remains the same and is $1.20 per gallon for raw and $1.23 for boiled.

Wrought Iron Pipe Prices

Winnipeg.

Further reductions were anticipated in wrought iron pipe but the prices quoted last week remain firm and are as follows:

BLACK PIPE
Effective March 2nd, 1921.
F. O. B.

Size ins.	Winnipeg	Calgary Edmonton Lethbridge and Medicine Hat.	Saskatoon	Regina	Brandon
		Add to Winnipeg price.			
⅛	$ 6.21	$ .30	$ .20	$ .17	$ .11
¼	5.67	.53	.34	.30	.19
⅜	5.85	.70	.45	.40	.26
½	7.88	1.05	.67	.59	.38
¾	9.72	1.40	.90	.79	.51

Sheet Lead Is Down

Winnipeg.

A reduction has been made this week in prices of sheet lead and it is quoted at 10 cents per pound for full rolls and 11 cents per pound for less than rolls.

Stillson Wrenches Reduced

Winnipeg.

The price has been reduced on genuine Stillson wrenches and they are now quoted at 30 per cent. off list.

Screws Lower in Price

Winnipeg.

The discounts have been revised on all kinds of screws, making the prices considerably lower. Following are this week's quotations:

Flat head bright, 67½% off list; round head bright, 65%; oval head bright, 65%; flat head brass, 55%; round head brass, 52½%.

Bright Wire Goods Reduced

Winnipeg.

The discounts have been changed on bright wire screw hooks and screw hooks and eyes, making the prices somewhat lower. Following are the prices now in effect: Bright wire screw eyes, 80 per cent. off list; bright wire screw hook and eyes, 80 per cent. off list.

Iron Washers Reduced Again

Winnipeg.

Although the price was lowered on washers last week a further reduction is recorded this week and following are the prices now in effect:

	Case lots	Less quantities
3-16 in., per 100 lbs.	$16 90	$17 40
¼ in.	14 92	15 42
5-16 in.	14 04	14 54
⅜ in.	13 05	13 55
7-16 in.	12 28	12 78
½ in.	11 84	12 34
⅝ in.	11 62	12 12
9-16 in.	11 73	12 23
¾ in.	11 51	12 01
⅞ in.	11 40	11 90
1 in.	11 40	11 90
1⅛ in.	11 40	11 90
1¼ in.	11 62	12 12
1⅜ in.	11 62	12 12
1 7-16 in.	11 62	12 12
1½ in.	11 62	12 12

Bar Iron and Steel Lower

Winnipeg.

The prices have been reduced from 30 to 50 cents per hundredweight on bar iron and steel and new quotations are as follows:

BAR IRON—Rounds and squares, 3-16, ¼ and 5-16 in., $7 base; rounds and squares, ⅜ to 2 in., and flats up to and including 1 x 4 in., $5.65 base; rounds and squares, over 2 in. and up and including 2¾ in., and flats over 1 x 4 in. up to 6 in. wide, $6.40 base; rounds over 2¾ in. to 6 in., $6.90 base; band steel, $5.95 base.

SOFT OR MILD STEEL—Rounds and squares, 3-16, ¼ and 5-16 in., $7 base; rounds and squares, ⅜ to 2 in., and flats up to and including 1 x 4 in., $5.95 base; over 2 in. up to and including 2¾ in., and flats over 1 x 4 in. up to 6 in., $6.40 base; rounds over 2¾ in. to 6 in., $6.90 base.

Putty Lower in Price

Winnipeg.

The price of putty has dropped this week $1 per hundredweight and new prices are as follows:

1½-lb. tins, 14½c each; 5-lb. tins, $9.20 per 100 lbs.; 12½-lb. irons, $8.30 per 100 lbs.; 25-lb. irons, $7.80 per 100 lbs.; 50-lb. drums, $7.23 per 100 lbs.; 100-lb. drums, $7.20 per 100 lbs.

Cut Lights Now 60 P.C. Off

Winnipeg.

The list prices on cut lights of glass are still the same but a bigger discount is recorded this week, making the prices somewhat lower. The discount now in effect is 60 per cent. off present pane price list.

Pittsburgh Markets

PITTSBURGH, March 17.—The steel commodity market shows a small though distinct increase in the volume of buying, chiefly in sheets, but this does not mean that the market is active, as it was entirely stagnant.

Steel ingot production during February was at the rate of 76 per cent. capacity on the part of the Steel Corporation, and 26 to 27 per cent. of the independents, making a total of 48 per cent. for the whole. As the steel industry has not been able for various reasons to operate at capacity since 1916, this total is not as bad as it appears. New buying is still light, and a good deal of present business is in the form of release of shipments which had been suspended.

Prices show little change and are generally the same as quoted a week or two ago. Bars are a shade stronger and sheets are inclined to be easier. Tin plate and steel pipe remain at the old price, and the demand for pipe which has held up well is a little lighter. Another 50 cent decline is recorded in foundry pig iron, basic is nominally quoted at $25 valley, and bessemer at $27.

PITTSBURGH, March 17.—There is a distinct, though small, increase in the volume of buying of some steel commodities, this improvement being most marked in the case of sheets. The improvement was predicted at the beginning of the year, being based chiefly on the progress of the season, as demand always becomes more active on the approach of spring. In January, however, a greater improvement was expected than now seems likely to develop.

Improvement, however, does not make the steel market active by any means, since it was entirely stagnant. The increased buying is in miscellaneous quarters, there being no large projects. Some of the business received, and counting as part of the improved demand, is in the form of releases to shipments formerly suspended. The strictly new buying is still conspicuously light, though not altogether as light as two or three weeks ago.

Production

The process continues of old orders running out, and accordingly the increase in buying and the releases against suspensions are not sufficient to arrest the decline in actual production. The monthly report of the American Iron and Steel Institute, giving the steel ingot output of the thirty steel companies that make monthly reports, indicates that steel ingot production during February was at the rate of about 25,150,000 gross tons a year. The Steel Corporation produced at 76 per cent. of its capacity and the independents at 26 or 27 per cent. of their capacity, making a total for the industry as a whole of about 48 per cent. The percentage is not nearly as bad as it seems, for it does not mean 48 per cent. of any actual production that has been realized. The steel industry has not been able to operate at capacity since 1916, there being either shortage of orders or physical difficulties. In the first nine months of 1920, when steel was scarce, the average operation was only about 80 per cent.

Production at the present time is lower than the average rate of February, being approximately at the rate of 21,000,000 tons a year, or just one-half the rate during the first nine months of last year. Considering how active the demand then seemed to be, and how completely absent demand now seems to be, this really looks like a high rate. Although the independents started cutting prices early in February while the Steel Corporation has maintained its prices, the production rates now are about 13,500,000 tons by the corporation and 7,500,000 tons by the independents, so that the corporation is making about 65 per cent. of the steel although it has only about 43 per cent. of the capacity.

Steel Corporation Orders

The Steel Corporation's unfilled obligations decreased during February by 639,297 tons, against decreases of 574,958 tons in January, 873,359 tons in December and 815,371 tons in November. The February decrease represented 51 per cent. of the month's capacity, and as shipments may be estimated at 75 per cent. of capacity the net bookings in the month appear to have been about 24 per cent. of capacity. The net bookings are, of course, the total bookings minus cancellations, of which there were few in February or January. In November and December there was a very considerable quantity of cancellations, some of the cancelling being by initiative of the corporation of orders that seemed unlikely to represent actual shipments within a reasonable time. That the Steel Corporation should book any business at all when the independents were cutting prices shows that the corporation's customers are quite willing to stay with it, expecting they will profit in the long run, as in the past, by doing so.

Prices

Bars, shapes and plates are quotable at the same prices as a week or two ago, 2c for bars and 2.10c for plates or shapes. Generally a very ordinary sized order can be placed at these prices, but the specifications have to be fairly attractive. Plates and shapes are no stronger than a week or two ago, but bars are apparently a shade stronger, since an extreme concession from the 2c price would be $1 or $2 a ton, for a very attractive order, while three or four weeks ago it appeared that 1.85c could probably be done on a large order.

Sheets, on the other hand, are easier. Ten days ago the market on fair-sized lots with reasonably definite specifications was about 3.20c for blue annealed, 4.10c for black and 5.20c or 5.25c for galvanized. Now it is possible to do 3c, 4c and 5c respectively, and in some quarters it is believed that the 4c price on black could be shaded. The spread between black and galvanized is narrowed down to about $1 per 100 pounds, when the Industrial Board spread was $1.35. The decrease is attributable largely to the low price of zinc, which is 4.80c, St. Louis, or lower than the average price in any calendar year since 1902 with the exception of 1908.

Tin plate remains at the old price of $7 per base box, 100-pound, all efforts of buyers to break the market having failed. The mills hold together because they realize that if any accident should happen to the regular price there would probably be a decline that would prevent the mills from realizing cost out of their high-priced tin bought before the decline to the present remarkably low price and might make them experience a loss beyond that.

Pig Iron

Another 50-cent decline is recorded in the foundry pig iron market, as the Standard Sanitary Manufacturing Company has bought 1,000 tons of valley foundry iron on the basis of $26, furnace, for its New Brighton plant, near Pittsburgh. At the same time this interest bought 1,000 tons for its plant at Louisville, Ky., taking half from Virginia furnaces at $26, furnace, and half from Birmingham furnaces at $25, furnace, the last named price being $1 under the Birmingham market as previously quoted.

Basic iron remains nominally quotable at $25, valley, and Bessemer at $27. These are quotations of merchant furnaces. It is thought probable that some steel works would sell from their surplus stocks of basic at about $23. A careful canvass of the situation made by a producer shows that just now there is no real price issue as between producer and consumers, the consumers stating that they have no inclination to buy. Some have no orders against which they could use iron, while others have a few orders but have considerable tonnage of pig iron due them on old purchases, some of this iron being at as high as $40. A 500-ton lot of basic iron has just been sold by a broker at approximately $23, valley, but such a sale would not be representative of the market.

Interesting Study of the Hardware Markets

Index of Wholesale Prices Shows Substantial Decline—Average Increase of 140% in Hardware Compared With Pre-war Prices —History Repeated in Steel Market

THE question of how far prices are still inflated is one present in the minds of everyone in business. The general public also is interested in the answer, and is cautious in purchases because of the uncertainty as to whether the particular article wanted at the moment may not be bought at lower prices later on. This attitude, of course, tends to restrict buying very greatly. The index number of wholesale prices in Canada for February, according to a leading economist, stood at 197.8, compared with 212.6 for January and a high of 298.3 in May, 1920. The number is based on the prices of 20 foodstuffs and 20 manufactured commodities.

In connection with the above it is interesting to see how hardware prices have been affected during the past 12 months, and the apparent tendency at the present time. In a price comparison table of 67 hardware lines which was published in March 12 issue of Hardware and Metal, it was shown that there had been an average decline of 5.1 per cent. from the prices of March 1, 1920. The percentage of decline may not appear large, but it will be remembered that prices of most hardware lines were steadily advancing during the spring and summer of 1920, so that the decline from the peak would show a considerably larger figure, and it was pointed out that the average decrease in the first two months of this present year amounted to 8½ per cent. In other words, hardware has lost one-twelfth of its value since January 1st, 1921.

Compared with 1914

A point often raised is as to how present prices compare with those of 1914. A leading authority has prepared a table covering the principal commodities, from which the following lines affecting hardware have been taken. The figures are the prices on February 1 of each year, compared with the average price of the same date of the five years before the war; that is, from 1910 to 1914 inclusive, represented by par or 100.

	1915	1916	1917	1918	1919	1920	1921
Cotton	65	91	112	238	204	299	108
Silver	86	100	136	153	179	239	102
Copper	100	179	220	161	145	133	89
Tin	91	100	119	164	171	145	81
Iron	85	137	228	229	222	267	214
Steel	82	139	273	200	188	227	183
Zinc	131	320	163	134	112	156	86
Lead	86	143	190	161	115	197	112
Petroleum	103	99	99	132	145	198	198
Rubber	59	73	77	57	58	45	18
Hides	125	123	161	154	158	187	62
Cement	100	118	142	152	268	239	317
Lumber	85	86	122	180	185	207	222

Although these figures are prepared from prices in the United States, they give a very fair indication of the course of prices in Canada.

Average Increase 140 Per Cent.

How do present hardware prices compare with those of the pre-war era? An average taken of 50 staple hardware lines shows the average index figure to be 240.22, compared with 100 of August, 1914, or an average increase of 140 per cent., despite a decrease of present prices from those of the peak of last year.

The Steel Markets

No review of hardware markets is complete without a study of the steel markets. It has been said that the history of the steel market can be divided into three periods. The steel market as a steel market began early in the eighteen-nineties. Before that time the finished rolled products, with the exception of rails, were chiefly in wrought iron. Steel has been gradually making its place. The steel wire nail, for instance, had come out in 1886 and soon afterwards it was shown that steel was suitable for pipe making. Bars, shapes, plates, sheets, etc., followed.

The first large development of the steel industry, as such, occurred during the period of industrial depression of 1893 to 1898 inclusive. Very close prices were named, due to sharp competition, and profits were moderate. Then came the boom of 1899, when prices soared, and through to 1907 the general demand for steel was heavy and the market strong except for short intervals, and there was scarcely any interruption in actual consumption. From 1907 to date, on the other hand, the periods of inactivity have been mainly periods in which demand accumulated whereby there was later heavy pressure on the mills for deliveries.

These three periods were quite different. In the first period there was no the buyer was willing to pay the price. In the second period the price issue was prominent when there was light buying. In the third period there was no direct price issue. When the consumer stopped buying it was because he needed no more steel. It has been said that history is going to be repeated.

Light Demand for Steel

At the present time there is only a light demand at the mills for steel products. Consumers and distributors show a decided unwillingness to buy at this time, quite irrespective of prices. There has been some slight signs of a revival in demand during the past few days, but this would be in keeping with the progress of the season. A mild buying movement can be counted on in the spring. Steel plants to-day are operating about an average rate of scarcely 50 per cent. of capacity and the rate is still declining.

There seems to be a disposition on the part of the independent mills of the United States to quote less concessions than formerly from the Industrial Board prices. The lowest quotations reported have been $3 on blue annealed sheets, black at $3.85 and galvanized at $5. Wire nails have been quoted at $3 at the mills, and it is reported that more wire drawers are meeting this price.

Pipe is the one steel product that has not yielded much in price, and one of the reasons is probably that the demand keeps up better than for other products, and most of the pipe mills are operating from better than half to nearly full capacity. During the past few years many cities and towns have been unable to properly extend and replace water and gas pipes, and are doing so now, and are creating a demand for this product.

Non-Ferrous Metals

In the non-ferrous metal markets there has been, on the whole, more of a decline in prices than in iron and steel, and several of them are at or below pre-war levels.

Copper has been quoted this week at 12 cents. Last year the average price was 17.28 cents, and in 1917 it touched 37 cents. During 1913 and 1914 the average stood round 15 cents, so that with the higher cost of production it is claimed it is being produced at a loss. One reason for the smaller demand for this metal is that during the era of high prices and shortage, substitutes such as zinc, steel and other metals were used, and it is necessary for the public to be re-educated to its use. Production is being curtailed and the price should firm up again. Consumers claim that there is still too great a spread between the ingot metal and the sheet.

Tin is another metal which shows a big decline and the recession has been more sudden than in copper. During this past week it was quoted at £148 at London, against £423 10s. of a year ago. On the New York markets it is also below the pre-war value. It is commencing to firm up again and indications are that it has reached the bottom of its decline.

Lead at Low Level

Lead is also at a low level and has touched $3.80 at St. Louis and £16 10s. in London, against high level prices of

Continued on page 223

Weekly Paint Markets

Montreal

MONTREAL, March 17.—No notable price change is made this week in the paint market, and with the exception of linseed oil and window glass it is much steadier than in previous weeks. Linseed oil is rather uncertain again and lower prices are likely than even those now quoted. Window glass remains, as stated in last issue, very unsettled. Turpentine seems to have arrived on a sound basis, as quotations are still at the dollar figure. White lead and putty are unchanged in price, white lead having slightly better sales each week.

From week to week a slow improvement is noted in mixed paint and varnish sales. This week manufacturers report that orders are now coming to hand in good numbers, but are somewhat smaller than last year.

Linseed Oil Prices Unchanged

Montreal.

Quotations on linseed oil show no change this week, but the undertone is by no means certain. The demand is still said to be small, and jobbers do not seem anxious to encourage sales at such low figures when their present stocks were bought at much higher prices. The recent fluctuations in the seed market have had no great results on the oil quotations, but with the outside seed coming in at the end of this month it may affect the market either way. If the demand shows no improvement prices may stiffen, whereas with consumption low and plenty of seed prices are likely to be still easier. The present situation is much different from last year at this period, when oil was both scarce and high-priced, and further hindered by delayed shipments and congestion.

	Raw	Boiled
1 to 2 barrels	0 95	0 97½
5 to 10 barrels	0 90	0 92½

Turpentine Continues at $1

Montreal.

No change has been made in turpentine, the price remaining at $1.00 in one barrel lots. With the local demand still reported light, the demand in the United States has shown a slight improvement in the last two weeks, and the market has a firmer tendency. Lower prices are not thought likely, at least other than slight revisions, but quotations are more liable to have an upward trend when the demand increases. Following are the present prices:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 00
2 to 4 barrel lots	0 97
Broken lots	1 05

Shellac Shows Slight Change

Montreal.

The prices on shellac have been altered in one gallon jugs to read 20 cents less than former quotations. Orange shellac in one gallon jugs is now selling at $4.80, and white at $5.30. The demand is light, but like other products in the paint market, it is improving slowly.

Orange shellac, in barrels, $4.50; in one gal. jugs, $4.80; white, in barrels, or 5 gal. jugs. $5; in one gal. jugs, $5.30.

White Lead Steady

Montreal.

Sales of white lead in oil are slowly improving, with prices registering no change from quotations set last month. Although more activity was experienced last year at this time, outside painting will no doubt bring the movement to a normal state. The pig lead market continues to ease, but this is not expected to bring any results on the oiled product, at least not for some little time. Quotations will be found on current paint market pages.

Putty Demand Still Light

Montreal.

Dealers are experiencing an inactive period in putty. The season is yet considered early for any great movement, as building is the only factor that will increase sales in the spring of the year. Prices are holding at decline of last month and are as follows:

Standard Putty—	5 ton	1 ton	Less ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Glass Situation Unchanged

Montreal.

Practically nothing new is to be reported on window glass, the situation remaining, as stated in the last few issues, very unsettled. If anything, a slightly better demand has been manifest during the past week, but this will have to be much heavier before any relief can be given to the present condition. Stocks will also have to be much lower before any settled quotations are given. Present prices are 50 per cent. off Montreal list with most jobbers, but better quotations are obtainable for quantity, and a net price list is used by others. Montreal list is given on current market page.

Paints and Varnishes

Montreal.

Better progress continues to be made in ready mixed paints and varnishes, sales gradually increasing from week to week. One manufacturer stated to Hardware and Metal that the number of orders received is quite favorable, but they are smaller than last year. This, he stated, was more or less looked for, but showed that dealers were buying, if very cautiously. The weather permitting outside painting is required now to increase the consumption, necessitating dealers to buy, as it is quite apparent they are only ordering in sorting quantities. Prices on all lines are remaining steady.

Toronto

TORONTO, March 17.—There is little change in paint prices or in the allied products, and it is felt that prices have become steadier and have apparently reached the limit of decline for the present. There will possibly be fluctuations in prices, but material changes are not expected. Linseed oil is quoted at a slight reduction from last week, but turpentine is unchanged. The demand for both is not as heavy as it should be at this season. Shellac continues to be quoted at a lower level. A better demand for paint products is reported, and not only are travelers sending in better orders, but mail orders show an increase, which is a significant sign.

Prepared Paints Improving

Toronto.

An improvement is reported in paint and varnish sales, although the bulk of the orders are smaller than last spring, but under present conditions this is only natural. A larger number of orders by mail are stated to be coming along, and is a sign that retailers who have neglected to place their orders up to the present are beginning to feel the spring demand. No further changes in prices are recorded, and it is not expected that present quotations will vary much for awhile.

White Lead Prices Hold

Toronto.

Prices are holding steady at recent change on white lead in oil. Sales are stated to be slowly improving, though orders are smaller than is usual at this season of the year. Quotations will be found on current market pages.

No Change in Putty

Toronto.

No further changes have been made in putty prices, and little alteration is shown in the demand, which is light at present. Quotations are the following:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

No Further Glass Changes

Toronto.

No new developments are reported in window glass markets. A better feeling is evident among the wholesalers and they look for a larger demand from now on as spring approaches. Many believe that the present low quotations will no be maintained, and look for an adjustment in prices. Quotations here are generally 60 and 10 per cent off old list, although net prices are quoted by some dealers.

Sprayers and Insecticides

Toronto.

The new prices for Paris green were given in last week's issue of Hardware and Metal, and will be found in this issue in the current market quotation pages. The prices for arsenate of lead, arsenate in paste, lime sulphur, dry and other insect destroyers for spraying plants and bushes and trees are now out and are as follows:

Arsenate of Lead, Dry—½-lb. cartons, 100 lbs. to case, per lb., 46c; 1-lb., 44c; 5-lb. drums, 41c; 25-drums, 36c; 50-lb. drums, 34c; 100-lb. drums, 32c.

Arsenate of Lead, Paste.—1-lb. jars, 50 to case, per lb., 26c; 5-lb. jars, 10 to case, 23c; 25-lb. drums, 20c; 50-lb. drums, 18½c; 100-lb. kegs, 18c; 600-lb. barrels, 17c.

Lime Sulphur, Dry.—1-lb,. tins, 24 to case, per lb., 26c; 5-lb. tins, 10 to case, 22c; 25-lb. drums, 16c; 100-lb. drums, 14c; 250-lb. drums, 13c.

Kalickill, Drry.—Arsenate of Lime, Calcium.—½-lb. cartons, per lb., 39c; 1-lb. cartons, 37c; 5-lb. drums, 35c; 25-lb. drums, 32c; 50-lb. drums, 30c; 100-lb. drums, 28c.

Turpentine is Unchanged

Toronto.

No changes have been made here this week in turpentine prices. The Southern markets continue firm, although the market quotations there are down a trifle, but there is reported to be little offering. Producers claim that it has been selling at a loss, and are not anxious to sell. It is stated that the demand in local markets has been a little heavier and though the future trend is uncertain an upturn would not be surprising. The following, which are last week's quotations, are still in effect:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 00
2 to 4 barrel lots	0 97
5 gal. lots	1 05

Linseed Oil, Small Decline

Toronto.

A small decline of 3 cents per gallon is noted in linseed quotations. The demand is very light, although there should be more movement in this product at the present time. Consumers appear to be waiting until the last moment, although the crushers believe that the present prices are good buying. The flax seed market is a little easier and fluctuations are, it is said, to be expected. The present quotations on oil are the following:

	Raw	Boiled
1 to 2 barrels, per gal.	0 92	0 95
3 to 5 barrels, per gal.	0 91	0 94
6 to 9 barrels, per gal.	0 89	0 92

Less barrels, add 15 cts gal.

INTERESTING STUDY OF THE HARDWARE MARKETS

Continued from page 221

$9.50 and £52 7s. 6d. respectively, of last year. One has to go back to 1915 in the United States and 1913 in England to find prices corresponding to the recent low levels. On this metal also production is being curtailed and many mines are closed down.

Prices are back at 1913 levels in spelter. Recent quotations in New York were $5.10. A year ago they were $9. The high level was reached in this during 1915, when prices were over five times those of to-day. Owing to the low exchange rate and other causes Germany has been able to produce this at a cheaper rate than any other country, but the price has stiffened since the allied advance into the Rhine region.

The indications seem to be, then, that the declines have been halted on these metals, and though there may be further reductions in the manufactured product, many lines, especially those of lead, have already been lowered considerably.

Further Declines

In iron and steel products many believe that there will be further declines. It is pointed out that in many of these lines there has been little if any recession in prices, and though iron and steel in the primary markets has been steadily declining in price, lower costs seem still probable. High freight rates, exchange and labor costs are advanced in some quarters as reasons for the upkeeping of prices. It may be some time before the first two change much, but in many industries wages have been reduced and where they have not already been reduced revisions are being considered.

No one can predict future business conditions, and though hardware commodities may possibly show declines in many directions it would be idle to expect the declines that have been made in textiles or foodstuffs, for the reason that hardware prices did not advance in price to the same extent as these commodities.

Not Lack of Funds

It has been said that it is not for the lack of money that the people are not buying, as savings bank deposits have not been depleted. In fact in many cases they have been increased. It is because the public is not as yet satisfied with the stability of prices. There is, however, an immense potential demand that is bound to break through soon for all manufactured goods. Stocks on hand have been greatly reduced and in many cases to a point where replenishment is absolutely necessary.

With a fall in prices the trend of business usually seems downward, a point sometimes lost sight of is that with lower prices less business appears to be done, just as when prices were advancing the same amount of sales gave a larger turnover.

Another point is that recessions in prices enable the country to do more business with less money than was required a year ago. Continuance of war prices for merchandise in peace time is impracticable, and the law of supply and demand is being vindicated.

Letters to the Editor

Communications expressing the opinions of subscribers concerning matters of interest to the trade.

USE OF ADVERTISING MATTER

Editor, Hardware and Metal.

There is considerable waste in illustrated circulars by some hardware dealers who do not use them to advantage. A visit was made to several stores to see the amount of circulation matter displayed in different parts of the city. A count of each pile was made and a week after a return visit was given these stores by a reliable advertising agency. Some had given out three, others seven, some ten, and with other kinds of circulars the count remained the same. Every manufacturer and dealer knows that any kind of printing is high in price at the present time and it is all done with the purpose of assisting the dealer. A wholesale house had a small parcel returned the other day and on opening, the parcel was found to be half filled with expensive color cards, vacuum sweeper booklets and other advertising that was furnished the dealer to help his trade as well as that of the manufacturer. The writer has noticed after visiting several stores that packages of illustrated matter were never opened or used in the proper season to get results. It is then wasted or thrown out. Every dealer should take this to heart and see that all advertising matter is properly distributed in the right season. Some expensive circulars are even used to wrap putty in.

The progressive retail hardwareman utilizes all advertising to fullest advantage by sending it out in envelopes or parcels. Perhaps some of our readers can furnish an improved method for distribution of illustrated helps to dealers.

SALESMAN.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

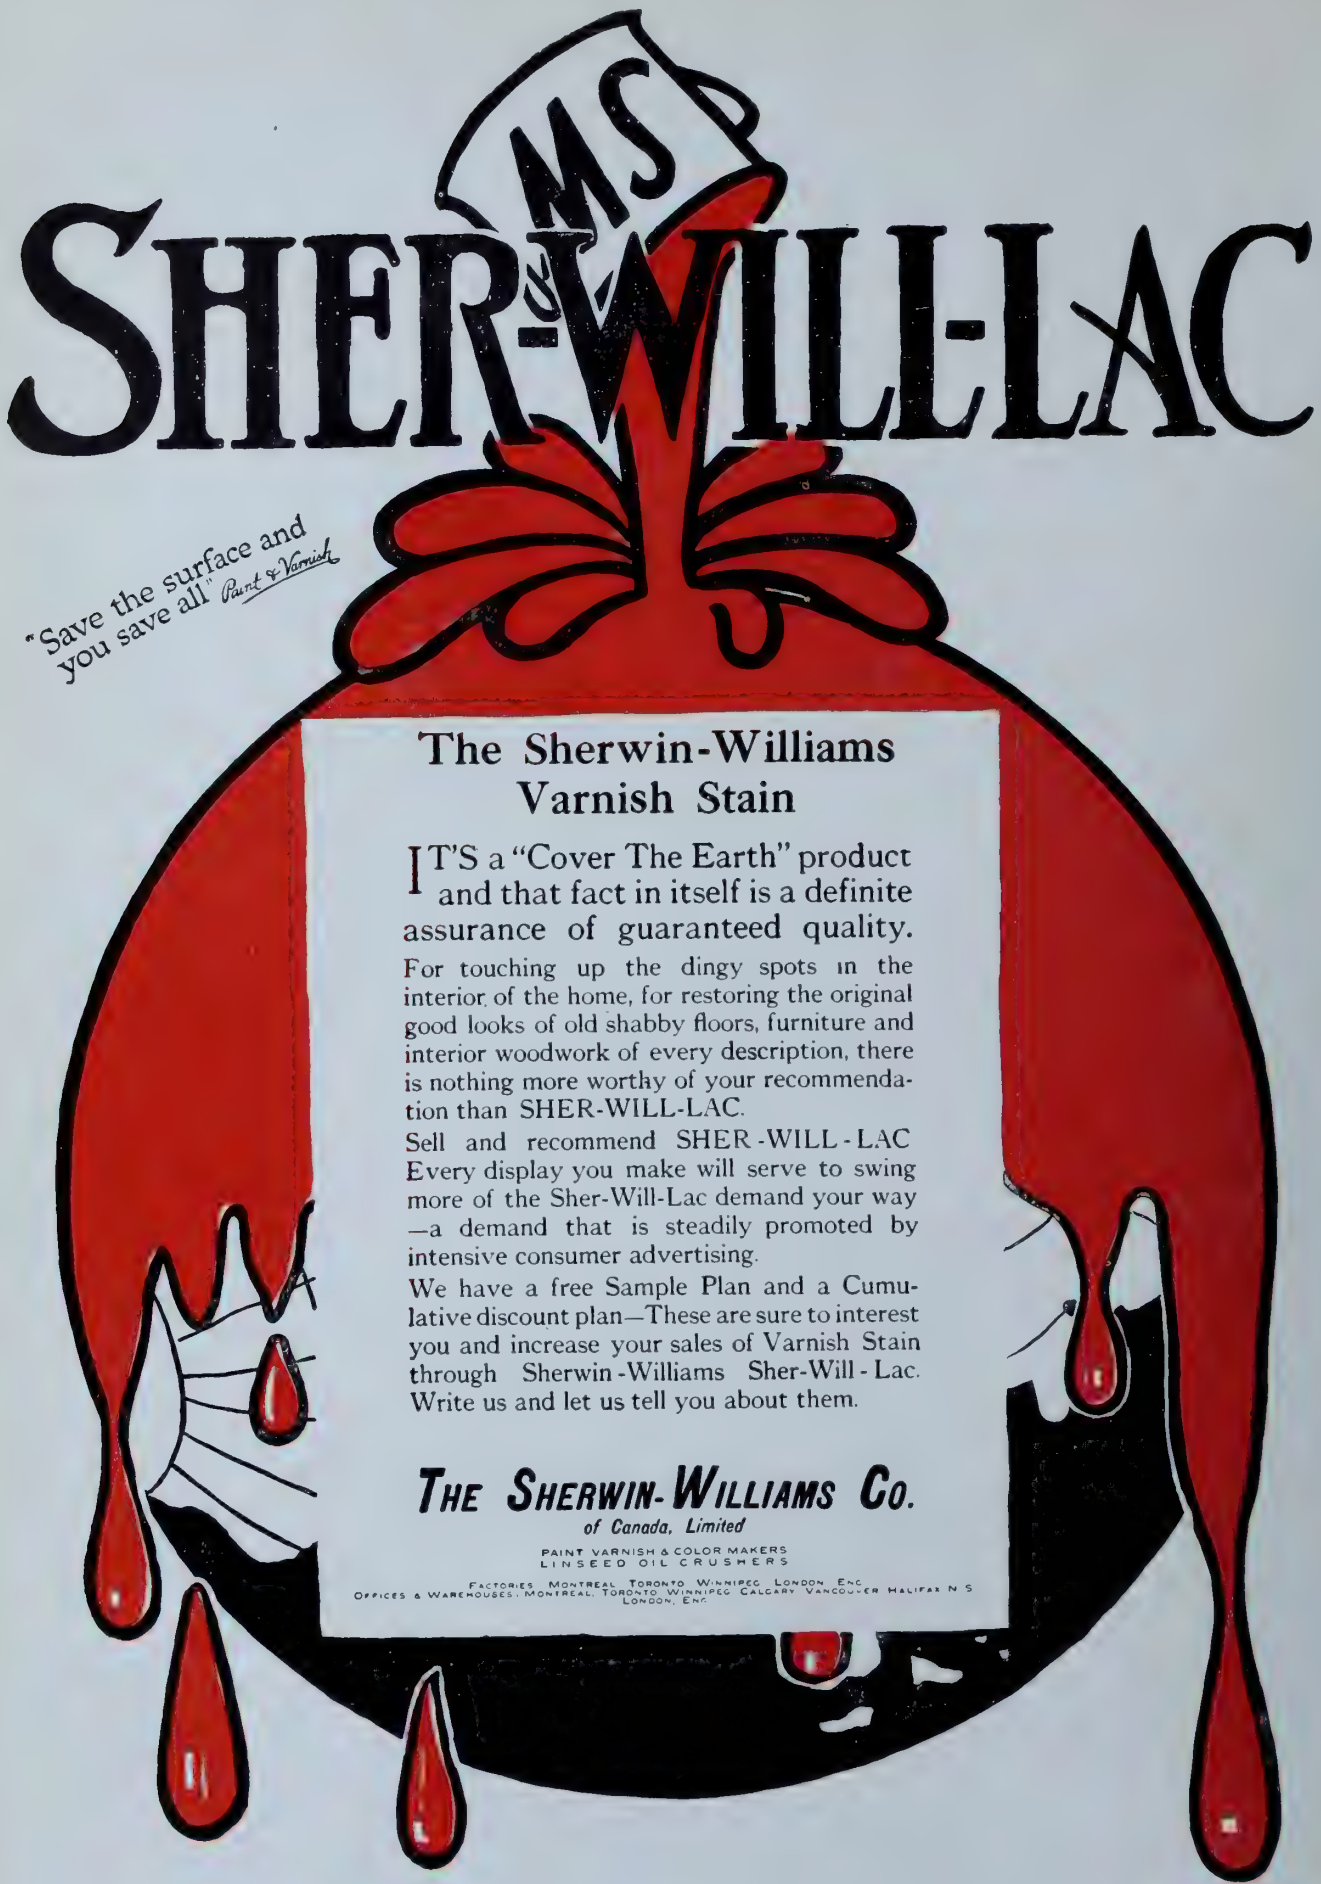
ARE YOU READY for SPRING TRADE?

"Save the surface and you save all" *Paint & Varnish*

Stock Up now with "Jamieson's Products" and be prepared to meet the demands of your district for the Spring house-cleaning season.

Jamieson's Products are in constant demand by consumers that are only satisfied with the best, and insure repeat orders, as they possess the desired satisfaction for both Dealer and Consumer.

Jamieson's "Painters' Peerless White" is far superior to any White Lead, as it is more durable, whiter, finer, covers better and is more economical. On outside work it will not crack or chalk off and on inside work it will not turn yellow.



The Quality of "Jamieson's Products" is guaranteed by over sixty years' standing.

SHER-WILL-LAC
"Save the surface and you save all" Paint & Varnish
The Sherwin-Williams Varnish Stain
IT'S a "Cover The Earth" product and that fact in itself is a definite assurance of guaranteed quality.
For touching up the dingy spots in the interior of the home, for restoring the original good looks of old shabby floors, furniture and interior woodwork of every description, there is nothing more worthy of your recommendation than SHER-WILL-LAC.
Sell and recommend SHER-WILL-LAC Every display you make will serve to swing more of the Sher-Will-Lac demand your way —a demand that is steadily promoted by intensive consumer advertising.
We have a free Sample Plan and a Cumulative discount plan—These are sure to interest you and increase your sales of Varnish Stain through Sherwin-Williams Sher-Will-Lac. Write us and let us tell you about them.

The Sherwin-Williams Standard of Value for Exterior Painting

COST PER GALLON is a false basis from which to measure paint values Far more important to the dealer is the **quality** of the paint he sells, whether it will satisfy the customer on the three all important points by which every paint should be judged—covering capacity, weather resistance and durability

Judge **S.W.P.** on that basis and it is the biggest paint value you can offer your trade **It covers one-third more area** than ordinary paints, **it lasts twice as long,** and therefore represents a real money saving in actual price as well as in labor cost for painting and repainting

Everybody knows S W P It's a "Cover The Earth" product and the Cover The Earth label is everywhere regarded as a guarantee for goodness

Turn this popularity to good account by identifying your paint department with S.W P and the other Sherwin-Williams Products Write to-day for particulars of agency offer and see the money making possibilities it offers you.

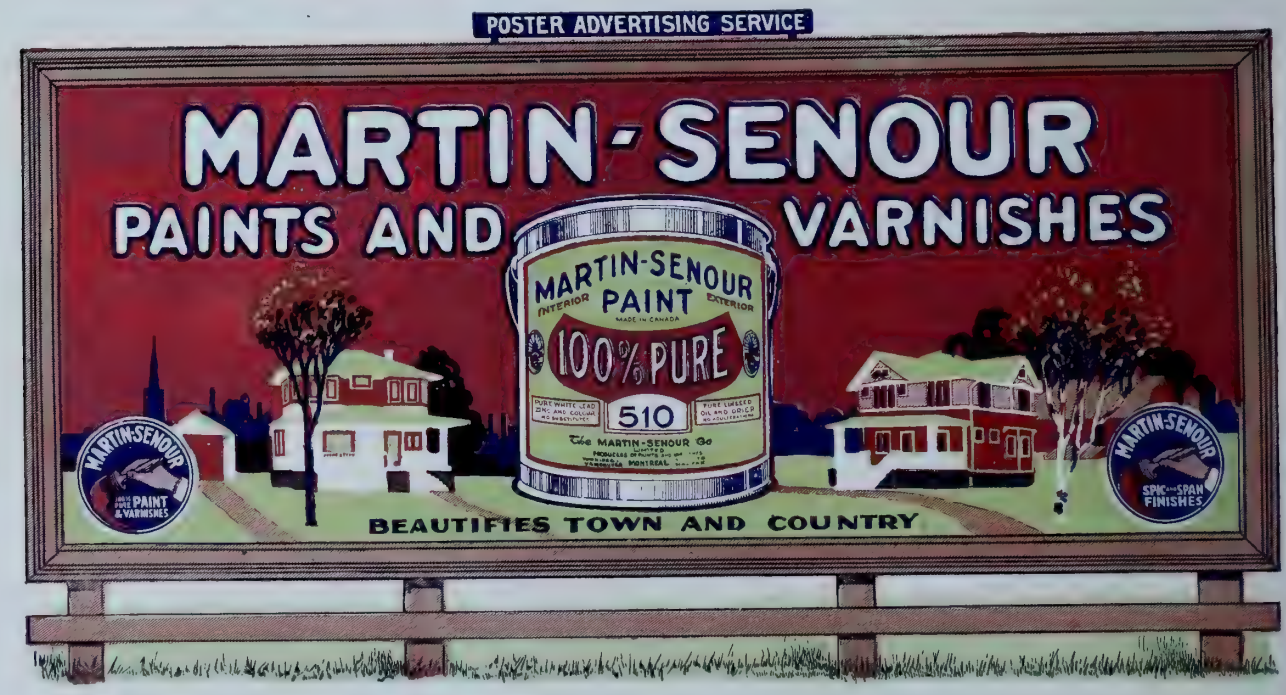
MARTIN

100% PURE



For Every

The completeness of the Martin-Senour line is a factor worth considering in the matter of bigger paint and varnish sales.

For no matter what painting job your customer has in mind you can fill his order with a Martin-Senour product ideally suited to the need.

And suited to it **exactly** because made for that particular purpose and made up to the M.-S. standard which your customers know to be the utmost attainable in Paint and Varnish manufacture.

One of the many Sales Pullers back of the M-S Dealer Agent —A Three-Color Martin-Senour Poster

SENOUR

PAINT & VARNISHES

Requirement of Your Trade

But aside altogether from the completeness of the Martin-Senour line and its quality there is the added force of convincing **Consumer Publicity.**

We have every confidence in the sales-creating value of this year's Publicity Campaign. Among the mediums employed to carry the Martin-Senour message to the Paint Buyers of Canada will be newspapers and magazines, poster showings, painted bulletins, mailing campaigns direct to consumer, window trims, show cards, outdoor signs, etc.

If you are not already a Martin-Senour man and if you have any reason at all to believe that your paint department is not producing at full pressure, write us now for full details of the M.-S. Agency Proposition.

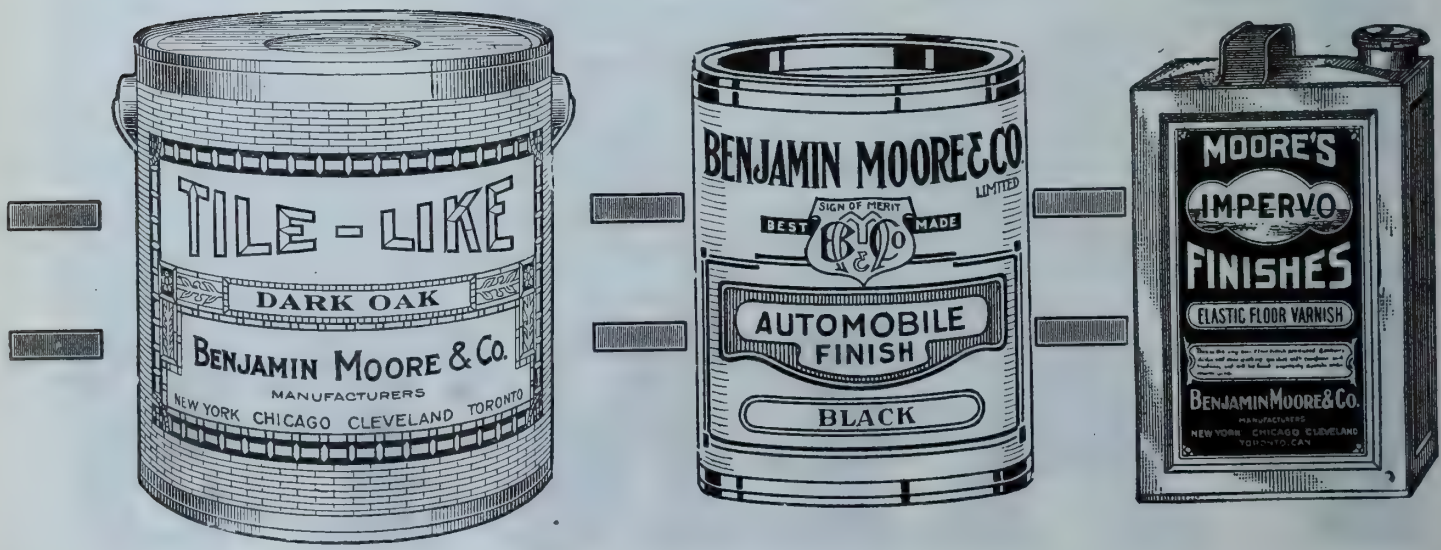
"Save the surface and you save all" Paint & Varnish

A Moore Agency

Attention! The Moore Sales



THE old reliable squad of Moore's sales-makers consists of high quality Paints and Varnishes for interior or exterior use; paints for wagons, barns, and automobiles; enamel for carriages, in fact everything in paints and varnishes for town or country.

Moore's Paints and Varnishes are fully guaranteed. Guaranteed that the quality is uniform, that the last brushful will give the same service as the first. A Guarantee that we back up with absolute satisfaction.

Dealers controlling a Moore Agency find Moore's Products easy to sell, customers are delighted with the way in which Moore's paints save-the-surface.

A Moore Agency is a paying game, and the coming season of spring house-cleaning will make the cash register ring for the hardware dealer whose counters and windows show displays of Moore's Paints and Varnishes.

Housewives will need "Muresco," "Impervo Varnishes," "Morelustre Enamel," "Floor Paint," and the many other Moore renovators and household beautifiers.

Means Bigger Profits

"Save the surface and you save all" *Paint & Varnish*

Squad is Always at Your Service

The farmer will need "Barn Paint," "Wagon and Implement Paint" to give his barns and wagons a new lease of life. There is an unlimited number of prospects for Moore's Products in your town, whose business you should have. Send to-day for color cards and full information of the famous Moore squad of sales-makers—they can be of service to you.

Moore's Products include : "Impervo" Porch and Deck. "Tile-Like," Mooramel, Auto Finish, "Muresco," "Impervo" Varnishes, Morelustre Enamel, Barn Paint, Moore's Floor Paint, Sani-Flat, High Gloss Enamel, Carriage Enamel, Wagon and Implement Paint, Shingle Stain.

Paints, Varnishes and Muresco

Toronto **Winnipeg**

ALABASTINE sells freely this spring because it is economical. **People appreciate the big saving**—to do a room costs about one-third as much as papering and one-fifth as much as painting. One coat is usually sufficient to give a rich, beautiful tint. It is easily applied, spreads evenly, does not dry too quickly and leaves no brush marks.

Make use of these selling points. Send for this big new window trim.

Put your sales effort on a line that returns big profits and moves quickly right now.

There's Profit and Prestige in Handling the Complete Johnson Line

You're in business to make money. Johnson's Artistic Wood Finishes net you a substantial profit on every sale. But in addition Johnson Products are business builders—they make satisfied customers—repeat buyers—the kind that means a steady, continuous, profitable business to you. The greater variety of the Johnson line, too, insures more sales.

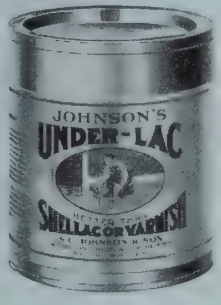
Everything bearing the Johnson label is of known, proved quality — not an experimental product of doubtful uniformity — but dependable and trustworthy. Selling the complete Johnson line gains prestige for you—for a store's customers judge it by the products it sells.

Advertising

The complete Johnson line will be extensively advertised throughout Canada. The leading magazines will carry the interesting Johnson story right into the homes of the people who are your logical customers. By displaying all the lines in your store and windows you will be the final link in completing the sale.

Sales Helps

And in addition to the advertising there will be attractive sales helps — counter cards, window cards, booklets, folders, envelope stuffers, and many other features that will aid you in building up an interesting and profitable business in Johnson products. When you send in your order specify just what sales helps you need.



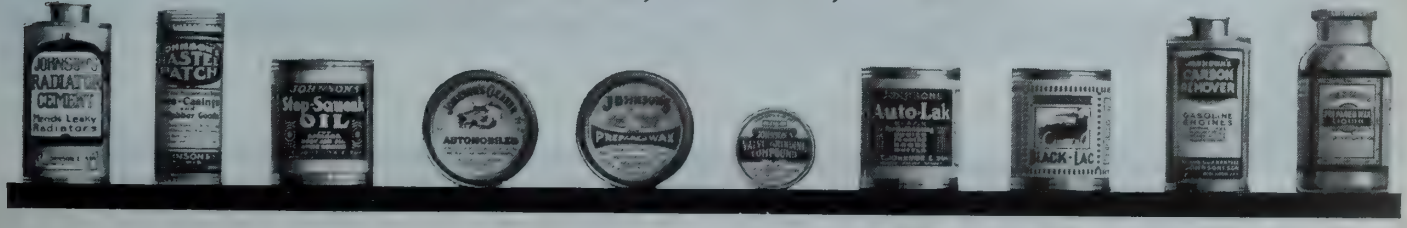
Johnson's Is a Quality Line

Johnson's Artistic Wood Finishes include everything necessary to transform unpolished wood into the most beautiful finished surfaces. Paste wood filler—wood dyes in all popular shades—prepared wax for floors and furniture—flat varnish—under-lac, a thin, elastic preparation combining all the good qualities of shellacs and varnish — Perfectone enamel—Perfectone under-coat—crack filler for floors and woodwork—Kleen Floor, a solution that removes spots, discolorations, etc., without harming the wood—Electric Solvo, a paint and varnish remover.

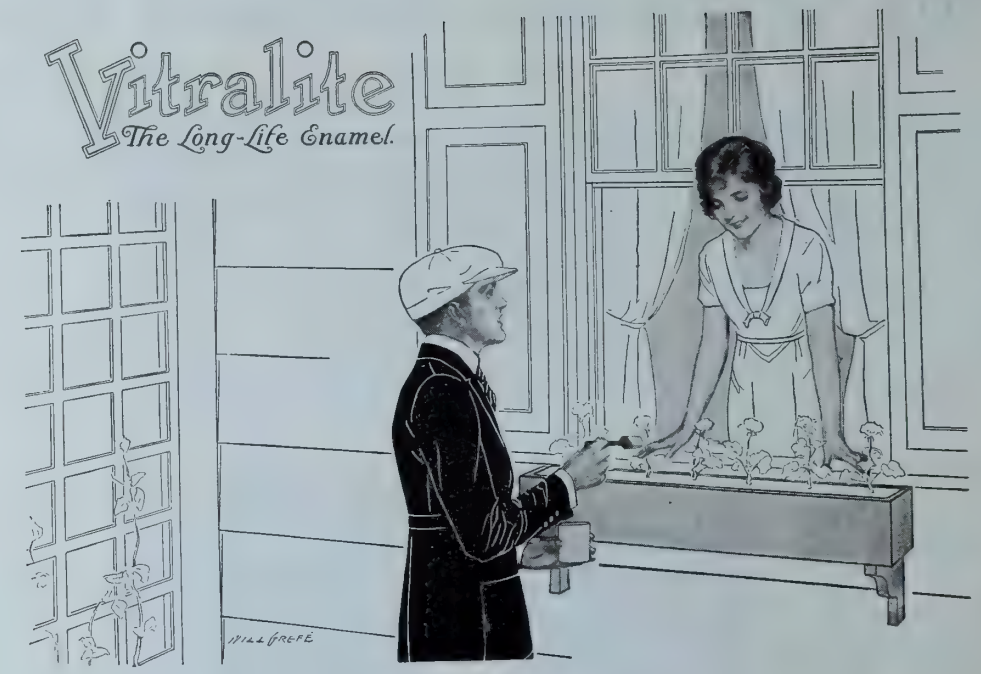
Every household needs Johnson's products continuously to keep it in spick and span condition. The housewife and the handy man, as well as carpenters, painters, etc., are prospective customers for the Johnson dealer.

Johnson's Prepared Wax in paste and liquid form supply thousands and thousands of households with the cleaner and polish that keeps them fresh, and new-like. Wherever there is furniture, wherever there is woodwork and floors—there Johnson Wax is needed.

Johnson's Car Savers—A Profit-Pulling Auto Accessory Line



When you stock the Johnson line of Artistic Wood Finishes don't fail to include Johnson Car Savers—they are profit builders. You can handle them right in connection with the regular Johnson line without devoting much space to their display or tying up much of your capital.



Johnson's Carbon Remover has proven itself a ready seller wherever it is displayed. It is a clean, highly efficient method of removing carbon. You can sell it easily.

Johnson's Black-Lac—the perfect top dressing, **Johnson's Stop-Squeak Oil** — reduces the liability of Spring breakage, **Johnson's Radiator Cement**—the liquid radiator mender and **Johnson's Prepared Liquid Wax** for body polishing—all are ready sellers. Send for full particulars about our attractive dealer proposition.

S. C. JOHNSON & SON, LTD.

BRANTFORD, ONTARIO, CANADA

Tommy and Betsy are in Your Town

You know this always interesting couple — originated by Pratt & Lambert and made familiar to the whole country by national advertising. But do you realize that they really live in your own community? — that every household where their message is read, becomes a Tommy and Betsy household so far as the purchase of Vitralite Tints is concerned?

And the number of these families in your town would surprise you. Step into any better-class home and you will find at least *one* of these magazines: Atlantic Monthly, Century, Country Life in America, Harper's, House Beautiful, Review of Reviews, Scribner's or World's Work. Tommy and Betsy are in them all — creating better-class trade for you in a season when better-class business is particularly welcome.

The introductory proposition on Vitralite Tints is worth knowing about. Tell us to send the details.

FLINT STAINS

If interested tear out this page and place with letters to be answered.

O.P.W.

The Paint Dealer means as much to the morale of a town as the Minister

Paint ain't all he carries. On his shelves there's cheerfulness, pride and sunshine—darned good things for a man or a town.

The Paint Dealer don't press your pants or shine your shoes, but, in a roundabout way he influences those things. A well-groomed home and a well-groomed man are usually connected, and the well-groomed woman ain't so far away. And, most often, they live in a well-groomed town where the Paint "Minister's" on the job with his text "Paint Up and Clean Up."

All of which brings us back to the Ottawa folk with the paints and varnishes that put weight and substance into your paint sermons. O.P.W. lines sell well and stay sold, and O.P.W. dealers stay with the goods. The Ottawa folk keep the friends they make, and it ain't only the goods—it's the selling co-operation, good feeling, and right prices.

Invite us along and talk it over.

Says Ottawa Pete:

Livingston

THE KIND YOUR GR

FOR 57 YEARS THE STANDARD

In the old days the name "Baden" signified everything good that could be said of linseed oil. It was the merchants' and the customers' guarantee that the oil was the best that could be produced.

Even to-day the name "Baden" is still the "buy word" for the older generation, but it is generally being replaced by the name of the originator.

This is the result of the expansion of the Livingston organi-

THE "BLUE BARRELS"—THE OUTWARD

The Dominion Linseed

BADEN TORONTO

If interested tear out this page and place with letters to be answered.

Brand Oil

ANDFATHER USED

RECOGNIZED LINSEED OIL

zation, covering, as it now does, the entire Dominion of Canada.

The name "Livingston" on a barrel of oil means that the contents represent the result of over half a century's experience in the manufacture of linseed oil. It means that it is the standard of quality through and through, and that it is absolutely guaranteed by the makers.

Your jobber can supply Livingston brand.

RUBBERSET

TRADE MARK

PAINT AND VARNISH BRUSHES

Thoroughbreds!

If you sell a man a paint or varnish brush that disappoints him—if the bristles come out and mar his work, if the brush disintegrates through the action of turpentine, varnish or oils—he blames **you,** Mr. Dealer, as well as the brush itself.

So it's best to be SURE.

The Bristles can't come out of Genuine Rubberset Brushes. They are embedded in vulcanized rubber—thus becoming part of the brush itself. They are thoroughbreds!

This Rubberset grip is impervious to heat or cold, to time, or the chemical action of any compound in which a brush can be used.

So when a customer asks for a brush—give him a RUBBERSET. When you hand it to him say: "Every bristle of this brush is gripped EVERLASTINGLY in hard rubber."

You can tell him that with the utmost confidence because back of every Rubberset Brush is this iron-clad guarantee—

"RUBBERSET MUST MAKE GOOD—OR WE WILL"

HILLCREST
A GUARANTEE OF QUALITY

Hillcrest Barn Red Paint

This is a dependable paint to sell your customers that have farm buildings and silos, fences, roofs, or bridges to cover. We manufacture "Hillcrest" Barn Red Paint from pure English Oxide of Iron; it will stand any climate, under all weather conditions. Five gallons will cover 1,500 square feet on wood, or 2,000 square feet on iron, with two coats. It dries with a hard, permanent finish.

We make this reliable barn paint, and our experience after forty years in business is that it is very good barn paint to tie to. We have learned that it serves the consumer with far more than satisfaction, and it has been our pleasure for many years to put reliable merchants on the road to success with this and other business-building products in the "Hillcrest" line. Ask the "Hillcrest" salesmen how it will pay to stock this line.

We Also Manufacture :

Hillcrest Colors in Oil; Hillcrest Colors in Distemper; Hillcrest Colors in Japan; Hillcrest Porcelain White Enamel; Hillcrest Ebony Black; Spanish Enamel; Hillcrest Bath Enamel; Hillcrest Motor Car Enamel; Hillcrest Paste Filler; Hillcrest Crack Filler; Pearcy's Pure Prepared Paints; Hillcrest Barn Red Paint; Hillcrest Outside Gloss White; Hillcrest Inside Flat White; Hillcrest Aluminum Paint; Hillcrest Carriage Paint; Hillcrest California Gold Paint; Hillcrest Graphite Machine Paint Liquid; Hillcrest Orange Shellac; Hillcrest White Shellac; Hillcrest Oil Stain; Hillcrest Varnish Stain; Hillcrest Shingle Stain; Cottage Shingle Stain; Hillcrest Varnishes—all kinds; Hillcrest Pure Lead; Hillcrest Bronzing Liquid.

CURTIS
AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—**Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.**
2—Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.
3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.
4—Fan flywheel cools cylinder; increases capacity.
5—Inspectable valves, light weight, large area.
6—Valves cannot drop into cylinder and wreck machine.
7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.
9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

SAND'S

Announcement

To the Trade:-

Our Canadian friends will be pleased to know that their loyal support and patronage during the past two years has made it possible, and necessary, for us to open a factory in Canada in order to take care of our large, and rapidly growing, Canadian trade.

On March 15th, 1921, we will set the wheels of our Canadian factory in motion, and Sand's famous Levels will then become a Canadian product bearing the brand, "Made in Canada."

Our Canadian business will be known as Sands Level Company, with factory located at Walkerville, Ontario, and Sales Department located in Toronto.

The Sales Department will be conducted by Campbell Agencies, 33 Richmond Street West, Toronto, and our customers can rest assured of continued prompt attention and courteous treatment from that organization.

Spring orders already in hand will consume the production of our new factory until May 1st, 1921, after which date we will be in a position to fill rush orders promptly, and in future our sole aim will be to furnish such service as will be entirely satisfactory to our host of Canadian customers.

We solicit for the Canadian factory a continuation of the magnificent support given the mother company, feeling that, with all exchange difficulties removed, business will be greatly facilitated.

Respectfully yours,

Sands Level Company

Sand's Levels have noteworthy features that have naturally been developed in twenty-five years of leadership in level making.

Remember, in buying your level, that J. Sand & Sons, established in 1895, were the originators of Aluminum levels. Sands originated the Walnut level. Sands originated plate glass lenses to protect spirit glasses—to make them dustproof, dirtproof and waterproof. Sands originated the solid-set spirit glasses that require no adjustment. Sands originated wire, friction grip locaters at each end of the bubble.

Twenty-five years of experience insures their absolute accuracy.

The Nor'-West Farmer

The Pioneer Farm Journal of Western Canada

Vol. 40. No. 4 **February 21, 1921** **64 Pages**

Demanding to be Shown

Proof—actual fact backing up claims of economy, quality, and value—is being demanded by farmer buyers for every dollar they spend. Necessity has restored the time-honored method of making sales by submitting evidence.

The firms listed here have been backing up their dealers' efforts by effectively presenting their sales facts to the best farmers of Western Canada through the pages of "The Nor'-West Farmer." Advertised goods are now leading the market because they have won the confidence of the farm trade.

This spring sales of cream separators, fence, paint, and engines will not be as great as they have sometimes been, but the dealer who handles the lines listed here can guarantee a good volume of business by coupling his own efforts with the dealer helps supplied him and the advertising appearing in "The Nor'-West Farmer."

It pays to keep tab on advertising in The Nor'-West Farmer--$1.00 per year

TAPATCO
REGISTERED TRADE MARK
BRAND
COLLAR PADS

A Market Established For You

THERE is no doubt about sales and profits when you stock and display a good, sound article for which a continuous and well-defined need exists.

Tapatco Brand Collar Pads were made to supply an already existing market. Every horse owner is your prospect. He is interested for more than humane reasons alone; these efficient, reliable Collar Pads are his cheapest form of insurance against definite loss of money. A horse disabled, even for a day, by chafed, galled or bruised shoulders may cause business losses out of all proportion to the cost of prevention by Tapatco Collar Pads.

Our New Line — The SANI-CAN

DEALERS having long recognized the merits of Perfection Oil Heaters, New Perfection Oil Cookstoves, Ovens and Cabinets, and New Perfection Water Heaters, will be glad to know that we have added the Sani-Can to the Perfection line.

The Sani-Can is a sanitary receptacle for garbage, refuse and rubbish; odor, germ and fly-proof. Heavy coated white enamel finish. A welcome addition to any kitchen. Nothing else like it—nothing else so good.

Convenient, too. Touch the toe-pedal with the foot and the lid is lifted. No bending or stooping required to place material in the can. When the foot is removed the cover drops back and showers a special deodorant on the contents of the can.

The Sani-Can is a fast seller everywhere at all seasons. One or more Sani-Cans are needed in each office, mill and store, as well as in every home. Our salesman will gladly demonstrate the Sani-Can and give you full particulars.

The entire Perfection Line of long-lasting, reliable, economy-makers provides good profits for dealers. Our dealer proposition is interesting. Ask for it.

Windows which sell garden tools

These displays are yours —for the asking

GOODYEAR

MADE IN CANADA

If interested tear out this page and place with letters to be answered.

Long Wear and Efficient Service Prove Goodyear Hose Economy

Dealers have found that Goodyear Wingfoot Cord Hose can be relied upon. This quality has made it particularly satisfactory to sell.

Goodyear 5/8-inch Wingfoot Cord Hose more than answers garden hose requirements. It gives a heavier flow of water than ordinary 1/2-inch hose at very little increased cost.

Contractors use it extensively because they can effect great savings in cost by using it for industrial purposes.

These things have given decided advantages in handling Goodyear Wingfoot Cord Hose.

We co-operate with our dealers in selling our products. Valuable help in window displays, beautifully colored showcards and posters, leaflets on garden tools are available to Goodyear dealers.

Phone, wire or write the Head Office. Our representative will call on you without obligation.

A Live Quartette for You

Made in Canada

The Mayall Motor Heater

This heater heats the right spot—the motor; prevents the radiator and water jacket from freezing by maintaining a continuous circulation. It ensures easy starting. The "Myall" Motor Heater applies the principle of the electric toaster to the heating of a car; is as easily turned on as attaching any electric appliance to a socket. Made to fit the water connection of any make of car—easily applied.

Showing construction (Note 3rd Spring) and method of attaching.

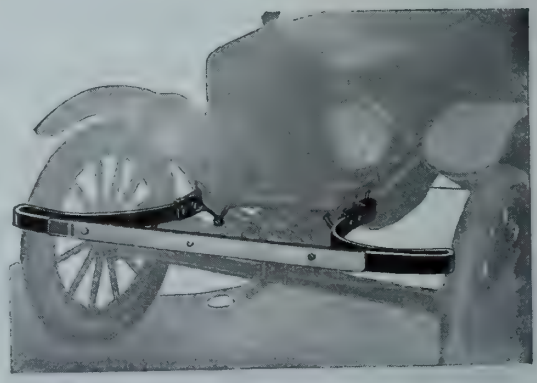
Float-a-Ford Shock Absorber. Solid comfort. This reliable appliance finds a ready sale in the accessory department. The third spring is the important feature; it absorbs the rebound—the cause of nearly all spring breakage and vibration damage to your car. The whole shock absorber acts independently of the regular spring, relieves it, and the third spring takes the upward jump of the car body.

This is an effective, reliable shock absorber; one that you can sell and make money on. If you are not handling it now—investigate.

M. S. L. Air-Tight Plunger

Made to fit all styles of pumps, replacing the old style leather plunger and giving 30% more power to any pump.

There are thousands of old disused pumps being reclaimed every year by the use of the M. S. L. Air-Tight Plunger.



This Display Assortment will make daily sales for you.

"Mayall" Flat Spring Bumpers

Made entirely in Canada from the finest grade spring steel; designed by experts to overcome weak features encountered in other bumpers. Exceptionally handsome and strong; brackets designed for easy attachment to all cars without drilling, disfigurement, or interference with shock absorbers.

Finished in baked, black enamel with nickel-plated reinforcing bar—(Nickel-plated on copper base).

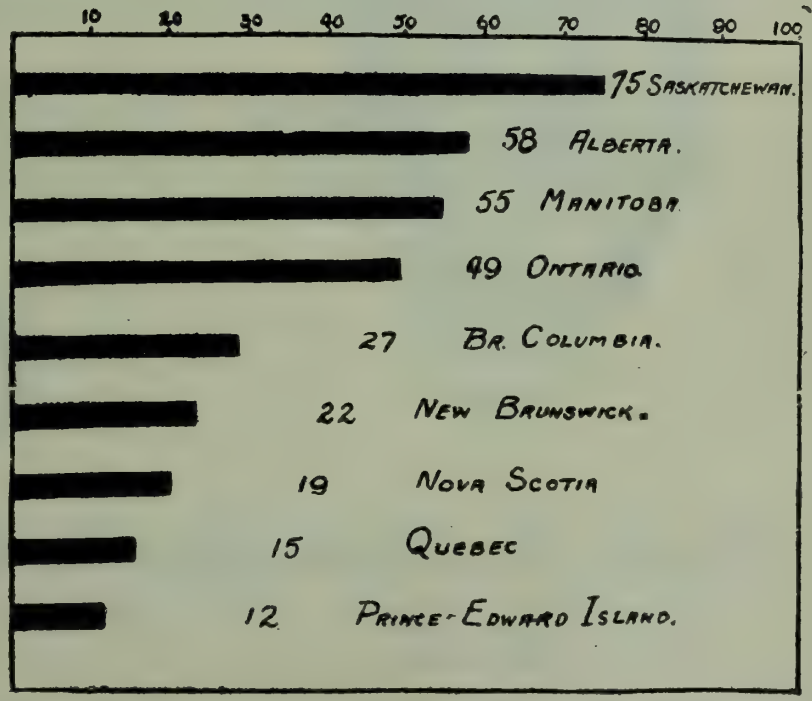
Expect Active Season For Auto Accessories

Approximately 400,000 Cars in Operation in Canada Call for Tire Replacements of 1,200,000 This Year, Also Large Volume of Other Accessories—Figures Show Canada's Automobile Industry Has Assured Future

THE selling of automobile accessories through the hardware trade in Canada is no longer an experiment, it is a history of successful achievement and today many of the finest displays and biggest turnovers in auto accessories are found in hardware stores. Neither are these located only in any one section of the country, but they are distributed in good proportion throughout all the provinces.



Canada stands as one of the foremost countries in the world from the standpoint of percentage of cars to population. Its requirements in automobiles and accessories are large and steadily increasing. This has become an established industry in Canada, employing large numbers of people in manufacture and distribution, and while there has recently been a lull in this industry, due to prevailing conditions, it is the consensus of opinion that this lull has been only temporary and already there are said to be signs of renewed activity. Recent reports tell of the re-opening of a number of automobile plants which were closed due to the falling off in demand during the quiet months of the winter.

Removal of Luxury Tax on Cars

The recent removal of luxury taxes on automobiles in Canada did much to relieve the strain of prohibitive costs on automobiles. A gradual return to normal conditions, coupled with the expectation of an early spring and summer and the indications of considerable tourist travel to this country from across the border during the warm months, are all factors in predicting a busy season in the sale of accessories.

Some indication of the extent to which automobiles are owned and operated by Canadians is found in the table which shows the registrations per thousand of population in the various Canadian provinces to be as follows: Saskatchewan 75, Alberta 58, Manitoba 55, Ontario 49, British Columbia 27, New Brunswick 22, Nova Scotia 19, Quebec 15, Prince Edward Island 12.

Statistics show that there are approximately 400,000 cars registered in Canada. This number of cars calls for the use of a large volume of accessories. In the case of most accessories it is difficult to estimate the requirements, but taking tires as an example, figuring each car necessarily has four tires and counting an average of at least one spare tire to each car, there are then 2,000,000 tires in use in Canada. Assuming that each car needs three new tires, a conservative estimate for a year, there will be a replacment demand of 1,200,000 tires this year. Each merchant can apply this and other averages to the number of cars owned locally and thus arrive at a fair estimate of the requirements of his district.

The above black, thick lines show the comparative number of cars per 1,000 population in the various Canadian provinces. The figures above represent the number of motor vehicles registered per 1,000 population. Saskatchewan, the Prairie province, leads.

Motor Car Owners Are Telling the Story of

DUNLOP CORD TIRES

One man recently said :

"The Tires I brought to be re-treaded ran 23,000 miles"

The popular Tires are the easy tires to sell---are the kind that move quickly from your stock.

The quality is in them to protect the user.

The Broad Dunlop Selling Policy protects you.

Ask about our special Accessories proposition. It will make money for you.

Why Not Stock a Line of Garden Hose That Sells Readily?

You may be one of those fortunate dealers who have benefited in realizing this fact:

Dunlop Garden Hose is the easy line to sell.

If not, the coming season will afford you ample opportunity to demonstrate this for your own satisfaction.

Orders placed now will be given careful attention and shipment will conform as near to schedule as possible.

You will gain nothing by delaying to order. You cannot afford to be without Hose when the demand for it is greatest.

A little attention to Hose sales will net you a nice profit.

"GUTTA PERCHA" TIRES

What the Dealer Considers

In choosing Tires for his Spring and Summer Stock, the Dealer considers his own interests

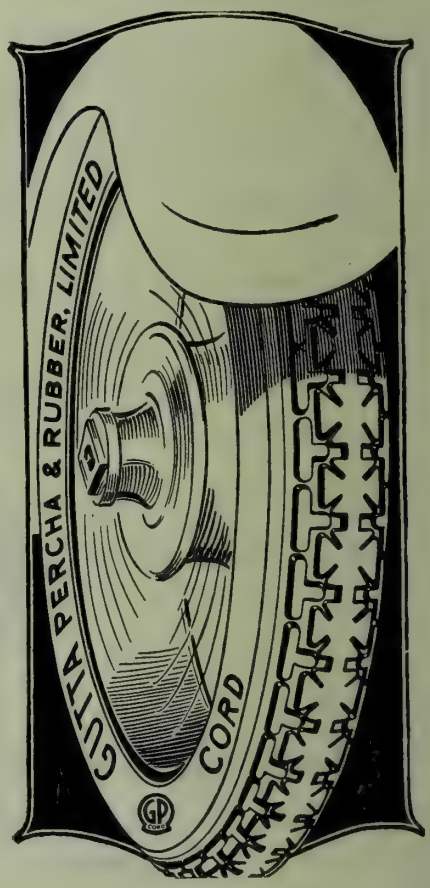
He Must Make a Profit.

Yes, but he must give genuine value to his customers. Cheap tires will never build up a good tire business.

He Must Keep Goods of Good Appearance.

Yes, for a good tire **looks** good, and is an ornamental line of stock to have on display.

He Must Satisfy His Customers.



Yes, and that is the most important point of all, for the "tires that give satisfaction" are the tires that will bring repeat orders and make your customers advise their friends to buy.

He Realizes the Value of Advertising.

Yes, the Hardware Man is keen and understands the value, aye, the necessity, not only of his own advertising in the local papers, but of the manufacturer's advertising in the national papers. "Gutta Percha" advertising is of a character to assist every dealer in selling "Gutta Percha" Tires.

He Must Be Able to Guarantee Quality.

Yes, and in "Gutta Percha" Tires the quality is paramount, and it can be proved by the splendid mileage records made by these tires. No dealer need ever hesitate on the standard guarantee of "Gutta Percha" Tires.

"GUTTA PERCHA" ACCESSORIES

—RELINERS—

For the motorist whose casings are wearing down. When blowouts threaten he will be glad to buy the "Gutta Percha" Reliner, because with it he can drive his tires to the last mile. They protect the weak spots and almost eliminate blowouts. They should not be used in new casings.

BLOWOUT PATCHES

"Gutta Percha" Blowout Patches have a very smooth lining and are feather edged at the ends to prevent chafing or pinching the tube. These are the most satisfactory and safest patches yet devised. Your customers will prefer them after the first trial.

Will They Beat A Pathway?

Some business experts say that the old maxim, "Make good things, and customers will beat a pathway to your door," does not hold good to-day.

Maybe it doesn't. But then consider these facts:

Ames Holden "Auto Shoes" are comparatively new. They haven't been extensively advertised. They have had to elbow a way through hosts of competitors.

However, when the first sales were made the result was like starting snowballs downhill—they gathered in new sales as they went. Men who find a good thing simply can't help talking about it.

Now clean advertising and wide distribution are lending impetus to the sales growth of Ames Holden "Auto Shoes"—adding force to the great influence of enthusiastic users, talking "Auto Shoe" performance wherever mileage is the topic.

And sales results to date show that "customers are beating a pathway" to the doors of our dealers—from one end of Canada to the other.

Apart from the matter of sales, our dealer policy considers you very largely. Let us tell you about it. Write.

AUTOMOTIVE EQUIPMENT

The 1921 edition of our catalogue is a veritable encyclopedia of what is latest and best in equipment and supplies for automobiles, trucks and tractors, as well as a special section devoted exclusively to accessories for Fords. Labor-saving devices for Repair Shops, Service Stations and Garages are also shown in this book. If you have not as yet received a copy, write for it together with Dealers Net Price List.

LEGALITE NON-GLARE LENSES

ENDORSED BY ONTARIO DEPT. OF HIGHWAYS

Legalite Lenses received an unusually high rating (permitting use of 24 C.P. Mazda "B," and 27 C.P. Gas Filled Lamp Bulbs) during the tests held last October, and a certificate to this effect was duly issued by Hon. F. Biggs, Minister of Highways for Ontario.

Legalite Lenses are scientifically designed, furnishing more light and throwing all of it where needed—ON THE GROUND—even when going up or down a hill.

With the Legalite Lens there is positively NO GLARE, and light beams are never more than 42 INCHES above the surface of the road, AS REQUIRED BY LAW.

The law against glaring headlights on motor vehicles will be rigidly enforced in Ontario during 1921. Dealers should order in their stock of Legalite Lenses now to take care of the demand.

Legalite Lenses are the best appearing, most satisfactory and provide the largest profit for the dealer. Write for particulars.

The Chart Steers You Right

The index chart in the Champion Spark Plug Merchandiser prevents the dealer selling the wrong type of plug. By referring to it the salesman knows instantly the correct size and type to recommend to a customer. The various makes of passenger cars, motor trucks, tractors, motor cycles, farm stationary and marine engines, are all listed in alphabetical order. He simply cannot go wrong in his selection.

And the chart is only one of the many advantages of this Merchandiser. It attracts attention, acts as a steady reminder to those who need spark plugs, guides the customer to real spark plug service and gives the dealer the benefit of the Champion reputation for dependability.

Free Offer to Dealers

We will send you one of the striking Merchandisers, free, with a shipment of any one of the three different assortments of Champion Spark Plugs. You can take this up with your jobber or write us direct for full details.

New Champion Prices to Users

The prices of all Champion Spark Plugs have been reduced as follows:—

Champion "X" (Ford) now	85c.
Champion Regular Plugs now	95c.
Champion Heavy Stone	$1.10

Billmont wrenches with the exclusive interchangeable socket feature whereby eight wrenches, twenty-four sizes in sockets and two extensions interchange to the extent of developing 768 combinations, are the sort of tools that are self sales-creators. Allow a customer to get his hands on a Billmont and the sale is made.

We have a plan — a distinct departure from present-day wrench merchandising—that will enable that hardware man chosen as our "service station" to get the socket and wrench business of his community —and at a real profit. This is a tried, proven plan and is backed by our complete co-operation.

You will be interested. No obligation attached to a request for details. Write us to-day.

No. 500—Mechanics' Kit. The equivalent of 768 wrenches.

DU PONT

THE STANDARD SHOTGUN POWDER

Get an *Extra* Turnover This Year on Your Stock of Shotgun Shells

THE cranks who ask for "special" loads are comparatively small in number. Nevertheless many dealers have tied up thousands of dollars in slow-moving stock through attempting to accede to their whims.

The Du Pont Company, with the hearty backing of the Loading Companies and the Jobbers, is taking strenuous action to remedy this situation.

We know what loads give the most satisfactory results for each kind of shooting. These are contained in the table shown below. These are all the loads that any shooter can possibly need in any section of the country.

We are recommending these standard loads to every shooter we can reach through the sportsmen's magazines or in person. This campaign which started last year has already had its effect. It will bring even greater results in the fall of 1921.

Get an extra turnover on shotgun shells this year. Put in a concentrated stock of Du Pont Standard Loads. Order from this table.

Most Shooters Use Du Pont Shotgun Powders
STOCK THEM IN THESE STANDARD LOADS

DU PONT

Standard Twelve Gauge Loads

	DUPONT SMOKELESS Drams	DUPONT BLACK Drams	OUNCES Shot
Large Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼
Small and Medium Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼
Grouse, Partridge, Prairie Chicken	3 or 3¼	3¼	1⅛
Pheasants	3	3¼	1⅛
Geese	3½	3½	1⅛
Wild Turkey	3½	3½	1⅛
Squirrel, Rabbits	3	3¼	1⅛
Doves, Pigeons	3 or 3¼	3¼	1⅛
Quail	3 or 3¼	3¼	1 or 1⅛
Snipe, Woodcock	2¾ or 3	3	1 or 1⅛
Shore Birds	2¾ or 3	3	1 or 1⅛
Sora Rail	2¾ or 3	3	1 or 1⅛
Trap Loads	3 or 3⅛		1⅛ or 1¼

Facts that Every Dealer Should Know about Du Pont

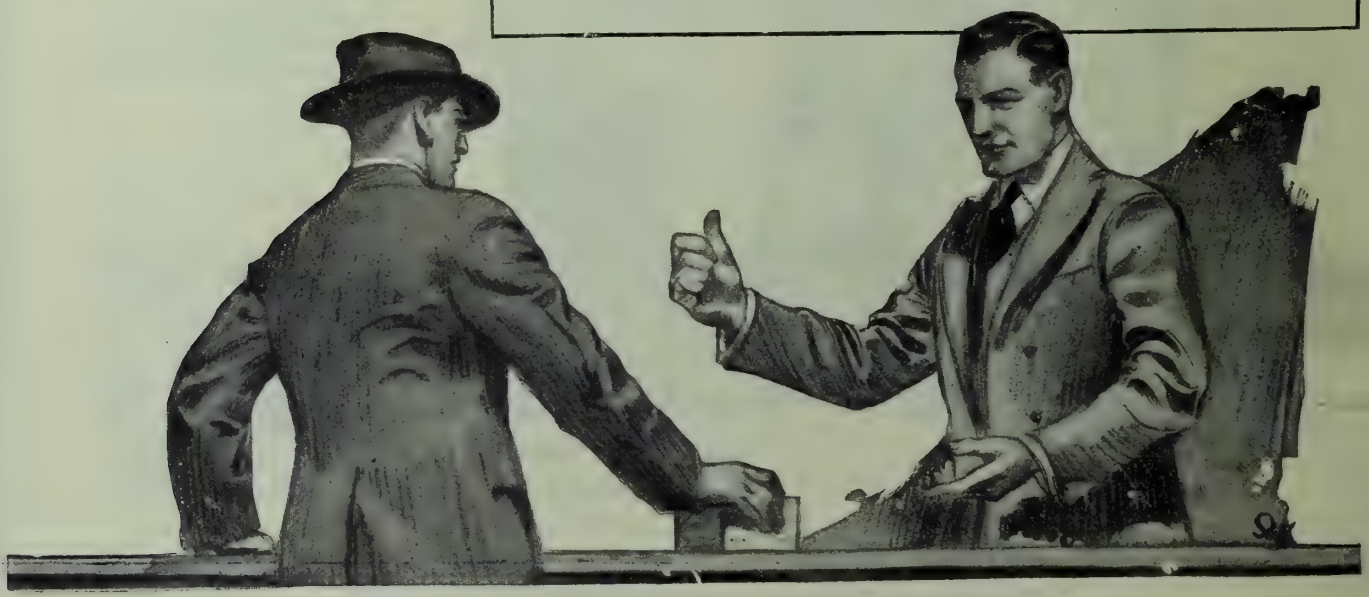
It is a fact that the pressure generated by "Du Pont" Powder averages 10% less than any other powder made, and the velocity given to the shot is GREATER than that obtained from any other powder.

Other reasons why "Du Pont" has the largest sale of any powder made:

—it gives the closest patterns.

* * *

—it is the cleanest burning powder made.



* * *

—it is waterproof, dependable, and absolutely uniform year in and year out.

* * *

A shell is only as good as the powder it contains.

B.S.A. Twelve Bore Hammerless

Specifications of this desirable shot gun

BARRELS— 30 inches long. Jessop's fluid compressed steel. Lumps formed solid with the barrels. Right: Modified. Left: Full choke or back full choke.

ACTION— B.S.A. special pattern (Anson & Deeley type). Sears, tumblers and other action parts of chrome vanadium steel. Body of nickel steel. Top lever. Automatic safety. Double bottom lock. The B.S.A. shot gun action is the strongest in the world.

FORE-END— Snap-on type. Nicely checkered.

STOCK— Straight hand or half-pistol grip. Nicely checkered. Bend at heel 2 in., at comb 1½ in., length 14¼ in.

WEIGHT— About 7¼ lbs.

BALANCE AND TRIGGER PULL Specially attended to, to give this B.S.A. Gun the superb handling qualities of the best hand-made gun.

INTERCHANGEABILITY— All parts will be strictly interchangeable.

PROOF AND TESTS— Every gun is nitro proved at the official proof house and is carefully tested.

High-class London Gun-making—You'll be Proud to Sell It!

This likeable gun has perfect balance, crisp trigger-pull, wear-resisting power, sweet functioning and beautiful lines.

When your customer swings it up to his shoulder it "comes up to the bird" easily, surely and quickly. This is because the metal massed around the action and breech for safety is perfectly distributed for balance; the stock length is right and the shape is correct, thanks to skilled designers and shooters.

This gun wins experienced shooters and makes the sales. It has no fancy decoration, yet the knowing users of shot-guns make friends with it at once. You cannot offer a better gun.

The Birmingham Small Arms Company. Limited, the famous gun-making establishment that the British Government chose for making the celebrated rifles of the British army, makes this beautiful shot-gun and guarantees it.

EVEREADY DAYLO

SPIELMAN AGENCIES Regd., 45 St. Alexander Street, MONTREAL

Manufacturers of and Dealers in

Transmission Oil	Cutting Oil
Auto Oil	Lustriene Floor Oil
Neatsfoot Oil	METEOR Spark Plugs
Tanners' Oil	Boiler Compound
Lard Oil	Linseed Oil Soap

and all kinds of Lubricating Oil and Greases, etc.

Velvet Lubricant is suitable for transmission, differential and cup lubrication, does not stiffen up in the cold so as to cause any inconvenience in shifting the gears, and will not become thin in hot weather, having been specially treated to meet the requirements of the varied weather conditions. Coats the gears to make them silent, will work into the smallest openings where oil will travel, and lubricate every bearing perfectly.

"Lubriko" Auto Oil is the most highly refined neutral oil for automobile lubrication, possessing high fire test, so that it retains its body under extreme heat.

After many years' practical experience in oils we produced this brand, and we offer it to dealers, knowing it to be of the highest standard of quality for the lubrication of automobiles, stationary gas engines, motor boats, motor cycles, and all kinds of gas engines, whether air or water cooled. Made in light, medium and heavy consistencies.

The Commercial Oil Company, Limited
Hamilton, Ontario, Canada

Tractor Time is Battery Time

Sell the Dependable "North Star"

Thousands of farmers throughout Canada are tuning up tractor and gas engine in readiness for the big spring rush. Batteries are tested and replaced.

This means profitable battery sales for the dealer who has dependable batteries to offer—such as North Star—for the consumer has learned the necessity of using batteries of known quality.

North Star Batteries are guaranteed to give a stronger spark and to last longer than any other battery manufactured in Canada—yet they cost less.

Leading wholesalers and jobbers sell them.

North Star Multiples are Absolutely Waterproof.

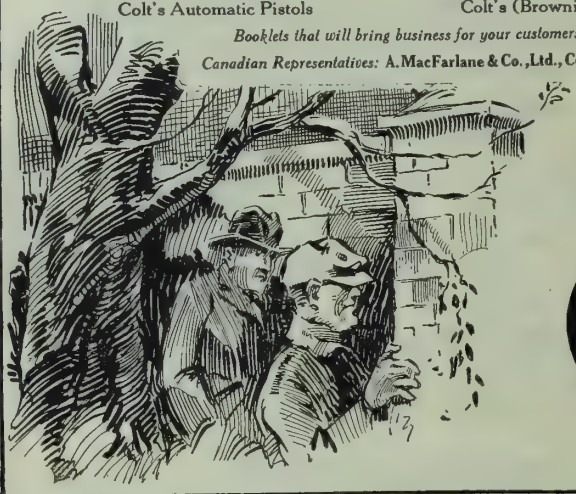
Make his home secure —while he's away

IF you know of the absences from home of the members of your community, so do others. These others have not, as you have, the interest of the community at heart.



Would it not be well to suggest the necessity of home protection in such cases? Give these homes the "Best That Money Can Buy"—a Colt Revolver or a Colt Automatic Pistol. The times require it, and dealers everywhere are doing their part to co-operate with our national advertising.

COLT PATENT FIRE ARMS MFG. CO., HARTFORD, CONN.

Hold Tight Wedge Plates

Owners—Have your repair man put them on your car when you are having it overhauled.

Dealers—Use them in your shop and save the owners the price of a new wedge.

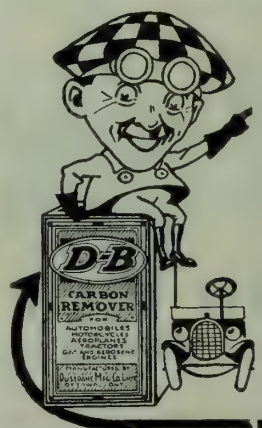
Jobbers—Place your orders NOW.

Ren Automotive Supply Mfg. Co.
PRESTON, ONT.

STOPS— *THE* SQUEAKS

Retail price, 10c each, or $1.50 per box of 20. Packed in neat, counter display cartons containing 12 boxes.

Mr. Dealer— You're the Doctor



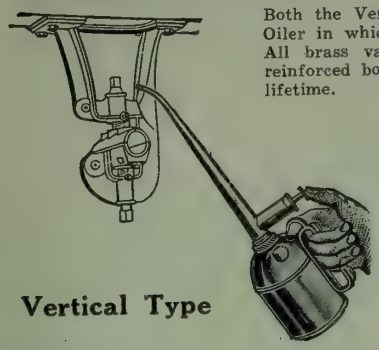
You know that your customers have engine troubles on account of carbon—and we know those troubles can be cured. Here is the medicine that does the work—

D-B CARBON REMOVER

It does not cut compression.

We are telling motorists about D-B through extensive advertising, and they will be asking for it. Will YOU help fill the demand?

You may conscientiously sell D-B as a **real** "carbon cure"—and there is money in it for you. Write for our dealers' proposition.



Auto Jack Says—

To keep your engine healthy, keep it clean. Don't let carbon accumulate. A good engine laxative, such as D-B, will remove carbon harmlessly via the exhaust, and keep the engine clean and efficient.

Part of Your Stock in Trade

Clean, bright merchandise, immaculate display counters and dustless floors are a real asset to your business. The regular use of Imperial Floor Dressing is the simplest and easiest way to attain such desirable results.

Imperial Floor Dressing does prevent dust from rising. It holds it to the floor where it can be conveniently swept up and entirely removed. As a cleaner and preservative for wood, linoleum or oil cloth, Imperial Floor Dressing is unequalled.

One gallon of Imperial Floor Dressing will treat a surface of from 500 to 700 square feet. It does not gum or evaporate and one application will give satisfactory service for weeks. It keeps your store looking right at all times. Makes it an attractive shopping centre for the most particular customer.

Use Imperial Floor Dressing on your floors and display it prominently on your shelves. You can easily turn a good stock into profit. Ask the Imperial Oil salesman for a demonstration and be convinced.

IMPERIAL
FLOOR DRESSING

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

Stop! Prepare for Spring with

Kyanize

KY-AN-IZE

Kyanize will make floors and furniture look like new, and a cloth with warm water will keep them looking spick and span. Kyanize is the most durable finish ever made. Can be supplied in clear and eight popular colors.

Kyanize Motor Car Enamels are easy to apply, dry hard in a short time, with a beautiful lustre that lasts. Made by the celebrated Kyanize Process, they color and varnish in one operation. Nine beautiful, permanent colors, also a rich, lustrous black.

One of the many well-known lines which progressive manufacturers have placed with the J. H. Ashdown Hardware Company, Limited. The various offerings of hardware are carefully checked up by us and only those lines are offered to our customers that we can confidently recommend. Kyanize is one of these and we recommend it to retail hardware merchants as a reliable, salable line.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — A — ASHDOWN GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Showing sediment formed after 500 miles of running. The bottle at the left shows ordinary oil after use. The bottle at the right contains Veedol after use.

VEEDOL

The Lubricant That Resists Heat

The Story That Convinced A Million Motorists

TWO test bottles from the laboratory! They show vividly what happens inside your engine—they show the cause of bearings that pound, of scored cylinders, of fouled spark plugs—they show the cause of 90% of the engine troubles you have to pay for.

The bottle at your left, half black, contains ordinary oil after use in an ordinary engine for 500 miles of driving. The bottle on the right contains Veedol, the lubricant that resists heat.

In the bottle of ordinary oil after use, almost one-half is taken up with black sediment—sediment formed during use. Under the intense heat of the engine—200° to 1000° F.—ordinary oil forms great quantities of black sediment.

Sediment has no lubricating value. It causes premature wear which cuts the life of an engine in two. This is the hidden toll taken by sediment in inferior oil.

Sediment is reduced 86% when you use Veedol. A million motorists who have seen this remarkable illustration of the effect of engine heat on ordinary oil now use Veedol exclusively. With Veedol in the crankcase most serious engine troubles are eliminated.

Have your engine flushed out to cleanse it of grit, sediment and thickened oil. Put in Veedol. Leading dealers have it in stock. Ask for a supply of Veedol to-day.

Veedol Lubricants for Every Part of the Car

Use Veedol lubricant for all parts of the car: VEEDOL for the engine (light zero, medium, heavy, special heavy, extra heavy); for the differential and transmission: VEEDOL TRANS-GEAR OIL or GEAR COMPOUND; for the tractor and truck: WORM DRIVE OIL; GRAPHITE GREASE; CUP GREASE.

BUY
Hardware Mutual Fire Insurance
And Save 50%

NO other organization can make you the savings that the HARDWARE MUTUALS can. We specialize in HARDWARE MUTUAL FIRE INSURANCE. We originated MUTUAL insurance for hardware men in 1899. Collecting, on delivery of policy, premium based on the board rate our HARDWARE MUTUALS have returned at expiration of policy 50% of the premium paid **every** year since 1908. Thirteen continuous years of providing fire insurance on the hardware dealer's store building, stock, warehouses, dwelling and household furniture at a 50% saving. Ontario, Manitoba, Saskatchewan and Alberta dealers can now make the same savings by placing their fire insurance with the HARDWARE MUTUALS.

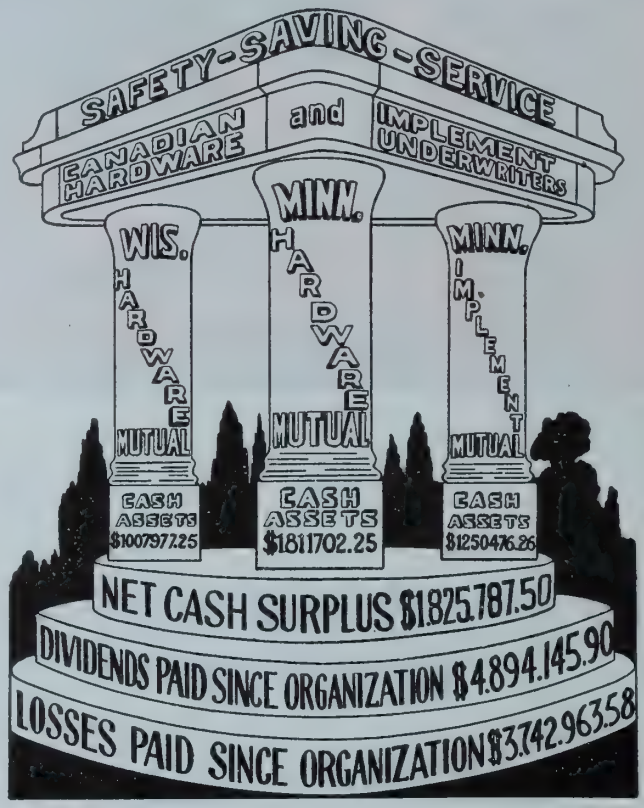
Time tried and fire tested.

Careful inspections.

Conservative lines.

Economical management.

No conflagration hazard.



Ample cash surplus.

High-grade investments.

Complete insurance service.

No commission to management.

Canadian premiums stay in Canada.

The official insurance connection for:

The Ontario Retail Hardware Association and Hardware Section of Manitoba Retail Merchants' Association.

Endorsed and recommended by every Hardware Association in the United States. Also the National Hardware Association.

Absolute satisfaction in adjustments of fire losses. Claims paid immediately upon receipt of proofs of loss.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

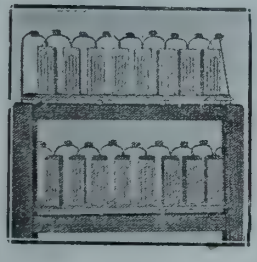
An Increase in the Maytag Family
—TRIPLETS—
Recently Born, Makes a Family of TWELVE, Healthy, Very Much Alive Kids

This is a photograph of one of the Triplets. She is named "Model No. 70, Aluminum Electric." The new Maytag Aluminum Washing Machine shows superlative skill in designing. Simplicity is the keynote. As each part is designed so exactly for the work it has to do, we do not feel that our claim for a lifetime of service is at all extravagant.

It is CONSTRUCTED ENTIRELY OF METAL, the tub is of cast Aluminum. IT WILL NOT RUST, CORRODE, DRY OUT OR SPLINTER. It is light in weight and easy to move.

For complete description, prices, etc., please write either to Winnipeg or Calgary. The Maytag Company to-day is the largest company in the world manufacturing Washing Machines. Any of the following are the best machines in the class where they belong:

Model 40, Hand.
Model 41, Wood Tub Electric.
Model 42, Wood Tub Power.
Model 43, Wood Tub Multi-Motor.
Model 50, Cabinet Electric.
Model 51, Cabinet Power.
Model 70, Aluminum Electric.
Model 71, Aluminum Power.
Model 72, Aluminum Multi-Motor.
Model 73, Double Tub Aluminum Electric.
Model 74, Double Tub Aluminum Power.
Model 75, Double Tub Aluminum Electric.



In other words, we have a type for every use. All are equipped with the Maytag swinging, reversible wringer.

O-Rib-O K.D. Round Pipe

Our K.D. Round Pipe can be instantly locked together without skill or tools. The lock is extremely simple, but absolutely prevents the pipe collapsing inwardly or pulling apart. The next section covers the lock and acts as a binder.

It is shipped in crates and well protected from damage in transit. It occupies only 1/25 of the space required for made-up pipe. It is made of black, tin and galvanized material, for smoke pipe or furnace pipe. Saves money. Cannot afford to be without them for either smoke pipe or furnace pipe.

O-Rib-O Self-Starter Adjustable Elbows

Suitable for rain water conductor pipe, smoke pipe or furnace pipe. Made of black, tin and galvanized material. Stock sizes: 3″, 4″, 5″, 6″, 7″, 8″, 8½″, 9″, 10″, 12″ and 14″. Larger sizes to order. For smoke pipe or furnace pipe this elbow is the best made. Is easily adjusted to any angle. Will not come apart. Saves time. You cannot afford to be without them.

Are You Ready For A Big Bicycle Year?

Last year's C. C. M. publicity campaign was the largest advertising campaign for bicycles during the last twenty years.

This year's campaign will be just as large and aggressive. What better proof of our confidence that 1921 will be a good bicycle year?

Are you ready for it? We have had an "open" winter and indications are we will have an EARLY spring. Is everything in readiness for the spring rush for

C·C·M· Bicycles

The Bicycle with the Triplex Hanger.

In many places street car fares have increased. In others the car service is poorer than ever. Every condition points in favor of the bicycle.

Have you a neat, attractive C. C. M. transfer on your window? Are your windows and your store inviting to the public? We can supply a nice assortment of display matter for window and inside the store.

Some vigorous advertising yourself in your local newspaper will tie your store up to our big national advertising campaign.

Full steam ahead for a big year in

Massey—Cleveland—Columbia--Red Bird
Perfect—Gendron--Ivanhoe Bicycles

A·G·M·CO. VIKO ALUMINUM

Your Viko Investment Brings Big Returns

Cooking utensils have been used for thousands of years; aluminum cooking utensils for but a comparatively short time. Yet, today the making of aluminum kitchen ware is one of the great industries. This quick rise to commercial importance can be due to nothing less than this metal's extraordinary fitness for cooking-utensil use.

VIKO, The Popular Aluminum, is the largest of all lines. It contains utensils for every kitchen need; and they are built with the sturdiness and the fine design that are found usually only in ware made to be sold at a higher price. You will find it profitable to handle Viko. For full information—

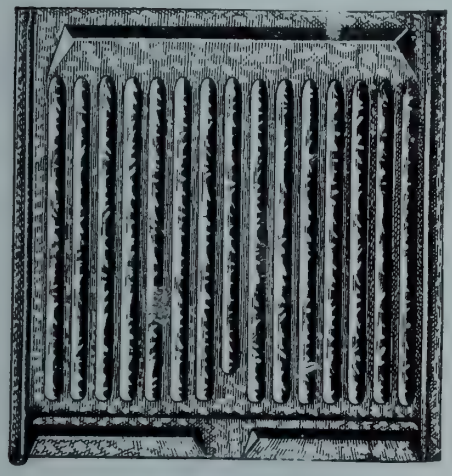
IT PAYS YOU TO FEATURE PEDLAR'S "PERFECT" SHEET METAL PRODUCTS

By giving complete satisfaction to your customers they increase your sales, your profits, and your good reputation.

Metal Roofing

Metal Siding

Metal Ceilings and Walls



Metal Culverts

Expanded Metal

Metal Lath

Pipe and Trough

Our factory shown above is the largest sheet metal plant in the British Empire, and is indicative of our ability to produce in a big output of quality goods and to offer you assurance of prompt and efficient service on all your orders for sheet metal products for the building trade.

Pedlar's Steel Shingles

Extensively Advertised in the Farm Papers throughout Canada

This year, owing to an improvement in the metal market, we are again in good position to supply our well-known "George" steel shingle, for many years the favorite barn roofing where permanence and full protection from fire, lightning and the weather are desired. We are making a special "drive" on this line, and your own best interests will unquestionably be served by co-operating with us to bring to the attention of farmers in your locality the unusual merits of the big "George" steel shingle.

Write for Catalog "H. M." and Price List

We are here to give you good service on all our lines. By placing your orders with us you will get goods of flawless quality and the promptest service in the trade.

Barrett Roofings, Cements Industrial Paints etc.

THE name "Barrett" on a product helps to build up your reputation for honest merchandise at fair prices.

The goods here described are made by Canada's oldest and largest manufacturers of roofings and industrial specialties and are endorsed by thousands of satisfied users in all parts of the Dominion. Our big advertising campaign is daily creating a demand for Barrett products. Here are two popular sellers.

Plastic Elastigum Patching Cement

THE plastic cement of a thousand uses—tough, elastic, adhesive, waterproof. Easy to apply and sticks obstinately to both wet and dry surfaces.

Unequalled for patching holes and leaks in roofs of all kinds and for repairing flashings, relining gutters, stuffing cornices, lining cisterns, etc. Its life and elasticity are unaffected by changing temperatures. It *stays tight* throughout the most severe weather conditions.

Plastic Elastigum is a popular repair material for which dealers will find a tremendous demand this year.

Comes in 1-lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, ½ barrels (about 300 lbs.), and barrels (about 600 lbs.)

Relining a gutter with Plastic Elastigum

Everlastic Liquid Roofing Cement

FOR renewing the life of old and worn-out prepared and "rubber" roofing, Everlastic Liquid Roofing Cement is positively without an equal. It is easy to apply and forms a new wearing surface that is smooth, tough, waterproof and so durable that it makes the old roof good for several years of extra service.

If you want to save money for your customers you should sell them this remarkable Barrett Product.

It comes ready for use in packages of various sizes, ranging from 1-pint cans to 40-gallon barrels.

Anyone can apply it.

The New *Westco* Tankless Water System

It is very often said that nothing is so perfect but that it may be improved.

To some extent this is true—at least we think so—so much so, that we are always investigating to discover means of improving the Westco System.

The general operation of the Westco Tankless System represents absolutely the last word in water pressure systems. Therefore, it is only in the details of construction of the system that we can effect improvements.

If you already sell Westco Systems you should write us for particulars about the improved Westco System.

If you do not sell Westco Systems you should write and find out what you have been losing by not handling this line.

For your information: The Westco Tankless Water System is now fitted with an

All-Bronze Pump and New Westco Two-Pole Pressure Switch

Write us for complete information about this pump, which has only one moving part, and for our Dealer Co-operative Plan.

Wiss Shears

Pay The Best Profit

A poor pair of shears or scissors earns no good feeling for the man who sells them.

Their one recommendation, low price, is soon forgotten and obscured by the constant irritation of poor service.

Quality Cutlery **pays best in the long run,** through good service, friendly relations and continued custom. In addition, there is a better profit on each individual sale.

Our little booklet, **"Fourteen Questions and Answers,"** represents that number of specific selling points which should help you sell more Wiss Shears.

Send for a copy to-day.

Gaining New or Greater Distribution

is a well-recognized and familiar use of properly-directed, continuous advertising.

For either marketing on a national scale or by "Zone Methods" continuous, properly-directed advertising blazes the trail, carries your name, reputation and a knowledge of the product to the trade, paving the way for the salesmen, lubricating your whole distribution system and creating friendly territory waiting to welcome your product and your travellers as your production expands.

A weekly message to the whole hardware trade of Canada through HARDWARE AND METAL—their recognized source of business information—will increase your distribution.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

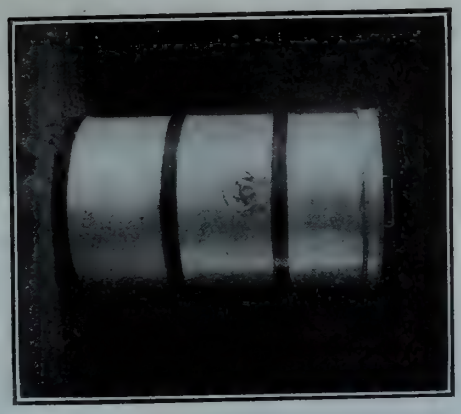
Order Now



When you see "Canada" on an Ash Sifter it means—the best that money and experience can make.

For Fall Selling

Place your order early for the ever popular Canada Dustless Ash-Sifter. Be ready for Fall Selling, when the many features of the "Canada" will make sales easy. Sure to impress customers by these special points: The iron rod reinforcing the top of can; the hinged trap; the convenient hopper, with rod for loosening ashes; braced cylinder; the strengthening corrugations of the body; the heavy iron band round bottom, and general superiority of design. Convenient, clean and dustless.

Reed's "Super-Service"

Trade Balance and Ash Cans

EVERY DOLLAR kept in Canada means a reduction of our adverse trade balance, and greater prosperity for our country. No longer is it necessary for users of heavy-weight ash or waste cans to purchase foreign-made goods. REED'S "SUPER-SERVICE" All Steel Cans are built in Canada by Canadians for Canadians. They are built in various sizes of heavy steel plate, galvanized, with reinforced tops, bottoms, and sides. And the prices are right, too.

We also manufacture "Almetl" Fire Doors, "Burt" Ventilators, Steel Tanks, and other metal specialties.

Let us quote you on your requirements.

Geo. W. Reed & Co., Limited, Montreal

What Every Horse Needs Now

EARLY Spring is the hardest time of year for horses. Now is the time every humane owner or teamster is in the market for a dependable, comfortable collar pad to protect the horses from strain.

Equipment Increases Store Efficiency

Modern Equipment Adds Value of Another Salesman to the Store —Keen Competitive Basis of Future Business Demands Most Efficient Store Equipment

THE value of modern equipment in the hardware store is fully realized by most merchants, but it remains for an authority on merchandising matters to figure out on a dollars and cents basis that the use of modern equipment adds the value of another salesman and that good equipment is as important as efficient man-power.

A recent investigation has revealed the fact that those merchants whose turnover is highest and net earnings greatest in percentage are generally those who have paid some attention to the economics of internal arrangement. The point is illustrated by stating that in a certain store the unnecessary distance traversed between the stock of a certain article and the weighing machine amounted to 300 miles of unnecessary walking, waste energy and lost time in one year. Needless to say, that particular article was re-located promptly.

The generous use of modern display fixtures, showcases, cash carriers, weighing machines, etc., saves many steps in the hardware store and increases the annual turnover per man. The underlying idea of the statement that modern equipment saves the cost of a clerk is not that such equipment will displace a clerk, but rather that it will increase the efficiency of the present staff. Business has taken on a changed aspect recently, competition for business is keener and the merchant who has every means of efficiency at his disposal will be the one to come out best in the struggle for business during this year and ensuing years.

Above is shown a typical hardware store where the value of modern equipment is fully realized. Note the up-to-date showcases, wall fixtures, lighting arrangements, etc.

Prepare for the keen competition which will come soon by letting us fit your store with "CAMERON" FIXTURES

Expressions of Appreciation From Our Customers

Our sales have increased considerably on account of the goods being displayed properly.

W. Walker & Son, Limited, Toronto.

We have learned from experience that this is the most satisfactory way of increasing our business.

Platt Bros., Toronto.

We have an exceptionally well-equipped store which will greatly facilitate service.

Cutts Hardware Co., Toronto.

The illustrations here shown are made from actual photographs of departments in two of Toronto's leading hardware stores. **Cameron Wall Fixtures** and **Display Cases,** used throughout, have after a trial of from one to two years proven beyond doubt to be real business-getters.

Cameron Fixtures mean efficient service to your customers, and attractiveness to your store.

We are specialists—Write us, enclosing rough sketch with measurements, and we may be able to serve you; no obligations.

Norcross *Garden Cultivators*

Every Garden Needs One

GARDENERS—Farmers—Florists—people in towns with the smallest gardens—all have use for a **Norcross** Cultivator or Weeder. There is a steady demand for them from the time gardening starts until the last weed has disappeared and cultivation is completed.

DEALERS: With just a little special effort you can double your Garden Tool business by simply seeing to it that these modern tools are properly displayed—and their good points explained.

While a common hoe will sell itself, remember that it will neither enthuse anyone, nor multiply your sales.

Sell a **Norcross** Cultivator to a customer, and very soon each of his neighbors will appear at your store to buy one.

Every user of a **Norcross** is an enthusiast from the very start; and everyone who sees this remarkable tool in action is at once possessed with the desire to own one.

Selling a **Norcross** is selling Quality, Service and Satisfaction to a customer at a moderate cost to him—and an attractive profit to yourself.

Three Sizes—all strongly made and handsomely finished. Place one alongside an old fashioned hoe and **watch it sell.**

Your Wants

are many here below. Use the Want Ad. page and get rid of a few of them.

Have You Received HARDWARE AND METAL Electro Catalog Yet ?

If interested tear out this page and place with letters to be answered.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

VIKO
Aluminum Cooking Utensils and Specialties

5025—Colander

We offer a most complete line of aluminum cooking utensils and specialties. Salesmen will find these goods possess attractive designs of a marked individuality—in fact everything that can be desired by your most particular customers.

Viko goods have, by consistent service, earned the great reputation of being of a superior wearing quality.

Viko Utensils are stamped from hard, thick, 99% pure, sheet aluminum. Every article illustrated in our catalogue is absolutely guaranteed against any defect in material or workmanship. We authorize our dealers to replace at our expense any Viko utensil which should prove defective in either workmanship or material.

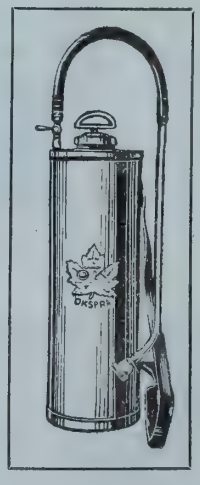
Quebec Agents: Bissonette & Bissonette, 54 Notre Dame, Montreal

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.



There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

STAR MANUFACTURING CO.
Carpentersville, Ill., U.S.A.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

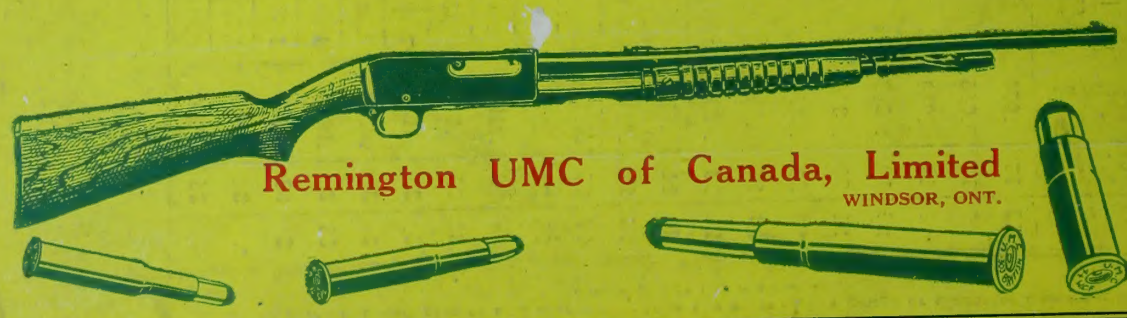
SELLING AGENTS

Cor. King St. and Spadina Ave. - TORONTO, CANADA

—and for the tenderfoot too

The Remington line still proves the favorite. The reliable, sure fire, well balanced rifles and shot guns, the dependable "Wetproof" shells and Metallic Cartridges, make Remington goods the Sportsman's choice.



Sales will be greater than ever this year, because—

Thousands of men, who in prewar days rarely (if ever) handled a gun, are now familiar with firearms. These men, taking up shooting as a sport, are bound to recognize the superiority of Remington goods.

Once you sell a man a Remington rifle or shotgun, he becomes a sales booster for you. He takes pride in his gun. He talks of its merits and demonstrates its qualities wherever possible. In this way he is creating new sales for you.

Be prepared for the renewed demand for Remingtons. Send in your order now.
